17. CURRENT LIABILITIES

17.1. Operating liabilities

	Total		
	31 March 2011	31 March 2010	31 March 2009
Trade payables	152,248	143,117	151,315
Tax and social security liabilities	59,893	54,742	53,008
Accrued credit notes	922	1,791	1,698
Deferred income	940	2,949	1,984
Accrued expenses	13,105	7,755	5,728
TOTAL	**227,108**	**210,354**	**213,733**

At 31 March 2011, "Trade payables" were increased by €13 million of work in progress creditors, compared to €10.8 million at 31 March 2010 and €10.9 million at 31 March 2009 (see note E.8).

17.2. Other liabilities

	Total		
	31 March 2011	31 March 2010	31 March 2009
Dividends payable	55	147	122
Other operating liabilities	10,031	13,512	11,782
TOTAL	**10,252**	**14,084**	**12,311**

18. FACTORING

In order to optimise the cost of the Group's bank financing, Faiveley Transport Tours, Faiveley Transport Amiens, Faiveley Transport Gennevilliers, Faiveley Transport NSF, Faiveley Transport Italia, Faiveley Transport Iberica, Faiveley Transport Leipzig and Faiveley Transport Witten sell their trade receivables to a factor.

Accordingly, factoring resulted in a €94,968 thousand reduction in trade receivables at 31 March 2011. In addition, available and uncalled cash with the factor amounted to €45,682 thousand and is included in cash.

However, the portion of receivables sold and not guaranteed was recorded as financial debt under "current borrowings" for an amount of €902 thousand. The risk incurred by the Group in respect of receivables sold and not guaranteed relates to the non-collection of these receivables.

19. SEGMENT REPORTING

In all tables summarising segment reporting, the column "Others" represented the activities of the parent company Faiveley S.A., including IFRS restatements and before the elimination of inter-company transactions.

At 31 March 2008, Faiveley S.A. only held shares in Faiveley Transport and had no relationship with the operating subsidiaries.

Following the transactions completed on 23 December 2008, Faiveley S. A. decided to proceed with the dissolution of Faiveley Transport without liquidation. At 31 March 2009, the net assets of Faiveley Transport were transferred to Faiveley S.A. (subsequently renamed Faiveley Transport) by a simple merger transaction by means of a complete transfer of its assets and liabilities, therefore eliminating all intermediate companies between the parent company and the operating companies of the Group.

Due to this, the segment reporting as at 31 March 2010 only concerns the railway sector.

24. NET FINANCE INCOME/(COST)

	31 March 2011	31 March 2010	31 March 2009
Gross cost of debt	(12,008)	(14,752)	(19,065)
Income from cash and cash equivalents	1,230	796	1,380
NET COST OF DEBT	**(10,778)**	**(13,956)**	**(17,685)**
Financial instrument income	3,440	14,372	252
Income linked to exchange differences	20,750	19,206	40,432
Proceeds from sale of investments	–	–	–
Proceeds from sale of marketable securities	94	112	110
Reversal of financial provisions	314	236	806
Income from balance of sale financing	410	271	496
Dividends received	7	11	23
Other finance income	379	188	62
OTHER FINANCE INCOME	**25,395**	**34,396**	**42,181**
Financial instrument charges	(4,926)	(338)	(19,368)
Charges linked to exchange differences	(19,589)	(33,449)	(16,008)
Interest charges on retirement commitments	(1,567)	(1,248)	(1,505)
Carrying amount of investments sold	–	(4)	(499)
Charges to financial provisions	(616)	–	(100)
Charges on bank guarantees	(766)	(728)	(614)
Other finance costs	(576)	(210)	(847)
OTHER FINANCE COSTS	**(28,041)**	**(35,978)**	**(38,941)**
NET FINANCE COST	**(13,425)**	**(15,538)**	**(14,445)**

The increase in the net finance cost was due to:

- interest and restructuring charges for the bank debt in December 2008, as part of the reorganisation of Group's shareholdings, which had a financial cost of €(10) million;
- the slight actual and unrealised exchange loss from financial transactions, after deduction of the value of derivative instruments, for €(0.3) million;
- the other financial income and expense items comprise various bank charges, interest on leasing, interest on the bank overdraft and other loans contracted by subsidiaries, the interest charge on pension commitments, offset by other financial income for a net negative of €(3.1) million.

25. INCOME TAX

a) Analysis by type

	31 March 2011	31 March 2010	31 March 2009
Current tax – continuing operations	31,159	26,579	29,661

28. POST CLOSING EVENTS

On 1 April 2011, Thierry Barel was appointed as Chairman of the Management Board and Chief Executive Officer by the Supervisory Board, to replace Robert Joyeux who resigned from his duties.

On the same day, the Supervisory Board also appointed Guillaume Bouhours, Group Chief Financial Officer, as a member of the Management Board.

In a ruling dated 13 April 2011, the District Court of New York acknowledged that Wabtec was responsible to subsidiaries of Faiveley Transport for acts of unfair competition, misappropriation of confidential and secret information and unjust enrichment. The federal court will examine the damage alleged by Faiveley Transport in future hearings, which are expected in the month of June 2011.

The Group has decided to move from the premises housing its headquarters to a building in Gennevilliers, which benefits from HQE (High Environmental Quality) and HPE (high energy efficiency) certification. The move took place in the month of July 2011.

29. RELATED PARTY TRANSACTIONS

The aim of this note is to present the material transactions entered into between the Group and its related parties as defined by IAS 24.

The parties related to the Faiveley Transport Group are the consolidated companies (including those companies that are proportionally consolidated and those consolidated using the equity method), the entities and people that control Faiveley Transport and the Group's senior management.

Transactions entered into between the Faiveley Transport Group and its related parties are at arm's length terms.

29.1 Transactions with related companies

A list of consolidated companies is provided in note G.

Transactions carried out and balances outstanding with fully consolidated companies at the balance sheet date are fully eliminated on consolidation.

Only the following are included in the notes below:

- data relating to such intra-Group transactions, when they involve companies over which the Group exercises joint control (proportionally consolidated) and those over which the Group has significant influence (accounted for using the equity method) concerning the portion not eliminated on consolidation;
- material transactions with other Group companies.

29.1.1. Transactions with consolidated companies:

- **With joint ventures:**

The joint ventures are proportionally consolidated companies:
- Qingdao Faiveley Sri Rail Brake Co. Ltd.: 50/50 joint venture formed in 2006 to enable the Group to penetrate the Chinese brake market.
- Datong Faiveley Couplers System Co. Ltd.: 50/50 joint venture formed in 2007 with Datong Yida Foundry Co Ltd, with the aim of manufacturing and selling couplers.
- ShiJiaZhuang JiaXiang Precision Machinery Co. Ltd.: on 20 December 2007, the Group acquired 50% of the shares of this Chinese company which specialises in the development and production of compressors for the railway market.

- **Transactions with joint ventures not eliminated on consolidation:**

The consolidated financial statements include transactions carried out by the Group with its joint ventures as part of its normal business activities.

These transactions are normally carried out at arm's length terms.

(€ thousands)	31 March 2011	31 March 2010	31 March 2009

Nil.

29.1.2. With the companies that control Faiveley Transport

- **With Francois Faiveley Participations**

– Contract of assistance

Under the terms of a contract of assistance, Faiveley Transport recognised the following amounts in its expenses and income for the financial year, corresponding to the rebilling of rent and the provision of services.

(€)	Faiveley Transport expenses	Faiveley Transport income
Contract of assistance, provision of services	365,000	1,020
Re-billing of rent and utility expenses	–	2,150

– Fraction of financial investments, receivables, debts, expenses and income pertaining to these related companies:

(€ thousands)	2010/2011	2009/2010	2008/2009
Trade receivables	1	1	1
Borrowings	(1,908)	(1,873)	(1,833)
Trade payables	–	(10)	(109)
Rebilling of rents	5	3	3
Provision of services	(365)	(365)	(365)
Financial income	–	–	–
Financial expenses	(24)	(23)	(73)

29.2. Senior management remuneration

Senior management comprises mainly the members of the Management Board, Supervisory Board and Executive Committee.

The Remuneration Committee determines the remuneration to be allocated to corporate officers; it is responsible for assessing and determining the variable portion of the remuneration of the members of the Management Board, which is based on performance targets and the financial statements audited by the Statutory Auditors.

The following table provides details, in aggregate and for each category, of the components of the remuneration of the senior management:

(€)	2010/2011	2009/2010	2008/2009
Short-term benefits(1)	6,591,515	6,376,930	5,559,586
Termination benefits(4)	646,330	989,449	–
Post-employment benefits(2)	(74,713)	75,927	44,084
Share-based compensation(3)	–	–	–
Other long-term benefits	723	(643)	411
Directors' fees	138,800	100,600	66,200
TOTAL	**7,302,655**	**7,542,263**	**5,670,281**

(1) This category comprises fixed and variable remuneration (including employers' costs), profit sharing and incentive payments, supplementary contributions and benefits in kind paid during the year.

(2) Change in retirement provisions.

(3) Expense recognised in the income statement.

(4) At 31 March 2010, termination benefits concerned non-executive employees.
At 31 March 2011, termination benefits concerned Etienne Haumont, who resigned his position as a member of the Management Board on 1 September 2010 and his duties as Chief Financial Officer on 24 September 2010.

- **Agreements entered into with senior management**

– With Robert Joyeux and Etienne Haumont

Memorandum of understanding with managers

In accordance with the memorandum of understanding entered into on 18 October 2008 between Faiveley S.A. and the managers of Faiveley Management (amended by the addendum of 17 November 2008), every manager who had received Faiveley Transport shares in exchange for Faiveley Management shares committed to retain them, and thus committed not to sell, and more generally transfer, directly or indirectly, at once or at a later date, the said Faiveley Transport shares without the prior approval in writing of Faiveley Transport, under the following terms and conditions:

(i) up to one third of shares granted as consideration for the contributions, for a period of 2 (two) years from the effective date of the transaction;

(ii) for the remaining shares granted as consideration for the contributions (two thirds), for a period of 3 (three) years from the effective date of the transaction.

It should be noted that the transaction was approved by the Extraordinary General Meeting of 23 December 2008, the effective date of the transaction. On this occasion, Robert Joyeux and Etienne Haumont were granted 140,610 and 58,588 Faiveley Transport shares, respectively, in exchange for their Faiveley Management shares.

Addendum to the Managers' memorandum of understanding

An addendum to the Managers' memorandum of understanding entered into on 16 October 2008 was signed on 13 September 2010 between the Company and Etienne Haumont, and authorised by the Supervisory Board on 6 June 2010, to amend the provisions of Article 9.1 of the said memorandum relating to the mandatory retention of shares held in the Company.

On 27 September 2010, Etienne Haumont sold 48,588 shares to the Company at market price.

Etienne Haumont resigned from his position as a member of the Management Board on 1 September 2010.

30. DIVIDENDS PAID AND PROPOSED

On 17 September 2010, a dividend of €1.20 per share was paid in respect of 14,082,173 shares, i.e. a total dividend of €16,898,607.60 for the year ended 31 March 2010. The difference between the number of shares in respect of which dividends were paid and the total shares making up the share capital, i.e. 322,538 shares, corresponds to the treasury shares owned by Faiveley Transport at the time of the distribution of the dividend.

	Number of shares	Treasury shares	Number of shares to which dividends paid	Dividends paid
Ordinary shares	6,759,591	322,538	6,437,053	7,724,464
Shares with double voting rights	7,645,120	–	7,645,120	9,174,144
	14,404,711	**322,538**	**14,082,173**	**16,898,608**(1)

(1) Including €7,578,450 to Financière Faiveley and €1,391,146 to François Faiveley Participation (F.F.P.).

In respect of the year ended 31 March 2011, the General Meeting will be asked to approve the payment of a dividend to shareholders of €17,285,653.20, being €1.20 per share. This distribution will be taken from the account “Retained Earnings”. It will be payable with effect from 19 September 2011. It was not recognised as a liability as at 31 March 2011.

F. Off-balance sheet commitments (in € thousands)

1. LEASES

- **Operating leases**

The operating leases entered into by the Faiveley Transport Group relate mainly to buildings and furniture.

The income and expenses recognised in respect of operating leases over the last three financial years break down as follows:

	2010/2011	2009/2010	2008/2009
Operating lease expenses	(9,182)	(8,631)	(8,467)
Sub-letting income	455	411	428
TOTAL	**(8,727)**	**(8,220)**	**(8,039)**

The future minimum payments to be made in respect of operating leases which are non-cancellable and had not expired as at 31 March 2011 are as follows:

	Under 1 year	1 to 5 years	Over 5 years
TOTAL FUTURE RENTS	**7,581**	**28,113**	**25,292**

- **Finance leases**

Finance leases relate to property, plant and equipment (see note E.3 above). The minimum outstanding lease charges in respect of irrevocable finance leases are shown in the following table, analysed according to their due dates:

	2010/2011	2009/2010	2008/2009
Under 1 year	639	620	805
1 to 5 years	765	1,383	1,767
Over 5 years	1,081	1,333	2,128
Total future rentals	**2,485**	**3,336**	**4,648**
Less interest	(15)	(273)	(925)
OUTSTANDING LIABILITY IN RESPECT OF FINANCE LEASES	**2,471**	**3,063**	**3,723**

2. OTHER COMMITMENTS GIVEN

	2010/2011	2009/2010	2008/2009
Guarantees, securities and bank guarantees given to customers	217,724	228,488,	167,269,
Guarantees and securities given by the parent company to customers	308,065	205,962	217,008,
Borrowings guaranteed by pledges:			
Mortgages of buildings	8,149	8,556	8,892
Share pledge (*)	289,317	289,317	325,578
Trade receivables pledged	1,114	1,037	6,837
Materials pledged	–	–	–

(*) The pledge of certain equity investments as guarantee for the bank loans.

The off-balance sheet commitments above entitled "guarantees, securities and bank guarantees" is related to guarantees or securities provided to the banks essentially in favour of customers with whom commercial contracts have been signed. These guarantees are generally issued for defined periods and for defined amounts. These are principally guarantees for the repayment of deposits and guarantees for the satisfactory completion of the contracts. The bank counter guarantees are issued for the benefit of banks supplying credit lines and the issue of guarantees for the benefit of certain subsidiaries of the Group.

The off-balance sheet commitments above entitled "guarantees and securities given by the parent company" are guarantees agreed by the parent company Faiveley Transport in favour of customers who have signed commercial contracts with subsidiaries of the Group. As for bank guarantees, these guarantees are issued for defined periods and for defined amounts and essentially relate to guarantees for the repayment of deposits and guarantees for the satisfactory completion of the contracts.

The shares that have been pledged in relation to the credit agreement relating the reorganisation of the shareholding structure and the refinancing of bank borrowings are as follows:

Shares pledged	Carrying value of shares (€ millions)
Faiveley Transport Amiens	20,000
Faiveley Transport Tours	29,398
Faiveley Transport Leipzig	23,111
Faiveley Transport Verwaltungs	29
Faiveley Transport Holding	90,010
Faiveley Transport Witten	74,500
Faiveley Transport Iberica	1,390
Faiveley Transport Italia	37,827
Faiveley Transport USA	13,052
TOTAL	**289,317**

3. COMMITMENTS RECEIVED

- Other guarantees from suppliers: €3,217 thousand.

(1) Faiveley Transport Leipzig GmbH & Co. KG, Faiveley Transport Witten GmbH, Faiveley Transport Verwaltungs GmbH, Faiveley Transport KG Holding GmbH and Nowe GmbH, as subsidiaries of the Faiveley Transport Group responsible for the preparation of the consolidated financial statements, made use of the provisions of paragraph 264b of the German Commercial Code as regards the year ended 31 March 2011 and the annual report, given that the financial statements and annual report will not be published.

Legal developments arising during the financial year

- At 31 March 2011, Espas was merged into Faiveley Transport Tours. This merger was recognised for accounting and tax purposes retrospectively, to 1 April 2010.
- Faiveley Transport acquired the remaining 25% minority interests in its Czech subsidiary, Faiveley Transport Lekov, which it now fully owns.
- Faiveley Transport acquired 80% of Swiss company Urs Dolder AG.
- Newly-created companies:
  Amsted Rail–Faiveley LLC (US joint venture for the freight market), 67.5% owned by the Group.

I. Financial communication

A German version of these consolidated financial statements has been filed with the local administration.

STATUTORY AUDITOR'S REPORT ON THE CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 MARCH 2011

This is a free translation into English of the statutory auditors' report on the consolidated financial statements issued in the French language and is provided solely for the convenience of English speaking users. The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. The information presented below is an opinion on the consolidated financial statements and includes explanatory paragraphs discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were made for the purpose of issuing an audit opinion on the consolidated financial statements taken as a whole and not to provide separate assurance on individual account captions or on information taken outside of the consolidated financial statements. This report also includes information relating to the specific verification of information given in the management report. This report should be read in conjunction with, and is construed in accordance with, French law and professional auditing standards applicable in France.

To the shareholders,

In compliance with the assignment entrusted to us by your Annual General Meeting, we hereby report to you, for the year ended 31 March 2011, on:

- the audit of the accompanying consolidated financial statements of Faiveley Transport;
- the justification of our assessments;
- the specific verification required by the law.

The consolidated financial statements have been approved by the Management Board. Our role is to express an opinion on these consolidated financial statements based on our audit.

I. Opinion on the consolidated financial statements

We conducted our audit in accordance with professional standards applicable in France; those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. An audit also includes evaluating the appropriateness of accounting estimates made, as well as the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the consolidated financial statements give a true and a fair view of the assets and liabilities and of the financial position of the group as at 31 March 2011 and of the results of its operations for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

Without qualifying our opinion, we draw your attention to the matter set out in note C-1 to the consolidated financial statements regarding the change of accounting method related to the implementation of "Revised IFRS 3 – business combinations" and "Revised IAS 27 – Consolidated and separate financial statements".

II. Justification of our assessments

In accordance with the requirements of Article L823-9 of the French Commercial Code (code de commerce) relating to the justification of our assessments, we bring to your attention the following matters:

- At the year-end, the Group systematically performs impairment testing on goodwill and intangible assets with indefinite lives in accordance with the terms and conditions described in Note E-1 to the consolidated financial statements. We have reviewed the methods for implementing this impairment testing as well as the cash flow forecasts and assumptions used and have verified that note E-1 provides appropriate disclosure.
- The Group recognizes income generated on contracts using the percentage of completion method in accordance with the terms and conditions described in note C-6-1 to the consolidated financial statements. These results are dependent on estimates on contract completion performed by contract completion by the company and examining the procedures used by executive management to approve these estimates.
- The Group records provisions to cover miscellaneous liabilities and losses as described in note C-15-2. Our work notably consisted in assessing the financial information and the assumptions on which these estimates have been based, in reviewing, on a test basis, the calculations performed by the Company and in examining the procedures used by executive management to approve these estimates. On this basis, we assessed the reasonableness of estimates made.
- Notes C-15 and E-14-2 specify the valuation methods used to measure pension and other similar related obligations. These obligations have been evaluated by actuaries. Our procedures consisted in examining the financial information used, assessing the assumptions adopted and verifying that notes C-15 and E-14-2 to the consolidated financial statements provide appropriate disclosure.

These assessments were made in the context of our audit of the consolidated financial statements taken as a whole and therefore contributed to the opinion we formed which is expressed in the first part of this report.

III. Specific verification

As required by law, we have also verified in accordance with professional standards applicable in France the information presented in the Group's management report.

We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

1.4.4. NOTES TO THE PARENT COMPANY FINANCIAL STATEMENT

Notes to the parent company financial statements at 31 March 2011. Total assets on this date amounted to €1,287,791 thousand, and the income statement reflected a net profit of €1,757 thousand. The financial period was of 12 months and covered the period from 1 April 2010 to 31 March 2011.

A. Significant events

- **Change to the term of office of the members of the Supervisory Board:**

The Combined General Meeting of 13 September 2010 amended the bylaws of the Company and reduced the term of office of members of the Supervisory Board to three years.

- **Changes in Group governance:**

On 1 September 2010, Guillaume Bouhours was appointed Chief Financial Officer to replace Etienne Haumont. On the same day, Etienne Haumont resigned his term of office as a member of the Management Board.

Robert Joyeux resigned from his duties as Chief Executive Officer and Chairman of the Management Board of Faiveley Transport on 31 March 2011. On 1 April 2011, Thierry Barel, previously Deputy Chief Executive Officer, replaced him in this position and Guillaume Bouhours was appointed as a member of the Management Board.

- **Share option plan:**

The Combined General Meeting of 13 September 2010 delegated the Management Board powers for the allocation of free shares, either new or existing. The General Meeting established a minimum vesting period of two years following which the allocation of ordinary shares to beneficiaries will be final, subject to the potential terms and conditions set out by the Management Board, and a retention period of a minimum of two years from the date of final allocation of the shares.

At its meetings held on 3 December 2010 and 24 February 2011, the Management Board decided to allocate a total of 69,700 shares to 43 beneficiaries.

- **Acquisition of Urs Dolder AG:**

On 24 February 2011, Faiveley Transport acquired 80% of the share capital of Urs Dolder AG for €2.9 million. Urs Dolder AG is based in Haegendorf, Switzerland, and employs 19 people with annual sales of €4 million. The company produces electrical heating devices for the railway industry; more than 30,000 of these devices are currently installed in railway carriages.

- **Acquisition of minority interests in Faiveley Transport Lekov:**

In January 2011, Faiveley Transport acquired the minority interests in Faiveley Transport Lekov, a company based in the Czech Republic, for €2.3 million. Faiveley Transport now fully owns Faiveley Transport Lekov.

- **Change in consolidation scope**

At 31 March 2011, Espas was merged into Faiveley Transport Tours. This merger was recognised for accounting and tax purposes retrospectively, to 1 April 2010.

B. Accounting rules and methods

1. APPLICATION OF ACCOUNTING RULES AND METHODS

The financial statements at 31 March 2011 were prepared in accordance with accounting rules applicable in France:

- the law of 30 April 1983 and its application decree of 29 November 1983;
- the French General Accounting Plan 1999 as described by regulation 1999-03 of the Comité de la Réglementation Comptable and subsequent amendments.

The financial statements and the analyses for the year ending 31 March 2011 were prepared and presented in accordance with accounting rules and in compliance with the principles of:

- prudence;
- matching;
- going concern;
- consistency of methods.

The historic cost method was used to determine accounting values.

2. CHANGE OF METHODS DURING THE YEAR

No changes of methods were introduced by the Company during the year.

3. MEASUREMENT METHOD

The measurement methods described below were used for the various items included in financial statements.

The financial statements were prepared taking account of the following provisions applicable to financial years beginning on or after 1 January 2005:

- CRC regulation n°2002-10 on asset amortisation and impairment;
- CRC regulation n°2004-06 on the definition, recognition and measurement of assets.

3.1. Non-current assets

Non-current assets are recognised at their acquisition cost or at their transfer value in the case of those related to the restructuring operations of previous financial years. In order to recognise an unfavourable technical variance, the latter must be assessed at each year-end. In case there is an indication of impairment, a writedown charge must be recognised in the financial statements

3.2. Amortisation and depreciation of non-current assets

Depreciation and amortisation of non-current assets acquired before 1 April 1993 are measured either on a declining-balance or on a straight-line basis, in accordance with tax requirements. Subsequent acquisitions are amortised or depreciated solely on a straight-line basis, in order to match economic reality more closely. Accelerated tax depreciation is recognised as far as permitted by tax regulations.

The principal periods of amortisation and depreciation are as follows:

- Intangible assets

– Software	1 to 3 years
– Patents	9 to 15 years

- Property, plant and equipment

– Buildings	15 to 20 years
– Misc. equipment and fittings	10 years
– Machinery and industrial equipment	3 to 8 years
– Vehicles	4 years
– Office equipment	3 to 10 years
– IT equipment	3 to 5 years
– Furniture	5 to 10 years

3.3. Equity investments

Equity investments are measured at their purchase and/or contribution value. At the end of the financial year, a provision for impairment is established when the realisable value is lower than its acquisition value. The realisable value is the value in use for the Group, measured on the basis of future discounted cash flows.

3.4. Receivables from equity investments

Receivables from equity investments correspond to loans provided to Group companies, as well as current accounts receivable from subsidiaries (excluding current tax receivables resulting from the Group tax return). A provision is established whenever there is a risk of non-recovery.

3.5. Accounts receivable and payable

Accounts receivable and payable are recorded at nominal value. Provisions have been made for bad and doubtful debts according to the likelihood of non-recovery, as estimated at the end of the financial year. Old accounts for which non-recovery has become a certainty are reported as an expense and the corresponding provisions reversed through the income statement.

3.6. Marketable securities

Marketable securities are recognised at their fair value on the basis of their quoted price or at their liquidation value at the year-end. Marketable securities are subject to impairment when their liquidation value at the financial year-end is lower than their acquisition value.

Treasury shares are included in this caption in accordance with CRC Regulation 2008-5 on treasury shares.

3.7. Share capital

All capital increases are registered at the nominal value of the shares issued. Should the issue price be greater than the nominal value, the difference is recorded in the share premium reserve.

3.8. Provisions for liabilities and charges

Provisions represent liabilities whose due date or amount has not been precisely determined. At 31 March 2011, the provisions amounted to €0.8 million (excluding the provision for the stock options plan of €0.1 million) and were composed of provisions for litigation-related expenses of €0.77 million and provisions for foreign exchange losses of €0.06 million (based on foreign currency accounts receivable and payable valued at the exchange rate on the balance sheet date).

3.9. Share purchase option plan of 27 September 2005

When beneficiaries of the share purchase option plan exercise their rights, a capital loss will be recognised in Faiveley Transport's financial statements. This loss has been estimated at €599 thousand at 31 March 2009 and spread over 7 years (duration of the plan). At 31 March 2010, this provision was reduced to €226 thousand due to options exercised during the period. During the 2010/2011 financial year, 118,074 options were exercised by the beneficiaries. On this occasion, an exceptional expense of €141 thousand was recognised. As a result, the provision for capital losses relating to outstanding options was €93 thousand at 31 March 2011.

3.10. Borrowings and financial liabilities

Financial liabilities and borrowings are valued at their nominal value and comprise:

- a loan of €367 million provided by the bank pool to finance the reorganisation of Faiveley Transport's shareholding structure;
- accrued interest on borrowings of €0.2 million;
- bank overdrafts and cash pooling (managed by the Group treasury department) of €228 million;
- a loan of €27.9 million from its subsidiary Faiveley Transport Malmö;
- current accounts with Group companies of €436 million;
- the balance on the special reserve for employee profit sharing.

3.11. Financial instruments

- **Exchange risk**

Due to the nature of its operations, Faiveley Transport is exposed to exchange risks arising from its holding company activities (including exchange hedging for the benefit of subsidiaries) or loan agreements and on inter-company balances.

In 2010/2011, the major currencies concerned are the US Dollar, the Pound Sterling, the Japanese Yen, the Czech Koruna, the Swedish Krona and the Chinese Yuan. The risks are hedged through forward purchases or sales of currencies and tunnel options.

These external hedge transactions aim to protect the Group against unfavourable fluctuations in foreign currencies that could affect the profit on a contract and are subject to an internal counterpart agreement with subsidiaries.

Information on financial derivatives currently in place to hedge against exchange risk on forward purchases or sales are detailed in the notes to the consolidated financial statements (see note E.16 – Financial instruments and financial risk management).

- **Interest rate risk**

The interest rate risk to which the company is exposed arises as a result of its long-term borrowings. Faiveley Transport concluded a credit agreement with a pool of nine banks for fixed-term borrowings, the balance of which was €339 million and USD 35 million at 31 March 2011.

This credit agreement is based upon variable Euribor and US Dollar Libor interest rates. The agreement commits the Company to hedge at least 60% of the principal due until December 2012.

To manage its risk, the Treasury Department has implemented a hedging strategy using swaps, tunnels and caps for interest rates and options.

The exposure of interest rates on loans in Euros is hedged for between 71% and 100% of the total debt bearing a Euro interest rate, depending on fluctuations for the 2011/2012 period. The exposure of interest rates on loans in US Dollar is fully hedged.

The estimated cost of bank debt in 2011/2012 is 2.64%, including hedges and spreads, for the debt in Euros and 2.81% for the debt in US dollars.

- **Foreign exchange transactions**

Income and expenses in foreign currencies are recorded at the exchange rate on the transaction date.

Foreign currency denominated borrowings, receivables and cash are recorded in the balance sheet at the exchange rate on the balance sheet date. Any exchange difference arising from the revaluation of these items at these exchange rates is taken to “translation differences”.

A provision for exchange risk is set up for unrealised exchange losses derived from overall exchange rates on existing assets and liabilities.

3.12. Income statement

Faiveley Transport continues its activities of providing services to the Group as the holding company. Sales €48.9 million achieved in 2010/2011 were in line with the previous year (€48.6 million). The significant increase of the previous financial year was primarily due to the fact that the transfer of all assets and liabilities of the former Faiveley Transport company, carried out on 31 March 2009, had had no impact on the parent company income statement.

As in the past, Faiveley Transport rebilled a significant portion of its expenses to its subsidiaries. The operating loss was €1.6 million, compared with a loss of €0.2 million for the year ended 31 March 2010. This negative movement was primarily due to the increase in non-production fixed costs of approximately €1.5 million.

The net finance expense was €2.2 million, compared to a net finance income of €37.2 million in the previous year. This movement was primarily due to the collection of exceptional dividends of €45.7 million in 2009/2010. In 2010/2011, dividends of €0.4 million were collected.

Excluding dividends, the net finance expense improved by €6 million during the 2010/2011 financial year. This was due, on the one hand, to a decrease of €0.8 million in interest expense, which relates to current accounts, bank overdrafts and interest on borrowings, partly offset by interest on loans. Faiveley Transport also recorded net foreign exchange gains of €3.6 million and a positive movement of €0.9 million following the release of a provision for foreign exchange losses. The interest expense on the bank borrowings taken out on 23 December 2008 amounted to €9.8 million, compared to €11.8 million in the previous year.

The €0.7 million income tax refund recognised for the year ended 31 March 2011 reflects the tax grouping gain of €1.5 million achieved during the period, reduced by the tax charge generated by the German subsidiaries, Faiveley Transport Holding Gmbh & Co KG and Faiveley Transport Leipzig GmbH & Co KG for €0.7 million and increased by a withholding tax credit of €0.1 million.

C. Notes to balance sheet and income statement

1. NON-CURRENT ASSETS

- **Changes in the period**

	Gross at 1 April 2010	Acquisitions	Disposals	Gross at 31 March 2011

- **Treasury shares**

The Company directly and indirectly held 3.21% of its share capital.

- **Employee participation in the share capital of the Company**

FCPE Faiveley held 15,500 shares (0.11%) in the Company.

- **Share purchase option plan of 27 September 2005**

On request from Faiveley Transport, Faiveley S.A. (now called Faiveley Transport) implemented a share option plan for the benefit of key Faiveley Transport Group management (excluding the managers who invested in Faiveley Management).

This share option plan, for a maximum of 325,000 Faiveley S.A. shares, was approved by the General Meeting of 27 September 2005 and implemented by the Management Board. Granted for a period of 3 years, this authorisation lapsed on 27 September 2008.

In order to meet its obligation to transfer these shares to the plan beneficiaries, Faiveley Transport began a share buyback programme at the end of 2005 and held 462,777 treasury shares (including 4,924 shares via its liquidity contract) at 31 March 2011. The options to purchase shares, if exercised, will give rise to the purchase of existing ordinary shares in Faiveley Transport.

- **Principle features of the current share purchase option plan**

Date of allocation	Number of shares allocated	Of which Executive Committee	Subscription price*	Options cancelled	Options exercised	Number of options outstanding
24 November 2005	221,760	26,880	26.79	47,040	142,109	32,611
29 December 2005	6,20	–	29.75	–	6,720	–
22 June 2006	31,360	–	30.48	4,480	21,320	5,560
25 October 2006	6,720	–	33.77	–	6,720	–
15 November 2006	4,480	–	34.13	–	4,480	–
1 December 2006	11,200	–	34.01	–	7,330	3,870
2 April 2007	26,880	–	42.80	–	6,720	20,160
19 February 2008	26,880	6,720	32.31	–	3,100	23,780
29 March 2008	13,440	–	34.08	4,480	–	8,960
16 July 2008	22,600	22,600	40.78	–	–	22,600
TOTAL	**372,040**	**56,200**		**56,000**	**198,499**	**117,541**

(*) The exercise price is equal to the average price of the twenty trading days prior to the date of the Management Board deciding on the allocation, less a discount of 5%.

Following the departure of certain option holders since the Management Board implemented the plan and options exercised until that date, options granted at 31 March 2011 related to 117,541 shares and 23 beneficiaries.

The options can be exercised from the second anniversary of their grant date by the Chairman of the Management Board, subject to the presence of the beneficiaries within the Faiveley Transport Group on the day of exercise and their acceptance of the option regulations. To date, 198,499 options have been exercised.

- **Share subscription option plan of 22 September 2009**

The Combined General Meeting of 22 September 2009 delegated the Management Board powers in relation to:
- granting share subscription and/or purchase options;
- issuing shares or marketable securities giving right to the allocation of new or existing shares of the Company, with, in the case of the allocation of new shares, the cancellation of the pre-emption right.

At its meeting of 23 November 2009, the Management Board decided to allocate, from that date and up to 23 November 2017, options giving right to subscribe for new shares of the Company, to be issued as part of a capital increase, for a total amount not exceeding €144,000, corresponding to 144,000 new shares of a par value of €1 each. The new shares will be issued at a price of €54.91 each.

- **Main features of the current share subscription option plan**

Date of allocation	Number of shares allocated	Of which Executive Committee	Subscription price	Options cancelled	Options exercised	Number of options outstanding
23 November 2009	144,000	128,500	54.91	–	–	144,000
TOTAL	**144,000**	**128,500**		**–**	**–**	**144,000**

- **Free performance-based share allocation plan**

Faiveley Transport's Combined General Meeting of 13 September 2010 delegated the Management Board powers for the allocation of free performance-based shares, either existing or to be issued, within the limit of 1% of the share capital at 13 September 2010.

At its meetings of 3 December 2010 and 24 February 2011, the Management Board allocated a total of 69,700 existing shares to 43 beneficiaries.

- **Main features of the current free share allocation plan**

Allocation date	Number of free shares granted	Of which to Executive Committee members	Free shares lapsed
3 December 2010	64,500	43,300	–
24 February 2011	5,200	–	–

After taking into account the purchase price of Faiveley transport shares purchased to service these stock option, share subscription and free share allocation plans, the exercise prices established and the price of Faiveley transport shares at 31 March 2011 applied to unallocated options, the unrealised capital gain amounted to €1,080 thousand.

5.2. Share premium

The share premium represents the difference between the nominal value of securities and the amount, net of costs, received in cash or kind at the time of the issue. There were no movements over the 2010/2011 financial year.

6. REGULATED PROVISIONS AND PROVISIONS FOR LIABILITIES AND CHARGES

	1 April 2010	Charges	Used reversals	Unused reversals	31 March 2011
Accelerated depreciation	–	–	–	–	–
REGULATED PROVISIONS	**–**	**–**	**–**	**–**	**–**
Provisions for liabilities	1,458	57	(1,428)	–	87
Provisions for taxes	–	–	–	–	–
Provisions for litigation	280	490	–	–	770
Provisions for option plans	226	–	(132)	–	94
Provisions for employee compensation	8	1	–	–	9
PROVISIONS FOR LIABILITIES AND CHARGES	**1,972**	**548**	**(1,560)**	**–**	**960**

7. LOAN AND BORROWINGS

	Less than 1 year	More than 1 year	31 March 2011	31 March 2010	31 March 2009
Loans and borrowings from credit institutions	277,142	318,136	595,278	617,810	657,485
Employee profit-sharing	–	65	65	65	65
Other borrowings[1]	9,310	18,619	27,929	37,120	34,208
Current accounts	436,055	–	436,055	350,122	346,499
TOTAL	**722,507**	**336,820**	**1,059,327**	**1,005,117**	**1,038,257**

(1) Other borrowings at 31 March 2011, corresponds to the loan contracted with its subsidiary Faiveley Transport Malmö of €27.9 million.

During the financial year, loans and borrowings from credit institutions decreased by €22.5 million. This decline primarily related to a €50.5 million repayment of the loans taken out on 23 December 2008, offset however by a €28 million increase in bank overdrafts.

This debt is subject to a number of financial conditions with regard to the Group's financial structure and profitability.

The Faiveley Transport Group must comply with the following three financial conditions:
- leverage ratio (net consolidated borrowings/consolidated EBITDA): must not exceed 2.50 at 31 March 2011. At this date, the ratio was 1.15;
- gearing ratio (net consolidated borrowings/consolidated equity): must not exceed 1.50 at 31 March 2011. At this date, the ratio was 0.35;
- total bank guarantees must not exceed 22% of the consolidated order book following the amendment signed in March 2010. At 31 March 2011, this was 15.00%.

Non-compliance with one of these conditions could render the outstanding debt repayable immediately.

Other borrowings decreased by €9.2 million. This decline was due to the repayment of the Swedish Krona-denominated loan granted by the Faiveley Transport Malmö subsidiary.

Current accounts payable balances increased by €86 million at 31 March 2011.

8. OTHER LIABILITIES

	Less than 1 year	More than 1 year	31 March 2011	31 March 2010	31 March 2009
Trade payables	13,448	–	13,448	15,633	16,554
Tax and social security liabilities[1]	9,172	–	9,172	6,821	4,983

Other[1]	1,458	–	–
TOTAL	**1,317**	**(244)**	**–**

(1) The exceptional income is primarily due to the technical dispute with Acela Amtrack, arbitrated in November 2010.

17. INCOME TAX

17.1. Analysis of income tax between the current tax charge, exceptional income and accounting profit

	Before tax	Tax	After tax
Profit/(loss) from ordinary activities	(3,816)	–	(3,816)
Exceptional income	1,317	–	1,317
Effect of tax grouping	–	742	742
ACCOUNTING PROFIT/(LOSS)	**(2,499)**	**742**	**(1,757)**

17.2. Tax grouping

Faiveley Transport heads a tax grouping that comprises Faiveley Transport Tours, Faiveley Transport Amiens, Faiveley Transport Gennevilliers and Faiveley Transport NSF.

Tax savings achieved as part of this tax grouping are recognised and retained by the parent company. For the year ended 31 March 2011, the tax grouping generated a tax saving of €1.5 million, offset by the €0.7 million tax charge of its German subsidiaries.

Without the tax grouping, the taxable profit of Faiveley Transport alone, which was a loss of €5.2 million, would not have attracted any income tax.

At 31 March 2011, tax losses carried forward were €1.2 million. Since these losses originated prior to the merger between Faiveley S.A. and Faiveley Transport, they may be offset against any of Faiveley Transport's future profits.

17.3. Exceptional tax assessments

None

17.4. Deferred and unrealised tax position

Description	Amount
Taxes payable on:	
Regulated provisions:	–
Provisions for price increases	–

over 5 years	–	–	–	–	–
TOTAL	**–**	**–**	**–**	**258**	**258**

c/ Hedging commitments

- **Interest rate risk**

The main interest rate risk to which the Group is exposed originates from long term borrowings.

To manage its interest rate risk, the Treasury Department has implemented a hedging strategy using swaps, tunnels, caps and options.

The exposure to interest rates on Euro-denominated borrowings is hedged for between 71% and 100% of the total debt drawn down based on Euro interest rate fluctuations for the 2011/2012 period. The US Dollar-denominated debt is fully hedged.

The estimated cost of bank debt for 2011/2012 is 2.64%, including hedges and spreads for the debt in Euros, and 2.81% for the debt in US dollars.

- Instruments recognised under equity

	Euro borrowings		USD borrowings			
	Nominal value (€ thousand)	Fair value (€ thousand)	Nominal value (USD thousand)	Fair value (USD thousand)	Nominal value (€ thousand)	Fair value (€ thousand)
Swap	145,000	311	41,369	(997)	29,119	(702)
Tunnel	112,500	(124)	–	–	–	–
Cap	70,000	(15)	–	–	–	–
TOTAL	**327,500**	**172**	**41,369**	**(997)**	**29,119**	**(702)**

- **Exchange risks**

The Group operates in foreign countries and is therefore exposed to exchange risk as a result of various foreign currency exposures.

The principal currencies concerned are the Chinese Yuan, the US Dollar, the Pound Sterling, the Czech Koruna and the Swedish Krona. The instruments primarily used are forward purchases and sales. The Treasury Department may also use swaps, options and tunnels.

– Forward sales used to hedge business transactions at 31 March 2011

	Nominal value (€ thousands)	Nominal value (thousands of foreign currency)	Fair value (€ thousands)
US Dollar	55,425	74,946	2,103

Chinese Yuan	17,992	136,592	(93)
Hong-Kong Dollar	17,426	181,698	(901)
Australian Dollar	1,316	1,816	(19)
TOTAL	**186,564**		**(3,445)**

– A HKD-denominated project is partly hedged by options:

- a tunnel of €2 million, with a fair value of (€207 thousand) at 31 March 2011;
- sale of a call option of €1 million, with a fair value of (€109 thousand) at 31 March.

- **Derivative instruments**

The fair value of derivative instruments used to hedge against foreign exchange, interest rate and raw material risks was recognised in the balance sheet as follows:

	31 March 2011 Interest rate hedge	31 March 2011 Foreign exchange hedge	31 March 2011 Raw material hedge	31 March 2011 Total
Financial instruments - Assets	1,135	6,484	–	7,619
Financial instruments - Liabilities	1,603	6,424	25	8,052
Unrealised capital gains/(losses) taken to equity	(635)	278	(25)	(382)

d/ Commitments received

None.

e/ Individual training right (ITR)

The employees of Faiveley Transport are entitled to request additional training. A total of 19 hours of training in respect of the ITR was requested by employees during the financial year. At 31 March 2011, a total of 2,678 unused training hours had been accumulated.

f/ Share purchase option plan of 27 September 2005

On request from Faiveley Transport, Faiveley S.A. implemented, a share purchase option plan for the benefit of key Faiveley Transport Group management (excluding the managers who invested in Faiveley Management S.A.S.).

This share option plan, for a maximum of 325,000 Faiveley Transport shares, was approved by the General Meeting on 27 September 2005 and was implemented by the Management Board. The table in Note C.5.1 "Share capital", details the share allocations. 117,541 shares were outstanding at 31 March 2011.

The options are exercisable as of the second anniversary date of their allocation by the Chairman of the Management Board, provided the beneficiary is still employed by the Faiveley Transport Group on the day of exercise and has accepted the options terms and conditions. The shares are not transferable until the 4th anniversary of the allocation of purchase options. It should be noted that 198,499 share purchase options were exercised at 31 March 2011.

g/ Share subscription plan of 22 September 2009

The Combined General Meeting of 22 September 2009 delegated to the Management Board powers in relation to:
- granting share subscription and/or purchase options;
- issuing shares or marketable securities giving right to the allocation of new or existing shares of the Company, with, in the case of the allocation of new shares, the cancellation of the pre-emption right.

At its meeting of 23 November 2009, the Management Board decided to grant, on this date and up to 23 November 2017, options giving right to subscribe to new shares in the Company, to be issued through a share capital increase not exceeding an overall nominal amount of €144,000, corresponding to 144,000 new shares at a par value of €1 each. The new shares will be issued at a price of €54.91.

h/ Free performance-based share allocation plan

The Combined General Meeting of 13 September 2010 delegated the Management Board powers to allocate free shares of the Company, either new or existing shares. The General Meeting established a minimum vesting period of two years following which the allocation of ordinary shares to beneficiaries will be final, subject to the potential terms and conditions set out by the Management Board, and a retention period of a minimum of two years from the date of final allocation of the shares.

In its meetings held on 3 December 2010 and 24 February 2011, the Management Board decided to allocate a total of 69,700 shares to 43 beneficiaries.

8. Statutory Auditors' fees

Statutory Auditors' fees are included in Note H of the 2010/2011 consolidated financial statements.

STATUTORY AUDITORS' REPORT ON THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 MARCH 2011

This is a free translation into English of the statutory auditors' report issued in French and is provided solely for the convenience of English speaking users. The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. The information presented below is an opinion on the financial statements and includes an explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the financial statements taken as a whole and not to provide separate assurance on individual account captions or on information taken outside of the financial statements.

This report also includes information relating to the specific verification of information given in the management report and in the documents addressed to shareholders.

This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

To the Shareholders,

In accordance with our assignment as auditors at your annual general meeting, we hereby report to you for the year ended 31 March 2011 on:

- the audit of the accompanying financial statements of Faiveley Transport;
- the justification of our assessments;
- the specific procedures and disclosures required by law.

These financial statements have been approved by the management board. Our role is to express an opinion on these financial statements, based on our audit.

I. Opinion on the financial statements

We conducted our audit in accordance with professional standards applicable in France; those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence about amounts and disclosures in the financial statements. An audit also includes evaluating the appropriateness of accounting estimates made, as well as the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the financial statements give a true and fair view of the financial position and the assets and liabilities of the Company as of 31 Mach 2011 and the results of its operations for the year ended in accordance with accounting principles generally accepted in France.

II. Justification of assessments

Pursuant to Article L823-9 of French Commercial Code (code de commerce) relating to the justification of our assessments, we bring to your attention the following matters:

As indicated in note B.3.3 to the financial statements, non consolidated investments are valued at their value in use for the company at the year-end. Our procedures consisted in assessing the financial information and assumptions on which these estimates are based and reviewing the calculations performed by the company. On this basis, we assessed the reasonableness of estimates made.

These assessments were performed as part of our audit approach for the financial statements taken as a whole and contributed to the expression of the unqualified opinion in the first part of this report.

III. Specific procedures and disclosures

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by French law.

We have no comment to make as to the fair presentation and consistency with the financial statements of the information given in the management board's report and in the documents addressed to shareholders with respect to the financial position and the financial statements.

Concerning the information given in accordance with the requirements of article L. 225-102-1 of the French Commercial Code *(code de commerce)* relating to remunerations and benefits received by the directors and any other commitments made in their favour, we have verified its consistency with the financial statements, or with the underlying information used to prepare these financial statements and, where applicable, with the information obtained by your company from companies controlling your company or controlled by it. Based on this work, we attest the accuracy and fair presentation of this information.

In accordance with French law, we have verified that the required information concerning the purchase of investments and controlling interests and the identity of the shareholders and holders of the voting rights has been properly disclosed in the management report.

STATUTORY AUDITORS' SPECIAL REPORT

ON REGULATED AGREEMENTS AND COMMITMENTS ANNUAL GENERAL MEETING TO APPROVE THE FINANCIAL STATEMENTS AT 31 MARCH 2011

This is a free translation into English of the statutory auditors' report issued in French and is provided solely for the convenience of English speaking users. The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. The information presented below is an opinion on the financial statements and includes an explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the financial statements taken as a whole and not to provide separate assurance on individual account captions or on information taken outside of the financial statements.

This report also includes information relating to the specific verification of information given in the management report and in the documents addressed to shareholders.

This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

To the Shareholders,

In our capacity as Statutory Auditors of your Company, we hereby present our report on regulated agreements and commitments.

The terms of our engagement require us to communicate to you, based on information provided to us, the principal terms and conditions of those agreements and commitments brought to our attention or of which we would have become aware, without expressing an opinion on their usefulness and appropriateness and without identifying the existence of any further agreements and commitments, if any. It is your responsibility, pursuant to Article R. 225-38 of the French Commercial Code, to assess the interest involved in respect of the conclusion of these agreements and commitments for the purpose of approving them.

Our role is also to provide you with the information stipulated in Article R. 225-58 of the French Commercial Code relating to the implementation, during the past year, of agreements and commitments previously approved by the General Meeting, if any.

We have conducted our procedures in accordance with the professional guidelines of the French National Institute of Statutory Auditors (Compagnie nationale des commissaires aux comptes) relating to this assignment. Those procedures consisted in verifying the information provided to us with the relevant source documents.

Agreements and commitments submitted for the approval of the Annual General Meeting

AGREEMENTS AND COMMITMENTS AUTHORISED DURING THE YEAR

Pursuant to Article L.225-86 of the French Commercial Code, we have been advised of the following agreements and commitments that received the prior authorisation of your Supervisory Board.

With Etienne Haumont

Amendment of 13 September 2010 to the Memorandum of Understanding of 16 October 2008

Senior manager concerned: Etienne Haumont

(Supervisory Board meeting of 11 June 2010)

As part of its capital restructuring operations, Faiveley Transport signed a memorandum of understanding (MOU) on 16 October 2008 and an amendment to this MOU on 17 November 2008 with the managers and their spouses who are partners in Faiveley Management SAS.

Within the framework of this memorandum of understanding and this amendment, Etienne Haumont received 58,588 Faiveley Transport shares in exchange for 68,513 Faiveley Management shares provided to Faiveley Transport.

Etienne Haumont is committed to retaining all his Faiveley Transport shares for two years with effect from 23 December 2008 and two thirds of his shares for three years with effect from 23 December 2008.

In addition, for a period of six years beginning on 23 December 2008, any disposal of a block of more than 10,000 Faiveley Transport shares is subject to a pre-emption right by Faiveley Transport.

The amendment to the memorandum of understanding signed on 13 September 2010 between Etienne Haumont and Faiveley Transport, represented by Robert Joyeux, discharged Etienne Haumont from his obligation to retain his Faiveley Transport shares and from related terms and conditions.

Agreements and commitments previously authorised by the Annual General Meeting

Agreements and commitments authorised during previous years and having continuing effect during the year

Pursuant to Article R.225-57 of the French Commercial Code, we have been advised of the following agreements and commitments that received the prior authorisation of the General Meeting during previous years and having continuing effect during the year.

With the Czech company Faiveley Transport Lekov a.s.

Amendment to the shareholder agreement extending the validity of the shareholder agreement signed on 30 October 2002

This amendment signed on 15 December 2009 extended until 31 January 2015 the effects of the shareholder agreement and reviewed the conditions concerning the mutual rights to purchase and sell shares held by the minority shareholder.

With Robert Joyeux

Memorandum of understanding with the managers and amendment n°1 – Sale and transfer of Faiveley Management shares to Faiveley S.A (which became Faiveley Transport on 22 September 2009)

As part of its capital restructuring operations, Faiveley Transport signed a memorandum of understanding (MOU) on 16 October 2008 and an amendment to this MOU on 17 November 2008 with the managers and their spouses who are shareholders of Faiveley Management SAS.

Within the framework of the memorandum of understanding of 16 October 2008, Robert Joyeux received 140,610 Faiveley Transport shares in exchange for 164,430 Faiveley Management shares provided to Faiveley Transport.

Robert Joyeux is committed to retaining all his Faiveley Transport shares for two years with effect from 23 December 2008 and two thirds of his shares for three years with effect from 23 December 2008.

Furthermore, for a period of six years with effect from 23 December 2008, any disposal of any block of over 10,000 shares in Faiveley Transport is subject to a pre-emption right of Faiveley Transport.

With Francois Faiveley Participations SAS

In application of the technical, commercial and administrative assistance agreement concluded between FFP and Faiveley Transport on 26 June 2004, and in respect of the re-invoicing of rents and services provided, Faiveley Transport recorded the following amounts as income and expense during the year.

In €uro	Faiveley Transport expenses	Faiveley Transport income
Assistance agreement and provision of services	365,010	1,020
Re-invoicing of rents and charges	–	2,150

Neuilly-sur-Seine and Dijon, 20 July 2011

DRAFT RESOLUTIONS TO BE SUBMITTED TO THE COMBINED GENERAL MEETING

OF 14 SEPTEMBER 2011 TO CONSIDER THE FINANCIAL STATEMENTS FOR THE YEAR ENDING 31 MARCH 2011

RESOLUTIONS IN THE ORDINARY SESSION

FIRST RESOLUTION

Approval of the parent company financial statements for the year ending 31 March 2011

The General Meeting, with the required quorum and majority for Ordinary General Meetings, having considered the management report of the Management Board and the observations of the Supervisory Board on the operations of the Company for the financial year ending 31 March 2011 and on the financial statements of that year, and having considered the Statutory Auditors' report on the execution of their remit for this financial year, approves the company financial statements for the year ending 31 March 2011, as presented, showing a loss of €1,757,423.54, and the transactions recorded in these financial statements and summarised in these reports.

Consequently, the General Meeting discharges the Management Board for the execution of their duties for this financial year.

SECOND RESOLUTION

Allocation of profit for the year ending 31 March 2011

The General Meeting, with the required quorum and majority for Ordinary General Meetings, on the proposal of the Management Board, agrees to allocate the profit for the year ending 31 March 2011 as follows:

Loss for the financial year	(€1,757,423.54)
Retained earnings from prior years	€86,292,398.91
Distributable profit	€84,534,975.37
– Transfer to legal reserve:	€0
– Cash dividend of €1.20 per share:	(€17,285,653.20)

The balance of €67,249,322.17 will be transferred in full to retained earnings.

Taking account of these allocations, the Company shareholders' equity will be €177,139,971.16.

The dividend will be payable with effect from 19 September 2011.

Pursuant to Article 158 of the General Tax Code, as modified by the 2006 Finance Act, the dividend distributed will give an entitlement, to individual shareholders only, to a rebate of 40% on the amount received.

According to the provisions of Article 243(ii) of the General Tax Code, the General Meeting notes the amount of dividends distributed in the last three financial years:

Year	Dividend
2007/2008	€0.35
2008/2009	€1.00
2009/2010	€1.20

If at the time of the payment, the Company holds treasury shares, the distributable profit corresponding to the unpaid dividend due to the holding of the shares shall be allocated to the account "retained earnings".

THIRD RESOLUTION

Approval of the Consolidated Financial Statements for the year ending 31 March 2011

The Annual General Meeting, with the required quorum and majority for Ordinary General Meetings, having considered the management report of the Management Board and the observations of the Supervisory Board on the operations of the Group for the financial year ending on 31 March 2011 and on the consolidated financial statements of that year, and having considered the report on the consolidated financial statements from the Statutory Auditors in the execution of their assignment for this financial year, approves the Consolidated Financial Statements of the year ending 31 March 2011, as presented, and the transactions recorded in these financial statements and summarised in these reports.

FOURTH RESOLUTION

Directors' fees

The General Meeting, with the required quorum and majority for Ordinary General Meetings sets the amount for fees allocated to the Supervisory Board for the financial year ending 31 March 2011 at €222,000.

FIFTH RESOLUTION

Approval of the transactions and agreements under Articles L.225-86 and subsequent of the Commercial Code

The General Meeting, with the required quorum and majority for Ordinary General Meetings, having considered the Statutory Auditors' special report on the agreements covered by Articles L.225-86 and subsequent of the Commercial Code, notes and approves the terms of this report and the agreements mentioned therein.

SIXTH RESOLUTION

Renewal of the term of office of the Statutory Auditors

The General Meeting, with the required quorum and majority for Ordinary General Meetings, having considered the Statutory Auditors' report, appoints the term of office of Company EXPERTISE COMPTABLE ET AUDIT represented by Jérôme Burrier and Company PRICEWATERHOUSECOOPERS AUDIT represented by Philippe Vincent as Statutory Auditors as well as respectively Eric Gaboriaud and Yves Nicolas as Alternate Auditors, for a period of six years expiring at the end of the Ordinary General Meeting called to approve the financial statements for the year ending 31 March 2017.

SEVENTH RESOLUTION

Authorisation given to the Management Board to trade in the shares of the Company

The General Meeting, with the required quorum and majority for Ordinary General Meetings, having considered the report of the Management Board, authorises the Management Board, with the facility to subdelegate to its Chairman and/or one of its members, with the approval of the Chairman and within the law, pursuant to Articles L.225-209 and subsequent of the Commercial Code, to purchase or sell shares in the Company.

The General Meeting decides that the transactions may be made to:

- ensure the liquidity and to support the market for the Faiveley Transport share by an investment services provider via a liquidity contract that conforms to the ethics charter recognised by the Autorité des Marchés Financiers;
- grant them to employees and management of the Group according to the terms and conditions of the law (options to purchase shares, employee profit-sharing, allocation of free shares);
- cancel them by way of reduction in capital within the limits set by law;
- retain them within the limit of 5% of the capital and use them in exchange or payment, in particular as part of acquisitions initiated by the Company, by way of public offer or other;
- implement any other market practice that is permitted by the Autorité des Marchés Financiers and more generally all transactions that conform to the regulations in force.

The purchase of Company shares may be made up to a number of shares such that the total number of shares held by the Company following these purchases does not exceed 10% of the shares comprising the share capital of the company, knowing that the percentage will apply to capital adjusted as a function of the transactions that may occur subsequent to the current Meeting.

The purchases, disposals, exchange or transfer may be made by any means, on the market or principal to principal, including by acquisition or disposal of blocks, or by recourse to derivative financial instruments, under the conditions provided by market authorities and regulations. The maximum share capital acquired, disposed of, exchanged or transferred by of a block of securities may relate to the entire buyback programme.

The maximum purchase price is set at €90 per share.

The General Meeting delegates to the Management Board the power to adjust the above purchase price in order to take account of the incidence of possible financial transactions on the value of the share. In particular, in the event of an increase in capital by incorporation of reserves and the issue of free shares, the price indicated above will be adjusted by a coefficient of a multiplier equal to the ratio of the number of securities comprising the share capital before the transaction and the number after the transaction.

The total amount allocated to the repurchase programme is €129.6 million.

This authorisation remains valid for eighteen months with effect from this day.

The General Meeting confers all powers to the Management Board, with the power to delegate to decide and implement the buyback programme, and in particular to issue stock exchange instructions, conclude all agreements, carry out all formalities and make declarations to the Autorité des Marchés Financiers and any other organisation, and in general, do everything necessary to complete the transactions carried out under the present authorisation.

This resolution replaces and cancels the authorisation granted by the seventh resolution voted by the Combined General Meeting of 13 September 2010.

RESOLUTION IN EXTRAORDINARY SESSION

EIGHTH RESOLUTION

Amendment to Article 19 of the bylaws

The General Meeting, with the required quorum and majority for Extraordinary General Meetings, having considered the report of the Management Board, decides to establish conditions for staggered terms of office of members of the Supervisory Board and to thereby modify Article 19 of the bylaws of the Company and in particular to cancel the paragraph II of the said Article with the title "Renewal". Article 19 of the Company's bylaws currently reads as follows:

"The Supervisory Board comprises at least five members and ten members at most. In accordance with the law, this number, which corresponds to a minimum of three members, may not exceed eighteen members subject to the exemption provided by law in the event of a merger.

I. Appointment

The members of the Supervisory Board, individual or corporate persons, are elected by the Ordinary General Meeting of shareholders from among its members, by a simple majority, for a period of three years. By exception, and to allow the implementation and maintenance of the staggering of the terms of members of the Supervisory Board, the Ordinary General Meeting may appoint one or more directors for a term of one (1) year or two (2) years. Members of the Supervisory Board are eligible for re-appointment. They will take the title of "director".

....

II. – Resignation – Vacancy

...

III. – Dismissal

...

IV. – Member of the Supervisory Board representing employee shareholders

..."

RESOLUTIONS IN ORDINARY SESSION

NINTH RESOLUTION

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to renew the term of office of Philippe Alfroid as member of the Supervisory Board for a period of one year, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2012.

TENTH RESOLUTION

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to renew the term of office of François Faiveley as member of the Supervisory Board for a period of one year, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2012.

ELEVENTH RESOLUTION

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to renew the term of office of Didier Alix as member of the Supervisory Board for a period of one year, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2012.

TWELFTH RESOLUTION

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to renew the term of office of Maurice Marchand-Tonel as member of the Supervisory Board for a period of two years, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2013.

THIRTEENTH RESOLUTION

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to renew the term of office of Christian Germa as member of the Supervisory Board for a period of two years, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2013.

FOURTEENTH RESOLUTION

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to renew the term of office of Christopher Spencer as member of the Supervisory Board for a period of three years, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2014.

FIFTEENTH RESOLUTION

Appointment of a new member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to appoint Mrs. Hélène Auriol-Potier, as a new member of the Supervisory Board of the Company, for a period of three years. This term of office will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2014.

SIXTEENTH RESOLUTION

Appointment of a new member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to appoint Nicoletta Giadrossi-Morel, as a new member of the Supervisory Board of the Company, for a period of three years. This term of office will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2014.

SEVENTEENTH RESOLUTION

Appointment of a new member of the Supervisory Board

The General Meeting, with the required quorum and majority for Annual General Meetings, decides to appoint Robert Joyeux, as a new member of the Supervisory Board of the Company, for a period of two years. This term of office will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2013.

RESOLUTIONS IN EXTRAORDINARY SESSION

EIGHTEENTH RESOLUTION

Ratification of the transfer of head office and relevant amendment to the bylaws

The General Meeting, with the required quorum and majority for Extraordinary General Meetings, ratifies the transfer of the Company's registered office in accordance with Article 225-65 of the Commercial Code to the following adress:

Immeuble Delage, Hall Parc-Bâtiment 6A,
3, rue du 19 mars 1962 – 92230 Gennevilliers

with effect from 15 July 2011,

decided by the Supervisory Board at its meeting on 9 June 2011 and makes the corresponding amendment to Article 4 of the bylaws, which currently reads as follows:

"The registered office is Immeuble Delage, Hall Parc-Bâtiment 6A, 3 rue du 19 mars, 1962, 92230 Gennevilliers.

It can be transferred within the same district or in a neighbouring district as decided by the Supervisory Board, subject to ratification of this decision by the subsequent Ordinary General Meeting, and in any places as decided by the Extraordinary General Meeting of shareholders.

The Management Board can create, transfer and close, in France and abroad, any establishments, agencies, branches, offices or warehouses."

NINETEENTH RESOLUTION

Delegation to grant authority to the Management Board to increase share capital without pre-emption right to subscribe through a private placement to qualified investors for the benefit or a restricted circle of investors

The General Meeting, with the required quorum and majority for Extraordinary General Meetings, having considered the report of the Management Board and the special report of the Statutory Auditors, and pursuant of the conditions of the Commercial Code, and in particular Articles L.225-129, L.225-129-2, L.225-135, L.225-136,

– delegates to the Management Board, with the power to subdelegate, subject to the conditions set by law and by the bylaws, the authority to decide on one or more increases in the share capital of the Company, in the proportions and at the times it decides, by the issue, of one or more offers covered by II of Article L. 411-2 of the Monetary and Financial Code, ordinary shares, as well as all marketable securities, issued for payment or for free, giving access by all means, immediately and/or in time, to new or existing ordinary shares in the Company, the subscription to these shares and marketable securities may be in cash, or by offset against liquid and current liabilities, or by incorporation of reserves, profits or premiums;
– decides that the total increases of share capital likely to be carried out immediately or in time by virtue of the present authorisation is set at 1% of the share capital at the date of this meeting with the stipulation that in any event, the issue of securities executed in this context are within the limits specified by the law: if applicable, the nominal amount of any shares potentially issued in addition to this limit, in the case of new financial transactions to protect the rights of holders of securities giving access to capital, shall be added to the said limit;
– decides that the present authorisation is given for a period of 26 months from the date of the current Meeting;
– decides to cancel the pre-emption right of shareholders to subscribe to securities issued by virtue of the present resolution;
– notes that, where appropriate, the present authorisation implies, for the benefit of holders of marketable securities issued giving access to the capital of the Company, waiver by shareholders of their pre-emption right to subscribe to shares to which these marketable securities give the right, immediately or in time;
– decides that the issue price of shares shall be at least equal to the minimum allowed by legal and regulatory provisions applicable on the date of issue (to date, the weighted average of the last three trading days preceding the date of the setting of the subscription price for the capital increase, minus a maximum discount of 5% thereafter, if applicable, correction of the average in case of a difference between the dates of transfer of ownership);
– gives all powers to the Management Board, with facility to subdelegate in accordance with the law and bylaws, to implement the present authorisation and in particular to set the conditions of issue, the nature and features of marketable securities giving access to capital, the methods of granting of capital securities to which these marketable securities give the right as well as the dates on which the rights of grant may be exercised, at its sole initiative allocate the costs of increase in capital to the related premiums and transfer from this amount the sums necessary to increase the legal reserve, proceed with all adjustments to take account of the effect of transactions on the capital of the Company, complete all agreements, in particular to ensure the successful completion of issues envisaged, note the realisation of the increases in capital, make the related changes to the bylaws, carry out the formalities required and in general do everything necessary;
– notes the fact that, in the event the Management Board uses the authorisation provided to it by the present resolution, the Management Board will request the prior approval of the Supervisory Board and report to the next Ordinary General Meeting, pursuant to the law and regulations, on the use made of the authorisations given by the present resolution;
– notes that the present authorisation replaces the authorisation adopted at the Combined General Meeting of 22 September 2009.

TWENTIETH RESOLUTION

Delegation to grant authority to the Management Board to increase share capital for the benefit of employees of the Group

The General Meeting, with the required quorum and majority for Extraordinary General Meetings, having considered the report of the Management Board and the special report of the Statutory Auditors and pursuant to Articles L.225-129-2, L.225-138, L.225-138-1 of the Commercial Code and L.3332-1 and subsequent of the Labour Code, and this in order to fulfil the provisions of Article L.225-129-6 of the Commercial Code,

- delegates to the Management Board, with the facility to subdelegate under the conditions foreseen by the law and by the bylaws, the authority to decide on one or more increases of the Company capital, in the proportion and at the times it deems appropriate by issuing shares or securities giving access to the capital of the Company reserved to employees enrolled in a company savings plan of the Company or a related company, up to a maximum nominal amount of 1% of the share capital on the day of the present General Meeting;
- decides that this authorisation is given for a period of 26 months from the date of the present meeting;
- decides to cancel the pre-emption right of shareholders to subscribe to securities issued by virtue of the present resolution;
- grants full powers to the Management Board, with the facility to subdelegate under the conditions set by the law and by the bylaws, to implement this delegation and in particular to set the price and terms of issue, the nature and characteristics of securities giving access to capital, the terms for the allocation of shares to which marketable securities are eligible as well as the dates in which allocation rights may be exercised, at its sole discretion charge the costs of capital increases against the amount of related premiums and to deduct from this amount the sums necessary to fund the legal reserve, to carry out any adjustments to take account of the impact of transactions on the capital of the company, including all agreements to achieve the successful completion of proposed issues, to record any capital increases, to amend the bylaws accordingly, to perform the required formalities and generally do whatever is necessary.

TWENTY-FIRST RESOLUTION

Authorisation to the Management Board to proceed with the allocation of free performance-based shares, either existing or to be issued

The General Meeting, with the required quorum and majority for Extraordinary General Meetings, having considered the report of the Management Board and the special report of the Statutory Auditors, authorises the Management Board, pursuant to Articles L.225-197-1 and subsequent of the Commercial Code to proceed on one or more occasions, with the allocation of free ordinary shares in the Company, existing or to be issued, for the benefit of executive management as defined by law and to certain members of the personnel of the Company and companies related to it.

The General Meeting sets the period of acquisition at the end of which the allocation of ordinary shares by the beneficiaries becomes final, subject to possible conditions determined by the Management Board, to a minimum period of 2 years and sets the period of compulsory retention of the shares by the beneficiaries, at a minimum of 2 years with effect from the final allocation date of the shares.

However, the General Meeting authorises the Management Board not to impose any retention period for the shares concerned, to the extent that the vesting period of one or several allocations is a minimum of four years.

The General Meeting decides that the total number of free shares allocated pursuant to this resolution may not exceed 1% of the share capital at the date of the current General Meeting.

The General Meeting notes that free shares allocated may be existing shares, or shares to be issued and authorises the Management Board, in the event of an allocation of free shares to be issued, to increase the capital, at the end of the acquisition period, by the incorporation of reserves, profits or issue premiums for the benefit of the beneficiaries of the said shares, this decision carries the full waiver by shareholders of their pre-emption right to subscribe for the benefit of beneficiaries of free shares from the reserves, profit or premiums thus incorporated, it being noted that the increase in capital will be carried out by the sole fact of the final allocation of shares to the beneficiaries.

The General Meeting grants all powers to the Management Board that will be supported by the Remuneration Committee, within the limits set above to:

- set the conditions and where appropriate, the allocation criteria for ordinary shares;
- within the legal conditions and limits, set the dates on which the allocations will proceed;
- determine the identity of beneficiaries, the number of ordinary shares allocated to each of them and the means of allocation of ordinary shares.

The General Meeting sets the validity of this authorisation at 38 months, from this date. This authorisation cancels any amounts unused by the Management Board by virtue of the previous authorisation granted by the General Meeting of 13 September 2010.

The Management Board will inform the Ordinary General Meeting every year of transactions carried out by virtue of the present authorisation, in a special report, pursuant to Article L.225-197-4 of the Commercial Code.

RESOLUTIONS RELATIVE TO BOTH MEETINGS

TWENTY-SECOND RESOLUTION

Powers for formalities

The Annual General Meeting confers full powers to the bearer of copies or extracts of the minutes recording its decisions, to carry out all the legal formalities of publication.

CORPORATE GOVERNANCE

CHAIRMAN OF THE SUPERVISORY BOARD'S REPORT

ON THE OPERATION OF THE SUPERVISORY BOARD AND ON INTERNAL CONTROL WITHIN FAIVELEY TRANSPORT.

Dear Shareholders,

Pursuant to the provisions of Article L.225-68 of the Commercial Code, I hereby inform you by the present report:

– of the conditions for the preparation and organisation of the work of your Supervisory Board during the financial year ended 31 March 2011;
– the principles and rules agreed by the Board to determine the remuneration and benefits of all kind granted to senior executives;
– of the internal control procedures implemented by the Company;
– other information required by Article L.225-68 of the Commercial Code.

The current report was discussed and approved by the Supervisory Board at its meeting of 9 June 2011.

1. Preparation and organisation of the work of the Supervisory Board

1.1. COMPOSITION OF THE SUPERVISORY BOARD

Pursuant to the bylaws, the Supervisory Board comprises at least five members and ten members at most.

The Company adopted the form of a public limited company with a Management Board and a Supervisory Board at the time of the General Meeting held on 27 September 2005. The first members, formerly Directors of the Company constituted as a public limited company with a Board of Directors, were appointed for an initial period of three years and were reappointed at the Annual General Meeting held on 17 September 2008 for a period of 6 years, in accordance with the Company's bylaws.

The Combined General Meeting of 13 September 2010 amended Article 19 of the Company's bylaws. Now board members are appointed for three years and they can be reappointed. This decision is effective immediately and applies to current terms.

Any shareholder, individual or corporate, may be elected as a member, subject to their holding at least one share in the Company (Article 19 of the bylaws).

The Supervisory Board elects, from among its own members, a Chairman and a Vice-Chairman, who are individual shareholders, otherwise their appointment is null and void. The Chairman and Vice Chairman are charged with calling board meetings and leading discussions.

Where a legal entity assumes the function of a member of the Supervisory Board, it is required to designate a permanent representative who is subject to the same conditions and requirements and who has the same civil and personal liability as if they were a member of the Board in their own name.

Members of the Management Board, as well as current or former statutory auditors and their parents or relatives under the laws, may not be members of the Supervisory Board.

The education and professional experience of board members are quite varied, given that they have all held high-level management positions.

With regard to the six independence criteria defined by the Supervisory Board, in line with those recognised by Euronext at 31 March 2011, three of the current eight members may be considered independent: Christian Germa, Philippe Alfroid and Maurice Marchand-Tonel.

At 31 March 2011, the Supervisory Board comprised eight members, all French nationals, given that Christopher Spencer has dual French and British nationality. The average age of the members at 31 March 2011 was 58.

The members appointed by the General Meeting are as follows:

- **Philippe Alfroid (born 29 August 1945)**

Philippe Alfroid was appointed a Supervisory Board member at the General Meeting of 27 September 2005 and was reappointed at the General Meeting of 17 September 2008.

He was appointed Chairman of the Supervisory Board on 22 September 2009.

Philippe Alfroid is an engineer from ENSEHRMA-Grenoble and holds a Master of Science from Massachusetts Institute of Technology (MIT). Philippe Alfroid worked as a consultant for the company PSDI. He then joined Essilor in 1972, where he was Chief Executive Officer from 1996 to 2009.

- **François Faiveley (born 26 April 1951)**

François Faiveley was appointed as a Supervisory Board member at the Combined General Meeting of 27 September 2005 and was reappointed at the Ordinary General Meeting of 17 September 2008.

He was appointed Vice Chairman of the Supervisory Board on 22 September 2009.

François Faiveley is a graduate from ESCAE (Business School) in Dijon. He has served in operational and management positions within the Faiveley Transport Group since the start of the 1990s.

- **Christian Germa (born 11 February 1970)**

Christian Germa was appointed as a member of the Supervisory Board at the Combined General Meeting of 27 September 2005 and was reappointed at the Ordinary General Meeting of 17 September 2008.

Christian Germa is a graduate of the Ecole Polytechnique and he is a member of the "Corps des Ingénieurs des Ponts et Chaussées" (the body of civil engineers in France). He started his career in Treasury Management at the Ministry of Finance, where he carried out the duties of Deputy Secretary General to the Comité Interministériel de Restructuration Industrielle (Inter-Ministerial Committee for Industrial Restructuring). He joined the Vinci Group in 2002, where today he is responsible for public-private partnerships.

- **Edmond Ballerin (born 6 January 1943)**

Edmond Ballerin was appointed as a member of the Supervisory Board at the Combined General Meeting of 27 September 2005 and was reappointed at the Ordinary General Meeting on 17 September 2008.

Edmond Ballerin is a graduate of the Ecole des Cadres. He started his career with DIM as assistant to the Advertising Manager before joining the Bristol Myers Group and then Ciba-Geigy. He joined Faiveley in 1971, where he successively held the positions of Marketing Manager, Product Manager, then Head of Communications.

- **Maurice Marchand-Tonel (born 14 February 1944)**

Maurice Marchand-Tonel was appointed as a member of the Supervisory Board, at the General Meeting held on 22 September 2009, following the resignation of Mr Stéphane Volant.

Maurice Marchand-Tonel is an independent consultant. On leaving Harvard Business School he started his career with the Boston Consulting Group with whom he co-founded their French and German offices. Afterwards, he was appointed Chairman of Compagnie Olivier, and subsequently Chief Executive Officer of Sommer and Chairman of Givenchy. He then managed Ciments Français International, before becoming Chairman of Transalliance until 1999. In 2000, he became a partner with Arthur Andersen, which has since become BearingPoint, where he has been Senior Advisor since 2004. Maurice Marchand-Tonel is Chairman of the European American Chamber of Commerce.

- **Didier Alix (born 16 August 1946)**

Didier Alix was co-opted as a member of the Supervisory Board at its meeting held on 27 November 2009 following the resignation of Christian Baffy. His appointment as a member of the Supervisory Board was ratified at the General Meeting of 13 September 2010.

Didier Alix joined Société Générale in 1971, where he held a number of positions, notably within the Inspection Générale then as Head of Central Risk Control. He was also Head of Branch Offices before being promoted to Chief Executive Officer of Franfinance, then Head of Réseau France. In 1998, he became Deputy Chief Executive Officer for Individuals and Businesses. In 2006, he became Deputy Chief Executive Officer of Société Générale. He currently is Advisor to the Chairman and Chief Executive Officer.

- **Christopher Spencer (born 4 November 1962)**

Christopher Spencer was appointed as a member of the Supervisory Board at the Combined General Meeting of 22 September 2009, following the resignation of Denis Grand-Perret. He was previously a Director of the Board of Faiveley Transport (November 2004 – February 2009).

Christopher Spencer holds both a French and German degree in higher management studies (ESC Reims and Fachhochschule Reutlingen) and is a Chartered Accountant. He has over twenty years experience in private equity in Europe, the last six with the Sagard funds, which he helped establish in the French market. Since the beginning of 2010, M. Spencer has focused on his private investment and Business Angel activities.

- **Serge Choumaker (born 18 September 1959)**

Serge Choumaker was appointed as a member of the Supervisory Board representing employee shareholders at the Combined General Meeting of 13 September 2010.

He is Head of Accounting & Consolidation within the Faiveley Transport Group. Serge Choumaker holds a D.E.C.S. He joined the Faiveley Transport Group in September 2001. Previously, Serge Choumaker held management positions as Head of Accounting at the companies Lafarge and Ferembal.

Xavier de Lavallade, Legal Counsel of the Group, shall serve as Secretary of the Board.

Members of the Supervisory Board can be contacted at 143 Boulevard Anatole France, 93200 Saint-Denis.

1.2. FUNCTIONING OF THE BOARD

The Supervisory Board continuously ensures, by all appropriate means, management control of the Management Board. The Supervisory Board is regularly kept up-to-date by the Management Board through quarterly reports on the businesses and operations of the Company and its subsidiaries.

As part of its legal duties, the Supervisory Board exercises continuous control over the management of the Company by the Management Board. At all times of the year, it carries out verifications and controls that it considers appropriate and may request documents it considers useful to the carrying out of its work. The Management Board presents an operating report to the Supervisory Board at last once a quarter.

The Supervisory Board appoints the members of the Management Board and sets their remuneration. It can also dismiss them in accordance with the bylaws. It appoints the Chairman of the Management Board and can also appoint the Chief Executive(s).

The Supervisory Board checks and monitors the parent company and consolidated financial statements for the half year and full year prepared by the Management Board.

At the Ordinary General Meeting, it presents a report containing its observations on the Management Board's report as well as on the financial statements for the year.

The Supervisory Board approves the medium and long-term strategy presented by the Chairman of the Management Board and monitors its execution. It oversees the quality of information provided to shareholders as well as the markets, via financial statements or at the time of major transactions.

In addition to the provisions of the bylaws, the Supervisory Board must approve beforehand all significant transactions in respect of the scope of the Company's business (acquisitions, disposals, internal restructuring) or outside the approved strategy of the business. It is regularly informed of the financial position, the cash position and the commitments of the Company.

The Chairman calls the Supervisory Board as often as required in the interests of the Company and at least once a quarter in the fifteen days following the release of the periodic report by the Management Board.

The Supervisory Board's deliberations are not valid unless at least half its members are present and decisions are made by a majority of members present. In the event of a tie, the Chairman has the deciding vote.

At any one meeting, no Director may hold more than one power of attorney received from a Director who could not be present.

In order to conform to AFEP-MEDEF's corporate governance code for listed companies of December 2008, the Supervisory Board added to the agenda of its meeting on 22 April 2010 a revision to its internal regulations providing and specifying:

- its powers;
- its operational rules;
- the terms and conditions of meetings, the organisation and preparation of the work of the Board;
- the information required by members of the Supervisory Board in the exercise of their duties.

Following the recommendation of the AMF (the French Financial Market Authority) of 3 November 2010 on the prevention of insider trading violations by management, the Supervisory Board at its meeting on 24 February 2011 decided to precisely define the trading restriction periods during which management and permanent insiders are prohibited from doing a transaction in the Company's securities. The Supervisory Board also amended its internal regulations and brought the Company's Code of Conduct into compliance at the same meeting. The Supervisory Board's internal regulations are available on the Company's website.

Moreover, at the meeting held on 24 March 2011, the Supervisory Board reviewed the provisions of the law of 27 January 2011 concerning the fair representation of women and men on boards of directors and supervisory boards and decided to comply with the requirements of this regulation. Consequently, the Supervisory Board has entrusted the Remuneration Committee with the task of putting forward female candidates, stating that the candidates should have the possibility of being classified as independent under the regulation adopted by the Supervisory Board on the matter. These applications will be reviewed by the Supervisory Board in a meeting scheduled for 22 July 2011. The name of a female representative will therefore be proposed at the General Meeting of 14 September 2011 to serve on the Supervisory Board of the Company.

In light of their legal assignments, each member of the Supervisory Board is bound by the basic obligations of loyalty, confidentiality and due diligence.

The Board adopted a Charter for members of the Supervisory Board that defines the criteria adopted to qualify as an Independent Director, as well as the obligations of members of the Supervisory Board. This Charter is also available at the registered office of the Company.

It is specifically stated that at least two of the members of the Supervisory Board must meet the qualification of Independent Director.

Aside from the requirements for expertise and experience required, a member of the Supervisory Board is deemed independent where he/she has no direct or indirect relationship, of whatever nature, with the Company, its group or its management that may compromise the exercise of freedom of judgment and their completely objective participation in the work of the Supervisory Board.

To be considered an Independent Director, a member of the Supervisory Board must satisfy the following criteria:

- they must not be or have been an employee or executive of the Company or an employee or director of a company that has been consolidated during the past five years;
- not be a senior executive of a company where the Company, directly or indirectly, holds a position as Director or has an employee appointed as such, or where a senior executive of the Company (currently or in the last five years) holds the position of Director;
- must not be a customer, supplier, commercial partner, merchant banker, or financing banker:
  - that is of significance to the Company or its group,
  - or where the Company or its group represent a significant part of the activities;
- must not be directly or indirectly related, nor have been directly or indirectly related during the last five years, to such a customer, supplier, commercial partner, merchant banker or investment banker;
- must not have any close family relationship with a senior executive of the Company;
- must not have been an auditor to the business during the previous five years;
- must not have been a member of the Supervisory Board for more than twelve years;
- must not hold, directly or indirectly, a shareholding equal to or greater than 10% in the share capital or voting rights of the Company or in any one of the companies of its Group, nor be related in any way whatsoever to a shareholder holding more than 10% of the capital or the voting rights of the Company or a company of its Group.

Every year, at the meeting to consider the financial statements of the year just ended, the Supervisory Board examines the position of each of its members on a case by case basis with regard to the criteria of this clause, and brings the conclusions of its examination to the attention of the shareholders in its annual report so that the Independent Directors are identified.

Finally, beyond the sole statutory requirements, internal regulations require that each member of the Supervisory Board be a shareholder in a personal capacity. It was decided that each member of the Supervisory Board should acquire at least two hundred (200) shares of the Company. During this financial year, board members regularised their status to conform to this new provision of the internal regulations.

1.3. FREQUENCY OF MEETINGS

During the last financial year, the Supervisory Board met seven times.

The agendas of the Board meetings were as follows:

- **On 22 April 2010**, with the following agenda:
  - Approval of the minutes of the previous meeting;
  - Update on the Group's business and the last financial year;
  - Adoption of the new internal regulations of the Supervisory Board;
  - Date of the next Annual General Meeting to approve the financial statements and associated work schedule;
  - Update on the Wabtec dispute;
  - Miscellaneous.
- **On 11 June 2010**, with the following agenda:
  - Approval of the minutes of the previous meeting;
  - Presentation by the Management Board and observations of the Board on the parent company and consolidated financial statements for the year ending 31 March 2010;
  - Presentation of the Audit and Risk Committee's report;
  - Presentation and approval of the Supervisory Board's report on the management report prepared by the Management Board for the Annual General Meeting;
  - Presentation and approval of the Chairman's report on internal audit procedures and preparation and organisation of the Board's work for the Annual General Meeting;
  - Review of draft resolutions submitted by the Management Board at the Annual General Meeting;
  - Review of the list of regulated agreements over the previous year under Article L.225-86 of the Commercial Code;
  - Review of the list of current agreements concluded under normal conditions over the previous year;
  - Presentation of the conclusions of the Remuneration Committee: remuneration of Board members and review of procedures for setting up a performance-based share distribution plan;
  - Governance:
    - Adoption of the Code of Conduct with regard to transactions in Company securities involving directors and senior non-executive directors;
    - Result of the Supervisory Board's vote concerning the representation of employee shareholders (Article L.225-71 of the Commercial Code);
    - Appointment of Board Secretary
  - Miscellaneous.
- **On 13 September 2010**, with the following agenda:
  - Approval of the minutes of the previous meeting;
  - Resignation of a member of the Management Board;
  - Miscellaneous.
- **On 22 October 2010**, with the following agenda:
  - Approval of the minutes of the previous meeting;
  - Review of sales for the first half of 2010-2011;
  - Review and approval of the remuneration of Board members;
  - Review and approval of the distribution and performance criteria put forward by the Remuneration Committee for the implementation of the new stock option and free share issue plans approved by the Combined General Meeting of 13 September 2010;
  - Miscellaneous.
- **On 26 November 2010**, with the following agenda:
  - Approval of the minutes of the previous meeting;
  - Presentation and approval of the interim report finalised by the Management Board;
  - Implementation by the Management Board of a free performance-based share distribution plan: presentation of the settlement plan, retention obligation for Company executives that are beneficiaries and eligible to serve on the Management Board;
  - Miscellaneous.
- **On 24 February 2011**, with the following agenda:
  - Approval of the minutes of the previous meeting;
  - Request for the Management Board's preliminary authorisation regarding the issuance of a bond on behalf of the Company SFRT, governed by Chinese law;
  - Annual authorisation of guarantees, sureties and securities granted to the Management Board;
  - Governance: presentation of the Financial Market Authority's recommendation on the prevention of insider breaches attributable to directors of listed companies, compliance with the Code of Conduct and Supervisory Board internal regulations;
  - Miscellaneous.
- **On 24 March 2011**, with the following agenda:
  - Approval of the minutes of the previous meeting;
  - Formation and Chairmanship of the Management Board;
  - Review of the Law of 27 January 2011 concerning the fair representation of women and men on the Management and Supervisory Boards;
  - Date and venue of the next Annual General Meeting;
  - Miscellaneous.

1.4. CONVENING MEETINGS OF THE SUPERVISORY BOARD MEMBERS

In accordance with Article 20-III of the bylaws, the advance notice required for formal meetings of the members of the Supervisory Board is four days.

Each member has the option of being represented by another member at the board meetings.

The meetings are chaired by the Chairman of the Supervisory Board, or in his absence, by the Vice-Chairman.

1.5. INFORMATION FOR SUPERVISORY BOARD MEMBERS

Before a meeting, each member receives Group financial information and a file detailing the items included on the agenda for the meeting.

1.6. DIRECTORS' FEES

Details are provided in the Management Report of the Management Board.

1.7. LOCATION OF THE MEETINGS

In general, meetings of the Supervisory Board take place at the registered office, however, occasionally, certain meetings are held in other locations.

1.8. MINUTES OF THE MEETINGS

Minutes of Supervisory Board meetings are drafted at the end of each meeting and are immediately forwarded to board members upon request.

1.9. SUMMARY OF 2010/2011 ACTIVITY

During the year ended 31 March 2011, the Board met seven times. The attendance rate was 85.7%. All seven meetings were chaired by the Chairman of the Supervisory Board, Philippe Alfroid.

During the financial year, all Management Board members attended meetings and presented items on the agenda within their respective areas of expertise to the Supervisory Board.

The Group Legal Counsel attended all Board meetings and performed a secretarial role at the meetings.

Pursuant to Article L.225-238 of the Commercial Code, the Statutory Auditors were invited to the Board meetings at which the interim and year-end financial statements were presented and approved.

1.10. RULES GOVERNING DIRECTORS' REMUNERATION AND OTHER BENEFITS

Executive compensation, detailed in the Management Board's report, is determined by the Remuneration Committee and the Supervisory Board. All the information required under Article L.225-102-1 of the Commercial Code is presented in the Management Board's report.

The setting and granting of Directors' fees is decided at a meeting between the Chairman and the Vice-Chairman of the Supervisory Board, which specifically take account of the following criteria:
- Board meeting attendance;
- work carried out as part of the various committees;
- time given;
- personal expertise and contributions to the Board's deliberations.

The functioning of the Supervisory Board is then assessed by the Chairman and the Vice-Chairman. The frequency of meetings, the members' contribution to work carried out, work methods, governance rules and the composition of the Board are reviewed carefully in order to propose the improvements deemed necessary. At the end of last year, the Chairman called on external consultants to point out and draw from governance practices implemented by companies of a similar size to the Faiveley Transport Group. Results are expected in September 2011.

Directors' fees totalling €175,000 were allocated in respect of the financial year ending 31 March 2010.

In its decision dated 28 November 2008, the Supervisory Board adopted the principles of the AFEP-MEDEF corporate governance code. This Code includes:

- the October 2003 corporate governance code for listed companies, updated in April 2010;
- the October 2008 recommendations on Directors' remuneration.

The Supervisory Board has reservations concerning the rule against holding a term of office and an employment contract concurrently: it favours suspending employment contracts of senior executives at the time of their appointments as Chairman and Chief Executive Officer or as Chief Executive Officer, where their seniority in the business is at least ten years at the time of their appointment.

Management Board members do not benefit from specific remuneration attached to their terms of office as Directors of the Company. In addition, Board members who are also directors of the Group's companies do not receive specific benefits as part of their terms.

The Management Board meeting of 29 December 2005 approved the terms of its internal regulations, by which all members are individually bound. The internal regulations specify the powers and duties of the Management Board and the procedures governing meetings and decision-making. The internal regulations are available at the registered office of the Company.

With regards to third parties and according to the bylaws, only the Chairman of the Management Board may represent the Company, unless decided otherwise by the Supervisory Board. Robert Joyeux, Chairman of the Management Board, is the sole Chief Executive Officer and has no specific limits on his powers.

Management Board members were reappointed for a three-year term during a deliberation of the Supervisory Board on 28 November 2008. Thierry Barel, Chief Executive Officer of the Company, was appointed member of the Management Board on 22 September 2009 for a three-year period. The Management Board is currently made up of three people.

The Remuneration Committee is in charge of defining the share purchase and subscription option policy, as well as the policy governing the allocation of free shares to Directors and Executive Officers, in close collaboration with the Group's Human resources Department. This policy is then implemented by the Management Board, which acts strictly within the bounds of the delegation granted to it by the shareholders' General Meeting.

2. Internal control procedures and risk management

The Company has developed internal control procedures and risk management to ensure rigorous financial management and the control of risks associated with its business activities. The procedures are also aimed at ensuring that reliable information is provided regarding the Company's financial situation and in the financial statements given to shareholders.

The benchmark for internal control adopted by the Company is that of the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In this document, internal control is a process aimed at ensuring the following objectives are met: the realisation and optimisation of transactions, reliability of financial information and compliance with the law and regulations in force. As with all systems of internal control, it cannot provide an absolute guarantee that all risks will be eliminated. As a result, the Group's system of internal control respects the operational framework recognised by COSO: organisation and principles of control, risk assessment processes, the control activities themselves, documentation and communication of rules regarding control, supervision of the systems of internal control.

In the area of internal control, the Company uses the general principles defined by the AMF (French Financial Market Authority).

2.1. GROUP OBJECTIVES FOR INTERNAL CONTROL PROCEDURES AND RISK MANAGEMENT

The objectives of the internal control procedures implemented within the Faiveley Transport Group, which represents 100% of Group sales, are as follows:

- to establish accurate, reliable reporting of the Company's accounting and financial information;
- to ensure that the information forwarded to the Supervisory Board of Faiveley Transport and to General Meetings is reliable and is a true reflection of the Company's business;
- to ensure that the operations carried out within the Company comply with current legislation and regulations in force and with the objectives laid down by General Management;
- to ensure adequate internal distribution of relevant and reliable information, enabling each participant to fulfil his/her responsibilities;
- to establish an organisation with clearly defined responsibilities, adequate resources and expertise, one which relies on appropriate IT systems, operating procedures and methods, and appropriate tools and practices;
- to compile and analyse major identifiable risks in light of the Company's objectives and to ensure that procedures are implemented to manage these risks;
- to ensure that published financial statements and other information disclosed to the market is reliable.

One of the main objectives of the internal control system is to anticipate and manage the risks inherent to the Company's business and the risk of mistakes or fraud, particularly in the area of accounting and finance.

Internal control is an integral part of the Group's corporate governance strategy. In addition to the specialised committees described below, the executives of Faiveley Transport have formed a Steering Committee that meets every month in order to monitor the operational and financial performance of the railway business in a very detailed and consistent manner.

2.2. INTERNAL CONTROL PROCEDURES AND RISK MANAGEMENT

The objective of internal control is to ensure the prevention and management of risks arising from the operations of Group entities and the risk of errors or fraud, particularly of a financial and accounting nature. It seeks to ensure compliance with the law and applicable regulations, as well as the reliability of financial and accounting information.

The Group has set up an organisation, procedures and processes with the purpose of identifying, evaluating and reducing risks. The goal is also to allocate the resources necessary to manage risks, in line with the strategic and operational objectives of the Group.

However, as with all systems of internal control, it can offer reasonable assurance but cannot provide an absolute guarantee that these risks will be fully eliminated.

The internal control and risk management mechanisms in place within the Group are thus aimed at promoting:

- internal control in terms of the control environment: the Group's control environment is based on:
  - reference documents comprising, among others, a body of rules summarised in a 'Corporate Manual' including the best practice rules for management, submission of tenders, quality procedures, human resource management, insurance and finance;
  - "Financial and Accounting Policies", a standardised benchmark document for the Group, covering accounting standards, accounting rules and practices, consolidation, reporting and cash management procedures;
- a clear internal organisation appropriate to the Group's business model;
- information systems adapted to the Group's business and organisation;
- identification of major Group risks (market, industrial and environmental risks);
- protection and monitoring activities: IT security, the implementation of corrective action plans by operational entities as part of their continuous improvement;
- internal communication: the Group distributes relevant and reliable information mainly via the Group Intranet site. An internal newsletter is issued regularly within the Group.

Moreover, in its control functions, the Supervisory Board now follows the principles set down by the new corporate governance code for listed companies, published by AFEP-MEDEF in December 2008 and updated in April 2010.

2.3. IMPLEMENTATION OF INTERNAL CONTROLS

In order to meet objectives and to structure internal control activities, the Group has two types of procedures:

- operational procedures;
- internal control procedures relating to the preparation and processing of financial and accounting information.

2.3.1. Content of operational procedures

The principal standardised operating procedures are as follows:

- a "Corporate" manual whose major components concern:
  - management organisation, and the roles and responsibilities of their major duties;
  - key performance indicators;
  - key processes: "management reviews" and "projects reviews";
  - sales-related procedures;
  - financial procedures;
  - quality management;
  - health, safety and environmental procedures;
  - human resources procedures;
- compilation of "Quality" instructions describing certain common operational processes for the entire Group;
- an "Insurance" manual, which was redrafted after all Group policies for civil liability and damages were placed with the same broker;
- a collection of procedures and rules implemented by most Group subsidiaries as part of ISO certification. These rules relate to the management of production and purchasing.

2.3.2. Internal control procedures in respect of the preparation and processing of financial and accounting information

Since 2006, a reporting and consolidation package integrated into Hyperion has been in operation. This constitutes a very significant improvement, both in terms of timing and quality of data production, and in terms of the evaluation of subsidiaries' performance and projects.

2.3.3. Risk management tools

The identification of risks was significantly stepped up in 2008 and structures were gradually set up: work undertaken was designed to both define the rules of internal control, and the standardisation and enhancement of IT security directly related to accounting and financial information.

In 2007, the Group started to work on the harmonisation and the gradual updating of all its technical and IT architecture. Standard IT tools (ERP) have been rolled out in operational units. The improvement in IT tools thus contributed to the structuring of internal controls and led in time to the achievement of productivity gains.

The importance of the changes brought about currently requires close follow-up by the Group's management of the processes and rollout of the base configuration.

The Group has already set up a framework of procedures to improve its internal controls, to harmonise practices within the Group and to optimise its operations.

The Group gives special attention to the management of human resources, and has set up procedures linking the remuneration of operational managers with the assignment of stated objectives and the measurement of their achievement, thus ensuring consistency in objectives and in the remuneration policy for managers in the entire Group.

Monthly reporting by subsidiaries is consolidated using a unique tool (Hyperion) within the Group's control and management area.

The Group has set up a number of key performance and financial indicators to enable monitoring in a common language within the Group. It also set up a budgetary process that changed significantly in 2005. This process is carried out with the participation of operational management and with strategic overviews decided by the Management Board. Budgetary reviews are carried out by the legal entity with the involvement of the Executive Committee.

A benchmark of key controls is being prepared, with the objective being to identify all the essential controls of the Group on processes considered critical by the Group's Management (Faiveley Management System). This includes dividing the business into key processes and sub-processes considered applicable to the entire business at a central and local level. This process is already in place within industrial management and shall be rapidly rolled out within the Finance Department.

Lastly, an approval process for tenders was set up at the commercial and financial level to monitor the conditions under which the various product lines offer their equipment and services to customers.

2.4. INTERNAL CONTROL PROCEDURES AND RISK MANAGEMENT FOR THE PREPARATION AND PROCESSING OF ACCOUNTING AND FINANCIAL INFORMATION

Accounting and financial operations, as described in the quality manual, are carried out by the Finance Department for the parent company, subsidiaries and all entities.

This department is responsible for:
- supplying General Management at all times with relevant documents and indicators to manage the company's operations;
- continually anticipating and contributing to the defining of action plans, their implementation and ongoing monitoring with the company's General Management;
- ensuring the reliability of information supplied by the Company's accounting and financial information system.

The financial statements are drawn up according to:
- IFRS applicable to listed companies;
- rules laid down by Faiveley Transport, regarding the drafting of interim and annual financial statements for the parent company and subsidiaries.

Within the framework of the changeover to IFRS within the Group, the Finance Department has already introduced a number of accounting procedures and regulations which are part of the internal control framework and are covered by the audits conducted by Group and local auditors.

The preparation of accounting and financial information is carried out within the Finance Department by the Consolidation Department, which summarises accounting data and produces the Group's financial statements.

It forwards to plants and subsidiaries a timetable of tasks and checks to be carried out for the end of each accounting period. The timetable also schedules the work of Statutory Auditors to ensure certification within an acceptable timeframe, in order to allow for the approval of the financial statements by the Management Board.

Working under the direction of the Group's Financial Controller, the controllers at the head office supervise the monitoring and reporting of subsidiaries and projects in their area. They have the power to investigate and take action in conjunction with finance managers and controllers at subsidiaries.

Their work results in reports which provide a view of the accounting and financial position of subsidiaries and projects, of compliance with Group procedures and which define improvement plans to be carried out.

2.5. INTERNAL CONTROL PLAYERS

During the year ending 31 March 2011, the various internal control players operated as follows:

- **The Steering Committee**

The Steering Committee includes the members of the Management Board of the Company and certain members of the Supervisory Board. They meet monthly to evaluate operational and financial performance, to discuss matters and to define the strategic direction of the Group in its various businesses and in different markets, and each year, they supervise the preparation of the annual budget.

- **The Remuneration Committee:**

The Remuneration Committee has three members. It is chaired by an Independent Director, Philippe Alfroid, and has François Faiveley and Christopher Spencer as members.

This committee does not follow precise rules; it meets at least twice annually and its task is to determine the remuneration of General Management and of senior managers at the Faiveley Transport Group.

The Remuneration Committee deals specifically with the remuneration of senior executives; its task is to evaluate and confirm the allocation of the variable part of the remuneration of the Chairman of the Management Board of Faiveley Transport, based on individual performance objectives and on financial statements audited by the Statutory Auditors.

- **The Audit Committee**

The Audit and Risk Committee has four members: Christian Germa (Chairman), Maurice Marchand-Tonel, Philippe Alfroid and Christopher Spencer. Serge Choumaker, a member of the Supervisory Board representing employee shareholders, participates in his capacity as the Group's Director of Accounting & Consolidation. The operating principles of the Audit and Risk Committee are consistent with the findings of the Audit Committee's final report, published by the Financial Market Authority in July 2010.

Its specific task is to examine the interim and annual financial statements and the internal control procedures of the Faiveley Transport Group.

In order to carry out this assignment, the Audit and Risk Committee interviews the Statutory Auditors and the Chief Financial Officer of the Group, it examines the scope of the consolidated companies, it calls on external experts where necessary, and proceeds with an examination of risks and of significant off-balance sheet commitments. In addition, it examines the fees of the Statutory Auditors and the terms and conditions of their reappointment. It is also involved in the preparation of the Group's financial communication of the half-year and full-year financial statements and significant transactions (acquisitions, disposals, etc.).

The Audit and Risk Committee meets to approve the interim and year-end financial statements. It issues recommendations and prepares a report for the Supervisory Board of Faiveley Transport.

- **The Management Board of Faiveley Transport**

The Board is responsible for the organisation and the implementation of accounting and financial internal controls, as well as the preparation of the financial statements prior to their approval.

The Management Board approves the financial statements and the Supervisory Board carries out the verification and checks on the financial statements that it deems necessary.

- **The Executive Committee**

In addition to the Committees described above, there is an Executive Committee for the business, comprising the General Management, the Chief Financial Officer, and the heads of operational and product line management. It deals with all subjects concerning the market and the operations of the Company and it meets once a month.

Depending on the agenda prepared at the previous meeting, people external to the committee are invited to deal with matters within their area of responsibility.

- **The Finance Department**

Its contribution to internal control primarily consists of:
- management control: monitoring of the budgeting control process;
- accounting and consolidation: monitoring of the quality and reliability of subsidiaries' financial statements and of the consolidated financial statements;
- treasury: reliability of cash generation, delegation of authority, and management of exchange rate and interest rate risk;
- legal department: monitoring of contractual and insurance risk.

Management control is undertaken by a team of controllers at the head office and in each subsidiary. The Finance Department organises periodic reviews to monitor industrial activities and business projects. Every month it issues a report for General Management, Operational Management and Product Line Directors.

- **The Heads of Departments' Committee**

This is led by the Managing Director of each industrial subsidiary. It highlights Group indicators and deals with problems raised at previous meetings, looking at the solutions implemented. It meets once a month.

- **The Quality Department**

The quality system is steered by a quality department within every industrial subsidiary and involves the senior management of each entity and subsidiary. It is the subject of structured documentation, bringing together the description of processes as well as quality procedures.

The monitoring of the quality system is carried out by a steering committee for continuous improvement.

2.6. MONITORING OF SUBSIDIARIES

Faiveley Transport has a majority or joint shareholding in each of its subsidiaries. Therefore, it has a strong presence on the Management Board and within the managerial structure of each of its subsidiaries.

A monthly management report, D+3 then D+7, is provided to the parent company by each subsidiary. The parent company then decides whether to launch any appropriate actions depending on the information received.

In November 2010, the Audit and Risk Committee requested an external audit of the Chinese companies F.M.T. Shanghai Ltd and Qingdao Faiveley SRI Rail Brake Co. Ltd. These audits were conducted by Deloitte's Shanghai office. The findings of these audits are discussed below (2.8 External Controls).

2.7. STANDARDISATION OF INFORMATION TECHNOLOGY SYSTEMS

In spring 2007, Group Management decided to commit to a programme for the integration of IT systems for the whole Group, a change that will be rolled out over five to six years.

A global "Moving Forward" programme was initiated to:
- reduce the complexity of the Group's organisation and to gain speed;
- standardise processes and share information;
- create more added value for the Group and its customers.

This programme is divided into five major projects, each one led by a project manager, and it uses tools that are common to all sites (Enterprise Resource Planning, Product Data Management, Infrastructure, Business Intelligence and Reporting).

2.8. EXTERNAL CONTROLS

External controls are carried out by certification agencies. The majority of the companies within the Group have ISO 9001-2000 certification and the Group quality management system is regularly audited by an external agency.

At 31 March 2011, more than ten Group entities, including the Group's main industrial sites were subject to ISO 14001 certification related to environmental safety management systems.

The Deloitte firm in Shanghai conducted an audit of certain Chinese subsidiaries of the Group following a request by the Audit Committee. Its findings were shared with members of the Audit Committee on 16 December 2010. Based on this information, a number of corrective actions were initiated in early January 2011, in order to strengthen and/or implement new and more satisfactory controls. These actions are expected to continue for the year 2011/2012. At the same time, the results of these audits will be used to establish business surveys and send them to other subsidiaries. Based on the responses imparted to the Group, a suitable action plan will be developed for each subsidiary in order to correct any weaknesses or deficiencies found.

2.9. WORK OF THE STATUTORY AUDITORS

The Statutory Auditors are Deloitte and ECA. They act as Statutory Auditors to certain subsidiaries included in the consolidation and may carry out audits of other subsidiaries. This coverage has enabled the harmonisation of controls carried out for the entire Group and has facilitated the reporting of information made at the time of on-site checks. The work of the Statutory Auditors is the subject of numerous and regular exchanges with the Finance Department and the Audit and Risk Committee.

2.10. SHAREHOLDERS INFORMATION

All information on specific terms and conditions relating to shareholders' participation in general meetings is included in the Company's bylaws, in particular under Title V, Articles 26 and subsequent.

Please note also that items likely to have an impact in the event of a public offer, pursuant to Article L225-100-3 of the Commercial Code, appear in chapter 6 of the Company's Reference Document.

2.11. ACTION PLAN FOR THE FORTHCOMING FINANCIAL YEAR

The operational and financial management of Faiveley Transport continues to introduce the new corporate procedures and rules within the Group. With regard to this, the Moving Forward project will result in a redefinition of key processes of the business, and as a consequence, to changes in responsibilities and in organisation. These actions are designed to improve the Group's performance.

Operational Management continues to be strengthened to support the Group's growth and to improve its performance.

The Finance Department focuses its efforts on supporting the "Moving Forward" programme and Treasury management.

The preparations for the rollout of the new ERP "M3" will speed up the implementation of homogeneous processes within the various activities and will benefit internal audit. Now, two of the Group's entities use the new ERP Movex. These companies are Faiveley Transport Leipzig and Faiveley Transport Gennevilliers. At the same time, the holding company, Faiveley Transport has developed a new cash management tool (KTP) to facilitate reliable daily cash management and monitoring of hedges.

The Group pays particular attention to the implementation of procedures that have been prepared or adapted to changes in the organisation. Efforts made will be continued and stepped up in 2011/2012.

In addition to the implementation of business surveys to strengthen internal audit in all Group subsidiaries, it is also expected that the statutory auditors, as part of their work, will carry out internal audit reviews. Each year one or two topics will be chosen by the Group's Finance Department in connection with the Audit and Risk Committee and in cooperation with auditors. Reports will be prepared by the auditors for each of the subsidiaries audited. Action plans will be implemented based on these results and in accordance with their recommendations.

Chairman of the Supervisory Board

STATUTORY AUDITORS' REPORT

PREPARED IN ACCORDANCE WITH ARTICLE L225-235 OF THE FRENCH COMMERCIAL CODE *(CODE DE COMMERCE)*, ON THE REPORT PREPARED BY THE CHAIRMAN OF THE SUPERVISORY BOARD. FOR THE YEAR ENDED 31 MARCH 2011

This is a free translation into English of the statutory auditors' report issued in French prepared in accordance with Article L.225-235 of French company law on the report prepared by the Chairman of the the Supervisory Board on the internal control and risk management procedures relating to the preparation and processing of accounting and financial information issued in French and is provided solely for the convenience of English speaking users.

This report should be read in conjunction and construed in accordance with French law and the relevant professional standards applicable in France.

To the shareholders,

In our capacity as statutory auditors of Faiveley Transport and in accordance with Article L225-235 of the French commercial code (code de commerce), we hereby present our report prepared by the chairman of your company in accordance with Article L225-68 of the French Commercial Code (code de commerce) for the year ended on 31 March 2011.

It is the chairman's responsibility to prepare, and submit to the Supervisory Board for of approval, a report on the internal control and risk management procedures implemented by the company and containing the other disclosures required by Article L225-68 of the French Commercial Code (code de commerce), particularly in terms of corporate governance.

It is our responsibility:
– to report to you on the information contained in the Chairman's report in respect of the internal control and risk management procedures relating to the preparation and processing of the accounting and financial information, and
– to attest that this report contains the other disclosures required by Article L225-68 of French Commercial Code (code de commerce), it being specified that we are not responsible for verifying the fairness of these disclosures.

We conducted our work in accordance with professional standards applicable in France.

Information on the internal control and risk management procedures relating to the preparation and processing of accounting and financial information

The professional standards require that we perform the necessary procedures to assess the fairness of the information provided in the chairman's report in respect of the internal control and risk management procedures relating to the preparation and processing of the accounting and financial information. These procedures consisted mainly in:
– obtaining an understanding of the internal control and risk management procedures relating to the preparation and processing of the accounting and financial information on which the information presented in the Chairman's report is based and the existing documentation;
– obtaining an understanding of the work involved in the preparation of this information and the existing documentation;
– determining if any significant weaknesses in the internal control procedures relating to the preparation and processing of the accounting and financial information that we would have noted in the course of our engagement are properly disclosed in the chairman's report.

On the basis of our work, we have nothing to report on the information in respect of the company's internal control and risk management procedures relating to the preparation and processing of accounting and financial information contained in the report prepared by the chairman of the supervisory board in accordance with article L225-68 commercial code (code de commerce).

Other disclosures

We hereby attest that the Chairman's report includes the other disclosures required by Article L225-68 of the French Commercial code *(code de commerce)*.

Neuilly-sur-Seine et Dijon, 20 July 2011

TOTAL	**314,945**	**314,945**	**806,208**	**806,208**

* The variable part is measured in relation to both Group and individual objectives. Group objectives are based on EBITDA and cash generation. Individual objectives are specified at the start of each financial year with line supervisors and are also presented to the Remuneration Committee in respect of Executive Committee members. A decision on the final vesting of the variable part of remuneration based on individual objectives (bonus) is reached following individual interviews and, as regards Group objectives, based on the audited financial statements. These recommendations are subsequently debated within the Remuneration Committee. The Chairman of the Remuneration Committee then presents a summary to the Supervisory Board.

** Erwan Faiveley received Directors' fees in 2009/2010 for participating in various steering committees and for contributing to the Supervisory Board's work.

FINANCIAL REPORT

MANAGEMENT REPORT OF THE MANAGEMENT BOARD

++++++++

To the Combined General Meeting of 14 September 2012

Ladies and gentlemen,

We have convened this General Meeting, in compliance with legal and regulatory requirements, to submit for your approval the Faiveley Transport annual and consolidated financial statements for the year ended 31 March 2012.

These financial statements have been prepared in accordance with Articles L. 232-1 and L. 233-16 of the Commercial Code.

The parent company and consolidated financial statements were approved by the Management Board on 6 June 2012, and were presented to the Supervisory Board and approved at their meeting of 6 June 2012.

This report has been compiled pursuant to Articles L. 232-1 paragraph 2 and L. 233-26 of the Commercial Code. It was made available to the shareholders prior to the General Meeting in accordance with legal and regulatory requirements.

The annual financial statements of Faiveley Transport and the consolidated financial statements have been compiled in accordance with legal and regulatory rules of presentation and valuation.

- Changes in Group governance:
  Robert Joyeux resigned from his duties as Chief Executive Officer and Chairman of the Management Board of Faiveley Transport on 31 March 2011. On 1 April 2011, Thierry Barel, previously Deputy Chief Executive Officer, was appointed Chief Executive Officer and Chairman of the Management Board. On the same day, Guillaume Bouhours was appointed as a member of the Management Board.

- Changes in the share capital of Faiveley Transport:
  As part of the acquisition of US-based Graham-White Manufacturing Co., finalised on 3 February 2012, 209,441 new Faiveley Transport shares, representing 1.45% of the Company's share capital, were issued to Graham-White Manufacturing Co.'s former shareholders.

  The share capital of Faiveley Transport now amounts to €14,614,152.

- On 27 July 2011, Faiveley Transport signed an amendment to the syndicated credit facility set up in December 2008. This amendment was granted unanimously by the nine contributing banks, thus confirming their confidence in the Group's credit rating.

  The total amount of funding remained unchanged, including an amortising term loan of €343 million (balance at 30 June 2011) and a revolving credit facility of €49 million.

  The main amendments included:
  - a 2.5-year extension of the loan maturity to 23 June 2016, instead of 23 December 2013,
  - a more favourable amortisation profile, with mandatory annual instalments of €35 million, compared to €49 million previously,
  - new covenants providing additional flexibility, with a leverage ratio (Net Debt/EBITDA) not exceeding 2.5x and a gearing ratio (Net Debt/Equity) not exceeding 150%,
  - the option of using the revolving facility for merger and acquisition transactions,
  - the release of the pledging on shares of operating subsidiaries.

  This refinancing transaction, carried out at favourable financial conditions, provides the Group with increased financial flexibility for the next five years and with the necessary resources to continue to expand, through both organic growth and acquisitions.

  During the second half of the year, the Group put several financing facilities into place:
  - a €20 million revolving facility, maturing on 18 November 2016, for the Group's general requirements or potential acquisitions;
  - a €15 million revolving facility maturing on 23 June 2016, for the Group's general requirements or potential acquisitions, to be repaid in annual instalments of €1.5 million from 23 December 2012;
  - a €30 million bridge loan to finance the acquisition of Graham-White Manufacturing Co., maturing on 14 January 2013 unless the acquisition is refinanced prior to that date. Since refinancing took place on 12 April 2012 (see below § A.4.4.2 Financing conditions), this loan was repaid on 13 April 2012.

- On 29 August, Wabtec Corporation appealed against the verdict of the New York Court, which ordered this company to pay damages of USD 18.1 million plus interest, i.e. a total of USD 19.6 million to Faiveley Transport USA, Faiveley Transport Nordic, Faiveley Transport Amiens and Ellcon National for trade secret misappropriation, unfair competition, and unjust enrichment. At the same time, Faiveley Transport also appealed against the verdict of the judge of the New York Court, who overruled Faiveley's claim for punitive damages.

- The Combined General Meeting of 14 September 2011 delegated powers to the Management Board for the allocation of ordinary shares of the Company free of charge, either new or already issued, within the limit of 1% of the share capital of the Company on the day of said General Meeting.

At its meeting held on 4 January 2012, the Management Board decided to implement this delegation and to allocate free shares. This decision was made as part of an employee shareholding plan aimed at a broader population of executives. The programme provides that an employee holding shares in the Company in a personal capacity may be granted two free shares for every share held, not exceeding a limit set for each level of management.

At its meeting held on 5 March 2012, the Management Board set the final list of beneficiaries and the number of free shares to be granted. A total of 79,224 shares are thus to be granted to 151 beneficiaries. The allocation of the shares will be final at the end of a two-year vesting period, or four years for non-French residents.

Thierry Barel and Guillaume Bouhours, both beneficiaries of free shares under this plan, are subject to an additional retention condition in their capacity as executive officers. They must retain at least 50% of shares granted to them by the Management Board under this new plan after the end of the vesting period defined by plan regulations. This rule will apply as long as they do not hold shares of the Company, acquired in the various plans to grant stock options or free shares of the Company, worth at least the equivalent of one year's net salary.

A. GROUP OPERATIONS 2011/2012 – CONSOLIDATED FINANCIAL STATEMENTS

In accordance with legal provisions, the financial statements of companies under direct or indirect control of Faiveley Transport were consolidated at 31 March 2012 with those of the parent company. The principles and conditions of this consolidation for the financial year 2011/2012, the related consolidation scope and the restatements undertaken in accordance with the accounting techniques of consolidation are presented in the notes to the consolidated financial statements.

A.1. Consolidation methods

The year ended 31 March 2012 and had a normal duration of 12 months.

A.2. Change in Group structure

- Acquisition of subsidiaries:
  In the fourth quarter of 2011/2012, Faiveley Transport announced the acquisition of 100% of the share capital of American company Graham-White Manufacturing Co., and its subsidiaries. Graham-White Manufacturing Co. employs more than 300 people and operates six facilities across the United States, with a central manufacturing site located in Salem, Virginia. Graham-White Manufacturing Co. generates annual sales of over USD 70 million and specialises in the design and manufacture of compressed air drying technology for railway braking systems. The company is a leading provider of brake components in the US locomotive and rail freight markets.

  With this acquisition, Faiveley Transport has strengthened its position in the US market, which opens up significant new opportunities thanks to an enlarged product range and complementary customer bases.

  The cost of this acquisition was USD 118.5 million, including USD 14.6 million (i.e. €11.1 million) as newly-issued Faiveley Transport shares.

- On 1 April 2011, two Group entities changed their functional currency. Faiveley Transport Malmö now holds its accounts in Euro and Faiveley Transport Canada in US Dollars.

A.3. Subsidiary operations

- **Annual sales**

By region of delivery	2011/2012	2010/2011
Europe	544,978	557,966
Americas	106,263	79,141
Asia-Pacific	243,043	268,907
Rest of World	6,239	7,858
TOTAL GROUP	900,523	913,872

For the financial year 2011/2012 as a whole, Group sales were €900.5 million, down 1.5% compared to the previous year, comprising a 2.3% decline on a like-for-like basis. Foreign exchange had a negative effect of 0.6% over the full year, while acquisitions made a positive contribution of 1.5%.

By geographic region and on a like-for-like basis, this change in sales reflects diverse developments:

- Sales declined moderately in Europe (down 3% on a like-for-like basis).
  Strong growth in Italy and Eastern European countries offset the significant decline in deliveries to Spain, as this country remained the most severely affected by the economic crisis within the railway industry. France, still the Group's leading market (17% of total sales), recorded a slight decline in sales due to the delivery of major projects in the previous financial year.

- Sales in the Asia-Pacific region retreated by 9% compared to the previous year, with a substantial decline in deliveries to China and India, which was offset by other countries in the region, particularly Russia and the Middle East.
  As previously announced, the events that took place at the Ministry of Railways in China during the year had an adverse effect on business activity, with an overall decline of 24% in sales. In India, the decline in sales was due to unfavourable comparables, following deliveries for the Delhi metro in 2010/2011.

- Sales in America posted strong organic growth of 27%. This significant increase was primarily due to the success of the joint venture with Amsted Rail and the recovery of the US freight market.

The Services business accounted for 36% of Group sales, due to organic growth of 6% during the financial year, reflecting the strong resilience of its markets and the success of the strategy of expanding the range of services.

• **Sales by activity**

	2011/2012	2010/2011
Energy & Comfort	19%	18%
Brakes & Safety	26%	27%
Access & Information	19%	22%
Services	36%	33%

The relative weight of each Group activity was similar to that of the previous year. The relative share of the Services activity increased, due to organic sales growth of 6% over the year. This activity continues to grow steadily due to the expansion of its range of services and the growth in the installed base of Group products.

A.4. IFRS consolidated financial statements of Faiveley Transport

4.1. PUBLISHED FINANCIAL STATEMENTS

• **Income statement**

	2011/2012	2010/2011
Sales	**900,523**	**913,872**
EBITDA* *as % of sales*	108,219 *12.0%*	142,169 *15.6%*
Profit from recurring operations *as % of sales*	**94,689** *10.5%*	**129,782** *14.2%*
Operating profit *as % of sales*	93,272 *10.4%*	126,666 *13.9%*
Net finance cost	(15,185)	(13,425)
Income tax	(26,912)	(32,096)
Net profit from continuing operations *as % of sales*	**51,175** *5.7%*	**81,145** *8.9%*
Net profit	**51,175**	**81,145**
Minority interests	(3,747)	(5,462)
GROUP SHARE OF NET PROFIT *AS % OF SALES*	**47,428** *5.3%*	**75,683** *8.3%*
Number of shares	14,012,090	13,941,934
Net earnings per share	**3.38**	**5.43**

* Operating profit + amortisation and depreciation.

– Operating profit

Profit from recurring operations totalled €94.7 million, or 10.5% of sales.

After deducting restructuring costs and adding net proceeds from the disposal of non-current assets, operating profit was €93.3 million, or 10.4% of sales, a decline of 3.5 points of operating margin.

This decrease was primarily due to project execution issues in China in the platform doors unit, and, to a lesser extent, to the decline in business activity in the Chinese and Spanish markets.

The difficulties encountered on platform door projects managed in China have led to significant margin revisions on these contracts. In order to rapidly rectify this situation, the Group has taken drastic reorganisation and restructuring measures.

The various items making up operating profit may be analysed as follows:

	2011/2012	2010/2011
Sales	900,523	913,872
Gross profit	233,801	261,468
Administrative costs	(66,607)	(65,564)
Sales and marketing costs	(52,010)	(50,236)
R&D costs	(11,111)	(11,638)
Other operating income and expenses from recurring operations	(9,384)	(4,248)
Profit from recurring operations	**94,689**	**129,782**
Non-recurring operating income and expenses	(1,417)	(3,116)
OPERATING PROFIT	**93,272**	**126,666**

- Gross profit

The Group's gross profit amounted to €233.8 million for the year to 31 March 2012 (26.0% of sales), compared to €261.5 million (28.6% of sales) for the year to 31 March 2011.

The 2.6 percentage point decline in gross margin during the year was primarily due to revised margins for the platform door activity in China, as specified above. Excluding this major impact, The Group's margins declined slightly due to an unfavourable project and product mix.

- Administrative costs

Administrative costs amounted to €66.6 million during 2011/2012 compared to €65.6 million during the previous financial year, an increase of 1.6% over the financial year. On a constant group structure basis (excluding the acquisition of Graham-White Manufacturing Co.), these costs only increased by 0.6%, due to the proactive cost-cutting policy implemented by the Group. These costs represented 7.4% of sales, compared to 7.2% for the year to 31 March 2011.

- Sales and marketing costs

Sales and marketing costs were €52 million during 2011/2012 compared to €50.2 million during the previous financial year, which was an increase of 3.5% over the period. These costs represented 5.8% of sales for the year to 31 March 2012 compared to 5.5% for the year to 31 March 2011.

This moderate increase (up 2.5% on constant group structure, excluding the acquisition of Graham-White Manufacturing Co.) was due to the continued strengthening of the Group's presence in strategic growth regions (Germany, Russia, China and the US), as well as significant tendering activity during the financial year.

- Research and development costs

Research and Development costs are taken to the balance sheet if they meet the capitalisation criteria set by IAS 38. If not, they are recognised as expenses.

The Group's research and development costs that were recognised as expenses represented €11.1 million during the 2011/2012 financial year (1.2% of sales), compared to €11.6 million (1.3% of sales) for the year to 31 March 2011.

- Other operating income and expenses

Other operating income and expenses correspond to a net expense of €9.4 million during the period, compared to a net expense of €4.2 million for the year to 31 March 2011.

The increase in this item during the financial year was primarily due to higher provisions unrelated to contracts, the reclassification of the profit-sharing charge to this category and the decline in other operating income.

- Profit from recurring operations

As a result, profit from recurring operations decreased by 27% to €94.7 million, i.e. 10.5% of sales, compared to €129.8 million for the year to March 2011, i.e. 14.2% of sales.

- Non-recurring operating income and expenses

The majority of non-recurring operating expenses was due to restructuring costs and gains and losses from the disposal of property, plant and equipment and intangible assets.

Restructuring costs amounted to €1.2 million during the period compared to €2.6 million for the previous year. During the 2011/2012, these restructuring costs primarily related to the reorganisation of Faiveley Transport Italia.

The loss on disposal of non-current assets was €0.2 million, compared to €0.5 million for the year to 31 March 2011.

– Consolidated net profit

The consolidated net profit was €51.2 million, compared to €81.1 million in the previous financial year, a decline of 36.9%.

Net profit was influenced by the following items:

- Net finance cost

The net finance cost amounted to €15.2 million for the year to 31 March 2012, compared to €13.4 million for the year to 31 March 2011. This charge is analysed as follows:

- the net cost of financial debt for the year, i.e. €(10.7) million, compared to €(10.8) million in the previous year;
- a slightly unfavourable realised net exchange loss, offset by exchange gains, for €(0.3) million;
- the increase in value of derivatives, decreased by unrealised exchange losses, resulting in a net impact of €(1.7) million;
- other financial income and expense items, mainly comprising bank guarantees, interest on pension commitments, the effect of the reversal of discounting the value of put options held by minority shareholders and other financial income and expenses, resulting in a net impact of €(2.5) million.

- Income tax

The income tax charge declined over the period and was €26.9 million, compared to €32.1 million for the year to 31 March 2011. This was due to the decrease in profit before tax from €113.2 million for the year to 31 March 2011 to €78 million for the year to 31 March 2012. As a percentage, the tax rate was 34.4% for the year, compared to 28.3% in the previous year.

This increase may be analysed as follows:

- The losses recorded by the platform door subsidiaries in China, FTMT Shanghai and Faiveley Transport Far East, which benefit from a low tax rate.
- The recognition of minimal deferred tax assets for these two subsidiaries, calculated based on tax losses carried forward.
- For French subsidiaries, the exceptional 5% contribution of income tax and the relative significance of the CVAE charge, which has been recognised as income tax since the 2010/2011 financial year, with similar amounts in both years (approximately €2 million).
- The impact of tax audits completed during the period, both in France and Germany.

The income tax rate paid was 38.1%, compared with 27.5% for the year to 31 March 2011.

- Net profit from discontinued operations

Nil.

- Minority interests

Minority interests comprise shares held by minority shareholders in Shanghai Faiveley Railway Technology (51%-owned), Faiveley Transport Schweiz AG (80%-owned), Nowe GmbH (75%-owned) and Amsted Rail-Faiveley LLC (67.5%-owned). Profits attributable to minority interests decreased during the period due to the decline in earnings reported by Nowe and Shanghai Faiveley Railway Technology.

– Group share of net profit

Taking the above-mentioned items into account, the Group's consolidated net profit for the year was €47.4 million, compared to €75.7 million the previous year.

Net earnings per share was €3.38 compared to €5.43 for the year to 31 March 2011, a decline of 37.7%. Net earnings per share is calculated after deducting treasury shares held by Faiveley Transport at the end of the financial year, i.e. 427,528 shares at 31 March 2012 and 462,777 shares at 31 March 2011.

• Summarised balance sheet

	2011/2012	2010/2011
Goodwill	648,981	562,028
Net non-current assets	114,752	113,381
Deferred tax assets	43,598	29,848
Current assets	457,151	433,546
Cash and cash equivalents	210,247	198,382
TOTAL ASSETS	**1,474,729**	**1,337,185**
Equity	505,145	453,275
Provisions	116,566	107,667
Deferred tax liabilities	22,090	17,508
Financial debt	448,285	393,752
Current liabilities	382,643	364,983
TOTAL EQUITY AND LIABILITIES	**1,474,729**	**1,337,185**

– Goodwill

Goodwill increased by €87 million, from €562 million at 31 March 2011 to €649 million at 31 March 2012.

This growth was primarily due to:
- the recognition of a USD 98 million (€73 million) increase in the acquisition goodwill following the acquisition of Graham-White Manufacturing Co.;
- the restatement of the acquisition goodwill of Faiveley Transport Gennevilliers for €12.4 million;
- the adjustment of Amstel Rail-Faiveley LLC's acquisition goodwill during the allocation period, for €(0.4) million, being USD (0.5) million;
- the translation adjustment of the Ellcon National and Amsted Rail-Faiveley LLC goodwill (assessed in USD) for €2 million.

– Net non-current assets

Net non-current assets increased from €113.4 million at 31 March 2011 to €114.8 million at 31 March 2012, an increase of €1.4 million.

The constituents of non-current assets are detailed in the Notes E2, E3 and E4, respectively, to the consolidated financial statements.

– Working capital requirements (WCR)

At 31 March 2012, the net WCR[1] was €65.2 million, an increase of €9.2 million compared to 31 March 2011. This change was primarily due to an increase in projects work-in-progress (up €25.1 million) following the launch of the engineering phase of numerous projects, partly offset by an increase in customer advances (€11.7 million), which are intended to finance this initial phase for major projects.

– Cash and cash equivalents

Analysis of cash and cash equivalents at 31 March 2012 (€ thousands):

Short-term investments	41,080
Factoring	50,205
Banks (available cash)	118,817
Cash	144
TOTAL CASH AND CASH EQUIVALENTS	**210,246**

At 31 March 2012, the amount of factoring was €50.2 million, compared to €45.7 million at 31 March 2011. No funds were drawn down from the factoring facility at 31 March 2012. The Group completed the deconsolidation process by factoring receivables on one-off bases for a total of €40.2 million, compared to €50.2 million at 31 March 2011.

– Equity

Equity amounted to €505.1 million at 31 March 2012, compared to €453.3 million at 31 March 2011, an increase of €51.8 million.

This movement is primarily due to the impact of:
- the net profit for the year: €51.2 million;
- the capital increase following the part payment in shares of former Graham-White Manufacturing Co. shareholders: €11.1 million;
- the payment of a cash dividend to shareholders of the parent company and other minority shareholders: €(18.1) million;
- the exercise of stock options during the year: €(1.3) million;
- the movement in translation differences: €5.4 million;
- the movement in minority interests, for €0.9 million, following the appraisal of the put option held by minority interests in Nowe GmbH and Faiveley Transport Schweiz AG.

– Provisions

At 31 March 2012, provisions totalled €116.6 million, compared to €107.7 million at 31 March 2011, a net increase of €8.9 million.

The various items comprising this movement may be analysed as follows:
- €4.8 million increase in provisions for completed contracts;
- €0.1 million decrease in provisions for pension commitments;
- €0.3 million decrease in provisions for restructuring;
- €4.5 million increase in other provisions for risks and charges.

– Net financial debt

Net financial debt, as defined in Note E.13.4 to the consolidated financial statements, increased by €43.6 million, from €169.8 million at 31 March 2011 to €213.4 million at 31 March 2012.

This change was due to:
- a €55.6 million increase in borrowings;
- an €11.9 million increase in cash and cash equivalents;
- a €0.2 million increase on financial receivables.

From an economic point of view, this increase in net financial debt during the year was due to additional borrowings related to the acquisition of Graham-White Manufacturing Co. Excluding this acquisition, financial debt would have decreased by €34 million during the year, thanks to cash generated by operations.

As a result, the Group's financial structure changed during the year:
- the net debt to EBITDA ratio underlying the level of bank margin reached 1.77 at 31 March 2012 compared to 1.15 at 31 March 2011;
- the net debt to equity ratio (gearing ratio) was 42.2% at 31 March 2012, compared to 37.5 % at 31 March 2011.

From a financial point of view, Group equity includes treasury shares, which are held for transfer as part of the share purchase or subscription option plans. The exercise of share options (207,035 at the end of March 2012) would result in an improvement of Group cash and cash equivalents by €9.9 million. The value of treasury shares not allocated amounted to €7.5 million at 31 March 2012 share price (including treasury shares held as part of the liquidity contract).

(1) Calculated based on net balance sheet values, on a current basis and after deducting losses on completion up to the value of projects in progress. The WCR used in the cash flow statement presented in the consolidated financial statements has been calculated excluding changes in group structure, movements in foreign exchange and without deducting provisions for losses on completion deducted from the asset.

• **Cash flow statement**

	2011/2012	2010/2011
Net profit	**51,175**	**81,145**
+ Movements in amortisation, depreciation and provision charges and others	18,165	16,616
Self-financing capacity	**69,340**	**97,761**
+ Changes in WCR	(4,030)	(4,106)
Net cash from operating activities	**65,310**	**93,655**
Purchase of PPE and intangible assets	(16,920)	(17,749)
Movement in other financial assets	204	(1,184)
Net cash from (used in) acquisitions/ sales of subsidiaries and minority interests	(77,608)	(5,001)
Net cash used in investing activities	**(94,324)**	**(23,934)**
Proceeds from issue of share capital	–	–
Sale (purchase) of treasury shares	932	(14,235)
Change in share premium	–	–
Other equity movements	(104)	5,527
Cash dividends paid	(18,094)	(17,024)
Movement in borrowings	57,707	(53,879)
Net cash from (used in) financing activities	**40,441**	**(79,611)**
Net foreign exchange difference	1,169	13,358
Impact of increase/(decrease) in value of cash equivalents	1,516	(2,483)
Cash and cash equivalents at start of period	**192,711**	**191,726**
CASH AND CASH EQUIVALENTS AT END OF PERIOD	**206,823**	**192,711**

– **Self-financing capacity**

At 31 March 2012, self-financing capacity was €69.3 million, a significant decline of 29% compared to the year-end at 31 March 2011 (€97.7 million).

This change was due to the decline in 2011/2012 net profit, i.e. €51.2 million, compared to €81.1 million in the previous year, offset by a slight €1.5 million reduction in provisions for operating assets, liabilities and charges and deferred tax. Amortisation and provision charges were similar in both years.

– **Net cash from operating activities**

Excluding the change in provisions on operating assets and the impact of IAS 32/39, WCR increased by €4 million. This primarily resulted from a significant increase in projects work-in-progress, linked to the capitalisation of engineering and project management costs in the initial stages of major projects awarded to the Group over the last two years. This effect was partly offset by an improvement in other operating items of WCR.

– **Net cash used in investing activities**

Investments in property, plant and equipment and intangible assets decreased moderately by €0.8 million during the year. Financial investments also decreased by €1.3 million over the 2011/2012 period.

In addition to these investments, Faiveley Transport Group acquired the American company Graham-White Manufacturing Co., on 3 February 2012 for €77.6 million paid in cash.

– **Net cash from (used in) financing activities**

The Faiveley Transport Group distributed cash dividends of €18.1 million, compared to €17 million in the previous year. In addition, stock options valued at €0.9 million were exercised during the year.

The change in borrowings was primarily due to higher drawdowns on credit facilities to finance the acquisition of Graham-White Manufacturing Co. and the repayment of the debt taken out in December 2008, for €43 million.

4.2. RESEARCH AND DEVELOPMENT

The majority of the research and development conducted within the Group falls within the engineering included in contracts and is therefore primarily sold to customers, with Faiveley Transport retaining the intellectual property rights.

In application of IFRS standards, €2.9 million in development costs was capitalised at 31 March 2012, compared to €3.1 million at 31 March 2011. The amortisation charge was €1.9 million for the year to 31 March 2012, compared to €2 million for the year to 31 March 2011.

At 31 March 2012, the total development costs recognised in balance sheet assets were €9.5 million, compared to €8.6 million at 31 March 2011. Development costs are amortised over 3 years.

Public operating grants are recognised in the income statement of the parent company financial statements under "operating subsidies". Under IFRS, if certain costs incurred can be capitalised pursuant to IAS 38, operating subsidies are offset against the "investment grant" item of equity in accordance with IAS 20.

Subsequently, the "investment grant" item is taken to the income statement, also over a period of three years, in line with the amortisation charge applied to development costs previously capitalised.

4.3. BUSINESS DEVELOPMENTS SINCE YEAR-END

4.3.1. Significant events after the year-end

Faiveley Transport announced the finalisation of a USD 75 million bond issue through a private placement on 12 April 2012 (see § 4.4.2).

4.3.2. 2012/2013 Outlook

– **Order book at 31 March 2012**

Thanks to an exceptional year in terms of order taking, the Group posted a record order book of €1,690 million at 31 March 2012, reflecting an increase of 16.3% compared to the end of March 2011, the sixth consecutive year of growth in excess of 10%.

– Enterprise Resource Planning System (ERP)

The basic configuration has been implemented at three pilot sites (Leipzig, Plzen and Gennevilliers). Following a stabilisation phase, a standardised version will be deployed throughout the Group, starting in 2013.

– Outlook

The Group expects renewed organic growth and improved profitability for the 2012/2013 financial year, with the following sales outlook by region:

- In Europe, sales should remain stable overall, with a further year of transition before the start in 2013/2014 of deliveries on some of the major contracts awarded to the Group over the past few years.

- In Asia-Pacific, a recovery in Chinese orders should materialise in 2012 for locomotives and high-speed trains, with the usual leadtime between orders and deliveries, while Russia should experience a further year of strong growth.

- In North America, the railway freight and locomotive markets remained buoyant. Thanks to the acquisition of Graham-White Manufacturing Co., Faiveley Transport will also strengthen its presence with locomotive manufacturers and freight operators.

4.4. CASH AND CAPITAL

4.4.1. Share capital of Faiveley Transport

See chapter C. Information on the share capital.

4.4.2. Financing conditions

a) Long-term loans

- Bank financing

The Group amended the agreement governing the syndicated credit established in December 2008 to extend loan maturity by 2.5 years, i.e. until 23 June 2016 instead of 23 December 2013.

At 31 March 2012, in accordance with the loan maturity schedule, €299.9 million and USD 35.7 million remained outstanding. The €49 million revolving facility, also taken out in 2008, was fully drawn down at 31 March 2012.

Two new revolving facilities were negotiated during the year:
- a €20 million bullet loan, repayable on 18 November 2016;
- a €15 million loan, repayable in annual instalments between 23 December 2012 and 23 June 2016.

The Group also negotiated a €30 million bridge loan to finance the acquisition of Graham-White Manufacturing Co. This loan was repaid on 13 April 2012 after the bond issue was finalised.

- Non-bank financing

To partly refinance the acquisition of US company Graham-White Manufacturing Co. and diversify its financing sources, during the second half of the year the Group launched its first private placement bond issue in the US with two institutional investors, for a total of USD 75 million, made up of two tranches:
- USD 30 million with a 10-year final maturity, redeemable between 2017 and 2022;
- USD 45 million of bullet loan with a 10-year maturity.

The average fixed rate is 4.91% per year.

At 31 March 2012, two conditions precedent needed to be lifted to finalise the transaction:
- the authorisation to issue bonds, granted to the Management Board by the General Meeting;
- the US institutional investors requested compliance with an additional financial ratio, i.e. "Consolidated EBITDA/Consolidated Net Cost of Financial Debt". Due to the Group's commitments listed in the various loan agreements, this new financial condition was offered to the Group's main lenders.

Both conditions were lifted on 12 April 2012 and the financing was finalised. The funds raised were used to repay a portion of credit facilities drawn down.

- Financial conditions

Under the credit agreements, the Faiveley Transport Group must comply with a number of financial conditions, including the following three major conditions:
- leverage ratio, which refers to Consolidated Net Debt/Consolidated EBITDA over a 12-month moving average to the end of each half-year accounting period, must not exceed 2.5. At 31 March 2012, the ratio was 1.77;
- gearing ratio, which refers to Consolidated Net Debt/Consolidated Equity, must not exceed 1.5 at the end of each half-year accounting period. At 31 March 2012, the ratio was 0.41;
- the "Consolidated EBITDA/ Net Cost of Consolidated Financial Debt" ratio, which must not fall below 3.5 at the end of each half-year accounting period. At 31 March 2012, this ratio was 11.4.

b) Analysis of Faiveley Transport Group net debt

At 31 March 2011, Group debt was €169.8 million, comprising financial debt taken out from banks totalling €377.9 million, offset by financial receivables of €9.7 million and cash and cash equivalents of €198.4 million (including short-term investments of €44.9 million and cash of €153.5 million).

At 31 March 2012, Group debt was €213.4 million, comprising financial debt taken out from banks totalling €433.5 million, offset by financial receivables of €9.9 million and cash and cash equivalents of €210.2 million (including short-term investments of €41 million and cash of €169.2 million).

Cash of €169.2 million included €50.2 million of uncalled factoring and €119 million of available cash. Following the financial crisis and its impact on the credit market, the Group decided to maintain some financial flexibility to ensure internal organic growth and/or finance acquisitions.

It should be noted that Faiveley Transport holds 427,528 treasury shares that are designated, in their majority, to be purchased by managers within the share purchase or subscription option plan or to

be allocated to managers who benefit from the performance-based stock option plan. These shares are currently deducted from equity. The exercise of these stock options (207,035 at the end of March 2012) would result in a cash inflow for the Group of €9.9 million. Unallocated treasury shares were valued at €7.5 million at the stock market price of 31 March 2012 (including treasury shares held as part of the liquidity contract).

4.4.3. Restrictions on the use of capital

The debt documentation includes limitations in terms of:
- lease finance;
- disposal of receivables;
- various financing;
- overdraft pursuant to a cash pooling agreement;
- vendor financing;
- bank guarantees on long-term contracts.

4.4.4. Financing of operations and expected sources

Cash flow generation and available finance currently cover the Group's recurring industrial investment requirements.

The recent financing transactions ensure the availability of medium-term resources.

Euro-denominated amortisable repayments are funded by cash flow generated outside the US, and the US Dollar repayments by cash flow generated by the American subsidiaries, with the bullet portion (due in June 2016) to be refinanced in due time.

The conditions for the early repayment of Group debt notably include the loss of the majority control of voting rights by the Faiveley Family and failure to comply with financial ratios.

A.5. Risk factors

5.1. MARKET RISKS

As part of its business, the Faiveley Transport Group is exposed to various types of market risks, in particular foreign exchange, interest rate, raw material, credit and liquidity risks. A description of these risks is provided below and additional information is disclosed in Note E.14 to the consolidated financial statements.

The Group's management of foreign exchange, interest rate and raw material risks seeks to minimise the potentially unfavourable effect of the financial markets on the Group's operating performance.

The Group uses derivative financial instruments to cover its exposure to fluctuations in foreign currency exchange rates. As part of its hedging policy, the Group may use currency swaps, hedges, exchange rate options and structured products.

The Group covers its exposure to interest rate risk by the use of swaps and options.

The Group hedges its raw material exposure through raw material swap contracts.

The Group does not use derivatives for speculative purposes.

• Exchange risk

The main currencies concerned are the Chinese Yuan, US Dollar, Pound Sterling, Czech Koruna and Swedish Krona.

The management of the exchange risk of commercial contracts, where permitted by regulatory requirements, is centralised by the Group Treasury Department and comprises two parts: the certain and the uncertain risk.

- Exchange risk management relating to tenders in foreign currencies (uncertain risk):
  The Faiveley Transport Group is required to submit tenders denominated in foreign currencies. The Group's hedging policy is not to put into place hedge instruments during the offer phase, unless when specifically decided by Management. The aim is to manage the exchange risk through normal commercially available means. If necessary, the Group Treasury Department uses mainly exchange options.

- Exchange risk management relating to commercial contracts (certain risk):
  Commercial contracts in foreign currencies (most often successful tenders) are hedged by the Group Treasury Department from contractual commitment. Instruments used mainly include forward purchases and sales and exchange swaps. Group Treasury may also use options.

Information concerning derivative financial instruments currently in place to hedge the exposure to exchange risks for future purchases and sales is disclosed in the notes to the consolidated financial statements (Note E.14 – Financial instruments and financial risk management).

The Group's policy is to systematically hedge against currencies, except for certain very long-term contracts and certain currencies, which are faced with the technical limitations of hedging or prohibitive cost.

At 31 March 2012, the Group's exposure resulting from all its commercial contracts was as follows:

Amounts in thousands of currency	Trade receivables (a)	Trade payables (b)	Commitments (c)	Net unhedged position (d) = a-b+/-c	Hedging instruments (e)	Net hedged position (f) = d-e
AUD	–	(242)	(1,621)	(1,863)	(1,980)	117
CHF	200	(136)	178	242	240	2
CNY	8,137	(2,581)	38,050	43,607	44,300	(693)
CZK	–	–	(768,327)	(768,327)	(768,385)	59
GBP	1,706	–	19,633	21,339	14,200	7,139*
HKD	(6,663)	–	(141,721)	(148,384)	(148,345)	(39)
INR	–	–	(206,204)	(206,204)	(205,000)	(1,204)
JPY	–	–	1,773	1,773	–	1,773
PLN	–	–	3,459	3,459	3,400	59
SEK	(17,370)	409	(116,244)	(133,205)	(134,452)	1,247
SGD	1,768	–	26,588	28,356	28,400	(44)
USD	(454)	3,623	18,580	21,749	22,094	(345)

*The £7.1 million amount relates to the SSL project, for which £21.4 million remains outstanding.

Recurring commercial exposure, excluding the subsidiaries' projects are hedged by the Group's Treasury based on an annual budget process or through forward purchase or sale contracts.

Intra-group financing contracts are hedged by Treasury, through exchange swap contracts.

Impacts on the income statement due to variations in the Euro (+/-10%) against major foreign currencies and on items not hedged against and recorded at 31 March 2012 are presented in the notes to the consolidated financial statements (Note E.14.4).

• Interest rate risk

The interest rate risk to which the Group is exposed is mainly due to long-term loans amounting to €433.5 million at 31 March 2012 (see details in the notes to the consolidated financial statements, Note E.13), of which €326.7 million related to the syndicated debt, excluding the €49 million revolving facility, fully drawn down at 31 March 2012.

Syndicated debt, excluding the revolving facility, is indexed on variable Euribor and US Libor interest rates. The credit agreement commits the Group to hedge against at least 60% of the principal amount due until December 2012.

To manage its risk, the Treasury Department has implemented a hedging strategy using interest rate swaps, tunnels, caps and options.

The exposure to Euro interest rates is covered for between 66% and 85% of the total debt drawn down based on interest rate fluctuations for the 2012/2013 period. The exposure to US Dollar interest rates is 94% hedged.

The estimated cost of bank debt in 2012/2013 is 2.13%, including hedges and spreads for the debt in Euros, and 3.19% for the debt in US Dollars.

At 31 March 2012, outstanding Euro-denominated syndicated debt was €300 million, with corresponding interest rate hedges for €262.5 million of this. The amount of the US Dollar syndicated debt was USD 36 million, the total nominal value of which is hedged in the amount of USD 35 million.

Net exposure and the sensitivity analysis are described in the notes to the consolidated financial statements (Note E.14.4.b Interest rate risk).

• Raw material risk

The Faiveley Transport Group is exposed to increases in the cost of raw materials such as steel, cast iron, copper, aluminium and rubber, as well as to increases in transportation costs.

The Group has already anticipated these effects, both in the preparation of its tenders and in terms of its purchasing policy:
- Certain contracts relating to projects include price indexation mechanisms that enable the Group to absorb a large part of the increases in raw material costs.
- The vulnerability of raw material purchases is taken into account when developing the purchasing budgets. These price changes are subject to a rigorous control throughout the year by purchasing teams to limit their impact.

However, Faiveley Transport Group's sintered brake activity is exposed to fluctuations in the price of copper.

This information is disclosed in the notes to the consolidated financial statements (Note E.14.4.c).

• Credit risk

The Group enters into commercial relationships with third parties whose financial position is known to be healthy. The Group's policy is to verify the financial health of those customers wishing to obtain credit.

In the case of derivative instruments and cash transactions, counterparties are limited to financial institutions that currently finance the Group.

The Group also practices debt factoring and the sale of receivables. Details of this are provided in the notes to the consolidated financial statements (Notes E.8 Current receivables and E.14.5 Credit risk).

• Liquidity risk

The Company carried out a specific review of its liquidity risk and considers that it is in a position to meet its maturities.

The Group's Finance Department monitors all of the Group's liquidity in order to honour its financial commitments by maintaining a level of cash, cash equivalents and sufficient financing facilities.

Within this framework, during the first half of the year the Group amended the agreement governing the syndicated credit established in December 2008 to extend loan maturity by 2.5 years, i.e. until 23 June 2016 instead of 23 December 2013. At 31 March 2012, in line with the maturity schedule of the agreement, the outstanding balance was €299.9 million and USD 35.7 million. The €49 million revolving facility also contracted in 2008 was fully drawn down at 31 March 2012.

During the second half of the year, the Group set up a number of credit facilities totalling €65 million. These fundings, partly supplemented by the revolving facility of €49 million, were used to pre-finance the acquisition of US company Graham-White Manufacturing Co. At the same time, the Group launched a private placement in the US to raise USD 75 million and refinance the acquisition of the American company, while diversifying its sources of funding. At 31 March 2012, two conditions precedent had not been met; both were lifted on 12 April 2012.

This debt is subject to a number of financial ratios. At 31 March 2012, the Group complied with all ratios required. The details of these covenants are commented in the notes to the consolidated financial statements (Note E.13 – Borrowings and financial debt).

Note E.14.6 to the consolidated financial statements provides additional information of the cash and cash equivalents position at 31 March 2012.

The Group had the following cash and cash equivalents at 31 March 2012 (internal source):

	31 March 2012
Available credit lines (a)	56,754
Parent company's cash (b)	27,100
Subsidiaries' cash and cash equivalents (c)	182,129
AVAILABLE CASH AND CASH EQUIVALENTS (1) = (A+B+C)	**265,983**
Financial liabilities due in less than one year (d)	77,174
Available credit lines maturing in less than one year and bank overdrafts (e)	110,196
NET CASH AND CASH EQUIVALENTS AVAILABLE DURING THE NEXT YEAR (1-D-E)	**78,613**

The "table of future cash flows", presented in the consolidated financial statements (Note E.14.6.b) provides a breakdown of future liabilities by maturity.

• Share risk

The Group does not hold a share portfolio but deposits excess cash balances. At 31 March 2012, it had certificates of deposits of €29.3 million, and fixed-term deposits of €11.8 million.

The risk of these instruments is deemed low.

5.2. LEGAL RISKS

This section provides a limited overview of the various forms of legal risks arising from the Group's operations and the execution of its contractual requirements. The Group considers that sufficient provision charges have been recognised to date to cover all risks and litigations.

• Risk of non-conformity

The Faiveley Transport Group may be confronted by the usual risks encountered by all industrialists that produce and sell manufactured products: these are contractual liabilities put forward by another professional (car builder, operator, and maintainer) in the event of non-conformity of products delivered or non-compliance by the seller of contractual commitments in terms of timescale, reliability, life, etc. Guarantees concerning the proper operation of products delivered are granted for longer or shorter periods (between 12 or 36 months on average) according to the demands of the final customer, the type of project and its specific features. The risk related to this contractual guarantee is evaluated upstream and included in the price of the product.

The risk of cancellation for fault is low due to the understanding and technical feasibility study of the project by a specialised and dedicated team within the design office, as well as the selection of dual source suppliers to avoid any sudden interruption in the delivery of components or materials.

In order to limit the risk of non-conformity, the Group also uses the contractual technique that restricts certain types of damages, and even eliminates some of them (loss of profit, damage to image, loss of customer base or sales).

When it occurs, litigation is very frequently settled out of court and under conditions that do not endanger future relationships between the parties.

In addition, the Faiveley Transport Group uses insurers to cover operational civil liability and products adapted to its business and in compliance with customer requirements.

As part of equipment contracts, the Group and its subsidiaries are contractually bound to maintain equipment with a life span of several decades. A specific plan is set up to manage obsolescence of each project, with the assistance of the manufacturer and/or operator. The requirement to keep equipment operational and reliable during this time period imposes on the equipment supplier the need to ensure leading edge technology and to set up a stock of spare parts in order to avoid a sudden break in supply. Strict contractual obligations (duty to alert, end of life orders, selection of a second source, etc.) are imposed on the Group's own suppliers.

At 31 March 2012, a €25.8 million provision for risk of non-compliance of products sold was recognised in the financial statements. These risks were estimated by project managers and engineers.

• Risk of counterfeit

In the area of intellectual property, the Faiveley Transport Group holds a portfolio of patents and brands that provide it with competitive advantages. Every entity with a design office has set up a process to monitor technology to detect all inventions patented by third parties that may thwart its future developments.

Groups within the leading technical project teams have been organised internally to detect every risk related to the counterfeiting of intellectual and/or industrial property rights that may be held at third-party premises.

The Group avoids granting licences to countries where counterfeiting is not easily punished.

Across the selection of specialists in intellectual property, the Group has built a portfolio of patents and brands that is regularly analysed and evaluated. On behalf of the Group, these specialists carry out surveillance of all similar patents and/or brands and take the necessary steps to protect the Group's rights in that area, both in France and abroad.

The technology, as well as the expertise held by the Group, are also automatically protected by terms of secrecy, which is reflected in the signature of confidentiality agreements with both customers and suppliers very early in the pre-contract relationship.

It should be noted here that, as part of an arbitration procedure carried out under the auspices of the Arbitration Court of the International Chamber of Commerce, Faiveley Transport Malmö sought the conviction of Wabtec Corporation for the misappropriation by Wabtec, since 1 January 2006, of intellectual property relating to friction brake cylinders (BFC TBU brakes), as well as two other braking product concepts (PB-PBA actuators) that are unique to Faiveley Transport. On 24 December 2009, the arbitration was notified to the parties: the arbitration award confirmed that Faiveley Transport is still the owner of trade secrets in relation to the manufacture of the products, and that Wabtec had breached the license agreement once it had been cancelled, as well as certain obligations resulting from this agreement. Furthermore, the award confirmed that certain aspects of the reverse engineering process implemented by Wabtec to obtain a product that is utterly different from Faiveley Transport's may be deemed tainted.

Faiveley Transport Malmö was awarded USD 3.9 million in damages plus interest from Wabtec.

Wabtec was also ordered to pay the royalties that Faiveley Transport should have received in respect of products sold by Wabtec on orders resulting from contracts signed before the licence expired and delivered from 2006. In addition, Wabtec was ordered to cease using manufacturing drawings and other documents relating to these products, except for those that enable Wabtec to fulfil orders resulting from contracts signed before the licence agreement was revoked.

The enforcement order of the arbitration award in the US was granted by a New York Court on 10 May 2010.

Following the favourable outcome of the arbitration, on 14 May 2010, Faiveley Transport initiated a new legal action against Wabtec before the courts of New York, through its subsidiaries Ellcon National, Faiveley Transport USA, Faiveley Transport Nordic and Faiveley Transport Amiens, in compensation for damages suffered in the US on the basis of unfair competition and the violation of trade secrets. In a ruling on 13 April 2011, the district court in New York acknowledged that Wabtec was responsible to the corporate plaintiffs for acts of unfair competition, misappropriation of confidential and secret information, which was the property of Faiveley Transport, and unjust enrichment concerning the friction brake cylinders (CFB-TBU) and PB-PBA actuators. On June 28, 2011, a jury in the New York Federal Court rendered a verdict against Wabtec for damages for the amount of USD 18.1 million, plus interest, to Faiveley Transport USA, Faiveley Transport Nordic, Faiveley Transport Amiens and Ellcon National for market losses suffered in North America due to the dishonest conduct of Wabtec Corporation. Wabtec appealed this ruling on 26 August 2011. At the same time, the plaintiffs filed a counter-appeal contesting the judge's decision to reject their request for punitive damages. The proceedings are being held before the New York Court of Appeals. The exchange of findings between the two parties will continue until June 2012, with the Court of Appeals' decision expected by the end of 2012.

In May 2008, the US company Wabtec Corporation issued a writ against Faiveley Transport USA in the Pennsylvania courts for unfair competition on US soil. To date, no figure has been attributed to their claim. This proceeding is in response to the two procedures described above, launched by Faiveley Transport Group. On 23 September 2011, Wabtec waived the benefit of this proceeding after it was announced that the Faiveley Transport Group had obtained a favourable result before the New York Courts.

• Tax risk

The Group has set up the rules required to understand the subject in an international context and uses external consultants, case by case, country by country, to best protect its interests.

Every Group subsidiary is led by a local team that must ensure that their business is conducted in compliance with the local regulations in force.

In 2008, Faiveley Transport was subject to a tax audit. An adjustment proposal was issued on 15 July 2008 by the tax authorities. The corrections considered relate to additional income tax of approximately €190 thousand, which has been settled. These corrections are still subject to proceedings initiated by Faiveley Transport against the tax authorities.

The tax audits of the companies Faiveley Transport, Ellcon National and Faiveley Transport USA have been completed. Tax adjustments were only minor. The new tax audit instituted on Faiveley Transport Leipzig will continue into the 2012/2013 financial year.

• Other risks

- **Anti-competition risks:** the Group's business sector is not significantly exposed to this type of risk. In fact, the modest number of players as well as the system for public tenders is not open to this kind of illegal behaviour.
- **Corruption risks:** certain contractual requirements have been specifically considered and prepared to protect the Group against any abuse in this area. An Ethics Charter was introduced during the year and the Purchasing Department has formalised a Code of Conduct for its teams to protect itself against any abuse in this area.

5.3. INDUSTRIAL AND ENVIRONMENTAL RISK

In this area, the Group has identified accurately and thoroughly the various classes of risks it may confront due to the nature of its business.

These classes are the following:

• Product risk

Even though the Faiveley Transport Group is positioned in the sector for the production and sale of certain parts described as safety for the railway industry (brakes, doors, etc.) and thus, inherently exposed to contractual or criminal liability in respects of "products", the Group's level of exposure to such risks is considered to be medium by the civil liability insurance agents. The evaluation takes into account the process of product design as well as the type and content of contracts entered into with car builders and the operators.

In French contracts, the legal liability for hidden defects also applies throughout the life of the product even though, between professionals, its application may be expressly excluded by contract.

Liability as a result of product defects may also have an effect in terms of risk, even if the user often only knows the operator, while the chain of contract prevails between the operator, the car builder, the equipment manufacturer and the supplier.

The organisation and management of quality, the selection and monitoring of suppliers and subcontractors, the follow up of complaints and the contractual environment are adapted to the nature and potential scale of the exposures.

The production series are short. Orders for supply of raw materials and components are carried out by project. The most unfavourable case would thus be a design error impacting an entire project. This may represent several thousand parts. The nature of the fault may be rapidly understood due to the expertise of the teams and the possibility of dispatching technicians on site who can recommend the best technical solutions for operators.

As regards suppliers, a selection process is in place that includes, in addition to the criteria of financial stability, an audit of selection by the supplier's quality department and follow up of performance. Every return or rejected component leads to the organisation of a working group dedicated to resolving the problem, to analyse the causes and take a decision as to changes to be made to avoid a recurrence of the same problem.

Design and development are carried out under the guidance of Technical Management as part of a customer project or at the time of in-house R&D developments, initiated by the Group. For each project identified as critical, a formal plan is prepared, split into fundamental tasks, implemented and updated by the project manager and project coordinators. The features taken into account at the start of the project are functional and performance requirements, regulatory and legal requirements where applicable, information from previous similar designs and all other requirements required for design and development. Project reviews are carried out and reports produced. The verification of the designs comprises execution of calculations, the completion of FMEA (Failure Mode Effects Analysis) as well as verification of the plans.

The internal validation of the design is carried out by test laboratories for the prototype stage on the basis of a formalised validation plan. Prototypes are validated by the customer with certification trials and/or types followed by FAI (First Article Inspection).

Every new order for parts is subject to a material check, dimension check, verification of compliance with legal and regulatory requirements and an environmental analysis.

All products are identifiable. The products carry an identification plate showing an identification number and serial number, enabling the date of construction to be found and the trial notes with the name of the related operator. The series number of devices comprising a sub-assembly is identified from these notes. Small parts are traced by production batch.

Additional information, concerning a methodology of evaluating provisions for customer risks, is described in the notes to the consolidated financial statements (§C – Consolidation principles and methods, Note 15.2).

Warranty provisions are calculated based on a specific percentage for each product manufactured and the reliability experienced over time. Percentages vary between 1% and 6% depending on products and are applied to sales achieved, project by project.

At 31 March 2012, the warranty provisions totalled €45.1 million.

The amount provided in respect of the warranty and Customer Services, as well as litigation declared by our customers and penalties payable is disclosed in the notes to the consolidated financial statements (Note E.12.3).

• Health and safety risk

In each of the Group's industrial site, a safety coordinator manages all aspects of site "health, safety and environment" on a daily basis, making the necessary checks in the factory, studying and recording the product received, updating the job files and organising training.

The objective of general management is to integrate safety into the management system for quality and the environment (QHSE approach), an approach heavily promoted and supported by the Group's insurers.

The job files summarising the risks of various activities and specifying the required individual protection equipment are displayed at all work stations. Every accident with work stoppage is subject to a detailed analysis of the circumstances and causes and where necessary, leads to action being taken to prevent any recurrence.

At French sites, a single administrative document has been established and a fire work permit has been instituted for all external companies liable to work using hot spots on the premises.

Taking account of the number of external companies operating on the sites, improvements have been made to the storage of chemicals and paint to avoid risk of fire.

• Continuity of business after a disaster

The French sites now avail of in-house fire wardens, in line with insurers' recommendations. The quantity of flammable material stored in production areas has also been significantly reduced.

Each industrial site has identified potential emergency and accident situations and set up regularly tested emergency plans.

Concerning the risk of production interruption following a fire or flood, it should be noted that the major industrial sites have set up emergency procedures describing the steps to take following a large scale incident that could fully or partly paralyse the operation of the site in question.

Survival plans are being developed at the Group's major sites in order to take the necessary steps and reduce consequences as soon as possible after an incident. A list of companies that can provide repair equipment as well as those specialising in decontamination of electrical devices, has been compiled.

Those in charge of taking the major tasks after an incident have been designated in advance to design the most adequate response. Taking account of the size of these sites as well as, in some cases, the proximity of other Group establishments in the same geographical area, it is necessary to consider specific and rapid solutions to reduce the consequences of a large scale incident.

The majority of production tasks can be easily subcontracted and are for the most part manual. The machines, though expensive, can be acquired relatively rapidly. In addition, the interdependence of sites is limited.

• Dependence on suppliers and/or subcontractors

As part of its business, the major operating entities of the Group may be confronted with a state of dependence on certain suppliers and/or subcontractors for certain commodities, or with certain suppliers and/ or subcontractors being dependent on the Group.

The implementation of best purchasing and purchasing management practices by type of commodity and by supplier enable us to accurately assess these risks of dependence and take the necessary steps.

Increased monitoring, due to the international economic crisis, was put into place in order to pre-empt the failure of any major suppliers.

• Increased cost of raw material and transport risk

This information is detailed in §5.1 and in the notes to the consolidated financial statements (Note E.14.5.c).

• Environmental risk

The industrial sector in which the Group operates is subject to compliance with restrictive and multiple environmental standards. The production processes require the use of chemical products (paint, glue, surface treatment, etc.) that may pose a risk to the environment.

The major French sites are ICPE-classified (classified sites for the protection of the environment) and subject to a declaration system, and even authorisation from the competent regional authorities for some of them.

The administrative authorities may also require steps to be taken to prevent or treat, going as far as ordering the closure of sites, in the event of serious violations of applicable regulations in the area of labour and/or environmental law. The Faiveley Transport Group may also be held liable by third parties under the regulations protecting the environment and the general principle of criminal liability.

The Group is fully aware of the importance of managing compliance with regulations in the area of the environment by dedicating a senior engineer to the aspects of safety - health - environment, who must verify every day whether the site they are responsible for is compliant with the various applicable standards.

Audits carried out by the insurers have disclosed some weaknesses in the manner of understanding this risk. Even though the quantity of pollutants used in the business sector is very small, the Group may be called on to pay rehabilitation costs, fines or damages-interest relative to non-compliance with environmental standards.

The factories of Saint-Pierre-des-Corps and Amiens are both in industrial parks with a SEVESO classified site that stores oil and chemical products. In the event of problems on these sites close to the Group's production units, this could have a negative effect on their production capacity.

The sites of Saint-Pierre-des-Corps (Electromechanical) and La Ville-aux-Dames (Electronics) are situated in the flood plains of the Loire and Cher rivers. According to the risks map and the IGN69 system, the two sites are in an area of medium level risk (water depth of 1 to 2 metres with modest to nil speed or less than 1 metre with medium speed). The two sites at Saint-Pierre-des-Corps are in a Natura 2000 area.

As the constraints of safety, environment and pollution are becoming ever greater, the Group is conscious that it may be obliged to incur expenditure, notably to enhance the procedures for monitoring soil, water and air pollution. However, these investments would not be significant for the Group.

In addition, in order to comply with European Directive n°2004/35, from 31 March 2009 the Group decided to subscribe to additional guarantees in terms of insurance. Environmental damage and soil and water clean-up cover was added to the accidental and gradual environmental damage policies.

The Group is already committed to areas of improvement in the storage of products posing a danger to the environment (retention tank, anti-fire cabinets, management of condensates from compressors, elimination of PCB transformer, etc.) and the reduction in the emission of volatile organic compounds. The use of toxic products for surface treatment such as chromic acid and hydrofluoric acid, requires adequate and regular monitoring (once a quarter), which is carried out by each applicable site.

Below are specific matters facing the Group at present:

- Faiveley Transport Amiens, as the last remaining operator of classified facilities in Sevran, at 4 boulevard Westinghouse, a site occupied by Sab Wabco until 1999 for the production of cylinders for braking systems, was declared to be a polluted site and therefore likely to create pollution or represent an on-going risk for people and the environment, according to an order from the Prefect on 11 April 2005. This order requested that Faiveley Transport Amiens conform to certain procedures to remediate the site. It should be mentioned here that the land concerned was sold on 16 September 2002 by Faiveley Transport Amiens and that the acquirer, in an express condition of the transfer document, agreed to make it his personal business and to take full responsibility for all potential clean-up work deemed necessary under the administrative proceeding launched by the Prefecture of Seine Saint-Denis, regarded as complete as of the notification of the order mentioned above. The acquirer and his successors were regularly informed of and involved in the on-going procedure. The site was again sold under a legal deed signed on 16 December 2009. The new owner committed to carry out the remediation, pollution clean-up and soil improvement of the site, under his own responsibility and at his own expense, in line with current and future guidelines, formal notices and administrative rulings that have been or are liable to be taken against Faiveley Transport Amiens (formerly Sab Wabco) and to handle all complaints, legal actions, claims or proceedings related to the environmental condition of the building, its soil and subsoil. The new owner is a specialist in this type of work.
  On 21 June 2011, the Administrative Court of Montreuil dismissed the Commune of Sevran's claim disputing the implicit decision of the Prefect of Saint-Denis to take no action and to close the investigation related to the request to remediate the site concerned. This decision was not appealed in the two months following the notification of the Administrative Court's judgment. This proceeding was thus closed.

- In 2003, the Brazilian subsidiary of the Sab Wabco Group, not yet acquired by the Faiveley Transport Group, sold land to the company Cyrela. A risk of soil pollution was identified in 2004, subsequent to the purchase of the Sab Wabco Group by Faiveley Transport, as a result of which the latter bore the costs of soil decontamination. Due to this risk of pollution, Cyrela retained a part of the sale price (R$3.7 million, or €1.6 million, remains outstanding).
  The situation is currently as follows: decontamination work continues under the agreed conditions. Site meetings are regularly held with the contractor and local authorities to assess soil quality. On completion of the work that will allow the contaminated soil to achieve a level of quality acceptable to local authorities, Cyrela may request building permits. At the issuance of these permits, the amount withheld may be released and the payment made.
  At 31 March 2012, a provision of R$2.5 million had been recognised in relation to this issue (€1 million).

- On 19 January 2011, Faiveley Transport Amiens received a prefectural order requiring it to proceed with monitoring and diagnostic measures for the water table at its site situated at Zone Industrielle Nord, Rue André Durouchez, 80000 Amiens, France. It must prepare a management plan to carry out groundwater monitoring, to look for sources of soil pollution and proceed with the development of a management plan for pollution found at its site, in accordance with the circular of 8 February. Over the course of the financial year, the Company has taken action which allows it to meet the provisions of this order.

- At the end of March 2012, the company Graham-White Manufacturing Co. incorporated a reserve of USD 4.5 million into its accounts, designed to cover potential environmental risks at its American sites.

5.4. IT RISK

The Group's unwavering concern is to protect its IT infrastructure, data and application software. Centralised applications are hosted with several partners who ensure the physical security of the hardware and software protection access within a "Service Level Acceptance" agreement.

Having developed application software that make communication and mobility increasingly easier, the Group attaches great attention to anti-intrusion systems (firewalls) and information access security profiles.

The Group is committed to a major project, called "Moving Forward", which aims to integrate and standardise the information system of the entire Group.

This project covers:

- infrastructure optimisation;
- unification of the communication policy;
- integration of the industrial operation of the Group via a single ERP (Enterprise Resource Planning).

To secure the rollout of a single ERP, the Group management has set up a project platform at the Group level, and enlisted the help of external consultants. To control these risks, the Group elected to have a pilot phase that will set the Group configuration before gradually rolling it out to all subsidiaries.

Three pilot sites are currently in production (Leipzig, Plzen and Gennevilliers). The feedback analysed enabled the creation of a version 2 of the solution, which will be validated at the end of 2012 and deployed through the whole Group from the start of 2013.

B. PARENT COMPANY FINANCIAL STATEMENTS: FAIVELEY TRANSPORT AT 31 MARCH 2012

B.1. Parent company financial statements (according to French accounting principles)

1.1. INCOME STATEMENT

	2011/2012	2010/2011
Sales	**52,681**	**48,860**
EBITDA * *as % of sales*	(681) *(1.29%)*	(1,180) *(2.4%)*
Profit/(loss) from recurring operations *as % of sales*	(1,599) *(3.03%)*	(1,600) *(3.3%)*
Operating profit/(loss) *as % of sales*	**(1,599)** *(3.03%)*	**(1,600)** *(3.3%)*
Net finance income (expense)	(9,992)	(2,216)
Exceptional income/(expense)	(243)	1,317
Income tax	835	742
NET PROFIT/(LOSS)	**(10,999)**	**(1,757)**

* Operating profit plus amortisation and depreciation.

Faiveley Transport continues to provide services for the Group, as the holding and management company.

The €52.7 million sales achieved in 2011/2012 grew by €3.8 million compared to the previous year (€48.9 million).

A significant portion of Faiveley Transport's costs corresponding to services provided to subsidiaries is rebilled. The operating loss was €1.6 million, unchanged compared to the previous financial year. Fixed costs that are not rebilled to subsidiaries increased; this increase was however offset by growth in royalties for the use of the Faiveley Transport brand.

The net finance expense was €9.9 million, compared to an expense of €2.2 million in the previous year. In 2011/2012, dividends of €1.3 million were collected, compared to €0.4 million in 2010/2011.

Excluding dividends, the net finance expense declined by €8.7 million during the 2011/2012 financial year. This was due, on the one hand, to an increase of €2.2 million in interest expense, which relates to bank borrowings, higher drawdowns on credit facilities, interest on current accounts and bank overdrafts, partly offset by interest on loans to subsidiaries. Faiveley Transport also recorded virtually nil net foreign exchange gains during the year, compared to an income of €4.4 million in the previous year. In addition, a €0.6 million provision for writedown of treasury shares was recognised during the year, whilst the reversal of a €1.5 million provision for foreign exchange risks was recognised in the previous year.

The €0.8 million income tax refund recognised at 31 March 2012 reflects the tax consolidation gain of €3.7 million achieved during the period, reduced by the tax charge generated by the German subsidiaries, Faiveley Transport Holding GmbH & Co KG and Faiveley Transport Leipzig GmbH & Co KG, for €3 million, and increased by a withholding tax credit of €0.1 million.

1.2. BALANCE SHEET

	2011/2012	2010/2011
Net non-current assets	1,057,476	954,847
Current assets	54,288	46,330
Cash and cash equivalents	334,297	286,584
TOTAL ASSETS	**1,446,061**	**1,287,761**
Equity	177,807	194,426
Provisions	1,884	960
Financial debt	1,238,275	1,059,357
Other liabilities	28,095	33,018
TOTAL EQUITY AND LIABILITIES	**1,446,061**	**1,287,761**

Net non-current assets take account of the recognition of a €384.8 million technical deficit, registered on the transfer of Faiveley Transport and Faiveley Management's assets and liabilities to Faiveley S.A., intangible assets of €14.7 million, property, plant and equipment of €1 million, equity investments of €499.9 million and receivables of €157 million attached to these investments.

Equity investments increased by €82 million over the year. This increase was due to the creation of the Chinese subsidiary Faiveley Transport Systems Technology (Beijing) for €2 million, the initial €56 million investment in the share capital of Faiveley Transport Belgium and the increase of Faiveley Transport's €24 million equity investment in Faiveley Transport USA Inc. Furthermore, receivables attached to equity investments increased by €17.2 million, primarily due to an increase in current accounts. Loans to receivables remained stable at €116.8 million.

Current assets increased by €8 million during the year. This was primarily due to the €5 million increase in trade receivables and a €2.5 million increase in receivables related to the tax consolidation.

Cash and cash equivalents grew by €47.7 million during the year. This resulted from a €50.3 million improvement in cash balances and a €3 million decline in marketable securities. At the same time, on the liability side bank overdrafts increased by €58.6 million.

Equity decreased from €194.4 million at 31 March 2011 to €177.8 million at 31 March 2012. This €16.6 million negative movement may be analysed as follows:

- increase in capital: €11.1 million;
- payment of dividends €(16.7) million;
- loss for the year: €(11) million.

Provisions increased by €0.9 million due to provisions established for the share subscription plan of 23 November 2009, for €0.1 million, and the free share allocation plans, for €1.4 million. Provisions for litigations were reduced by €0.6 million, showing a balance of €0.3 million at 31 March 2012.

Financial debt was valued at nominal value and comprised:

- the €326.6 million loan granted by the banking pool, with a view to reorganising the Faiveley Transport's shareholding;
- credit lines for €94 million;

- current bank and cash pooling overdrafts (Group cash management) for €286.7 million;
- the loan subscribed from the Faiveley Transport Malmö subsidiary, for €20.3 million;
- credit current accounts with Group companies, for €510.05 million;
- accrued interest in relation to the above financial debt, for €0.2 million;
- the balance of the special reserve for employee profit sharing for €65 thousand.

Other liabilities also decreased by €5.8 million during the year. This change was primarily due to the decline in tax liabilities of French subsidiaries included in the tax consolidation, for €2.6 million, and liabilities to the German tax authorities, for €1 million, in relation to two of the Group's German subsidiaries.

B.2. Events after 31 March 2012

On 12 April 2012, Faiveley Transport finalised a USD 75 million bond issue through a private placement (see above § A.4.3.1 and § A.4.4.2). This transaction was implemented through its Faiveley Transport USA Inc. subsidiary, in order to acquire Graham-White Manufacturing Co.

B.3. Research and development costs

None in the Faiveley Transport parent company financial statements.

B.4. Change of method during the year

Nil.

B.5. Information on non-tax deductible charges

Non-tax deductible charges at 31 March 2012 amounted to €26,042.

They generated a tax charge of €9,380.

B.6. Information on payment terms

At 31 March 2012, trade payables posted to the balance sheet totalled €12,365 thousand, of which €10,145 thousand related to international intercompany invoices, due in 60 days at month-end, payable on the 5th of the month.

The ageing analysis was as follows:

	30 days	60 days	+ 60 days	Total
Trade payables at 31 March 2012	1,361	931	10,073	12,365
Trade payables at 31 March 2011	561	429	11,309	12,299

B.7. Treasury shares

The Company directly and indirectly holds 2.93% of its share capital.

B.8. Analysis of results and allocation of the 2011/2012 net loss

- **Table of results of Faiveley Transport for the last five years**

Attached to the present report, pursuant to the provisions of Article R. 225-102 of the Commercial Code, is the table of the results of the Company for each of the last five years.

- **Proposed allocation of net loss**

We would ask you to approve the annual financial statements (balance sheet, income statement and notes) as presented to you, showing a net loss of €10,998,977.46.

We would also ask you to approve the following allocation of net loss for the financial year ended 31 March 2012:

• Loss for the year	(€10,998,977.46)
• Increased by:	
Retained earnings	€67,796,499.37
• Distributable profit	€56,797,521.91
– Allocation to legal reserve:	(€20,944.10)
– Dividend payment, i.e. €0.85 per share:	(€12,422,029.20)

The balance of €44,354,548.61 will be allocated in full to "Retained earnings".

The dividend will be payable with effect from 20 September 2012.

Taking account of the allocation, the equity of the Company amounts to €165,384,526.63.

If at the time of the payment, the Company holds treasury shares, the profit distributable corresponding to the unpaid dividend due to the holding of the shares, shall be allocated to the account "Retained earnings".

It should be noted that over the last three financial years, the following sums were paid in dividends: €17,285,653.20 for the financial year 2010/2011, €17,285,653.20 for the financial year 2009/2010 and €14,404,711 for the financial year 2008/2009.

C. INFORMATION ON THE SHARE CAPITAL

C.1. Bylaw conditions governing revisions to the share capital and corporate rights

The share capital is increased, either by the issue of new shares, or by an increase in the nominal value of existing shares.

New shares are fully paid, either in cash, or by offset against current liabilities of the Company, or by incorporation of reserves, profits or share premium, or by transfer in kind, or by conversion of bonds. New shares are issued at their nominal value, or at that amount increased by a share premium.

An Extraordinary General Meeting is the only competent body to decide, based on a report by the Management Board, to increase the share capital. A reduction in share capital is authorised or decided by an Extraordinary General Meeting that may delegate to the Management Board all powers to effect the transaction. A capital increase must be completed within five years from the date of the General Meeting that decided or authorised it.

C.2. Share capital issued and authorised unissued share capital

2.1. SHARE CAPITAL ISSUED

At 31 March 2012, the share capital of the Company was €14,614,152. It comprises 14,614,152 shares of €1 nominal value each, fully paid, all of the same class.

• Revision to the share capital and rights attached to shares

Every revision to the share capital or rights attached to securities that comprise it, is subject to the law; the bylaws do not provide for specific requirements.

• Form and registration of shares

Shares are in nominative or bearer form at the shareholders' discretion. Both these categories are subject to the law that relates to them.

• Existence of thresholds in the bylaws

Apart from the legal requirement to inform the holding company of certain fractions of the share capital, there is no particular requirement in the bylaws.

• Identification of bearer shareholders

Except in instances specified by the law, fully paid up shares are either held in nominative or bearer form, at the shareholders' discretion. Shares are registered in accordance with the terms and conditions provided by law.

The Company is authorised to use, at any time, the legal provisions in respect of identification of holders of securities giving, immediately or in time, the right to vote at Shareholders' Meetings.

• Company share registrar

The Company has delegated its share registrar service to Société Générale Securities Services: 32, rue du Champ de Tir – BP 81236 – 44312 Nantes Cedex.

• Transfer of shares

Company shares may be freely transferred between living persons or upon the death of the holder. Transfers of Company shares involving third parties and the Company are completed by way of an account-to-account transfer order. Shares in the Company that are not fully paid in respect of payments due cannot be transferred.

2.2. AUTHORISED UNISSUED SHARE CAPITAL

• Delegation of authority to increase the share capital

At the Combined General Meeting of 14 September 2011, a resolution (nineteenth resolution) was approved by the shareholders to delegate authority to the Management Board to increase the share capital, with waiver of the pre-emption right, through a private placement to qualified investors or for the benefit or a restricted circle of investors.

This resolution was adopted by a qualified majority.

Pursuant to Articles L. 225-129, L. 225-129-2, L. 225-135 and L. 225-136 of the Commercial Code, the Management Board was authorised to increase the share capital, with waiver of the pre-emption right, with the facility of effecting the transaction in one or more offerings in accordance with section 2 of Article L. 411-2 of the Monetary and Financial Code, and not exceeding 10% of the share capital of the Company on the day of the General Meeting.

This authorisation was given for a period of twenty-six months from 14 September 2011.

On 3 February 2012, the Management Board implemented this delegation, having been granted approval of the planned transactions by the Supervisory Board on 23 November 2011.

As part of the acquisition of US company Graham-White Manufacturing Co., the acquisition contract, concluded on 22 December 2011 and amended on 10 January 2012, provided for the acquisition price of the Graham-White Manufacturing Co. shares to be partly paid to the sellers in new Faiveley Transport shares.

As a result, on 3 February 2012, the Management Board decided to increase the share capital of the Company by a nominal amount of €209,441, thereby increasing it from €14,404,711 to €14,614,152, through the issue of 209,441 new shares in the Company with a par value of €1 each, to be issued at a price of €53.086 per share, being a total subscription price of €11,118,384.93. The issue price corresponds to the weighted average of the share price over the last three trading days preceding the date the subscription price of the capital increase is set, less a discount of 5%.

C.3. Shareholders and voting rights at 31 March 2012

3.1. ANALYSIS OF SHAREHOLDERS AND VOTING RIGHTS

According to the information supplied by Société Générale, amongst which, the register of nominative shareholders and the identification of a certain number of bearer shareholders, the shareholders and the voting rights in the Company at 31 March 2012, were as follows:

Principal shareholders at 31 March 2012	Number of shares	% of capital	Single voting rights	Double voting rights	Total voting rights	% voting rights
Financière Faiveley	6,315,380	43.21%	43,055	6,272,325	12,587,705	56.86%
François Faiveley Participations (F.F.P)	1,159,288	7.93%	354,538	804,750	1,964,038	8.87%
François Faiveley	225	0.00%	–	225	450	0.00%
Thierry Faiveley	214,524	1.47%	214,524	–	214,524	0.97%
Erwan Faiveley	5	0.00%	–	5	10	0.00%
TOTAL FAIVELEY FAMILY	**7,689,422**	**52.62%**	**612,117**	**7,077,305**	**14,766,727**	**66.70%**
Directors and senior executives *	147,191	1.01%	6,314	140,877	288,068	1.30%
Treasury shares	427,528	2.93%	–	–	–	–
Nominative shares**	770,529	5.27%	35,929	734,600	1,505,129	6.80%
General public	5,579,482	38.18%	5,579,482	–	5,579,482	25.20%
TOTAL	**14,614,152**	**100.00%**	**6,233,842**	**7,952,782**	**22,139,406**	**100.00%**

* Excluding Erwan Faiveley and François Faiveley.
** Excluding Faiveley Family, senior executives and treasury shares.

To the knowledge of the Company, no other shareholder held over 5% of the share capital or the voting rights at 31 March 2012.

3.2. ANALYSIS OF THE SHARE CAPITAL OVER THE LAST THREE YEARS

	2011/2012 % of capital	2010/2011 % of capital	2009/2010 % of capital
Nominative shares	58.66	60.15	58.94
General public	41.34	39.85	41.06

3.3. SHARE CAPITAL OF THE COMPANY SUBJECT TO PLEDGES

Name of shareholder as pure nominative form	Beneficiaries	Start date of pledge	Expiry date of pledge	Condition for release of pledge	Number of shares pledged at 31 March 2012	% of capital pledged
Financière Faiveley	Société Générale and Crédit Lyonnais	24/03/2006	31/03/2016	Full repayment of loan granted	70,400	0.49
François Faiveley Participations	Société Générale and Crédit Lyonnais	24/03/2006	30/03/2013	Full repayment of loan granted	4,062	0.028

C.4. Movements in the share capital during the last six years

Date	Transactions	Increase in capital (€)	Cumulative number of shares	Capital (€)
31 March 2006	Nil	Nil	12,529,585	12,529,585
31 March 2007	Nil	Nil	12,529,585	12,529,585
31 March 2008	Nil	Nil	12,529,585	12,529,585
31 March 2009	Issue of new shares	1,875,126	14,404,711	14,404,711
31 March 2010	Nil	Nil	14,404,711	14,404,711
31 March 2011	Nil	Nil	14,404,711	14,404,711
3 February 2012	Issue of new shares	209,441	14,614,152	14,614,152
31 March 2012	Nil	Nil	14,614,152	14,614,152

C.5. Employee interest in the Company's share capital

FCPE Faiveley Shares held 15,360 shares (0.10%) in the Company at 31 March 2012.

C.6. Buyback by the Company of its own shares

At 31 March 2012, the Company held 427,528 of its own shares, representing 2.93% of its share capital. The book value of these shares was €21,375,820.45 and their market value was €17,462,834.60.

The Combined General Meeting of 14 September 2011 was called to approve a new share buyback programme in its seventh resolution. A description of this programme, prepared in accordance with the provisions of Article 241-2 of the AMF general regulations, is presented hereafter, as provided by Article 241-3-III of the same regulations. As a result, it will not be subject to a specific publication.

6.1. OBJECTIVES OF THE SHARE BUYBACK PROGRAMME AUTHORISED BY THE COMBINED GENERAL MEETING OF 14 SEPTEMBER 2011

Shares may be bought back to:
- ensure the liquidity and to support the market for Faiveley Transport shares by an investment services provider via a liquidity contract that conforms to the ethics charter recognised by the Autorité des Marchés Financiers;
- grant them to employees and management of the Group according to the terms and conditions of the law (options to purchase shares, employee profit-sharing, allocation of free shares);
- cancel them by way of reduction in capital within the limits set by law;
- retain them within the limit of 5% of the capital and use them in exchange or payment, notably as part of acquisitions initiated by the Company, by way of public offer or other;
- implement all other market practice that is permitted by the Autorité des Marchés Financiers and more generally all transactions that conform to the regulations in force.

6.2. MAXIMUM PERCENTAGE OF THE SHARE CAPITAL, MAXIMUM NUMBER AND FEATURES OF SHARES THE COMPANY IS PROPOSING TO BUY BACK AND MAXIMUM PURCHASE PRICE

Purchase of shares in the Company may relate to a number of shares such that the number of shares held following these purchases does not exceed 10% of the shares comprising the share capital of the Company, knowing that the percentage will apply to the capital adjusted according to transactions that may occur subsequent to the present Meeting.

The maximum purchase price is set at €90 per share.

The maximum amount allocated to the repurchase programme is €129.6 million.

Taking account of the 427,528 shares already directly or indirectly held by the Company at 31 March 2012, the maximum number of shares that the Company may acquire as part of this share buyback programme would be 1,033,887.

6.3. VALIDITY OF THE SHARE BUYBACK PROGRAMME

This authorisation will remain valid for eighteen months, i.e. until 14 March 2013.

During the year ended 31 March 2012, the Company did not buy back any Faiveley Transport shares, excluding those carried out by an investment service provider through a liquidity contract.

At the Combined General Meeting to be held on 14 September 2012, a draft resolution (ninth resolution) providing for the renewal of this buyback programme for a further period of eighteen months will be submitted to shareholders for approval.

If this resolution is adopted at the next General Meeting, the authorisation granted to the Management Board will supersede that provided at the General Meeting on 14 September 2011.

C.7. Contract to stimulate trading of the Faiveley Transport share

Since 22 September 2009, a liquidity contract has been implemented between the Company and ODDO Corporate Finance, an investment service provider that operates in full independence to stimulate the market.

The Company allocated 10,000 shares and €500,000 to ODDO as part of this contract. At 31 March 2012, ODDO Corporate Finance bought 159,857 shares and sold 154,600 on behalf of the Company.

The average price of the shares bought during the year was €55.89 and €55.36 for shares sold. At 31 March 2012, the Company held 10,181 shares through the market stimulation contract (being 0.07% of its share capital) for a market value of €534,110.94, i.e. a price per share of €52.46.

D. CORPORATE BODIES AND MANAGEMENT

D.1. Corporate governance

1.1. COMPOSITION OF THE MANAGEMENT BOARD

The Management Board comprises between three and seven members, selected or not from among the shareholders and appointed by the Supervisory Board, which confers on one of them the position of Chairman. The members of the Management Board must be individuals.

The Management Board is appointed for a period of three years by the Supervisory Board, which may replace members who die or resign, in accordance with the law.

No individual may be appointed as a member of the Management Board if they do not meet the conditions of qualification required by Directors of public limited companies, if they have been deemed incompatible, in default or subject to a prohibition forbidding them

access to these functions, if they are a statutory auditor to the Company, was or are a parent or related under the conditions set by Article L. 225-224 of the Commercial Code, if they are a member of the Supervisory Board, if they already have two other positions on the Management Boards of other companies or if they chair two other public limited companies.

Every member of the Management Board must be under 65 years old. If this age limit is reached in office, the Director in question is considered to have resigned and a new Director will be appointed as provided by the present article.

Every member of the Management Board may be linked to the Company through an employment contract that remains in force during the term of office and upon its expiry. Members of the Management Board may be reappointed.

In accordance with the bylaws, the Chairman who is granted the power to represent the Company carries the title "Chairman and Chief Executive Officer".

There are no family relationships between members of the Management Board.

Members of the Management Board are as follows:

• Thierry Barel (born 11 February 1961)

On 22 September 2009, Thierry Barel was appointed as a member of the Management Board by the Supervisory Board. He replaced Robert Joyeux as Chairman of the Management Board on 1 April 2011. On 9 June 2011, the Supervisory Board renewed his term of office for a further period of three years.

Thierry Barel graduated from ENSAM as an engineer and holds a degree from IMD.

Before joining the Faiveley Transport Group, from 2007 to 2009 Thierry Barel served as Chief Executive Officer of PhotoMe International, a Group listed on the London Stock Exchange that manufactures and operates automatic distribution machinery and instant photographic printing. Beforehand, he spent the greater part of his career with industrial group Staübli, a world leader in mechatronics, where he ultimately held the position of Chief Executive Officer.

– Other positions held within the Group

- Chairman of the Management Board of:
  - Faiveley Transport Lekov;

- Chairman of:
  - Faiveley Transport Amiens,
  - Faiveley Transport NSF,
  - Faiveley Transport Tours;

- Chairman of the Board of Directors of :
  - Ellcon National,
  - Faiveley Transport Acquisition,
  - Faiveley Transport Far East,
  - Faiveley Transport Ibérica,
  - Faiveley Transport Nordic,
  - Faiveley Transport Malmö,

• Guillaume Bouhours (born 3 July 1976)

On 1 April 2011, Guillaume Bouhours was appointed member of the Management Board by the Supervisory Board. On 9 June 2011, the Supervisory Board renewed his term of office for a further period of three years.

Guillaume Bouhours graduated from engineering schools Ecole des Mines de Paris and Ecole Polytechnique.

Guillaume Bouhours was a Director of Sagard, a private equity fund and a previous shareholder of Faiveley Transport. In this role, he participated actively in Sagard's investment decisions and was involved throughout the decision-making process of LBOs implemented by Sagard: from the analysis of the investment opportunity through to the finalisation of the financial and legal aspects of each transaction.

Guillaume Bouhours previously worked in the European Merger & Acquisition department of investment bank Morgan Stanley.

  – Stromboli Investissements;

- Director of:
  – Olympia Group of Companies,
  – Faiveley Transport.

1.2. COMPOSITION OF THE SUPERVISORY BOARD

Pursuant to the bylaws, the Supervisory Board comprises a minimum of five members and a maximum of ten members.

The Company adopted the form of a public limited company with a Management Board and a Supervisory Board at the General Meeting held on 27 September 2005. The first members, formerly Directors of the Company constituted as a public limited company with a Board of Directors, were appointed for an initial period of three years and were reappointed at the Annual General Meeting held on 17 September 2008 for a period of 6 years, in accordance with the Company's bylaws.

The Combined General Meeting of 14 September 2011 amended Article 19 of the Company's bylaws. The term of office of Board members is three years, but as an exception and to allow the implementation and the maintenance of staggered terms of office for members of the Supervisory Board, the latter may be appointed by the General Meeting for periods of one (1) or two (2) years. Board members may be re-elected.

The option to stagger the terms of office of members of the Supervisory Board was implemented when terms of office were submitted for approval by the Combined General Meeting of 14 September 2011. The term of office of one third of Board members will thus expire every year.

Any shareholder, individual or corporate, may be elected as a member, subject to their holding at least one share in the Company (Article 19 of the bylaws).

The Supervisory Board elects, from among its own members, a Chairman and a Vice-Chairman, who are individual shareholders, otherwise their appointment is null and void. The Chairman and Vice-Chairman are responsible for calling board meetings and leading discussions.

(1) Listed company.

Where a legal entity assumes the function of a member of the Supervisory Board, it is required to designate a permanent representative who is subject to the same conditions and requirements and who has the same civil and personal liability as if they were a member of the Board in their own name.

Members of the Management Board, as well as current or former statutory auditors and their parents or relatives under the laws, may not be members of the Supervisory Board.

The education and professional experience of board members are quite varied, given that they have all held high-level management positions.

With regard to the independence criteria defined by the Supervisory Board, and after a study of the individual position of each member of the Supervisory Board, at 31 March 2012 four of the current ten members may be considered independent: Hélène Auriol-Potier, Nicoletta Giadrossi-Morel, Christian Germa and Maurice Marchand-Tonel.

At 31 March 2012, the Supervisory Board comprised ten members, all French nationals, given that Christopher Spencer has dual French and British nationality. The average age of the members at 31 March 2012 was 56.

The members appointed by the General Meeting are as follows:

• Philippe Alfroid (born 29 August 1945)

Philippe Alfroid was appointed a Supervisory Board member at the General Meeting of 27 September 2005 and was reappointed at the Combined General Meeting of 14 September 2011.

He has been Chairman of the Supervisory Board since 22 September 2009.

Philippe Alfroid is an ENSEHRMA-Grenoble engineer and holds a Master of Science from Massachusetts Institute of Technology (MIT). Philippe Alfroid worked as a consultant for the company PSDI. He then joined Essilor in 1972, where he was Chief Executive Officer from 1996 to 2009.

– Other current positions

- Director of:
  - Essilor International [1],
  - Essilor of America,
  - Eurogerm [1],
  - Gemalto [1].

– Terms of office which expired during the last five financial year

- Deputy CEO of:
  - Essilor International;

- Director of:
  - Sperian Protection [1],
  - Gentex Optics,
  - EOA Holding Co,
  - EOA Investment Inc.,
  - Omega Optical Holding,
  - Essilor Canada LTEE/Ltd,
  - Pro-Optic Canada,
  - Shanghai Essilor Optical Company,
  - Faiveley Transport.

• François Faiveley (born 26 April 1951)

François Faiveley was appointed as a member of the Supervisory Board at the General Meeting of 27 September 2005 and was reappointed at the Combined General Meeting of 14 September 2011.

He has been Vice-Chairman of the Supervisory Board since 22 September 2009.

François Faiveley is a graduate from ESCAE (Business School) in Dijon. He has served in operational and management positions within the Faiveley Transport Group since the start of the 1990s.

– Other current positions

- Director of:
  - Financière Faiveley.

– Terms of office which expired during the last five financial years

- Director of:
  - Faiveley Transport.

• Didier Alix (born 16 August 1946)

Didier Alix was co-opted as a member of the Supervisory Board at its meeting held on 27 November 2009 following the resignation of Christian Baffy. His appointment as a member of the Supervisory Board was ratified at the General Meeting of 13 September 2010 and was reappointed at the Combined General Meeting of 14 September 2011.

Didier Alix joined Société Générale in 1971, where he held a number of positions, notably within the Inspection Générale then as Head of Central Risk Control. He was also Head of Branch Offices before being promoted to Chief Executive Officer of Franfinance, then Head of Réseau France. In 1998, he became Deputy Chief Executive Officer for Individuals and Businesses. In 2006, he became Deputy Chief Executive Officer of Société Générale. He is currently Advisor to the Chairman and Chief Executive Officer.

– Other current positions

- Chairman of the Supervisory Board of:
  - Komercni Banka;

- Chairman and Chief Executive Officer of:
  - Sogébail;

  - Société Générale au Liban,
  - MISR International Bank,
  - Sogessur,
  - Fiditalia,
  - Sg Private Banking Suisse,
  - SGBT Luxembourg,
  - Société Générale de Banques en Côte d'Ivoire.

• Hélène Auriol-Potier (born 26 November 1962)

Hélène Auriol-Potier was appointed as a member of the Supervisory Board at the Combined General Meeting of 14 September 2011.

Hélène Auriol-Potier graduated as an engineer from the Ecole Nationale Supérieure des Télécommunications in Paris and completed an Executive Programme from INSEAD. She started her career at France Telecom and then joined the company Nortel where she held several positions before becoming Vice President of the Service & Operations division. She then joined the company Dell where she was responsible for emerging markets in the Africa and Mediterranean region as Chief Operating Officer and member of the Executive Committee of Dell Emerging Markets. Today she is Chief Executive Officer – Enterprises and Partners – and a member of the Executive Committee of Microsoft France.

• Serge Choumaker (born 18 September 1959)

Serge Choumaker was appointed as a member of the Supervisory Board representing employee shareholders at the Combined General Meeting of 13 September 2010.

He is Head of Accounting & Consolidation within the Faiveley Transport Group. Serge Choumaker holds a D.E.C.S. He joined the Faiveley Transport Group in September 2001. Previously, Serge Choumaker held management positions as Head of Accounting at the companies Lafarge and Ferembal.

• Christian Germa (born 11 February 1970)

Christian Germa was appointed as a member of the Supervisory Board at the Combined General Meeting of 27 September 2005 and was reappointed at the Combined General Meeting of 14 September 2011.

Christian Germa is a graduate of the Ecole Polytechnique and he is qualified as an 'Ingénieur des Ponts et Chaussées'. He began his career in the Treasury Management of the Ministry of Finance, where he carried out the duties of Deputy Secretary General to the Comité Interministériel de Restructuration Industrielle (Inter-Ministerial Committee for Industrial Restructuring). He joined the Vinci Group in 2002, where he is today responsible for public-private partnerships.

– Terms of office which expired during the last five financial years

- Director of:
  - Faiveley Transport,
  - Vodafone SA (1).

• Nicoletta Giadrossi-Morel (born 16 May 1966)

Nicoletta Giadrossi-Morel was appointed as a member of the Supervisory Board at the Combined General Meeting of 14 September 2011.

Nicoletta Giadrossi-Morel began her university studies at Yale before graduating from Harvard with an MBA. She is Vice-Chairman and Chief Executive Officer of Dresser-Rand, EMEA (Europe, Middle-East, Africa). She also worked as a consultant in private equity for Boston Consulting Group, and spent ten years with General Electric where she held various profit centre management roles, in particular in the "Equipment Management" and "Oil & Gas" divisions.

– Other current positions:

- Chairman of the Board of Directors of:
  - Dresser Rand SA,
  - Dresser Rand SAS;

(1) Listed company

- Manager of:
  - H.F.M;

- Director of:
  - Aker Solutions asa.

– Terms of office which expired during the last five financial years

- Chairman of:
  - SMO SAS,
  - Ramosport.

• Robert Joyeux (born 2 September 1947)

Robert Joyeux was appointed as a member of the Supervisory Board at the Combined General Meeting of 14 September 2011.

Robert Joyeux holds a PhD in electronics and graduated from Sciences Politiques Paris with an economics and finance degree. He held several positions before joining the Faiveley Transport Group. He worked for the company Thompson (Thales) for 17 years in a variety of industrial roles before joining Tekelec Airtronic as the General Manager of the Components and Systems Division and then Alstom as General Manager for the Protection, Energy and Control division and the British group Laird as Chief Executive Officer. Robert Joyeux held the position of Chief Executive Officer of Faiveley Transport from 2001. He resigned from his positions on 31 March 2011 and currently works as a consultant.

– Other positions currently held

- Manager of:
  - RJX Consulting;

– Terms of office which expired during the last five financial years

- Chairman of the Management Board of:
  - Faiveley Transport;

  - CIM;

- Manager of:
  - Faiveley Transport Verwaltungs,
  - Faiveley Transport Beteiligungs,
  - Sofaport.

• Maurice Marchand-Tonel (born 14 February 1944)

Maurice Marchand-Tonel was appointed as a member of the Supervisory Board at the General Meeting held on 22 September 2009, following the resignation of Stéphane Volant, and reappointed at the Combined General Meeting of 14 September 2011.

Maurice Marchand-Tonel is an independent consultant. On leaving Harvard Business School, he started his career with the Boston Consulting Group with whom he co-founded their French and German offices. He was subsequently appointed Chairman of Compagnie Olivier, and subsequently Chief Executive Officer of Sommer and Chairman of Givenchy. He then managed Ciments Français International, before becoming Chairman of Transalliance until 1999. In 2000, he became a partner with Arthur Andersen, which has since become BearingPoint, where he has been Senior Advisor since 2004. Maurice Marchand-Tonel is also Senior Adviser of Investcorp (London and New York) and Newbury Piret (Boston). Maurice Marchand-Tonel is Chairman of the Board of Directors and a Founder of the European American Chamber of Commerce.

– Other current positions

- Chairman of the Board of Directors of:
  - European American Chamber of Commerce (Paris);

- Director of:
  - European American Chamber of Commerce (New York),
  - Essilor International [1].

– Terms of office which expired during the last five financial years

- Chairman of the Supervisory Board of:
  - Du pareil au même;

(1) Listed company

- Director of:
  - Faiveley Transport,
  - Financière Huysmans,
  - Groupe Souchier.

• Christopher Spencer (born 4 November 1962)

Christopher Spencer was appointed as a member of the Supervisory Board at the Combined General Meeting of 22 September 2009, following the resignation of Denis Grand-Perret, and reappointed at the Combined General Meeting of 14 September 2011.

He was previously a Director of Faiveley Transport (November 2004–February 2009).

Christopher Spencer holds both French and German degrees in higher management studies (ESC Reims and Fachhochschule Reutlingen) and is a Chartered Accountant. With an experience of over 20 years in private equity in Europe, the last 6 years of which were spent with Sagard funds, which he helped establish in the French market, since the start of 2010 Christopher Spencer has focused on his activities in private investment and as a business angel.

– Other current positions

  - Adminium SA.

– Terms of office which expired during the last five financial years

- Chairman of the Supervisory Board of:
  - Cougar Management;

- Vice-Chairman of the Supervisory Board of:
  - Cougar Investissements SAS;

- Chairman of:
  - Cougar International;

- Director of:
  - SGD,
  - Olympia.

Xavier de Lavallade, Legal Counsel for the Group, serves as Secretary of the Board.

Members of the Supervisory Board can be contacted through the Company's head office: Immeuble Le Delage – Hall Parc – Bâtiment 6A – 3 rue du 19 mars 1962, 92230 Gennevilliers, France.

(1) Listed company

D.2. Directors' remuneration

2.1. REMUNERATION AND ATTENDANCE FEES

During 2011/2012, the total remuneration, direct and indirect, of all kind received by members of corporate bodies of the Company amounted to €1,569,760.

Pursuant to Article L. 225-102-1 of the Commercial Code, we disclose the remuneration and benefits in kind of every nature received by every senior executive, during the year, from companies controlled in the sense of Article L. 233-16 of the Commercial Code:

	Remuneration				
Nom	Fixed	Variable	Deferred	Directors' fees paid by Group companies	Benefits in kind
Philippe Alfroid Chairman of the Supervisory Board	–	–	–	45,200	–
François Faiveley Vice-Chairman of the Supervisory Board	–	–	–	19,200	–
Didier Alix Member of the Supervisory Board	–	–	–	15,200	–
Serge Choumaker (1) Member of the Supervisory Board, Representative of employee shareholders	116,498	29,762	–	–	–
Christian Germa Member of the Supervisory Board	–	–	–	22,800	–
Robert Joyeux Member of the Supervisory Board	–	–	–	–	–
Maurice Marchand-Tonel Member of the Supervisory Board	–	–	–	16,400	–
Christopher Spencer Member of the Supervisory Board	–	–	–	17,600	–
Edmond Ballerin (2)	–	–	–	2,000	–
Thierry Barel (1) Chairman of the Management Board	432,794	381,300	–	–	Company car
Erwan Faiveley (3) Member of the Management Board	96,000	–	–	–	Housing allowance
Guillaume Bouhours (1) Member of the Management Board	214,173	160,833	–	–	Company car

(1) On 5 March 2012, the Management Board allocated free shares to a number of Group employees and executives, including 4,000 to Thierry Barel, 1,600 shares to Guillaume Bouhours and 800 shares to Serge Choumaker.

(2) The term of office of Edmond Ballerin as member of Supervisory Board was terminated in September 2011.

(3) Erwan Faiveley is an employee of François Faiveley Participations (F.F.P).

You will also find, in the appendices to this report, a detailed description of total remuneration received by directors of the Company, in accordance with AMF recommendations.

You should also decide on the total amount of Directors' fees paid to the Supervisory Board for the year ended 31 March 2012, which we propose be set at €260,000.

2.2. SUMMARY OF TRANSACTIONS IN 2011/2012 IN FAIVELEY TRANSPORT SHARES BY SENIOR EXECUTIVES AND INDIVIDUALS REFERRED TO IN ARTICLE L. 621-18-2 OF THE MONETARY AND FINANCIAL CODE

Director/senior executive	Financial instruments	Nature of transaction	Number of transactions	Value (€)
Thierry Barel, Chairman of the Management Board	Shares	Purchase	1	20,000
Individual related to Thierry Barel, Chairman of the Management Board	Shares	Purchase	1	20,000

Helen Balandrau, Member of the Executive Committee	Shares	Disposal	1	128,000

E. CORPORATE INFORMATION RELATING TO THE GROUP

E.1. Corporate information

1.1. HUMAN RESOURCES POLICY

Faiveley Transport is a group with an international culture and dimension. Its business is reflected in long-term contractual relationships with its customers. In order to capitalise on knowledge acquired throughout the life of these projects, the Group has resources enabling it to ensure staff loyalty over time.

The Group provides real prospects for career development through a policy of geographical mobility and shared expertise.

The Human Resources Department has been strengthened and is standardising the human resources policy on all sites, to streamline costs, to encourage staff mobility and to optimise career management.

Since the start of 2008, new indicators have been put in place by the Human Resources Department, in all of the 50 sites in 25 countries. Today, the consolidation and analysis of these indicators provides better insight into Company needs and helps establish priorities in the best way possible.

1.1.1. Ensuring the development of employee expertise

The policy adopted by the Human Resources Department is based on the dynamics of mobility and exchange of experiences. The more skills are transferred and good practices exchanged among the various entities in the world, the greater the level of the Group's expertise is reinforced.

Bolstered by this conviction, Faiveley Transport encourages the development of technical and project teams, working as closely as possible with their customers. Technical knowledge acquired by the Faiveley Transport staff, based at the four corners of the world, enables them to support their customers better and respond to their needs.

Using the strength of its expertise at a local level, the Group takes full advantage of its international scale.

The Group seeks to retain its human capital, that of its engineers as well as all employees, to provide a better response to the overriding requirements of reliability, safety and extended life of its equipment.

It is for this reason that the Group encourages internal mobility, both on a professional and geographic basis. This can provide a solution to the need to adapt employment levels as well as to integrate the aspirations of the employees.

Internal mobility also provides employees with career opportunities that encourage their professional development by the acquisition of new skills and qualifications.

In order to promote this internal mobility, a section has been created on the Group's intranet portal where everyone can preview the positions open at all sites around the world. It is only thereafter that job offers are advertised externally.

In the same vein, since 2009, in conjunction with all local Human Resources executives, the Group has been committed to continuing the review of existing tools and practices, to improve the contents and to ensure that a common Group standard is used in every country (in the area of training, annual performance review, etc.).

For instance, a common policy was implemented for holding annual performance review interviews; a common performance review form for all entities was prepared in consultation with local Human Resources officers.

At the same time, in order to support managers in this process, training will be provided on how to conduct these interviews.

This thought process continued via the creation of a Group-wide induction booklet. This document is intended to provide every new hire with a comprehensive overview of the Faiveley Transport Group, as well as all practical local information necessary to their integration. This is also a means of strengthening the sense of belonging to Faiveley Transport.

In 2011, continuing the spirit of standardising existing tools and practices, several projects emerged:

- a Group-wide information technology charter was established and distributed to all subsidiaries. This charter is intended to formalise legal, ethical and security regulations for the use of information systems and for communication within the companies belonging to the Faiveley Transport Group;
- a time management tool has been rolled out in France in an effort to streamline and optimise payroll administration tasks;
- a new database to pool all the administrative data on all Group employees, regarding payroll and career development, is currently being developed.
  Information such as salaries and bonuses will thus be managed using this software. This module will provide managers with a comprehensive overview of their teams, wherever they may operate in the world, both from the point of their change in salary and their career path, before and after they join Faiveley Transport.
  Over time, this software will also enable the Group's Human Resources Department to optimise career plan monitoring and further promote international mobility.

In this constantly changing economic environment for Group companies, maintaining and developing employees' expertise is an essential feature of the growth and overall performance of the Group.

Professional training constitutes in this respect a major area of the Human Resources policy. During the year, the training programmes concerned all positions.

In addition to making people aware of safety measures and quality standards, the largest part of the training budget continued to be dedicated to updating technical skills. In this area, the requirements have been defined by department managers together with the Human Resources departments.

There is also a strong need for Group employees to improve their proficiency in English.

The training policy is entirely adapted to the local level in line with the issues encountered at each site.

However, decentralisation does not rule out control. The Group remains vigilant and ensures that training is consistent from one site to another; the standardisation of practices must aim at providing suitable training for each category of personnel to meet the needs of all entities.

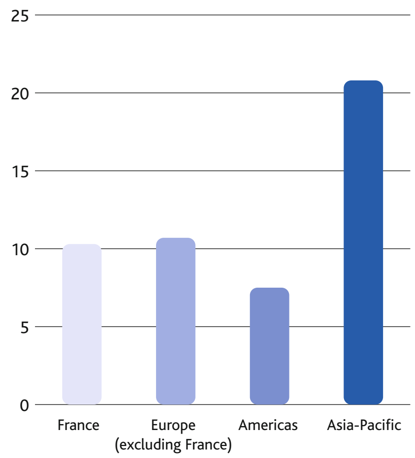
The objectives of the training indicators are to monitor the training budget of each entity, the percentage of trained employees and managers and the nature of training organised.

– Percentage of gross payroll dedicated to training [1]

Region	In 2011/2012	In 2010/2011
France	2.16%	1.70%
Europe (excluding France)	1.48%	0.73%
Americas	1.51%	0.95%
Asia-Pacific	1.35%	2.15%

(1) Only teaching costs are included.

– Average number of training hours per employee per year



This chart shows that the number of training hours per year and per employee is higher in the Asia/Pacific region and that this figure is not proportional to the amount of gross payroll devoted to training. This primarily includes in-house training programmes that did not involve external training companies.

– Number of training hours by category of personnel, per year

Region	Managers	Employees	Operatives
France	12	8	10
Europe (excluding France)	25	9	11
Americas	1	26	1
Asia-Pacific	49	10	22

– Number of training hours provided in each field during the year

Region	Position	Management	Languages	Total
France	9,585 *70%*	2,468 *18%*	1,598 *12%*	13,651 *100%*
Europe (excluding France)	13,718 *79%*	1,292 *7%*	2,487 *14%*	17,497 *100%*
Americas	3,616 *60%*	1,524 *25%*	879 *15%*	6,019 *100%*
Asia-Pacific	15,388 *55%*	9,397 *33%*	3,489 *12%*	28,273 *100%*
TOTAL	**42,306** *65%*	**14,680** *22%*	**8,453** *13%*	**65,439** *100%*

1.1.2. Promoting a common culture

– Respect for cultures and standardisation of processes

Given the growing internationalisation of the Group, the position adopted was to respect the diversity of each country and to allow local customers the possibility of retaining a local contact.

Every site therefore retained its identity, while respecting common values, which are: quest for performance and results, stimulation of creativity and sharing of experiences.

Through the generalised and systematic exchange of best practices between sites, a set of best practice rules have been defined and implemented. The standardisation of processes is fundamental to enable everyone to have a clear understanding of their action plan and expected results.

Management uses key performance indicators, focuses its efforts on performance improvement, thus contributing to greater motivation of all employees.

To achieve this, Faiveley Transport also uses the development of the industrial excellence system based on the "Lean manufacturing" method. This method consists of seeking industrial performance, by permanent and continuous improvement and the elimination of waste. It is based on two principal concepts: just-in-time and autonomation.
The just-in-time tools are the production with continuous and driven flows, the rapid change of tools and the integration of logistics. The autonomation tools include tools to automatically stop production, the methods of elimination of causes of errors and the analysis of problems.

The rollout of these techniques is based on the human resources of the business and their integration into the areas of improvement achieved, in most cases in the field.

The following programmes deserve a special mention: QRQC and TOP5, which encourage the staff to exchange ideas and develop action plans for improvement. The objective of this type of initiative is to offer solutions to the operational problems identified.

The QRQC method (Quick Response Quality Control) enables rapid solutions to be put in place for quality or other problems. The involvement of the personnel in the resolution of quality problems facilitates relations between departments and enables operators to improve their working conditions.

In the principal sites, the working day now starts with a 15-minute meeting on site. This is an opportunity to discuss problems encountered at their workstation and to propose ideas for improvement that may be rewarded on certain sites. This daily meeting enables them also to have a complete view of their results as well as the objectives to be achieved during the day.

– Development of internal communication

Faiveley Transport also continues to roll out its various internal communication tools to improve dialogue, promote communication amongst employees and to distribute Group information.

Within the Group, information circulates both from the bottom-up and the top-down within the organisation, via various communication tools, including:
- an intranet portal accessible to all Group subsidiaries;
- an internal Group newsletter (printed in four languages, including Chinese);
- an intranet network for each entity;
- a monthly information letter within certain companies;
- organisation of exchange meetings at operating company-level;
- organisation of annual business seminars (HR seminar, Finance seminar, Engineering seminar, etc.);
- organisation of annual meetings between the various Group managers;
- regular one-to-one meetings organised between employees and their immediate supervisor.

1.2. ANALYSIS OF WORKFORCE

At the end of March 2012, the Faiveley Transport Group had 5,469 employees across 25 countries worldwide. The change in the workforce during the last two years was as follows:

- **Geographic analysis**

	31 March 2012	31 March 2011
France	1,260	1,285
Europe (excluding France)	1,937	1,914
Americas*	784	384
Asia-Pacific	1,488	1,531
TOTAL	**5,469**	**5,114**

* including the workforce of Graham-White Manufacturing Co. acquired in February 2012: 352 people

- **Analysis of workforce by type of employment contract**

	31 March 2012		31 March 2011	
	Permanent	Fixed term	Permanent	Fixed term
France	1,217	43	1,226	59

TOTAL	**5,469**	**5,114**

* including the workforce of Graham-White Manufacturing Co. acquired in February 2012: 352 people.

• Analysis of workforce by age at 31 March 2012

Age	France	Europe (excluding France)	Americas	Asia-Pacific	Total	%
18-24	30	58	38	149	275	5%
25-34	239	405	165	785	1,594	29%
35-44	477	529	189	322	1,517	28%
45-54	340	519	212	174	1,245	23%
55-64	173	339	161	57	730	13%
>65	1	87	19	1	108	2%
TOTAL	**1,260**	**1,937**	**784**	**1,488**	**5,469**	**100%**

It should be noted that over 57% of the workforce of the Faiveley Transport Group is aged between 25 and 44 years old.

• Analysis of workforce by length of service at 31 March 2012

Seniority	France	Europe (excluding France)	Americas	Asia-Pacific	Total	%
Less than 2 years	152	365	256	396	1,169	21%
2 to 5 years	300	442	149	559	1,450	27%
5 to 10 years	192	325	154	231	902	17%
10 to 15 years	168	265	68	70	571	10%
Over 15 years	448	540	157	232	1,377	25%
TOTAL	**1,260**	**1,937**	**784**	**1,488**	**5,469**	**100%**

It should be noted that 48% of the workforce has been with the Company for less than 5 years and over 25% have over 15 years of service.

• **Absenteeism at 31 March 2012**

Region	31 March 2012	31 March 2011
France	2.2%	3.0%
Europe (excluding France)	3.1%	3.0%
Americas	0.7%	2.0%
Asia-Pacific	1.1%	0.8%
TOTAL	**1.8%**	**2.2%**

In most countries, absenteeism at the sites is below the national average for comparable industries. Overall, the Group's rate is 1.8% (number of hours of absence/theoretical number of working hours).

• **Turnover rate at 31 March 2012**

Region	Turnover
France	1%
Europe (excluding France)	3%
Americas	1%
Asia-Pacific	5%

• **Number of new hires per geographic region and category of staff during the year**

Region	Executives	Employees	Operatives	Total
France	55	6	8	69
Europe (excluding France)	15	89	71	175
Americas	4	45	33	82
Asia-Pacific	25	165	54	244
TOTAL	**99**	**305**	**166**	**570**

• **Number of departures by geographic region and reasons for departure during the year**

Region	Resignation	Redundancies	Retirement	Total
France	38	7	18	63
Europe (excluding France)	102	67	25	194
Americas	29	32	2	63
Asia-Pacific	244	63	13	320
TOTAL	**413**	**169**	**58**	**640**

Redundancies were for individual reasons or related to the restructuring of industrial sites (Faiveley Transport Iberica, Faiveley Transport Metro Technology Shanghai, etc.).

1.3. ORGANISATION OF THE WORKING WEEK

In France, the reduction and structure of the working week effective within the Group are subject to the applicable laws and collective agreements. The steps taken to reduce working hours means overtime levels are low.

In the rest of the world, the structure of the working week and the management of overtime are governed by the law in each country.

1.4. REMUNERATION POLICY

Efforts undertaken to control payroll expenses were continued, while retaining the principle of individualised remuneration, based on results and performance.

Generally speaking, the financial resources available for wage and salary increases within the Group are negotiated annually with personnel representatives for all staff.

The remuneration policy for staff is as follows:
- individual increase depending on the results and performance of each employee;
- a variable annual bonus, which is given to staff and managers depending on Group and individual objectives, in all Group companies.

Management's objective is to maintain an increase in salaries throughout Group companies.

1.5. RECOGNITION OF EMPLOYEE BENEFITS

Employee benefits, mainly comprising pension commitments, are recorded in the consolidated financial statements in accordance with IFRS. These amounted to €32.8 million at 31 March 2012, compared to €33 million at 31 March 2011.

1.6. GENDER EQUALITY

Faiveley Transport is committed to promoting a level playing field of equality between men and women in their career development, access to training, salaries and in their position within the business.

Since the Law of 9 November 2010 on pension reform, in France, companies of 50 employees or more must now establish a plan of action to ensure gender equality at work from 1 January 2012. The Group Human Resources Management initiated this process at its all subsidiaries during 2011. Today, all subsidiaries in France implement applicable gender equality provisions, either through collective agreements or as a result of a unilateral decision.

1.7. WORK-RELATED ACCIDENTS, HEALTH AND SAFETY CONDITIONS

The prevention of health and safety risks is a priority for the Faiveley Transport Group.

The various risks encountered in its business and the steps taken to deal with them are described in the Chapter "2.3. Industrial and environmental risks - § Health and safety risks".

The Health and Safety committees in France meet quarterly. During these meetings, critical situations are discussed and priorities defined. The cost of any required action is also reviewed and the results of such steps are analysed.

Not only does the Group hold these meetings in accordance with applicable local legislation, it also ensures that staff have an updated

brochure containing information on health and safety measures within the Company and on acceptable staff behaviour. Fire drills are conducted on a regular basis.

In addition to the steps implemented by the health and safety committees, progress groups are continuing to work within the various companies of the Group, focusing on diverse areas of interest in order to improve risk prevention and implement the safety training policy.

Since the Law of 9 November 2010 on pension reform, companies that employ more than 50 people, or that employ less than 50 people but are part of a Group with a workforce of 300 or more, must negotiate a collective agreement or prepare an action plan to alleviate arduous working conditions. In 2011, all subsidiaries in France carried out an analysis to determine the percentage of employees exposed to arduous working conditions, in order to put into place the necessary actions to reduce exposure to this risk.

Faiveley Transport considers that the improvement of working conditions contributes to the Group's sustainability and development. This commitment is a necessity to ensure long-term competitiveness.

The prevention of occupational risks is based on both ethical and legal obligations. It is strategic to ensure the attractiveness of metalwork as an occupation and the necessary extension of the working life of employees.

The occurrence of work-related accidents is monitored, analysed and communicated to the health and safety committee on a monthly basis, through a number of indicators. Encouraging results in terms of employee safety were recorded as a result of total commitment by the Group's senior management.

	France		Europe (excluding France)		Americas		Asia-Pacific		Total	
	2011/2012	2010/2011	2011/2012	2010/2011	2011/2012	2010/2011	2011/2012	2010/2011	2011/2012	2010/2011

1.8. CORPORATE INFORMATION CONCERNING COMPANIES OF THE FAIVELEY TRANSPORT GROUP

1.8.1. Collective agreements

The French companies of the Faiveley Transport Group are all subject to the national collective agreement in the metal industry.

1.8.2. Personnel representatives

Most subsidiaries of the Faiveley Transport Group have personnel representatives.

The Group has a European Works Council that meets twice a year, as well as a Group committee in France that meets once a year.

The Group convenes the meetings at a different site each time. The objective is to enable the representatives of these committees to make the most of these events and visit other industrial sites and thus discover other practices and cultures.

1.8.3. Employment and integration of disabled workers

All Group companies whose local laws provide for the employment of a certain percentage of disabled employees, comply with such local legal requirements.

Some of these subsidiaries employ a higher number of disabled workers than required by law.

The Human Resources Department recognises that this is a very important issue and in 2010 decided to ask its staff to think about how to best approach this topic within the Company.

			Legal obligation to employ disabled workers			
Sites	Annual legal obligation = BU * equivalent	Obligation met	Disabled people employed	BU * equivalent	Use of sheltered workshops	BU * equivalent
Faiveley Transport	3	1.09	NO	–	YES	1.09

Faiveley Transport Gennevilliers	4	6.11	YES	6.09	YES	0.02

(*) Beneficiary Units.

1.8.4. Outsourcing

For the Group as a whole, outsourcing for the financial year 2011/2012 was valued at €37 million, compared to €33.7 million in the previous year.

The Group ensures that its subsidiaries comply with the fundamental provisions of working conditions in their relationships with subcontractors.

1.8.5. Charitable activities

It should be noted that the vast majority of the entities in the Faiveley Transport Group allocate a significant budget to various charitable activities. An example is the support of orphans in Cambodia.

1.9. PROFIT-SHARING SCHEMES

Faiveley Transport has set up a group savings scheme, which is common to all French sites.

Since June 2011, all French subsidiaries adhere to a new employee savings plan, which includes a Group savings plan (PEG) and a Group joint retirement savings schemes (PERCO). A Group committee meets once a year in France to monitor employee savings plan.

1.9.1. Profit-sharing agreements

All our French subsidiaries have implemented a profit-sharing agreement.

1.9.2. Bonus schemes

All our French subsidiaries have implemented a bonus scheme.

1.9.3. Health and welfare benefit plans

An audit of health and welfare benefit plans with a view to simplifying, standardisation and optimising costs has now been completed in France.

Today, following the results of this audit carried out in 2008 and after communicating and discussing results with our personnel representatives, a single insurance provider has been selected. In France, the Group now has standardised guarantees for all the personnel of the Group's companies, regardless of the category of employee.

1.9.4. Employee shareholding, share option and subscription plans and allocation of free shares

Faiveley Transport has set up a long-term motivation plan for employees. The objective is to enable certain employees to become shareholders in the Company and drive performance improvement.

– Share option plan authorised by the General Meeting of 27 September 2005

Since the acquisition of Sab Wabco in 2004, Faiveley Transport has implemented a share option plan for the benefit of the Group's key managers. This share option plan, amounting to a maximum of 325,000 Faiveley Transport shares, was approved by the General Meeting of 27 September 2005 and implemented by the Management Board.

In order to meet its future obligation to transfer these shares to beneficiaries, Faiveley Transport began a share buyback programme on the market at the end of 2005.

- the Management Board of 24 November 2005 awarded 221,760 options to 38 employees or managers of Faiveley Transport;
- the Management Board of 29 December 2005 awarded 6,720 new options to 1 new beneficiary;
- the Management Board of 22 June 2006 awarded 31,360 options to 6 new beneficiaries;
- the Management Board of 25 October 2006 awarded 6,720 options to 1 new beneficiary;
- the Management Board of 15 November 2006 awarded 4,480 options to 1 new beneficiary;
- the Management Board of 1 December 2006 awarded 11,200 options to 2 new beneficiaries;
- the Management Board of 2 April 2007 awarded 26,880 options to 5 new beneficiaries;
- the Management Board of 19 February 2008 awarded 26,880 options to 4 new beneficiaries;
- the Management Board of 29 March 2008 awarded 13,440 options to 3 new beneficiaries;
- the Management Board of 16 July 2008 awarded 22,600 options to 1 new beneficiary.

Options granted that were neither exercised nor cancelled amount to 77,035 shares.

Options can be exercised from the second anniversary of their date of allocation by the Management Board, subject to the beneficiary being employed by the Faiveley Transport Group on the day they are exercised and their acceptance of the option regulations. It should be noted that 239,005 options had been exercised at 31 March 2012. The securities can only be disposed of from the fourth anniversary of the allocation of the purchase option. No Director of Faiveley Transport has been granted any share options as part of this plan.

– Share subscription plan authorised by the General Meeting of 22 September 2009

A share subscription plan was approved by the Annual General Meeting of 22 September 2009. This plan was implemented in accordance with recent regulatory developments, in particular the Law of 3 December 2008 on income earned and the AFEP-MEDEF recommendations of October 2008.

This plan was put forward in accordance with agreements concluded as part of the restructuring of the share capital of Faiveley Transport carried out in December 2008 and was intended to motivate and encourage the loyalty of Directors and senior executives to the Group.

At its meeting of 23 November 2009, the Management Board decided to grant on the same date and up to 23 November 2017, options giving the right to subscribe for new shares in the Company, to be issued through a share capital increase not exceeding an overall nominal amount of €144,000, corresponding to 144,000 new shares at a par value of €1 each. The new shares will be issued at a price of €54.91.

The terms and conditions of exercise of the options were posted or provided to the beneficiaries in a document listing the option plan regulations. Since one of the beneficiaries is a member of the Management Board and therefore a senior executive, a retention obligation was specifically provided.

– Plan for the allocation of free performance-based shares authorised by the General Meeting of 13 September 2010

To enable the Faiveley Transport Group to motivate and retain certain employees and officers, and to optimise the remuneration structure within the Group, the Combined General Meeting of 13 September 2010 authorised the Management Board to proceed on one or more occasions with the allocation of free ordinary shares of the Company's, existing or to be issued, for the benefit of corporate officers as defined by Law and to certain employees of the Company and companies related to it.

These allocations will be made within the limit, established by the General Meeting, of 1% of the share capital of the Company at 13 September 2010.

- The Management Board of 3 December 2010 awarded 64,500 free shares to 38 beneficiaries.
- The Management Board of 24 February 2011 awarded 5,200 free shares to 5 new beneficiaries.

The allocation of these shares will become final only after a period of two years and after the application of performance criteria established by the Remuneration Committee. Beneficiaries will be required to comply with a mandatory retention period of two years from the date of final allocation.

The terms and conditions of these free shares were included in a set of plan rules that was sent to the beneficiaries. One of the beneficiaries being member of the Management Board and as such an officer at the date of allocation, an additional obligation to retain the shares allocated to him was defined. At its meeting on 26 November 2011, the Supervisory Board of the Company decided that the officer should retain at least 50% of the shares that were allocated by the Management Board under the new plan, beyond the period of unavailability as defined by the regulations therein. This rule will apply as long as the officer does not hold shares of the Company, acquired in the various plans to grant stock options or free shares of the Company, worth at least the equivalent of one year's net salary.

– Free share allocation plan authorised by the Combined General Meeting of 14 September 2011

The Combined General Meeting of 14 September 2011 delegated the Management Board powers for the allocation, on one or more occasions, of free ordinary shares of the Company, either existing or to be issued, for the benefit of corporate officers and to certain employees of the Company and companies related to it.

These allocations will be made within the limit of 1% of the share capital of the Company on the date of the Combined General Meeting.

At its meeting held on 4 January 2012, the Management Board decided to implement an employee shareholding plan aimed at a broader population of executives, including a free share allocation plan (Executive Shareholding Programme). The plan, designed to increase the loyalty and motivation of key Group executives, brings the personal interest of employees in line with Group performance and requires a personal effort from each beneficiary that is commensurate to their rank within the organisation.

Therefore, each beneficiary has the option to invest in Company shares (purchased in the market or by contribution of treasury shares already held) and to be granted two free shares for each share already held under the Executive Shareholding Programme. Final vesting of the shares will take place at the end of a period of two or four years following the allocation date, with a stipulation that the beneficiaries must retain these shares for a further period of two years after the vesting date.

At its meeting held on 5 March 2012, the Management Board set the final list of beneficiaries and the number of free shares to be granted. A total of 79,224 shares are thus to be granted to 151 beneficiaries.

Thierry Barel and Guillaume Bouhours, both beneficiaries of free shares under this plan, are subject to an additional retention condition in their capacity as executive officers. They must retain at least 50% of shares granted to them by the Management Board under this new plan after the end of the vesting period defined by plan regulations. This rule will apply as long as they do not hold shares of the Company, acquired in the various plans to grant stock options or free shares of the Company, worth at least the equivalent of one year's net salary.

The main features of share option purchase plans, share subscription and free share allocation plans are detailed in Note E.11 – Equity to the consolidated financial statements.

E.2. Corporate responsibility

2.1. LOCAL, ECONOMIC AND SOCIAL IMPACT

Most of Faiveley Transport's production sites have been established for many years in the same region and are well accepted by the local population. The Group aims to recruit its teams locally and is often recognised as one of the largest employers in the areas in which it operates. In 1989, the company Elicon-National thus decided to leave New Jersey and set up its operations in Greenville, South Carolina, a town which was experiencing a high rate of unemployment at the time. Since then, this region of the US has become an important business hub, attracting many international companies, in a particularly pleasant living environment.

The Faiveley Transport Group companies are also involved with local industrial and economic development where they are members of professional associations and take part in research studies with local schools and universities and sometimes partnerships with local training organisations.

The Faiveley Transport Group is also actively involved with local communities throughout the world, supporting several initiatives. The Group supports a Senegalese association which has already built a library and is currently building a school. The Group has also supported a Cambodian project for the past 10 years, which has resulted in the opening of a school especially for deaf-mute and blind children and students. The Group supports its daily activities. Another

initiative in India finances the studies of students suffering from great poverty. When they complete their Engineering studies, these young people can take up a position with one of the Group's local factories.

Faiveley Transport has also taken part in initiatives to support minority groups, such as those with disabilities or the sick, in several countries. Through its career management policy, Faiveley Transport promotes dialogue between communities and respecting diversity is of great importance to the Group.

2.2. LONG-TERM DEVELOPMENT OF RELATIONSHIPS WITH FAIVELEY TRANSPORT SUPPLIERS

The Faiveley Transport Group aims to establish long-term relationships with its suppliers. For the Group, it is not a matter of seeking suppliers but rather partners in order to establish a relationship which brings about mutual, long-term benefits.

It is the Group's responsibility to see that all rules and best practices concerning the protection of people and the environment are implemented. Key factors in the choice of suppliers are respect for corporately responsible work standards to exclude all forms of discrimination and prohibit the recruitment of minors, as well as to prevent any favouritism.

The following policies have been implemented in the past two years:

- The "10 Commitments" Charter for better relationships between Faiveley and its suppliers:

  On 28 June 2010, Faiveley Transport signed the French Charter proposed by the French government to improve relationships between large and small to medium-sized companies.

  The companies which signed the Charter confirmed that they are committed to implementing best practices and fulfilling their responsibilities in an environment of mutual trust with suppliers, based on full knowledge and respect for the rights and obligations of each party.

  The "10 Commitments" Charter for responsible purchasing addresses the following:

  1. Ensuring financial equity in relation to suppliers.
  2. Promoting collaboration between major customers and strategic suppliers.
  3. Reducing the risk of mutual dependence between customers and suppliers.
  4. Involving major customers in the management of their industry.
  5. Assessing the full cost of the purchase.
  6. Incorporating environmental issues.
  7. Ensuring local responsibility for its company.
  8. Purchasing: one function and one process.
  9. A Purchasing function responsible for overall management of supplier relationships.
  10. Set a consistent buyers' remuneration policy.

- Commitment and training - purchasing teams:
  Likewise, all members of the Faiveley Transport purchasing team have signed the "Purchasing Charter" which defines and reminds the team of the basic values and the behaviour which all Group employees must adopt.

- Contractual agreements with suppliers:
  The new "Faiveley Transport - supplier agreement" comprises clear rules which provide for immediate termination of the supplier relationship where ethical and moral regulations are not complied with.

- Assessment of suppliers:
  Audits of Faiveley Transport suppliers contain a full chapter on environmental best practices, as well as on health and safety at work. The Group's suppliers must not engage in practices which could put their employers, their customers, the Company or the environment in danger. As such, no supplier may be classed as a Faiveley Transport supplier unless a supplier audit has been completed.

E.3. Environmental information

The Group's production activities, by their nature, generate little waste in the environment. The optimisation of the protection of the environment is one of the priorities for the Group whether in France or in its foreign subsidiaries. To this end, the Group takes initiatives to integrate environmental concerns into the management of its operations and facilities, in order to:
- comply with the legal and regulatory requirements that apply to all sites;
- find solutions that limit the impact of operations on the environment, prevent pollution and ensure continuous improvement in economic competitiveness;
- reduce non-renewable energy consumption and improve the quality of waste gases as well as improving waste sorting;
- contribute to the business and social aspects of sustainable development.

The procedures aimed at ensuring the correct application of environmental, health and safety regulatory provisions are decentralised and controlled by each of the main industrial sites. Environmental, health and safety costs are budgeted at site or unit level and recognised in the consolidated income statement. In all other subsidiaries, aspects liable to have an impact on the environment are integrated in the decision making and implementation structures of the management system.

The year 2011/2012 saw the continuing implementation of procedures and methods aimed at providing better management of legal provisions, objectives and rules in terms of environmental management.

The sites continued to take steps with a view to achieving ISO 14001 certification. This process is essential to meet customers' expectations and improve the public authorities and shareholders' trust in the Group.

At 31 March 2012, approximately ten entities, including the Group's main industrial sites, had been awarded ISO 14001 certification in relation to their environmental management; Faiveley Transport Iberica, which is a major production site in Europe was certified ISO 14001 in February 2012. This certification process has been initiated at other sites that have not yet been certified. Therefore, Faiveley Transport NSF is undergoing its own certification process.

Each industrial site now has an in-house manager responsible for coordinating Environmental, Health and Safety aspects.

In addition, in July 2011 the Group relocated its headquarters to a building in Gennevilliers, which has already been certified for HQE (High Environmental Quality). Faiveley Transport has a representative on the Green Committee that manages environmental aspects within the building.

3.1. MEASURES TAKEN TO ENSURE COMPLIANCE WITH LEGISLATIVE REQUIREMENTS

The Group seeks to bring all French and foreign sites together in a regular and genuine gathering of environmental information. This collective commitment led to the setting up of a general supervision programme at the sites.

Each of the Group's main industrial sites has established a set of objectives to reduce energy, water and raw material consumption, curb local impacts (noise pollution, etc.) and promote waste recycling. The Company's process is decentralised: each unit is responsible for its environmental self-assessment, for defining an action plan and associated objectives and for reporting its own environmental data.

Every site concerned has implemented regulatory monitoring, carried out an environmental analysis of its activities and identified actions to ensure compliance with standard and environmental regulations, such as the management of waste and chemicals. As part of this monitoring, possible irregularities and potential sources of nuisance or unnecessary energy consumption are specifically targeted for observation: an example of this is the battle against noise and the particular measures taken to remedy this issue in all the Group's industrial sites.

The Quality, Health and Environmental Safety staff at production sites have a duty to follow the applicable legislation and to analyse action plans implemented in order to conform. The effects of the Reach Regulation N°1907/2006 of 18 December 2006, which came into force on 1 June 2007 for the use of chemical substances by the Group that were included in the scope of application of this text, were taken into account in their entirety. The Group is committed to providing a positive contribution to the sustainable development of the European rail industry. The Company has voiced its intent to maintain and expand its operations in accordance with the founding principles of sustainable development.

The Group is fully aware of the requirements and has dedicated the necessary human and financial resources to take full responsibility and meet its targets. This a core concern for the Group's Operations department, which regularly assesses actions initiated and progress achieved.

Relative to the implementation of Directive 2002/95/CE of the restrictions on the use of dangerous substances and the Directive 2002/96/CE in respect of waste electronic and electrical equipment (WEEE), it appears that the Group's operations are not precisely covered by the categories stated in the various EU and national texts and are therefore not required to meet a deadline to conform.

Concerning the use of metals such as cadmium and lead, the various European production sites have adopted an approach to progressively eliminate these metals from products manufactured. The requirement to limit the use of these metals remains a medium-term objective, to the extent that Article 5 of the Directive 2002/95/CE expressly provides an exemption where substitution is technically or scientifically impossible or exempt from total safety compared to the final solution.

Despite the fact that the constraints imposed by the texts target more specifically the mass-market electronic and electrical products, specific attention is still paid to these issues.

Lastly, the Group seeks to make all suppliers aware by auditing their sustainable development policies.

3.2. SPECIFIC MEASURES TO LIMIT DAMAGE TO THE BIOLOGICAL BALANCE

In addition to the exercise of these controls, various new measures were introduced during the last year:
- installation of heat exchangers and heat economisers;
- use of bio-degradable oils and water-based paint;
- waste containers;
- reduction of packaging waste (wood, plastic, cardboard) and all associated treatment costs;
- water recovery systems;
- particle filters to reduce air emissions;
- retention basins and waste water disposal systems;
- centralised suction system with filters for sanding booths;
- compliance of fire-fighting water retention ponds with standards;
- outsourcing of alodine bath treatment (to avoid cyanide releases).

A significant reduction in environmental impact was also noted following the investment in cleaning machines that resulted in reduced water and solvent consumption and waste, at the sites dedicated to the Services division and also due to substantial investment at the Saint-Pierre-des-Corps site to double the production capacity in water-soluble paint and to comply with regulations on the discharge of Volatile Organic Compounds (VOCs). The new processes and systems can thus avoid any discharge of polluting compounds into the atmosphere.

Faiveley Transport Amiens has invested in an automated greasing system for its devices and machines. The advantages of this system are an almost 15% reduction of soiled packaging waste and the prevention of musculoskeletal (MSDs) disorders for operators, who no longer have to apply grease with a brush. This same entity has also decided to stop using chemical products Xn and F+, which are used to clean machine parts and assembly line workstations, replacing them with an environmentally-friendly "green" product.

The Faiveley Transport Tours sites, situated between the Loire and the Cher rivers, will also be subjected to a vulnerability assessment to define measures to reduce exposure to flooding. The aim is to identify strategic areas of the Company, to establish a potential disaster scenario, to define the weaknesses and rank them in order of significance. The aim is to implement an emergency procedure which will protect the Company's vital interests and at the same time help prevent potential harm to the environment, such as pollution from solvents, oils, paint, acid, etc.

During the past year, the prefectural authorisation for Faiveley Transport Tours' activities (at Saint-Pierre des Corps) has been subject to modifications to ensure its relevance to the business conducted on the production sites.

This entity has also completely updated its solvent management plan methodology to ensure it conforms to regulations on fugitive emissions.

As part of its commitments to its customers, Faiveley Transport now submits each major project for an environmental analysis at inception (% recyclability, % recovery, etc.). The Group took full note of the Environment Public Liability Directive 2004/35/CE, adopted on 21 April 2004, on environmental responsibility in respect of the prevention and restoration of environmental damage. By this text, which was transferred into French law by the Law n°2008-757 of 1 August 2008, a Group operation that damages fauna or flora is required to reverse the damage done or to bear the associated costs (at the discretion of the public authorities). Faced with this new regulation, the Group increased its attention to the protection of the environment and implemented the various options to cover this new area of liability with its insurers.

3.3. REDUCTION OF ENERGY INTENSITY AND GREENHOUSE GAS EMISSIONS AND OTHER ENVIRONMENTAL IMPACTS

For a number of years, the Group has sought to collect data on energy consumption within its industrial processes. This information enables the Group to be in keeping with greenhouse gas emission reduction objectives, established at an international level, in particular within the framework of the European Union's commitments.

• Gas consumption at the main industrial sites during the financial year ending 31 March 2012 (in KWh)

Entity	2011/2012	2010/2011
Shanghai Faiveley Railway Technology	60,000	–
Shijiazhuang Jiaxiang Precision Machinery	83,897	143,807
Qingdao Faiveley SRI Rail Brake	n.a.	n.a.
Datong Faiveley Coupler System	1,595	–
Faiveley Transport Witten	n.a.	n.a.
Faiveley Transport Leipzig	1,950,000	2,470,000
Nowe	26,597	23,133
Faiveley Transport India	n.a.	n.a.
Faiveley Transport Lekov	2,643,501	2,746,909
Faiveley Transport Italia	202,798	223,105
Faiveley Transport Ibérica	495,540	–
Faiveley Transport Amiens	1,669,335	2,267,896
Faiveley Transport NSF	302,440	613,988
Faiveley Transport Tours	7,161,111	9,171,830
Faiveley Transport Gennevilliers	3,422,103	5,248,977
Faiveley Transport Nordic	n.a.	n.a.
Faiveley Transport Do Brasil	n.a.	n.a.
Faiveley Transport Australia	n.a.	n.a.
Faiveley Transport Tamworth	483,901	–
Faiveley Transport Birkenhead	1,481,069	–
Ellcon National Inc./Amsted Faiveley	8,200	–
Faiveley Transport Tresmonice	n.a.	n.a.

We note an improvement in gas costs. French and Italian sites have optimised their gas costs by using updated models of heaters. Consumption statements demonstrate the efficiency of such measures. A decrease in gas costs was also noted at other Group sites. Winter was relatively mild in Europe, except at the end of the season, which may have caused an increase in consumption over the last months of the financial year.

• Electricity consumption at the main industrial sites during the financial year ending 31 March 2012 (in KWh)

Entity	2011/2012	2010/2011
Shanghai Faiveley Railway Technology	4,050,000	3,509,000
Shijiazhuang Jiaxiang Precision Machinery	702,940	726,760
Qingdao Faiveley SRI Rail Brake	111	115
Datong Faiveley Couplers System	12,820	–
Faiveley Transport Witten	3,264,080	3,621,034
Faiveley Transport Leipzig	1,445,000	1,550,500
Nowe	19,829	30,581
Faiveley Transport India	1,250,737	1,149,551
Faiveley Transport Lekov	1,320,139	1,387,636
Faiveley Transport Italia	1,991,187	1,840,960
Faiveley Transport Ibérica	1,452,768	1,817,805
Faiveley Transport Amiens	1,696,375	2,284,168
Faiveley Transport NSF	298,333	154,159
Faiveley Transport Tours	4,704,053	4,886,504
Faiveley Transport Gennevilliers	2,071,839	2,382,333
Faiveley Transport Nordic	2,009,000	2,061,000
Faiveley Transport Do Brazil	311,820	311,820
Faiveley Transport Australia	493,141	237,327
Faiveley Transport Tamworth	237,370	140,639
Faiveley Transport Birkenhead	843,600	–
Faiveley Transport Tresmonice	4,285	4,600
Ellcon National Inc/Amsted Faiveley	5,800,000	5,470,000

The general trend noted within the major production units is the stability of electricity consumption, despite a cold end to the winter in Europe. A significant decrease in consumption was however reported in Faiveley Transport Iberica and Faiveley Transport Witten. European sites have improved their lighting by installing energy saving light bulbs and by upgrading their electric heating systems. This year, the emphasis was put on better management of the settings of air conditioning devices, with high and low temperatures capped to save on this source of energy.

• **Water consumption at the main industrial sites during the financial year ending 31 March 2012 (in m^3)**

Entity	2011/2012	2010/2011
Shanghai Faiveley Railway Technology	48,450	35,200
Shijiazhuang Jiaxiang Precision Machinery	3,916	3,989
Qingdao Faiveley SRI Rail Brake	660	660
Datong Faiveley Coupler System	201	123
Faiveley Transport Leipzig	2,984	2,776
Faiveley Transport Witten	–	–
Faiveley Transport Leipzig	2,984	–
Nowe	107	50

Faiveley Transport Iberica	2,094	1,624
Faiveley Transport NSF	667	467
Faiveley Transport Amiens	1,892	2,193
Faiveley Transport Tours	5,994	7,500
Faiveley Transport Gennevilliers	4,646	13,002
Faiveley Transport Nordic	1,657	1,639
Faiveley Transport Do Brazil	1,468	1,468
Ellcon National Inc./ Amsted Faiveley	4,159	2,847
Faiveley Transport Australia	–	389
Faiveley Transport Tamworth	728	1,295
Faiveley Transport Birkenhead	2,200	1,834
Faiveley Transport Tresmonice	24	20

The overall trend was for stability or a moderate increase in water consumption at the various industrial sites, except for the Faiveley Transport Gennevilliers and Faiveley Transport Tours sites, which have implemented a number of initiatives that resulted in a decrease in consumption compared to the previous financial year.

Leak detection devices and leak-proof safety systems have been widely implemented at the sites. The doubling of the US subsidiary's consumption was due to the recovery in freight following the creation of the joint venture with US company Amsted Rail.

3.4. EXPENSES INCURRED AS PART OF THE POLICY OF PREVENTING ENVIRONMENTAL RISKS

Expenses incurred by Group subsidiaries to prevent the consequences of their industrial operations to the environment are steadily increasing.

For instance, the following subsidiaries incurred the following expenses:

- Faiveley Transport Tours: €127 thousand for waste processing, €32 thousand for air emission measurement and analysis, €24 thousand for fire detection and flood barriers;
- Faiveley Transport Amiens: €93 thousand in particular for waste processing;
- Faiveley Transport Iberica: €87 thousand in filters to prevent air pollution;
- Faiveley Transport Italia: €1 thousand expense (research costs, calculation of air emissions and waste water treatment cost);
- Faiveley Transport India: €3 thousand industrial investment for the treatment of waters;
- Faiveley Transport Witten: €85 thousand;
- Faiveley Transport Leipzig: €40 thousand;
- Shanghai Faiveley Railway Technology: €20 thousand for the treatment of dust and carbon filters for the painting process;
- Shijiazhuang Jiaxiang: €13 thousand.

Upon consideration of the report presented to you by the Statutory Auditors on this subject, your Management Board invites you to adopt the resolutions submitted to you for a vote, the text of which appears in appendix 5 to the present report.

APPENDICES TO THE MANAGEMENT REPORT

- **Appendix 1:** Information on senior executives' remuneration
- **Appendix 2:** Internal regulations of the Supervisory Board
- **Appendix 3:** 5-year financial results
- **Appendix 4:** Chairman of the Supervisory Board's report on the operation of the Supervisory Board and on internal control within Faiveley Transport
- **Appendix 5:** Draft resolutions submitted for approval by the General Meeting
- **Appendix 6:** Summary table of delegations granted to the Management Board by the General Meeting to make capital increases

At 31 March 2012, Faiveley Transport held 427,528 of its own shares, being 2.93% of share capital.

VI. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

A. Accounting information

Faiveley Transport is a French limited liability company (société anonyme) with a Management Board and a Supervisory Board. At 31 March 2012, its registered office was located at:
Immeuble le Delage, Hall Parc, Bâtiment 6A, 3 rue du 19 mars 1962
92230 - Gennevilliers.

The consolidated financial statements are prepared by the Management Board and submitted for approval to the shareholders at the General Meeting.

The financial statements for 2011/2012 were approved by the Management Board at its meeting on 6 June 2012. They were presented to and reviewed by the Supervisory Board at its meeting on 6 June 2012. They will be submitted for the approval of the Shareholders' General Meeting on 14 September 2012.

The financial statements have been prepared on the basis that the Faiveley Transport Group operates as a going concern.

The Group's functional and presentation currency is the Euro. Figures are expressed in thousands of Euros unless indicated otherwise.

B. Highlights

1. SIGNIFICANT EVENTS

- Changes in Group governance:
  On 1 April 2011, after Robert Joyeux resigned from his duties as Chief Executive Officer and Chairman of the Management Board of Faiveley Transport on 31 March 2011, Thierry Barel, previously Deputy Chief Executive Officer, was appointed Chief Executive Officer and Chairman of the Management Board. On the same day, Guillaume Bouhours was appointed as a member of the Management Board.

- Change in Faiveley Transport's share capital:
  As part of the acquisition of the US-based Graham-White Manufacturing Co., finalised on 3 February 2012, 209,441 new Faiveley Transport shares, representing 1.45% of the Company's share capital, have been issued to Graham-White Manufacturing Co.'s former shareholders.

  The share capital of Faiveley Transport now amounts to €14,614,152.

- On 27 July 2011, Faiveley Transport signed an amendment to the syndicated credit facility set up in December 2008. The amendment was granted unanimously by the nine contributing banks, which thus confirmed their confidence in the Group's credit rating.

  The total amount of funding remained unchanged, including an amortising term loan of €343 million (balance at 30 June 2011) and a revolving credit facility of €49 million.

  The main amendments included:
  - a 2.5-year extension of the loan maturity to 23 June 2016 instead of 23 December 2013,
  - a more favourable amortisation profile, with mandatory annual instalments of €35 million, compared to €49 million previously,
  - new covenants providing additional flexibility, with a leverage ratio (Net Debt/EBITDA) not exceeding 2.5x and a gearing ratio (Net Debt/Equity) not exceeding 150%,
  - the option of using the revolving credit facility for merger and acquisition transactions,
  - the release of pledging on shares of operating subsidiaries.

  This refinancing transaction, carried out at favourable financial conditions, provides the Group with increased financial flexibility for the next five years and with the necessary resources to continue to expand through both organic growth and acquisitions.

  During the second half of the year, the Group put several financing facilities into place:
  - a €20 million revolving facility, maturing on 18 November 2016, for the Group's general requirements or potential acquisitions;
  - a €15 million revolving facility maturing on 23 June 2016, for the Group's general requirements or potential acquisitions, to be repaid in annual instalments of €1.5 million from 23 December 2012;
  - a €30 million bridge loan to finance the acquisition of Graham-White Manufacturing Co., maturing on 14 January 2013 unless the acquisition is refinanced prior to that date. Since refinancing took place on 12 April 2012 (see below Note E.26), this loan was repaid on 13 April 2012.

- On 29 August, Wabtec Corporation appealed against the verdict of a jury of the New York Court, which ordered this company to pay compensatory damages of USD 18.1 million plus interest, for a total of USD 19.6 million, to Faiveley Transport USA, Faiveley Transport Nordic, Faiveley Transport Amiens and Ellcon National, for trade secret misappropriation, unfair competition, and unjust enrichment. At the same time, Faiveley Transport also appealed against the verdict of the judge of the New York Court, who overruled Faiveley's claim for punitive damages.

2. PLANS TO ALLOCATE SHARE PURCHASE/ SUBSCRIPTION OPTIONS AND FREE SHARES

During the financial year, a new free share allocation plan was established for the benefit of employees.

- **Free share allocation plan of 14 September 2011**

The Combined General Meeting of 14 September 2011 delegated the Management Board powers for the allocation of ordinary shares of the Company free of charge, either new or already issued, within the limit of 1% of the share capital of the Company on the day of the said General Meeting.

At its meeting held on 4 January 2012, the Management Board decided to implement this delegation and to allocate free shares.

This decision was made as part of an employee shareholding plan aimed at a broader population of executives. The programme provides that an employee holding shares in the Company in a personal capacity will be granted two free shares for every share held, not exceeding a limit set for each level of management.

At its meeting held on 5 March 2012, the Management Board established the final list of beneficiaries and the number of free shares to be granted. A total of 79,224 shares are thus to be granted to 151 beneficiaries. The allocation of the shares will be final at the end of a two-year vesting period, or four years for non-French residents.

Thierry Barel and Guillaume Bouhours, both beneficiaries of free shares under this plan, are subject to an additional retention condition in their capacity as executive officers. They must retain at least 50% of shares granted to them by the Management Board under this new plan after the end of the vesting period defined by plan regulations. This rule will apply as long as they do not hold shares of the Company, acquired in the various plans to grant stock options or free shares of the Company, worth at least the equivalent of one year's net salary. Share purchase, share subscription and free share allocation plans granted in previous years and still in force are detailed in Note E.11.1.

3. CONSOLIDATION SCOPE

- In the fourth quarter of 2011/2012, Faiveley Transport announced the acquisition of 100% of US-based Graham-White Manufacturing Co. and its subsidiaries. Graham-White Manufacturing Co. employs more than 300 people and operates six facilities across the United States, with a central manufacturing site located in Salem, Virginia. The company generates annual sales in excess of USD 70 million and is specialised in the design and manufacture of compressed air drying technology and brake components for the locomotive and railway freight market.
  With this acquisition, Faiveley Transport has strengthened its position in the US market, which opens up significant new opportunities thanks to an enlarged product range and complementary customer bases.
  The cost of this acquisition was USD 118.5 million, including USD 14.6 million (i.e. €11.1 million) as newly-issued Faiveley Transport shares, and generated goodwill of €74.2 million on the transaction date.
  The accounting implications of this transaction are detailed in Note D. Changes in consolidation scope.

- On 1 April 2011, two Group entities changed their functional currency. Faiveley Transport Malmö now holds its accounts in Euros and Faiveley Transport Canada in US Dollars.

C. Consolidation principles and methods

1. BASIS OF PREPARATION

In application of regulation 1606/2002 of the European Union (EU), the consolidated financial statements of the Faiveley Transport Group are prepared in accordance with IFRS (International Financial Reporting Standards), as adopted by the European Union.

1.1. Changes in accounting policies due to new standards and interpretations of mandatory application for interim periods and financial years starting on or after 1 April 2011

The Group's financial statements were not affected by new standards or interpretations, revised or amended, of mandatory application on or after 1 April 2011 in the European Union.

1.2. New standards and interpretation whose application is mandatory

- IFRS improvement amendments (May 2010): IAS 1, IAS 21, IAS 28, IAS 31, IAS 32, IAS 34, IAS 39, IFRS 3 and IFRS 7;
- Simplification of disclosures by state-controlled entities and clarification of the definition of a related party (IAS 24 revised);
- Amendment to Prepayments of a minimum funding requirement (amendment to IFRIC 14);
- Extinguishing financial liabilities with equity instruments (IFRIC 19).

The impact of these standards in the Group's consolidated financial statements at 31 March 2012 is not material.

1.3. New standards and interpretation whose application is not yet mandatory

The Group did not opt for the early application of the following texts, already published by the IASB and approved by the European Union, in its consolidated financial statements at 31 March 2012:
- Presentation of items of other comprehensive income (amendments to IAS 1);
- Financial instruments - disclosures (amendments to IFRS 7).

Texts not yet adopted by the European Union, the early application of which is not permitted:
- Amendment to deferred taxes (IAS 12);
- Employee benefits (IAS 19 revised);
- Separate financial statements (IAS 27 amended);
- Investments in associates and joint ventures (IAS 28 revised);
- Financial instruments: classification and measurement of financial assets (IFRS 9);
- Consolidated financial statements (IFRS 10);
- Joint arrangements (IFRS 11);
- Disclosure of interests in other entities (IFRS 12);
- Fair value measurement (IFRS 13).

The Group considers that the impact of the application of these provisions cannot be determined with sufficient accuracy at this stage and is currently analysing this impact.

2. CONSOLIDATION SCOPE AND METHODS

Companies over which the Faiveley Transport Group directly or indirectly exercises exclusive control are consolidated using the full consolidation method. In accordance with IAS 27, exclusive control is deemed to be present when more than one half of the Company's voting rights are held or when control is exercised through any other means.

Companies over which the Faiveley Transport Group exercises joint control are consolidated using the proportional consolidation method.

Companies over which the Faiveley Transport Group exercises significant influence over financial and operational policies are accounted for using the equity method. Significant influence is presumed when the Group holds more than 20% of the voting rights of a company.

Acquisitions or disposals arising during the financial year are reflected in the consolidated financial statements from the date on which effective control is transferred, unless the impact is not material to the income statement in the case of acquisitions carried out at the end of the financial year.

Intra-group balances and transactions are eliminated for all consolidated companies.

Faiveley Transport Group companies that are consolidated are listed in Note G.1. Note G.2 lists companies that are not consolidated due to their insignificant impact on the Faiveley Transport Group's financial statements.

3. USE OF ESTIMATES

In order to be able to prepare consolidated financial statements that comply with IFRS, Financial Management must make certain estimates and use assumptions that it considers realistic and reasonable. These estimates and assumptions affect the carrying value of the assets, liabilities, equity and results, and any contingent assets and liabilities, as presented at the balance sheet date. Finance Management regularly reviews its estimates on the basis of the information available to it. When events and circumstances are not in line with expectations, actual results may differ from such estimates.

The main accounting methods whose application necessitates the use of estimates relate to the following items:

3.1. Recognition of the margin on long-term building and service contracts and related provisions (see § C-6.1)

Revenue from long-term building and service contracts is recognised in proportion to the stage of completion of the contracts (see C-6 below). Project reviews are organised on a regular basis so that the stage of completion and finalisation of the contract can be monitored. If the project review identifies a negative gross margin, a provision is immediately raised in respect of the loss relating to the work not yet carried out.

The total estimated income and expenses in respect of the contract reflect the best estimate of the future benefits and obligations under the contract. The assumptions used to determine the current and future obligations take into account technological, commercial and contractual constraints measured on a contract-by contract basis.

The obligations under building contracts may result in penalties for delays in a contract's implementation schedule or an unexpected cost increase due to amendments to the project, a supplier's or subcontractor's failure to comply with its obligations or delays caused by unforeseen events or circumstances. Similarly, warranty obligations are affected by product failure rates, equipment wear and tear and the cost of actions needed to return to normal service.

Although the Group measures risks on a contract by contract basis, the actual costs resulting from the obligations associated with a contract may prove to be greater than the amount initially estimated. It may therefore be necessary to re-estimate the costs to completion when a contract is still in progress or to re-estimate provisions when a contract is completed.

3.2. Measurement of deferred tax assets (see § C-16)

The determination of the carrying values of deferred tax assets and liabilities and the amount of deferred tax assets to be recognised requires Finance Management to exercise its judgement as to the level of future taxable profits to be taken into consideration.

3.3. Measurement of assets and liabilities in respect of retirement and similar benefits (see § C-15.1)

The measurement by the Group of the assets and liabilities relating to defined benefit schemes requires the use of statistical data and other parameters used to predict future trends. Such parameters include discount rate, expected return on plan assets, salary increase rate, staff turnover rate and mortality rate. When circumstances where actuarial assumptions prove to be significantly different from actual data subsequently observed, this could result in a substantial amendment to the charge for retirement and similar benefits, actuarial gains and losses and assets and liabilities stated in the balance sheet relating to these commitments.

3.4. Measurement of property, plant and equipment and intangible assets (see § C-9)

Goodwill, including intangible assets with an indefinite useful life, is tested for impairment each year on 31 March or more frequently if there are indications of impairment. The discounted future cash flow model used to determine the fair value of the cash generating units utilises a certain number of parameters including estimated future cash flows, discount rates and other variables, and consequently requires the exercise of judgment to a significant degree.

The assumptions used to carry out impairment tests are the same for property, plant and equipment and intangible assets. Any future deterioration in market conditions or the achievement of poor operating performances could result in the Group being unable to recover the current carrying value of such assets.

3.5. Measurement of financial investments

Details of the method used to measure financial investments are provided in § C-10.3.

3.6. Inventories and work-in-progress (see § C-12)

Inventories and work-in-progress are measured at the lower of cost and net realisable value. Writedowns are calculated on the basis of an analysis of foreseeable trends in demand, technology and market conditions, the aim of which is to identify inventories and work-in-progress that are obsolete or surplus to requirements. If

market conditions worsen to a greater degree than was forecast, additional writedowns of inventories and work-in-progress may prove necessary.

3.7. Stock-options and free shares

Share subscription and/or purchase options as well as free shares granted to certain senior executives and employees of the Group are recognised in accordance with IFRS 2.

Options are measured at the allocation date. The fair value of options is a function of the expected life, exercise price, current price of underlying shares, expected volatility and share price. The Group uses the Black & Scholes mathematical model.

The fair value of free shares is estimated on the allocation date, specifically based on their expected life, current price of the underlying shares, expected volatility and share price and takes into account the terms and conditions attached to the share allocation.

This value is recognised as personnel cost between the date of grant and the end of the vesting period and offset under equity.

3.8. General provisions

Details of the method used to measure other provisions for liabilities and charges are provided in C-15.2.

4. TRANSLATION METHOD

The consolidated financial statements are presented in Euro, the Group's reporting currency.

4.1. Foreign currency-denominated transactions

Transactions not denominated in the functional currency are translated at the exchange rate on the date when the transaction was first recorded.

At the balance sheet date:
- foreign currency-denominated monetary items must be converted at the foreign exchange rate on the balance sheet date;
- foreign currency-denominated non-monetary items valued at historical cost must be converted at the foreign exchange rate on the transaction date; and
- foreign currency-denominated non-monetary items valued at fair value must be converted using the foreign exchange rate on the date fair value was determined.

4.2. Foreign currency-denominated subsidiary financial statements

Foreign currency-denominated subsidiary financial statements are prepared in the currency that is most representative of their economic environment. This currency is deemed to be their functional currency pursuant to IAS 21.

Foreign currency-denominated subsidiary financial statements were translated into Euros using the following exchange rates:
- closing rate for all balance sheet items, with the exception of the components of equity which continue to be translated at historical exchange rates (translation rates used on the date the subsidiary was acquired by the Group);
- average rate for the period for income statement and cash flow statement items.

Translation differences arising in respect of the profit or loss and shareholders' equity are recognised directly in shareholders' equity under the heading "Translation differences" in the case of the Group's share, with the portion attributable to third parties being recorded in minority interests.

On the disposal of a foreign subsidiary, the translation differences relating to such disposal and recognised in shareholders' equity after 1 April 2004 are accounted for in the income statement.

– Translation exchange rates used in the consolidation

	Closing rate		Average rate

5. BALANCE SHEET DATE

All companies are consolidated on the basis of financial statements drawn up at 31 March 2012.

6. INCOME STATEMENT PRESENTATION

6.1. Sales revenue and cost of sales recognition

In accordance with IAS 18 20, sales arising from contracts of less than one year in duration, which primarily relate to the sale of spare parts (Customer Services), are recorded upon transfer of title, which is generally at the time of delivery to the customer. The same applies to short-term service provisions, carried out on from time to time.

For services provided over a longer period, sales are recognised based on the percentage of completion of services.

Sales arising from contracts of more than one year in duration are recognised using the percentage of completion method in accordance with IAS 11. Percentage of completion is measured on the basis of relating actual sales billed (delivered) to the total contract sales value or by relating the actual costs incurred (work carried out) to the total costs estimated for the contract.

The total estimated cost of completion includes direct costs (such as raw materials, labour and engineering) relating to the contracts. This includes costs already committed and future costs, including warranty costs and costs specific to the probable risks. Provision charges for losses to completion and other provisions on contracts are recorded to cost of sales in the income statement if, during the review of the contracts, it seems probable that the costs to which they relate will arise.

All changes in the conditions of contract fulfilment and all changes to margins at completion are recorded as cost of sales in the income statement in the period in which they are identified.

Warranty provisions are valued based on contract terms and an assessment of risks based on sector knowledge.

6.2. Profit from recurring operations

This is the profit before restructuring costs, gains and losses on disposals of intangible assets and property, plant and equipment and exceptional accounting adjustments.

6.3. Finance income and costs

Finance income and costs include:
- interest income and expense on the consolidated net debt, which consists of borrowings, other financial liabilities (including liabilities in respect of finance leases) and cash and cash equivalents;
- dividends received from unconsolidated equity investments;
- the effect of discounting financial provisions;
- changes in financial instruments;
- foreign exchange gains and losses on financial transactions.

6.4. Income tax

The Group calculates its income tax in accordance with tax laws applicable in the country where profits are taxable.

The current tax liability is calculated using the tax laws that have been enacted or substantively enacted by the balance sheet date in the countries where the Group's subsidiaries and associates operate and generate taxable profits. Management periodically assesses

tax positions taken in light of applicable tax regulations, where the latter are subject to interpretation, and determines, if applicable, the amounts it expects to pay to tax authorities.

Temporary differences between the carrying value of assets and liabilities and their tax base, tax losses carried forward and unused tax credits are identified in each taxable entity (or tax group, if applicable). The corresponding deferred tax is calculated using the tax rates that have been enacted or substantively enacted for the financial year during which assets will be realised or liabilities settled (see § C-16).

Pursuant to the CNC communication of 14 January 2010 relating to the accounting treatment of the component based on value added (CVAE) of the CET tax (contribution économique territoriale) introduced in France by the 2010 Finance Act of 31 December 2009, following an analysis carried out by the Group and in light of its specific features, it was decided to treat the value-added based CVAE as income tax, in order to remain consistent with the classification of similar taxes in Germany and Italy (Gewerbesteuer and IRAP, respectively). This decision was also based on a 2006 proposal by the IFRIC that specified that the term of "taxable profit" implies that a net amount should be considered, rather than a gross amount, without necessarily being identical to the accounting profit.

Pursuant to IAS 12, the option selected involves the recognition of deferred taxes, at each balance sheet date, on temporary differences for:

- assets that produce economic benefits subject to the CVAE tax, whereas the consumption of added value is not deductible from added value: this is the net carrying value of property, plant and equipment and intangible assets eligible for depreciation and amortisation at 31 December;
- asset impairments and provisions that may not be deducted from the CVAE but that relate to expenses that will be deducted from the value added at a later date.

As the CVAE tax is deductible for income tax purposes, deferred taxes are recognised at the standard rate for deferred tax assets and liabilities recognised for the CVAE, as described in the previous paragraph.

6.5. Profit or loss from operations held for disposal and discontinued operations

The net of tax profit or loss from discontinued operations as defined by IFRS 5 is presented under a separate heading in the income statement. It includes the net profit or loss of such activities during the year and up to their date of disposal, as well as the net gain or loss on the disposal itself.

6.6. Earnings per share

Basic earnings per share is calculated based on the profit attributable to holders of ordinary shares of the parent company, divided by the weighted average number of ordinary shares outstanding during the financial period. Since the shares of the consolidating entity held by itself are deducted from shareholders' equity, these shares are excluded from the weighted average number of shares in circulation.

Diluted earnings per share is calculated based on the weighted average number of shares outstanding during the financial period, adjusted for the number of shares that would be generated by the exercise of share subscription options as per the conditions of IAS 33.45 and subsequent.

7. INTANGIBLE ASSETS

7.1. Goodwill

On each acquisition, the Group identifies and assesses the fair value of all assets and liabilities acquired, particularly intangible assets and property, plant and equipment, brands, inventories, work-in-progress and all provisions for liabilities and charges.

The unallocated difference between the cost of securities in companies acquired and consolidated and the fair value of assets and liabilities is recorded as goodwill. Where this difference is negative, it is taken directly to the income statement. When this difference is positive, it is recognised in the balance sheet.

In case of the partial acquisition of a company, goodwill will either be recognised based on the percentage of ownership of this new entity or fully consolidated, i.e. taking account of the share attributable to minority interests.

– Acquisitions of minority interests in subsidiaries that are already fully consolidated

Prior to the application of revised IAS 27, the Group had elected to recognise additional goodwill, which corresponds to the difference between the acquisition cost of securities and the additional share in consolidated equity that these securities represented.

Acquisitions of minority interests are now recognised as a deduction from the Group's share of shareholders' equity.

– Accounting treatment of put options on minority interests

Similar to the accounting treatment used for acquisitions of minority interests, the Group elected to use the option to recognise additional goodwill as part of the accounting treatment of put options on minority interests that existed prior to 1 April 2010. Put options granted after revised IFRS 3 and IAS 27 became applicable are recognised as a deduction from equity (see below § 10.6).

7.2. Intangible assets acquired separately or pursuant to a business combination

Intangible assets acquired separately are recorded in the balance sheet at their historical cost.

Intangible assets (primarily brands) resulting from the valuation of assets of acquired companies are recorded in the balance sheet at their fair value, determined generally on the basis of appraisals by external experts when significant in value.

Intangible assets, other than those with indefinite useful lives, are amortised on a straight-line basis over their estimated useful lives, which are as follows:

- Software: straight line basis - 1 to 3 years
- Patents: straight line basis - 5 to 15 years
- Development costs: straight line basis over 3 years.

7.3. Internally-generated intangible assets

Research costs are expensed immediately when incurred.

Development costs on new projects are capitalised if all of the following criteria are strictly met:
- the project is clearly identifiable and its related costs are separately identified and reliably measured;
- the technical feasibility of the project has been demonstrated and the Group has the intent and the financial capability to complete the project and to use or to sell the products derived from this project;
- it is probable that the project will yield future economic benefits for the Group.

Capitalised project development costs are amortised on a straight-line basis over 3 years.

8. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are measured at their acquisition cost or at their fair value when new subsidiaries are acquired. Depreciation is calculated separately for every asset component that has a distinct useful life. The useful lives of the assets concerned are deemed to be as follows:

• Buildings	15 to 25 years.
• Fixtures and fittings	10 years.
• Industrial machinery and equipment	5 to 20 years.
• Tools	3 to 5 years.
• Vehicles	3 to 4 years.
• Office equipment and furniture	3 to 10 years.

• Leases

Assets acquired under finance leases are recorded as assets when the lease agreement transfers substantially all the risks and rewards inherent to ownership of an asset to the Group. At each balance sheet date, a finance lease recognised as an asset gives rise to a depreciation charge (consistent with the depreciation policy applicable to other depreciable assets of the same nature). Lease agreements for which the risks and rewards of ownership are not transferred to the Group are treated as operating leases, with corresponding lease payments expensed on a straight-line basis over the lease term.

9. IMPAIRMENT OF ASSET VALUES

Goodwill and intangible assets with indefinite useful lives are tested for impairment each year.

Intangible assets and property, plant and equipment with finite useful lives are tested for impairment as soon as there is any indication that such assets may have become impaired. Where relevant, a provision for impairment is recognised.

Impairment testing involves comparing the recoverable amount of the asset with its carrying value. Recoverable amount is the higher of fair value less costs to sell and value in use.

Tests are carried out on the basis of Cash Generating Units (CGUs) to which these assets are allocated. A CGU is a consistent group of assets whose continuous utilisation generates cash inflows that are largely independent of cash inflows generated by other groups of assets.

The value in use of a CGU is determined based on the present value of the estimated future cash flows to arise from these assets, within the framework of economic assumptions and operating conditions anticipated by Group executive management. The measurement carried out is based mainly on the Group's three-year plan. Cash flows beyond that timeframe are extrapolated by applying a stable growth rate.

The recoverable amount is the sum of the present value of the cash flows and the present value of the terminal residual value. The discount rate is determined using the sector's weighted average cost of capital.

When this value is less than the carrying value of the CGU, an impairment loss, first allocated to goodwill, is recognised.

In the event of an indication of a recovery in value, this impairment loss may eventually be reversed to the extent that it does not exceed the carrying value of the asset at the same date had it not been subject to a writedown. Impairment losses recorded on goodwill may not be reversed.

10. FINANCIAL ASSETS AND LIABILITIES

Pursuant to IAS 32 and IAS 39, financial assets and liabilities comprise operating receivables and liabilities, financial loans and debts, shareholdings in unconsolidated companies, marketable securities, borrowings and other financial liabilities and derivative financial instruments.

On initial recognition, a financial instrument is valued at fair value, adjusted for issue costs:
- fair value, as defined by the applicable IAS, corresponds as a general rule to transaction value, with exceptions discussed below;
- under the IAS, the term "issue costs" is used to mean all of the ancillary costs directly attributable to the acquisition or implementation of the financial instruments.

In certain specific cases, e.g. loans, borrowings, operating receivables and liabilities which are interest-free or at beneficial rates, fair value does not correspond to the fair value on initial recognition in the balance sheet. In such cases, fair value is calculated by discounting the cash flows associated with the financial instrument, using the market rate increased by a risk premium.

At future balance sheet dates, financial assets and liabilities are recorded at either their amortised cost or fair value depending on the class of assets or liabilities to which they belong.

The accounting treatment of identified financial assets and liabilities is as follows:

10.1. Operating receivables

At each balance sheet date, the Group assesses whether there is an objective indication of impairment of a receivable. If there are objective indications of impairment in respect of assets recognised at amortised cost, the carrying value of the asset is reduced via the use of an impairment account. The amount of the impairment must be recognised in the income statement.

If the amount of the impairment reduces during a subsequent accounting period, and if such reduction can be objectively linked to an event that occurred after the recognition of the impairment, the impairment loss previously recognised must be reversed to the extent that the carrying value of the asset does not exceed the amortised cost on the date the impairment loss is reversed. Any subsequent reversal is recognised in the income statement.

In the case of trade receivables, an impairment loss is recognised when there is an objective indication (such as a probability of the debtor suffering bankruptcy or significant financial difficulties) that the Group will be unable to recover the amounts due in accordance with the contractual terms of the invoice. The carrying value of the trade receivable is reduced via the use of a value adjustment account.

Within the framework of the factoring of trade receivables, an analysis of the risks and rewards relating to the transfer of such receivables must be conducted pursuant to IAS 39 (credit risk and interest rate risk primarily):

- if the risks and rewards are substantially transferred, the receivables are removed from the balance sheet against cash;
- if the risks and rewards are substantially retained, the receivables are maintained on the balance sheet with a corresponding liability being recognised, the transaction being accounted for as a borrowing guaranteed by receivables;
- if the Company has neither transferred nor retained virtually all the risks and rewards and has retained control, the receivables are retained on the balance sheet of the transferor up to the value of the latter's interest in said receivables.

10.2. Financial receivables and loans

These financial instruments are also recorded at their amortised cost. They are subject to valuation tests, which are realised when there is an indication that their recoverable value is less than their carrying value, in accordance with the same principles as those described in Note C.10.1. The impairment loss is recorded in the income statement as are any loss reversals.

10.3. Shareholdings in unconsolidated companies

These financial instruments are classified as assets held for sale. They are unlisted shares for which the fair value cannot be reliably determined and therefore the carrying value at which they are recognised is their acquisition cost.

In the event of an objective indication of impairment of the financial asset (notably a significant and sustained drop in its value), the impairment loss is recognised in the income statement and may not be reversed in a subsequent period other than on the sale of the shareholding concerned.

10.4. Cash, marketable securities and cash equivalents

Cash and marketable securities reflected in the balance sheet include cash balances, bank accounts, term deposits maturing in less than three months and securities that can be traded on official exchanges. These short-term instruments comprise money market funds and certificates of deposit. They are considered by the Group as financial assets held for trading and are valued at their fair value, with any movements in fair value recorded to the income statement.

In the case of highly liquid short-term investments (maturity not exceeding three months), it is reasonable to assume that their fair value is equal to their carrying value (capitalised interest included). Such items are therefore classified as cash equivalents.

10.5. Borrowings and other financial liabilities

Borrowings and other financial liabilities are stated at amortised cost.

10.6. Put options held by minority shareholders in Group subsidiaries

If the put options held by minority shareholders in Group subsidiaries have an impact on the transfer of risks and rewards associated with underlying securities, the put option gives rise to the recognition of a firm and immediate acquisition of the securities, with their payment being deferred.

In accordance with IAS 32, put options are recognised as financial liabilities if they have no impact on the transfer of risks and rewards. The amount reflected in the balance sheet corresponds to the present value of the exercise price of put options, measured according to the discounted future cash flow method. This liability is offset under equity.

Subsequent fair value movements are recognised:

- in equity, for the estimated change in value of the exercise price;
- in net finance expense/(cost), for the reversal of debt discounting.

– Specific case of put options granted before 1 April 2010, i.e. before IFRS 3R and IAS 27R came into force

The difference between the present value of the liability and the carrying value of reclassified minority interests is recognised as "goodwill in progress" as long as the put option has not been exercised or extinguished.

When the put option is exercised, goodwill in progress is reclassified as goodwill.

Subsequent fair value movements are recognised as goodwill in progress and the impact of the reversal of debt discounting is taken to the income statement.

11. DERIVATIVE FINANCIAL INSTRUMENTS

The Group uses derivative financial instruments to manage its exposure to movements in interest rates and in the exchange rates of foreign currencies. As part of its hedging policy, the Group uses interest rate swaps and contracts for forward purchases and sales of currencies. The Group may also use caps, floors and options.

11.1. Exchange risk

The Group operates in foreign countries and is therefore exposed to exchange risk as a result of its exposure to a number of currencies. The management of exchange risk is centralised by the parent company's Treasury department and comprises two parts:

- exchange risk management relating to tenders in foreign currencies (uncertain risk);
- exchange risk management relating to commercial contracts (certain risk).

The Group's policy is to hedge all expected future transactions in each major currency.

11.2. Interest rate risk

The Group manages its interest rate cash flow risk through the use of variable rate against fixed rate swaps or caps and tunnels. From an economic point of view, the effect of these interest rate swaps or caps is to convert variable rate borrowings into fixed rate borrowings. The Group may also use structured instruments that do not qualify for hedge accounting.

A detailed description of the exchange and interest rate risks is provided in Note E.14 to the financial statements: "Financial instruments and financial risk management".

11.3. Derivative financial instrument accounting rules

The majority of derivative instruments used by the Group qualify for accounting purposes as hedges if the derivative is eligible for hedge accounting and if the hedging is documented according to the principles of IAS 39. In practice, the derivative financial instruments not qualified as hedging by the Faiveley Transport Group are the following:
- foreign exchange options to cover tenders;
- structured interest rate swaps.

The derivative hedging instruments are recorded in the balance sheet at their fair value. The recognition of movements in the fair value of derivative instruments depends on the following three classifications:
- Fair value hedges: the movements in the fair value of the derivative are taken to the income statement and offset, to the extent of the effective part, the movements in fair value of the underlying asset, liability or firm commitment, also recorded in the income statement. Forward exchange transactions and exchange swaps that cover certain commercial contracts and financial assets and liabilities denominated in foreign currencies are considered as fair value hedges.
- Hedging of future flows: the movements in fair value are recorded in equity for the effective part and reclassified in income when the item covered affects the latter. The ineffective part is taken directly to financial income and expense.
  Interest rate derivative instruments, as well as budget cash flow hedges are treated as future cash flow hedges.
- Transaction derivatives: the movements in the fair value of the derivative are recorded in finance income and costs.

12. INVENTORIES AND WORK IN PROGRESS

Inventories and work-in-progress include raw materials, work-in progress and finished products. They are stated at the lower of production cost and estimated net realisable value.

Raw materials are measured using the weighted average cost method.

Work-in-progress and finished products are measured at their production cost. The cost of inventories includes direct raw material costs and, where relevant, direct labour costs as well as overheads incurred in bringing the inventories to their present location and condition.

Writedowns are recorded to take into account the risk of obsolescence.

13. NON-CURRENT ASSETS HELD FOR DISPOSAL AND DISCONTINUED OPERATIONS

IFRS requires the separate disclosure in the balance sheet of the total value of assets and liabilities of operations held for disposal and discontinued without any offset. IFRS also requires the separate disclosure in the income statement of the total after tax profit realised from discontinued operations.

Non-current assets held for disposal may no longer be depreciated or amortised. They are valued at the lower of their carrying value and fair market value net of disposal costs.

14. TREASURY SHARES

Faiveley Transport parent company shares held by the subsidiaries or the parent company are deducted from consolidated equity, with any gains or losses on their disposal being directly allocated to equity.

15. PROVISIONS FOR LIABILITIES AND CHARGES

15.1. Provisions for retirement benefits and other personnel commitments

In accordance with the laws and practices of each country, Faiveley Transport Group participates in retirement benefit plans, social security plans, medical plans and employment termination indemnity schemes, with benefits based on several factors including seniority, wages and payments made into mandatory general plans.

These plans may be defined-benefit or defined-contribution plans.

– Post-employment benefits – defined benefits

Following retirement, Group employees receive benefits (pension or allowance) funded by a number of Group companies. These defined benefit plans primarily concern the United Kingdom, Germany, France and Italy.

In the United Kingdom and Germany, the majority of these plans involve supplementary pension plans. In the United Kingdom, commitments are pre-financed by plan assets.

In France, employees are granted by law a retirement benefit for an amount that varies according to the applicable collective agreement, seniority of employment and final salary. This benefit is paid by the employer when the employee retires. The 2010 pension reform, which in particular plans to raise the retirement age from 60 to 62 years by 2017, was taken into account and treated as an actuarial gain or loss.

In Italy, the law provides for the payment by companies of the "Trattamento di Fine Rapporto" (Severance pay) or TFR for the benefit of employees. The TFR is funded by a 7.4% contribution paid by the employer and is accumulated so as to provide the employee with a lump sum when leaving the Company. The impact of the TFR reforms has been integrated since 31 March 2008. The provision established in the Company's financial statements relates to rights acquired prior to 1 January 2007. For rights acquired subsequently, the employer's commitment is limited to the payment of contributions to external funds.

Commitments for defined benefit plans are calculated based on the "projected unit credit" method. Actuarial differences (resulting from changes in assumptions or experience variances) are recognised according to the corridor method. That portion of actuarial gains or losses exceeding 10% of the higher of the value of future benefits and the value of plan assets is amortised over the average remaining employment life of participants in the plan.

– Post-employment benefits – defined contributions

Contributions into defined contribution plans are expensed when made.

– Other long-term benefits

Other long-term benefits primarily concern Germany (seniority bonuses and early retirement schemes) and France (seniority awards).

Actuarial differences for this type of plan are expensed when they arise.

The net expense for retirement commitments and similar benefits is broken down between cost of sales and fixed costs, according to the distribution of the Company workforce.

15.2. Other provisions for liabilities and charges

In accordance with IAS 37, the Faiveley Transport Group recognises a provision when an obligation to a third party arises that will result in a probable loss or liability that can be reasonably measured. The Group reports a contingent liability as an off-balance sheet commitment when there is only a possibility of a resulting loss or liability or when it cannot be reasonably measured.

These provisions are determined based on the best knowledge available concerning risks incurred and their probability of realisation and are allocated to specific risks. They cover, in particular:
- probable after sales service expenditure arising from mechanical warranties;
- probable expenditure for industrial risks covered by contractual guarantees. The measurement of the provision amount is based on such factors as the products' technical complexities, their innovative nature, geographical proximity, etc.;
- litigation risks;
- losses on completion for the part exceeding the amounts due by the customers;
- restructuring costs when the restructuring has been officially announced and is subject of a detailed plan or whose execution has already begun.

These provisions are valued at their present value when their impact is significant and their measurement reasonably reliable.
Provisions for guarantees are calculated according to the percentage related to the type of product manufactured and experience gained of its reliability over time. The percentages vary from 1% to 6% according to the products and are applied to the sales achieved by project.

16. DEFERRED TAX

In accordance with IAS 12, deferred tax is calculated using the balance sheet liability method (use of tax rates adopted or virtually adopted at the balance sheet date) for all temporary differences between the accounting and tax treatments of assets and liabilities of each Group entity noted at the balance sheet date.

Deferred tax assets arising from tax losses carried forward are recognised when it is probable that the Group will realise sufficient taxable profits in the next financial year to offset against the tax loss incurred.

Deferred tax is recorded in the income statement, unless it relates to items directly posted to other items of comprehensive income, in which case it is also recognised under other items of comprehensive income.

17. SEGMENT REPORTING

In light of criteria defined by IFRS 8 and given the Group's internal organisation (steering of activities by project, with projects generally comprising several products and involving the participation of several Group subsidiaries) and the structure of the market, the Group opted for a presentation similar to IAS 14, pursuant to IFRS 8. In addition, it was deemed appropriate to retain an analysis by geographic region.

As a result, the application of IFRS 8 had no impact on the information presented at 31 March 2012 by the Group.

Segment information is presented in Note E.17.

18. SPECIFIC MECHANISMS LINKED TO FAIVELEY TRANSPORT SHAREHOLDING

Managers who were shareholders of Faiveley Management ("FM Managers") and Faiveley M2 ("FM2 Managers") have undertaken the following commitments in relation to their shareholdings in Faiveley Transport.

18.1. FM Managers commitments

FM Managers all agreed to a lock-up commitment of all their Faiveley Transport shares for 2 years, and of two thirds of their shares for 3 years from 23 December 2008.

In addition, over a period of 6 years from 23 December 2008, any disposal by an FM Manager of a block of more than 10,000 Faiveley Transport shares is subject to a Faiveley Transport pre-emption right.

18.2. FM2 Managers commitments

Every FM2 manager has entered into a unilateral undertaking to sell their Faiveley Transport shares to Faiveley Transport, which may be exercised in the event they resign their duties with the Faiveley Transport Group.

FM2 managers all agreed to a lock-up commitment of all their Faiveley Transport shares for 3 years from 23 December 2008.

In addition, over a period of six years from 23 December 2008, any disposal by an FM2 manager of a block of more than 3,000 Faiveley Transport shares, is subject to a Faiveley Transport pre-emption right.

D. Changes in consolidation scope

1. NEWLY-CREATED COMPANIES

The Faiveley Transport office in China became a subsidiary following the creation of Faiveley Transport Systems Technology (Beijing) Co. Ltd.

2. ACQUISITIONS

2.1. New acquisitions

– Acquisition of Graham-White Manufacturing Co.

In the fourth quarter of 2011/2012, Faiveley Transport acquired the American company Graham-White Manufacturing Co. and its subsidiaries. Graham-White Manufacturing Co. is a global leader in compressed air drying technology for railway braking systems and a leading provider of brake components in the US locomotive and rail freight market, generating annual sales of over USD 70 million, with a large share of revenues stemming from after-sales service and re-manufacturing.

Detailed calculation of goodwill:

	USD thousands	€ thousands [1]	€ thousands [2]
Acquisition cost of the shares	118,477	90,028	88,707
Shareholders' equity	20,862	15,853	15,620
GOODWILL	**97,615**	**74,175**	**73,087**

(1) Converted at the exchange rate on the acquisition date (3 February 2012): €0.759878.
(2) Converted at the closing exchange rate on 31 March 2012: €0.748727.

The valuation of the goodwill on these acquisitions has been calculated provisionally. In accordance with IFRS 3, these initial values may be restated within 12 months of the acquisition date.

2.2. Summary of acquisitions during the last two financial years

Companies acquired	Main business	Acquisition date	% owned	Acquisition cost
2011/2012				
Graham-White Manufacturing Co. and its subsidiaries	Design and manufacture of compressed air drying technology and brake components	3 February 2012	100%	USD 118,477 thousand
2010/2011				
Faiveley Transport Schweiz AG (formerly Urs Dolder AG)	Manufacture of electrical heating devices	24 February 2011	80%	€2,926 thousand

2.3. Impact of addition of new acquisitions to the Group structure

	Graham-White Manufacturing Co.		
	Carrying value	Adjustments	Fair value
Non-current assets:			
Intangible assets and property, plant and equipment	7,711	1,972	9,683
Deferred tax assets	–	5,209	5,209
Current assets:			
Inventories	4,609	2,032	6,641
Trade receivables	8,178	–	8,178
Other current receivables	204	–	204
Cash	**529**	**–**	**529**
Non-current liabilities:			
Non-current provisions	–	–	–
Deferred tax liabilities	–	(257)	(257)
Long-term financial debt	–	–	–
Current liabilities:			
Current provisions	–	(6,773)	(6,773)
Short-term financial debt	–	–	–
Operating liabilities	(3,247)	(3,723)	(6,970)
Other liabilities	–	–	–
TOTAL	**17,984**	**(1,540)**	**16,444**
of which Group share	**–**	**–**	**15,853**
Goodwill	–	–	74,175
Acquisition cost	**–**	**–**	**90,028**

* Amounts in € thousands translated at the exchange rate on the acquisition date (3 February 2012): €0.759878.

These financial statements have been prepared in accordance with IFRS. We have not identified any material difference in the fair value of the amounts disclosed above.

Since the acquisition date, the contribution of new acquisitions to sales has been €8,786 thousand and €933 thousand to net profit.

According to Company estimates, had Graham-White Manufacturing Co. been consolidated over the full year, i.e. from 1 April 2011 to 31 March 2012, this acquisition would have had the following impacts on the income statement:

- Sales: €53,944 thousand, i.e. 5.99% of the Faiveley Transport Group's consolidated sales for the year to 31 March 2012.
- Net profit: €5,688 thousand, i.e. 11.11% of the Faiveley Transport Group's consolidated net profit for the year to 31 March 2012.

3. DISPOSALS AND COMPANIES NO LONGER CONSOLIDATED

Nil.

4. MOVEMENTS IN GOODWILL DURING THE ALLOCATION PERIOD

The value of assets contributed by Amsted Rail during the creation of the Amsted Rail-Faiveley LLC joint venture in July 2010 has been restated and offset against goodwill.

This restatement had negative impact of USD 0.5 million (€0.3 million) on the opening goodwill balance.

E. Notes to the consolidated financial statements and accompanying tables (€ thousands)

1. GOODWILL

To expand its product range, the Faiveley Transport Group has acquired specialised companies. The main acquisitions include the Sab Wabco Group (acquired in 2004), which focuses on brake products and couplers, Faiveley Transport NSF (acquired in 2005), which specialises in air conditioning equipment, Nowe GmbH (acquired in 2008), which designs sanding systems, ShiJiaZhuang JiaXiang Precision Machinery Co. Ltd (of which 50% was acquired in 2007), which develops and manufactures compressors, Ellcon National (acquired in 2008), which specialises in brake components for the rail freight market, the sintered brake pads activity of Carbone Lorraine on 1 April 2008, Faiveley Transport Schweiz AG (acquired in February 2011), a manufacturer of railway heating devices, and Graham-White Manufacturing Co. (acquired in 2012) for the manufacturing of compressed air drying technology and brake components for the locomotive and railway freight market.

Following these acquisitions, the Group allocated goodwill and intangible assets with indefinite useful lives to each of the legal entities concerned or to a group of companies (which made up the Sab-Wabco group). A Cash Generating Unit therefore corresponds to a company acquired or a group of companies. The allocation of these goodwill amounts has not subsequently been amended.

In addition to these acquisitions, additional goodwill was recognised in the financial statements at the time of Faiveley Transport's (formerly Faiveley S.A.) acquisition of the entire minority shareholdings (both direct and indirect) in its subsidiary, Faiveley Transport. This goodwill is subject to an annual impairment test based on the Group's consolidated financial statements.

The following table provides details of unallocated goodwill as at 31 March 2012:

	Gross	Accumulated impairment	Net 31 March 2012	Net 31 March 2011
Faiveley Transport minority interests	265,778	–	265,778	265,778
Sab Wabco Group	234,004	–	234,004	234,004
Graham-White Manufacturing Co.	73,087	–	73,087	–
Amsted Rail-Faiveley LLC/Ellcon National Inc.	33,736	–	33,736	32,077
Faiveley Transport NSF	10,057	–	10,057	10,057
Nowe GmbH	7,581	–	7,581	7,831
Faiveley Transport Tours (1)	6,061	–	6,061	6,061
Faiveley Transport Schweiz AG (formerly Urs Dolder AG)	2,264	–	2,264	2,264
Faiveley Transport Gennevilliers	13,470	–	13,470	1,013
Shijiazhuang Jiaxiang Precision Machinery Co. Ltd.	102	–	102	102
Others	2,841	–	2,841	2,841
TOTAL	**648,981**	**–**	**648,981**	**562,028**

(1) Goodwill recognised following the purchase of Espas Group.

The business goodwill of €12,457 thousand recognised in the financial statements of Faiveley Transport Gennevilliers, at the time of the acquisition of certain assets of Carbone Lorraine's sintered brake pad activity, has been reclassified as acquisition goodwill during the year. At that time, the intangible assets concerned had not been subject to separate impairment tests that would have led to their identification.

• Change 2011/2012

	Gross 1 April 2011	Adjustments to opening goodwill	Acquisitions	Disposals	Impairment test	Other movements	Gross 31 March 2012
Faiveley Transport minority interests	265,778	–	–	–	–	–	265,778
Sab Wabco Group	234,004	–	–	–	–	–	234,004
Graham-White Manufacturing Co.	–	–	74,175	–	–	(1,088) (1)	73,087
Amsted Rail-Faiveley LLC/Ellcon National Inc	32,077	(362)	–	–	–	2,021 (1)	33,736
Faiveley Transport NSF	10,057	–	–	–	–	–	10,057
Nowe GmbH	7,831	–	–	–	–	(250) (2)	7,581
Faiveley Transport Tours	6,061	–	–	–	–	–	6,061
Faiveley Transport Schweiz AG (formerly Urs Dolder AG)	2,264	–	–	–	–	–	2,264
Faiveley Transport Gennevilliers	1,013	–	–	–	–	12,457 (3)	13,470
Shijiazhuang Jiaxiang Precision Machinery Co. Ltd	102	–	–	–	–	–	102
Others	2,841	–	–	–	–	–	2,841
TOTAL	**562,028**	**(362)**	**74,175**	**–**	**–**	**13,140**	**648,981**

(1) These movements are due to the translation difference on goodwill recognised in US Dollars: Graham-White Manufacturing Co. (USD 97,615 thousand) and Amsted Rail-Faiveley LLC/Ellcon National Inc (USD 45,057 thousand).
(2) Adjustment to the goodwill of Nowe GmbH following the discounting of the put option on shares held by minority interests.
(3) Reclassification of the Faiveley Transport Gennevilliers business goodwill.

As every year, at the time of closing the annual accounts, the Group reviews the value of goodwill and other non-current assets reflected on the balance sheet. This review was conducted by groups of net assets belonging to the same company or group of companies, based on cash flows expected from these assets, as determined within the framework of a strategic analysis, involving in particular the preparation of the budget and the long-term business plan.

The assumptions concerning sales growth are established based on the budget for the coming year and provisional budgets for the following two years. These forecasts are reliable due to high visibility in our markets and our significant order book. Beyond the first three years of forecast, a growth rate of 2.5% is used for the last year of the business plan and the subsequent two years. Beyond five years and to infinity, the growth rate used is 1.5%, which is a relatively prudent assumption in relation to the growth rates expected in this market.

The calculation of the free cash flow incorporates standard data for the entity in terms of changes in working capital requirement and capital expenditure.

The reference pre-tax WACC (Weighted Average Cost of Capital) is 12.4% for France (being an after-tax WACC of 8.3%), 13.5% for the rest of the Eurozone and the rest of the world, excluding the US, and 11.3% for the US. It is calculated using corresponding parameters:

- Market data:
  - risk-free rate on 10-year French government bonds (average of the last 3 months, January to March 2012). This risk-free rate is 3% for France and 4.1% for the Eurozone and the rest of the world, excluding the US. It is 2% for the USD area,
  - levered beta of sector of 6.6% and market risk premium of 1.26%. These percentages were obtained based on studies carried out in March 2012 by Bloomberg, Mainfirst and HSBC on Faiveley Transport.
- The entity's parameters:
  - estimated cost of debt: 2.4% for the 2011/2012 year (4-year swap rate, i.e. over the average maturity of Faiveley's debt and including an average spread of 100 pps),
  - equity/debt ratio at the balance sheet date,
  - a standard tax rate of 33.33%.

The carrying value at 31 March 2012 of goodwill and other non-current assets grouped together with other net assets by company or group of companies, was compared to their value in use calculated using the aforementioned method. No impairment was recognised following this review.

Furthermore, the sensitivity analyses carried out show that the use of a discount rate 1% higher or a standard annual growth rate 1% lower than those mentioned above would not have given rise to impairment, since in all assumptions the recoverable value of the Cash Generating Units remained higher than the net carrying value of their assets.

To supplement these impairment tests, it should be noted that the internal steering of all Group activities is carried out based on a monitoring of each project awarded. Projects with a lifespan exceeding one year are recognised according to the method prescribed by IAS 11 (recognition of profit margin based on the percentage of completion). Projects generally involve several products and thus involve several Group companies. They are reviewed periodically, under the responsibility of the Project Manager, to ensure their proper implementation. Site and Group Financial Controllers attend these meetings. Following review of the projects, the risks identified are estimated and a provision is established in the financial statements.

2. OTHER INTANGIBLE ASSETS

	Gross	Accumulated amortisation	Net 31 March 2012	Net 31 March 2011
Research costs	20,005	10,507	9,498	8,645
Patents, trademarks and licences	21,963	18,774	3,189	3,265
Business goodwill	2,561	–	2,561	12,507
Other intangible assets	25,103	294	24,809	20,514
TOTAL	**69,632**	**29,575**	**40,057**	**44,931**

At 31 March 2012, intangible assets are broken down as follows:

- Research costs: only include development costs incurred as part of research programmes and that comply with the IFRS capitalisation criteria. These costs are amortised over a maximum of 3 years.
- Patents, trademarks and licences: this heading primarily includes patents acquired as part of the acquisition of Carbone Lorraine's sintered brake business (€4,000 thousand), and computer software amortised over a maximum of 5 years.
- Business goodwill: comprises the client list taken over through the acquisition of Graham-White Manufacturing Co., valued at €2.5 million (i.e. USD 3.4 million).
- Other intangible assets: primarily includes intangible assets identified and measured (in particular, sales agency agreements) as part of the creation of the Amsted Rail-Faiveley LLC joint venture, for an amount of €8,626 thousand (USD 11,521 thousand) and costs already incurred of €14,548 thousand, corresponding to the rollout of the Moving Forward project, a significant IT system integration programme, launched in 2007, whose objective is to optimise our organisations, industrial processes, equipment and the sharing of technical data within the Faiveley Transport Group.

• Change 2011/2012

	Research costs	Patents, trademarks and licences	Business goodwill	Other intangible assets	Total
Gross 1 April 2011	**17,573**	**20,639**	**12,507**	**21,174**	**71,893**

Impact on income statement (a)-(b)+(c)	–	–	2,849	–	–	–

(1) Amount of deferred tax assets corresponding to tax losses not recognised due to the risk of non-recovery.
(2) See Note D.

On the basis of the budget and three-year plan, the Group is confident as to the recovery of the net deferred tax balance of €21.5 million.

6. INVENTORIES

The accounting methods used to measure inventories (including the method for determining the cost used) are described in paragraph C.12.

	Gross	Provisions	Net 31 March 2012	Net 31 March 2011
Raw materials	102,136	14,096	88,040	83,876
Work-in-progress	25,029	750	24,279	24,835
Finished products	27,666	1,533	26,133	14,949
Merchandise	6,466	918	5,548	10,222
TOTAL	**161,297**	**17,297**	**144,000**	**133,882**

• Movements in provisions 2011/2012

	Provisions at 1 April 2011	Change in group structure	Charges to provisions	Reversals provisions used	Reversals provisions not used	Other movements	Provisions at 31 March 2012
Raw materials	12,647	–	4,523	(3,081)	(148)	155	14,096
Work-in-progress	481	–	213	(60)	(67)	183	750
Finished products	1,032	880	340	(72)	(494)	(153)	1,533
Merchandise	1,168	–	236	(90)	(414)	18	918
TOTAL	**15,328**	**880**	**5,312**	**(3,303)**	**(1,123)**	**203** (1)	**17,297**

(1) Including €203 thousand in respect of translation differences.

During the 2011/2012 financial year, old inventories and inventories that had become totally obsolete were scrapped. Provisions of 77.6% of the value of these inventories had previously been raised. The impact on the income statement for the year ended 31 March 2012 was a loss of €1 million.

7. WORK-IN-PROGRESS ON LONG TERM CONTRACTS

At 31 March 2012, net work-in-progress on projects were valued at €91 million, compared to €70.1 million in the previous year. These primarily include engineering costs on long-term contracts. At each balance sheet date, the Group assesses their recoverable value. In the event of a loss-making contract, writedown is recognised as a reduction of contracts in progress.

Gross work-in-progress on projects were €98 million at 31 March 2012, compared to €73 million at 31 March 2011.

8. CURRENT RECEIVABLES

8.1. Trade receivables

	Gross	Provisions	Net 31 March 2012	Net 31 March 2011
Trade receivables	278,796	6,193	272,603	278,692
Receivables sold to a factor	(93,201)	–	(93,201)	(94,968)
TOTAL	**185,595**	**6,193**	**179,402**	**183,724**

– Movements in provisions for doubtful trade receivables

Year ended:	Opening balance	Change in group structure	Charges to provisions	Reversals provisions used	Reversals provisions not used	Other movements	Closing balance
31 MARCH 2012	**4,881**	**200**	**3,232**	**(1,211)**	**(1,024)**	**115**	**6,193**
31 March 2011	6,994	154	4,795	(4,698)	(2,317)	(47)	4,881

A provision for doubtful trade receivables is raised when there is an objective indication of the Group's inability to recover all or part of the amounts due under the terms initially laid down in respect of the transaction. Significant financial difficulties encountered by the debtor, the probability that the debtor will become bankrupt or undergo a financial restructuring or payment default are indications of the impairment of a receivable.

– Trade receivables at year end

	Total balance sheet	Receivables not yet due	Receivables due				
			Total	Less than 60 days	Between 60 and 120 days	Between 120 and 240 days	More than 240 days
Gross value	185,595	161,634	23,961	11,837	3,353	1,618	7,153
Provisions	(6,193)	(1,565)	(4,628)	(592)	(553)	(509)	(2,974)
NET VALUE	**179,402**	**160,069**	**19,333**	**11,245**	**2,800**	**1,109**	**4,179**

Receivables remaining unpaid beyond the contractual due date represent, in most cases, amounts confirmed by customers but in respect of which payment is subject to the retentions identified when work was inspected.

8.2. Other current assets

	Gross	Provisions	Net 31 March 2012	Net 31 March 2011
Supplier credit notes	1,431	–	1,431	794
Social security and tax receivables	10,650	–	10,650	13,199
Prepaid expenses	4,478	–	4,478	3,373
Accrued income	515	–	515	1,497
Dividends receivable	–	–	–	–
Other receivables	1,563	122	1,441	2,127
TOTAL	**18,637**	**122**	**18,515**	**89,008**

9. CURRENT FINANCIAL ASSETS

	31 March 2012	31 March 2011
Guaranteed deposits and securities (1)	4,021	4,323
Other financial receivables	304	369
Current accounts	–	307
Fair value of derivatives - Assets	5,003	7,619
TOTAL	**9,328**	**12,618**

(1) Of which guarantees provided to the factor: €3,834 thousand at 31 March 2012 and €3,551 thousand at 31 March 2011.
In order to guarantee the repayment of amounts the Group may owe the factor, the factor records in its ledgers a non-interest bearing escrow account funded by deductions made on the financing of transferred receivables. The balance on this account represents 10% of transferred receivables outstanding; this rate may potentially be increased in the event of an increase in disallowed receivables (credit notes, disputes, non-payment or discounts).

.

10. CLOSING CASH AND CASH EQUIVALENTS (GROSS AMOUNTS)

	31 March 2012	31 March 2011
Short term investments	41,085	44,927
Cash	169,166	153,457
Bank overdrafts	(2,405)	(4,771)
Invoices factored and not guaranteed	(1,023)	(902)
TOTAL	**206,823**	**192,711**

The Group does not hold a share portfolio but deposits excess cash balances. At 31 March 2012, it had certificates of deposits of €29.3 million and fixed-term deposits of €11.8 million. These deposits meet the criteria specified by IAS 7, which enables them to be classified as cash equivalents.

For local regulatory reasons, the cash and cash equivalents held by the Brazilian subsidiary (€4.4 million at the end of March 2012), may not be pooled with the Group's other cash resources, or be paid out as dividends until losses carried forward are not settled. As an exception, these cash balances are invested locally in certificates of deposits with a maturity exceeding 3 months. However, they may be drawn down at any time and do not bear any capital risk.

11. EQUITY

11.1. Share capital

At 31 March 2012, the Company's share capital totalled €14,614,152 divided into 14,614,152 shares of €1 each, fully paid up. Shares registered in the name of the same shareholder for at least two years have double voting rights.

As regards its capital management, the Faiveley Transport Group's main objective is to ensure the retention of a good credit risk rating and sound capital ratios in order to facilitate its activity and maximise value for its shareholders.

The Group manages its capital by ensuring that it maintains three financial ratios within the limits defined by its credit agreements (see Note E.13).

The Group manages its capital structure and makes adjustments depending on changes in economic conditions. With a view to maintaining or amending its capital structure, the Group may adjust the payment of dividends to its shareholders, redeem part of its capital or issue new shares. The management objectives, policies and procedures remained unchanged in 2012 and 2011.

– Composition of the share capital

Shares	Nominal value	31 March 2011	New shares issued	Double voting rights granted	31 March 2012
Ordinary	1	6,486,734	209,441	(34,805)	6,661,370
Redeemed	–	–	–	–	–
With preferred dividends	–	–	–	–	–
With double voting rights	1	7,917,977	–	34,805	7,952,782
TOTAL	**1**	**14,404,711**	**209,441**	**–**	**14,614,152**

– Breakdown of share capital and voting rights

	31 March 2012		31 March 2011	
Main shareholders	% of capital	% of voting rights	% of capital	% of voting rights
François Faiveley Group and the Faiveley family	52.62	66.70	53.42	67.50
Treasury shares	2.93	–	3.21	–
Registered securities [1]	6.26	8.08	6.70	8.34
General public	38.19	25.22	36.67	24.16

(1) Excluding treasury shares and Faiveley Family.

– Share purchase option plans

In 2005, Faiveley Transport implemented a share purchase option plan for the benefit of key Faiveley Transport Group management (excluding the managers who invested in Faiveley Management S.A.S.). This plan was approved by the Extraordinary General Meeting of 27 September 2005 for a period of thirty-eight months, expiring on 27 September 2008.

In order to meet its future obligation to transfer these shares to the plan beneficiaries, Faiveley Transport began a share buyback programme at the end of 2005.

If the share purchase options were exercised, they would result in the purchase of existing Faiveley Transport ordinary shares.

Number of shares that could be subscribed by members of the Executive Committee	13,440	–	–	–	–	–	–	6,720	–	22,600
Conditions of exercise	100% of options exercisable as from 24/11/2007	100% of options exercisable as from 29/12/2007	100% of options exercisable as from 22/06/2008	100% of options exercisable as from 25/10/2008	100% of options exercisable as from 15/11/2008	100% of options exercisable as from 01/12/2008	100% of options exercisable as from 02/04/2009	100% of options exercisable as from 19/02/2010	100% of options exercisable as from 29/03/2010	100% of options exercisable as from 17/07/2010

* The exercise price is equal to the average price of the twenty trading days preceding the date of the Management Board meeting that decided to grant the options, less a discount of 5%.

Following the departure of certain beneficiaries and the options exercised since the plans were implemented by the Management Board, at 31 March 2012, 77,035 options granted to 15 beneficiaries remained outstanding.

In the knowledge that the options become exercisable from the second anniversary of the date of their granting by the Chairman of the Management Board, subject to the requirement that the holder of the options continues to be employed by the Faiveley Transport Group at the time of exercise and accepts the option scheme rules, 239,005 options have been exercised to date.

- Changes to the plan

	31 March 2012	31 March 2011
Options granted	372,040	372,040
Options cancelled	56,000	56,000
Options exercised	239,005	198,499
OPTIONS OUTSTANDING	**77,035**	**117,541**

– Share subscription option plans

The Combined General Meeting of Faiveley Transport, held on 22 September 2009, authorised the Management Board to grant share purchase and/or subscription options, up to a maximum of 1% of the share capital.

The Management Board decided at its meeting of 23 November 2009 to grant, to 15 beneficiaries, options giving right to subscribe for new shares in the Company, to be issued through a share capital increase not exceeding an overall nominal amount of €144,000, corresponding to 144,000 new shares at a par value of €1 each. The new shares will be issued at a price of €54.91.

- Main features of the current share subscription plan

Share subscription features	n°1
Management Board meeting	23/11/2009
Exercise price in €*	54.91
Options exercisable from	22/11/2013
Options lapse on	22/11/2017
Initial number of beneficiaries	15
Restated initial number	13
Total number of options granted	144,000
Total number of options exercised	–
Total number of options cancelled	14,000
Number of options outstanding at 31 March 2012	130,000
Percentage of share capital at 31 March 2012 liable to be issued	0.89%
Number of shares liable to be subscribed by members of the Management Board and the Supervisory Board	45,500
Number of shares liable to be subscribed by members of the Executive Committee	95,000
Terms and conditions of exercise	100% of options exercisable as from 22/11/2013

* The exercise price is the average price of the last twenty trading days preceding the Management Board meeting that approved the allocation, without any discount.

On the allocation date, the fair value of options granted was estimated at €2.8 million, based on the Black & Scholes mathematical model, taking account of the terms and conditions of option allocation.

Calculation assumptions:
- Faiveley Transport share price on the allocation date: €55.39;
- expected maturity of option: 5 years;
- exercise price: €54.91 per option;
- no risk rate known on allocation date: 3.4%;
- full-year volatility of the Faiveley Transport share at 23 November 2009: 33%.

Based on these features, the value of the option is €19.58. In addition, it was assumed that no dividend would be paid during the period.

The IFRS charge (fair value of the plan), estimated at €2.8 million, is spread over the acquisition period of 4 years. The impact of the charge recognised for the year was €0.7 million.

– Free performance-based share allocation plan authorised by the General Meeting of 13 September 2010

Faiveley Transport's Combined General Meeting of 13 September 2010 authorised the Management Board to allocate free performance-based shares, either existing or to be issued, within the limit of 1% of the share capital.

At its meetings of 3 December 2010 and 24 February 2011, the Management Board allocated a total of 69,700 existing shares to 43 beneficiaries. The allocation of the shares will be final at the end of a vesting period of two years, subject to beneficiaries remaining employed by the Group at that date and to the achievement of part or all of performance criteria. This period will be followed by a retention period of a minimum of two years.

Allocation of free performance-based shares	n°1	n°2
Date of Management Board meeting	03/12/2010	24/02/2011
Date of final allocation of the shares	03/12/2012	24/02/2013
Date shares become available	03/12/2014	24/02/2015
Initial number of beneficiaries	38	5
Adjusted initial number	36	3
Total number of shares allocated	64,500	5,200
Total number of shares cancelled	5,000	2,400
Percentage of share capital at 31 March 2012 liable to be issued	–	–
Number of free shares granted to members of the Management Board and the Supervisory Board	15,800	–
Number of free shares granted to members of the Executive Committee after cancellations, if applicable	32,500	–
Terms and conditions of exercise	Determination of % of shares finally allocated at 03/12/2012	Determination of % of shares finally allocated at 24/02/2013

Free performance-based shares allocation plans are instruments that entitle their beneficiaries to acquire a variable number of ordinary shares of the Company, based on the number of exercisable performance shares and on the performance criteria set out.

These criteria are to be tested in November 2012; they have been set for the 2010/2011 and 2011/2012 financial years.

The criteria used to reflect wealth creation for the shareholders were:
- growth in operating profit: growth of 4% per year in profit from recurring operations, before non-recurring items; and
- cash flow generation (debt reduction): cumulative cash flow from operating activities for 2010/2011 and 2011/2012 to represent 85% of the operating profit target.

In the event performance criteria are fully achieved or exceeded, each beneficiary will receive 100% of the number of shares allocated to them.

In the event performance criteria are partly achieved, each beneficiary will receive a percentage of the number of shares allocated to them:
- criteria of operating profit growth:
  - 0% if growth is nil or negative,
  - pro-rata for average growth of between 0% and 4% per year;
- criteria of cash flow generation:
  - 0% if generation is nil or negative,
  - pro-rata for cash flow from operating activities of between 0% and 100% of the target.

The fair value of the performance-based free share plan was estimated on the allocation date by an external consultant, using the Monte Carlo method and taking into account the terms and conditions of allocation of the shares.

Calculation assumptions:
- Model: Monte Carlo method;
- Life of options: 2 years, related to the performance condition;
- Multiple of benchmark EBIT: 9.9x;
- Opportunity cost of capital: between 6.6% [(1)] and 7.1% [(2)];
- Volatility of Faiveley Transport after 2 years, debt-free: 26.6%;
- Management turnover: 15.7%.

The assessment pointed to a percentage of achievement of performance criteria of between 50.7% (with a capital cost of 6.6%) and 51.2% (with a capital cost of 7.1%).

The IFRS charge (plan fair value), estimated at €2.1 million, is spread over the acquisition period of two years. The charge recognised during the financial year was €1 million.

– Free share allocation plan authorised by the General Meeting of 14 September 2011

The Combined General Meeting of 14 September 2011 delegated the Management Board powers for the allocation free of charge of ordinary shares of the Company, either new or already issued, within the limit of 1% of the share capital of the Company on 14 September 2011.

At its meeting held on 4 January 2012, the Management Board decided to implement this delegation and to allocate free shares. This decision was made as part of an employee shareholding plan aimed at a broader population of executives. The programme provides that an employee holding shares in the Company in a personal capacity will be granted two free shares for every share held, not exceeding a limit set for each level of management.

At its meeting held on 5 March 2012, the Management Board set the final list of beneficiaries and the number of free shares to be granted. A total of 79,224 shares are thus to be granted to 151 beneficiaries. The allocation of the shares will be final at the end of a two-year vesting period, or four years for non-French residents, beginning on 5 March 2012.

The fair value of the free share plan was calculated on the allocation date, taking account of the number of shares allocated and the Faiveley Transport share price at 5 March 2012. As a result, the employee benefit granted to beneficiaries was estimated at €2.3 million, also taking account of a probability that free shares be waived due to employees selling the shares they previously owned or employees leaving the Group before the end of the 2-year period, as well as the savings made by Faiveley Transport over two years due to not having to pay dividends for these shares.

This charge will be spread over the vesting period of 2 years. The charge recognised for the year had an impact of €96 thousand.

– Treasury shares

At 31 March 2012, Faiveley Transport held 427,528 treasury shares, including 417,347 in nominative form and 10,181 through its liquidity contract.

Given the purchase cost of the Faiveley Transport shares acquired to service stock option, share subscription or free share allocation plans, the exercise prices granted and the price of the Faiveley Transport share at 31 March 2012, applied to unallocated options, the unrealised capital loss on treasury shares was €3.9 million.

(1) Opportunity cost of the Company's share capital.
(2) Capital cost used by the Bloomberg database on 18 November 2010.

11.2. Translation differences

Translation differences comprise mainly the gains and losses resulting from the translation of the equity of subsidiaries whose functional currency is other than the euro.

– Breakdown of translation differences by currency

The actual return on investments was €2.6 million in the year to 31 March 2012 (compared to €1.9 million for the year to 31 March 2011).

Contributions in respect of defined benefit schemes in the United Kingdom, Belgium and India were estimated to total €2.0 million for 2012.

The expected return on investments is estimated at €2 million in 2012. A one point increase in the assumed percentage rate of return would generate €0.4 million in additional income.

– Actuarial assumptions

The actuarial assumptions used to measure commitments take into account the demographic and financial conditions specific to each country or Group company.

Discount rates are determined by reference to the yields on AAA bonds with similar durations to those of the commitments as at the measurement date.

The assumptions used for those countries with the most significant commitments are shown in the following table:

	31 March 2012			31 March 2011		
	France	Germany	United Kingdom	France	Germany	United Kingdom
Discount rate	3.85%	3.85%	4.80%	4.80%	4.80%	5.60%
Inflation rate	2.00%	2.00%	3.15%	2.00%	2.00%	3.70%
Average salary increase rate	3.00%	1.60%	4.65%	3.00%	1.60%	5.20%
Expected return on investments	NA	NA	4.54%	NA	NA	5.20%

- The sensitivity of commitments at 31 March 2012 and the cost of services rendered for the next year to a 25 basis point change in the discount rate are summarised as follows:

(€ millions)	0.25% increase in discount rate	0.25% decrease in discount rate
Effect on the value of commitments	(2.661)	2.812
Effect on the cost of services rendered	(0.029)	0.032

- The sensitivity of commitments at 31 March 2012 and the cost of services rendered for the next year to a 25 basis point change in the salary increase rate are summarised as follows:

(€ millions)	0.25% rise in salary increase rate	0.25% reduction in salary increase rate
Effect on the value of commitments	0.324	(0.310)
Effect on the cost of services rendered	0.029	(0.027)

- The expected long term rate of return on plan assets in the United Kingdom, Belgium and India was determined by taking into account the structure of the investment portfolio.

  Currently the investment portfolio contains no Group securities.

The structure of the investment portfolio is as follows:

	31 March 2012	31 March 2011
Shares	47.8%	48.1%
Bonds	49.4%	48.8%
Other assets	2.8%	3.1%
TOTAL	**100.0%**	**100.0%**

- The expected return for each category of assets is as follows:

	31 March 2012
Shares	5.7%
Bonds	3.5%
Other assets	4.3%
Total	4.6%

12.3. Current provisions

(1) Including exchange differences of €1,140 thousand and reclassification of €1,412 thousand.

Current provisions primarily relate to provisions for guarantees and after-sales service granted to our customers and litigations and claims on completed contracts. The methods underlying the recognition of these provisions are specified in Note C.15.2.

13. BORROWINGS AND FINANCIAL DEBT

Under the credit agreements, the Faiveley Transport Group must comply with the following four financial conditions:

- leverage ratio (Consolidated Net Debt/Consolidated EBITDA) must not exceed 2.5 at 31 March 2012. At this date, the ratio was 1.77;
- gearing ratio (Consolidated Net Debt /Consolidated Equity): must not exceed 1.50 at 31 March 2012. At this date the ratio was 0.41;
- total bank guarantees must not exceed 22% of the order book. At 31 March 2012, they represented 13.4 %;
- "Consolidated EBITDA/Cost of Consolidated Net Debt" must not be less than 3.5. At 31 March 2012, the ratio was 11.4.

Non-compliance with one of these covenants may result in the debt becoming immediately repayable.

13.1.Breakdown and maturity of non-current and current financial debt

	2011/2012				
	Current portion	Non-current portion			
	Under 1 year	1 to 5 years	Over 5 years	Total	2010/2011

TOTAL FINANCIAL DEBT (1)	**433,467**	**377,861**

(1) Excluding fair market value of derivatives - liabilities.

13.4. Calculation of net financial debt

	At 31 March 2012	At 31 March 2011
Non-current financial debt	352,865	318,516
Current financial debt	77,174	53,672
Bank overdrafts	2,405	4,771
Invoices factored – not guaranteed	1,023	902
TOTAL FINANCIAL DEBT (A)	**433,467**	**377,861**
Receivables from investments	–	–
Loans	1,302	1,260
Guarantees, deposits and securities paid	5,155	5,411
Various other receivables	3,405	3,019
Current accounts	–	–
TOTAL FINANCIAL RECEIVABLES (B)	**9,862**	**9,690**
Cash and cash equivalents (c)	210,247	198,382
NET FINANCIAL DEBT (A-B-C)	**213,358**	**169,789**
Equity	505,145	453,275
Net debt/equity	**42.2%**	**37.5%**
Sales	900,523	913,872
Net debt/sales	**23.7%**	**18.6%**

In economic terms, net debt should be reduced by the value of treasury shares held for sale as part of the share purchase/subscription option and free share allocation plans.

The liquidation value of these shares was €17.5 million at 31 March 2012, given the exercise prices granted for share purchase/ subscription options and the year-end share price for shares not allocated to this plan.

For accounting purposes, the value of treasury shares held is deducted from equity under IFRS; this amounted to €21 million at 31 March 2012 and €22 million at 31 March 2011.

14. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

14.1. Financial instruments at 31 March 2012

Main valuation methods used for financial assets and liabilities:

- since most of Faiveley Transport's financial debt bears a variable rate, its fair value (rounded to the nearest credit spread) is equal to nominal values supplemented by interest not yet due;
- due to their short maturity profile, the fair value of trade and other receivables, other current financial assets, current financial debt, cash and cash equivalents and short-term investments is deemed identical to their carrying value.

		Breakdown by category					Fair value classification of instruments[1]		
At 31 March 2012	Carrying value	Non financial assets and liabilities	Loans, receivables and liabilities	At fair value through profit and loss	Available for sale financial assets	Fair value	Level 1	Level 2	Level 3

(1) Revised IFRS 7 requires that fair value measurements be classified on three levels. The levels of fair value hierarchy reflect the significance of data used for the measurements:
Level 1: prices (unadjusted) of identical assets or liabilities listed on active markets.
Level 2: other data than listed prices covered by Level 1, that can be noted for the asset or liability concerned, either directly (i.e. prices) or indirectly (i.e. data derived from prices).
Level 3: data relating to the asset or liability, not based on observable market data (unobservable data).

(2) This amount corresponds to the financial commitment recognised as part of the recognition of put options held by minority shareholders in Nowe GmbH and Faiveley Transport Schweiz AG (formerly called Urs Dolder AG) at 31 March 2012.

14.2. Financial instruments at 31 March 2011

(2) This amount corresponds to the financial commitment recognised as part of the recognition of put options held by minority shareholders in Nowe GmbH and Faiveley Transport Schweiz AG (formerly called Urs Dolder AG) at 31 March 2011.

14.3. Financial risk management

The Faiveley Transport Group's cash policy is based on overall financial risk management principles and provides specific strategies for areas such as exchange risk, interest rate risk, raw materials risk, credit risk and liquidity risk.

The Group also uses derivative instruments, mainly forward purchases and sales of currencies, interest rate swaps or caps and exchange rate contracts or raw material swaps. The aim of these instruments is to manage the exchange, interest rate and raw material risks associated with the Group's activities and financing.

The Group's policy is not to enter into derivative instruments for speculative purposes.

The Supervisory Board of Faiveley Transport examines risk management principles as well as policies covering certain specific fields such as exchange risk, interest rate risk, raw materials risk, credit risk and liquidity risk. These policies are summarised below.

The market values of interest rate and foreign exchange derivative instruments have been measured based on year-end market prices. They have been appraised by an independent expert.

14.4. Market risks

a) Exchange risks

The Group operates in foreign countries and is therefore exposed to exchange risk as a result of its exposure to a number of currencies.

The major currencies concerned are the Chinese Yuan, the American Dollar, the Pound Sterling, the Czech Koruna and the Swedish Krona.

The management of exchange risk on commercial contracts is centralised by the parent company's Treasury department and comprises two parts: the certain and the uncertain risk.

- Exchange risk management relating to tenders in foreign currencies (uncertain risk)

The Faiveley Transport Group is required to submit tenders denominated in foreign currencies. The Group's hedging policy is not to use hedge instruments during the offer phase, unless when specifically decided by Management. The aim is to manage the exchange risk through normal commercially available means. If necessary, the Group Treasury department uses mainly exchange options.

- Exchange risk management relating to commercial contracts (certain risk)

Commercial contracts in foreign currencies (most often successful tenders) are hedged by the Group Treasury Department from contractual commitment. The instruments used primarily include forward purchases and sales. Treasury may also use options.

The Group's policy is to systematically hedge the full value of future transactions expected in every major currency. The minimum trigger threshold for a foreign exchange hedge is €250 thousand.

Various flows are hedged against, at a minimum of 80%, based on the annual budget.

In addition to commercial contracts, all financial positions and management fees deemed significant are systematically hedged against.

- Forward sales hedging financial and commercial transactions as at 31 March 2012

	Nominal value		Fair value
	€ thousands	Local currency thousands	€ thousands
Australian Dollar	7,660	9,917	(1)
Swiss Franc	1,509	1,850	(28)
Chinese Yuan	20,082	172,100	(329)
Czech Koruna	7,013	174,000	(19)
Pound Sterling	22,208	19,000	(521)
Hong-Kong Dollar	16,243	172,000	(341)
Indian Rupee	422	27,300	28
Polish Zloty	767	3,400	(36)

Swedish Krona	11,110	99,888	(70)
Singapore Dollar	23,598	28,400	–
US Dollar	126,199	168,721	(37)
TOTAL	**237,317**	**–**	**(1,352)**

- Forward purchases hedging financial and commercial transactions as at 31 March 2012

	Nominal value		Fair value
	€ thousands	Local currency thousands	€ thousands
Australian Dollar	7,082	9,190	(48)
Swiss Franc	1,313	1,610	24
Chinese Yuan	15,308	127,800	(134)
Czech Koruna	35,703	897,929	569
Pound Sterling	28,304	24,317	825
Hong-Kong Dollar	21,139	221,883	253
Indian Rupee	3,221	232,300	(1)
Polish Zloty	1,508	6,750	103
Swedish Krona	45,728	411,490	374
US Dollar	53,378	70,857	390
TOTAL	**212,683**	**–**	**2,356**

- Sensitivity analysis

The following table presents, at 31 March 2012, the sensitivity to a 10% positive or negative change in the euro against other currencies:

- the effect on pre-tax profit only applies to financial assets and liabilities recognised in the balance sheet, which are denominated in a currency other than the functional currency of their controlling entity and which are not hedged against;
- the effect on equity results from the efficient portion of derivative instruments qualifying as cash flow hedges.

Currency	Movement in € exchange rate	Effect on profit from recurring operations (before tax)	Effect on equity reserves
US Dollar	10%	(189)	–
	(10%)	155	–
Australian Dollar	10%	40	(156)
	(10%)	(49)	156
Hong-Kong Dollar	10%	205	–
	(10%)	(211)	–
Brazilian Real	10%	(295)	–
	(10%)	360	–
Swedish Krona	10%	278	1,089
	(10%)	(359)	(1,089)
Pound Sterling	10%	57	(516)
	(10%)	(69)	516
Russian Rouble	10%	–	371
	(10%)	–	(472)

The impact of fluctuations in the Euro against other currencies is not material.

b) Interest rate risk

The main interest rate risk to which the Group is exposed originates from the syndicated debt, excluding the revolving facility.

To manage its risk, the Treasury department has implemented a hedging strategy using interest rate swaps and options.

The exposure of interest rates on loans in Euros is hedged for between 66% and 85% of the total debt bearing a Euro interest rate, depending on fluctuations for the 2012/2013 period. The exposure of interest rates on loans in US Dollar is 94%.

The estimated cost of bank debt of the Group in 2012/2013 is 2.13% for Euro-denominated debt and 3.19% for US Dollar-denominated debt, including hedges.

Considering the amortisation profile of the syndicated facility and interest rate hedges, the net exposure at 31 March 2012 is as follows:

€-denominated debt	Financial debt	Hedge instruments		Net exposure	
	Variable rate	Fixed rate	Variable rate	Fixed rate	Variable rate
Less than 1 year	32,440	32,440	–	–	–
1 to 2 years	32,440	32,440	–	–	–
2 to 3 years	32,440	32,440	–	–	–
More than 3 years	202,608	30,000	–	–	172,608
TOTAL EUR	**299,928**	**127,320**	**–**	**–**	**172,608**[1]

(1) Sensitivity analysis of net exposure (€172.6 million):
A 100 basis points increase in the reference "Euribor 3 months" interest rate would result in a full-year increase of €1.7 million in the interest expense.

USD-denominated debt	Financial debt Variable rate	Hedge instruments Fixed rate	Hedge instruments Variable rate	Net exposure Fixed rate	Net exposure Variable rate
Less than 1 year	3,580	3,580	–	–	–
1 to 2 years	3,580	–	–	–	3,580
2 to 3 years	3,580	–	–	–	3,580
More than 3 years	24,955	–	–	–	24,955
TOTAL USD	**35,695**	**3,580**	**–**	**–**	**32,115**(1)

(1) Sensitivity analysis of net exposure (USD 32.1 million):
A 100 basis points increase in the reference "Libor USD 3 months" interest rate would result in a full-year increase of USD 0.32 million in the interest expense.

All revolving credit facilities, whether drawn or undrawn, as well as the bridge loan bear a variable interest rate and have not been hedged.

- Instruments recognised in equity

	On Euro loans		On USD loans			
	Nominal (€ thousands)	Fair value (€ thousands)	Nominal (currency thousands)	Fair value (currency thousands)	Nominal (€ thousands)	Fair value (€ thousands)
Swap	150,000	(2,462)	35,791	(589)	26,798	(441)
Tunnel	42,500	(561)	–	–	–	–
Cap	70,000	(204)	–	–	–	–
TOTAL	**262,500**	**(3,227)**	**35,791**	**(589)**	**26,798**	**(441)**

- Sensitivity analysis

The Group has implemented a diversified interest rate risk management policy aimed at limiting the impact of potential interest rate increases on its cash flow. As at 31 March 2012, the servicing of projected debt, net of hedges put in place, would limit the impact of a 1% increase in interest rates on debt and hedges to €1 million.

The impact on equity is €1.8 million with a 0.5% interest rate increase.

c) Risk on raw materials

The Faiveley Transport Group is exposed to increases in the costs of raw materials such as steel, aluminium and copper, and to increases in transportation costs.

The Group has already anticipated these effects, both in terms of its purchasing policy and in the preparation of its tenders. As regards contracts relating to projects, price indexation mechanisms enable the Group to pass on a large part of the increases in raw material costs.

However, the Faiveley Transport Group's sintered brake pads activity is exposed to fluctuations in the price of copper. Contracts have been entered into to hedge almost 30% of the 2012/2013 through euro-denominated raw material swaps.

- Sensitivity analysis

A 1% increase in the price of copper would have a negative impact of €14.5 thousand on EBITDA.

d) Derivative instruments

- The fair value of derivative instruments for hedging exchange, interest rate and raw materials risks reflected in the balance sheet was as follows

At 31 March 2012	Financial instruments - Assets	Financial instruments - Liabilities	Unrealised capital gains/ (losses) taken to equity
Interest rate hedges(1)	–	**3,623**	**(3,557)**
Raw material hedges(1)	–	**4**	**(4)**
Foreign exchange hedges	**5,003**	**4,018**	**116**
• *fair value hedges*	*3,270*	*3,006*	–
• *cash flow hedges*	*184*	*78*	*116*
• *not eligible for hedge accounting*	*1,549*	*934*	–
TOTAL	**5,003**	**7,645**	**(3,445)**

(1) Cash flow hedges.

At 31 March 2011	Financial instruments - Assets	Financial instruments - Liabilities	Unrealised capital gains/ (losses) taken to equity
Interest rate hedges	**1,135**	**1,603**	**(635)**
Raw material hedges	**–**	**25**	**(25)**
Foreign exchange hedges	**6,484**	**6,424**	**278**
• *fair value hedges*	*4,776*	*4,615*	*–*
• *cash flow hedges*	*352*	*102*	*278*
• *not eligible for hedge accounting*	*1,356*	*1,707*	*–*
TOTAL	**7,619**	**8,052**	**(382)**

- Movement in equity reserve (excl. deferred tax)

	Amount 1 April 2011	Movement in the year	Amounts recycled to income statement	Amount 31 March 2012
Interest rate hedges	(635)	(2,373)	(549)	(3,557)
Foreign exchange hedges	278	(152)	(10)	116
Raw material hedges	(25)	21	–	(4)
TOTAL	**(382)**	**(2,504)**	**(559)**	**(3,445)**

- Horizon for release of amounts recorded in equity at 31 March 2012

The amount recorded in equity, in respect of exchange rate derivatives (€116 thousand), will be recycled to the income statement in the year ending 31 March 2013.

The amount recorded in equity, in respect of interest rate derivatives €(3,557 thousand), will be released to the income statement between 31 March 2012 and 31 March 2017 according to the maturity of the flows hedged.

The amount taken to equity in relation to raw materials €(4 thousand), will be transferred to the income statement for the year to 31 March 2013.

14.5. Credit risk

Owing to its commercial activities, the Faiveley Transport Group is exposed to credit risk, in particular the risk of default on the part of its customers.

The Group only enters into commercial relationships with third parties whose financial position is known to be healthy. The Group's policy is to verify the financial health of those customers wishing to obtain credit.

In the case of derivative instruments and transactions that generate cash when they are unwound, the counterparties are limited to financial institutions that finance the Group.
In addition, the Faiveley Transport Group makes use of factoring arrangements in France, Germany, Spain and the UK. Factoring enables the Group to sell, without recourse, part of its receivables to the factoring company and to banks. This selling without recourse has enabled the Group to improve trade receivables recovery and to transfer the risk of default or bankruptcy on the part of customers or other debtors to the factor.

At 31 March 2012, receivables sold without recourse totalled €93 million, and the amount of receivables sold and not guaranteed was €1 million.

As regards the risk associated with financial assets, the Group's maximum exposure is equal to their carrying value.

14.6. Liquidity risk

Prudent liquidity risk management requires the Group to retain a sufficient level of cash and securities that can be traded in a market, to have adequate financial resources due to the implementation of appropriate credit facilities and to be in a position to unwind positions in the market. Due to the dynamism of the Group's activities, the Treasury department aims to maintain financial flexibility by retaining open but unused credit lines.

During the first half of the year, the Group amended the agreement governing the syndicated credit established in December 2008 to extend loan maturity by 2.5 years, i.e. until 23 June 2016 instead of 23 December 2013 (see above Note B.1 Significant events).

During the second half of the year, the Group set up two medium-term credit facilities totalling €35 million and a bridge loan of €30 million. These fundings, supplemented by a syndicated revolving facility of €49 million, were used to pre-finance the acquisition of US company Graham-White Manufacturing Co. last February. The final funding package is to be partly financed in the US via a private placement of USD 75 million. At 31 March 2012, two conditions precedent had not been met; both were lifted on 12 April, which allowed for the repayment of the bridging loan and a significant portion of the medium-term facilities.

At 31 March 2012, the Group complied with all financial conditions required by all credit agreements.

The Group estimates that the cash flows generated by its operating activities, cash and funds available via existing credit lines will be sufficient to cover the expenditure and investment necessary for its operations, to service its debt and to pay dividends. Conversely, the Group may have to borrow to finance potential acquisitions.

a) Available cash and cash equivalents

	31 March 2012	31 March 2011
Available credit lines (a)	56,754	83,564
Parent company cash (b)	27,100	37,211
Subsidiaries cash and cash equivalents (c)	182,129	160,271
AVAILABLE CASH AND CASH EQUIVALENTS (1) = (A+B+C)	**265,983**	**281,046**
Borrowings due in less than one year (d)	77,174	53,441
Available credit lines maturing in less than one year and bank overdrafts (e)	110,196	88,995
NET CASH AND CASH EQUIVALENTS AVAILABLE OVER THE NEXT YEAR (1-D-E)	**78,613**	**138,610**

Cash and cash equivalents include unused factoring cash of €49.2 million (net of non-guaranteed receivables factored).

The decline in available cash and cash equivalents was primarily due to the acquisition of Graham-White Manufacturing Co.

Financial debt of less than one year is disclosed in paragraph 13.1 (excluding bank overdraft, fair value of derivatives and invoices factored and not guaranteed).

Available credit lines represent credit lines granted by the banks and available immediately to the subsidiaries or the parent company. At 31 March 2012, €2.4 million was used in respect of a bank overdraft.

b) Maturity dates of financial liabilities at 31 March 2012

At 31 March 2012	Carrying value	Under 1 year	1 to 5 years	Over 5 years	Non-financial liabilities

15. CURRENT LIABILITIES

	Total 31 March 2012	Total 31 March 2011
Trade payables	162,987	152,248
Tax and social security liabilities	61,271	59,893
Accrued credit notes	843	922
Deferred income	594	940
Accrued expenses	12,531	13,105
Due to suppliers of non-current assets	384	166
Dividends payable	55	55
Other operating liabilities	6,779	10,031
TOTAL	**245,444**	**237,360**

At 31 March 2012, "Trade payables" included €17.7 million of work in progress creditors, compared to €13 million at 31 March 2011.

16. FACTORING

In order to optimise the cost of the Group's bank financing, Faiveley Transport Tours, Faiveley Transport Amiens, Faiveley Transport Gennevilliers, Faiveley Transport NSF, Faiveley Transport Italia, Faiveley Transport Iberica, Faiveley Transport Leipzig, Faiveley Transport Witten and Faiveley Transport Birkenhead sell their trade receivables to a factor.

Factoring resulted in a €93,201 thousand reduction in trade receivables at 31 March 2012. In addition, available and uncalled cash with the factor amounted to €50,205 thousand and is included in cash and cash equivalents.

However, the portion of receivables sold and not guaranteed was recorded as financial debt under "current borrowings and financial liabilities" for an amount of €1,023 thousand. The risk incurred by the Group in respect of receivables sold and not guaranteed relates to the non-collection of these receivables.

17. SEGMENT REPORTING

At 31 March 2008, Faiveley S.A. only held shares in Faiveley Transport and had no relationship with the operating subsidiaries.

Following the transactions completed on 23 December 2008, Faiveley S.A. decided to proceed with the dissolution of Faiveley Transport without liquidation. At 31 March 2009, the net assets of Faiveley Transport were transferred to Faiveley S.A. (subsequently renamed Faiveley Transport) by a simple merger transaction by means of a complete transfer of its assets and liabilities, therefore eliminating all intermediate companies between the Group's parent company and operating entities.

Due to this, segment reporting as at 31 March 2010 only concerns the railway sector.

17.1. By business segment

– Income Statement

	2011/2012	2010/2011
Continuing operations:

18. SALES

	31 March 2012	31 March 2011
Sales of products associated with contracts	863,885	881,937
Sales of services	36,638	31,935
TOTAL [1]	**900,523**	**913,872**

(1) Of which sales of "Services" related products of €315 million to 31 March 2012 and €299 million to 31 March 2011.

19. COST OF SALES

	31 March 2012	31 March 2011
Direct labour	(76,730)	(69,337)
Raw materials	(377,946)	(378,314)
Fixed costs	(59,053)	(56,217)
Procurement costs	(44,430)	(44,477)
Engineering costs	(59,067)	(53,954)
Other direct costs	(40,482)	(40,532)
Change in projects in progress	19,870	15,659
Net change in project provisions (charge/reversal)	(24,290)	(25,045)
Net change in provisions for losses on completion	(4,594)	(187)
TOTAL COST OF SALES	**(666,722)**	**(652,404)**

20. OTHER INCOME AND EXPENSES FROM RECURRING OPERATIONS

	31 March 2012	31 March 2011
Royalties	1,456	1,603
Writebacks of provisions for other liabilities	891	671
Insurance compensation	47	133
Other operating income	293	82
TOTAL OTHER INCOME	**2,687**	**2,489**
Royalties	(162)	(15)
Doubtful debts	(2,475)	(2,379)
Charges to provisions for other liabilities	(3,335)	(875)
Inventory writedowns	(4,194)	(3,468)
Other expenses	(1,905)	–
TOTAL OTHER EXPENSES	**(12,071)**	**(6,737)**
NET OTHER INCOME AND EXPENSES FROM RECURRING OPERATIONS	**(9,384)**	**(4,248)**

The deterioration in this item during the financial year was primarily due to the increase in provisions unrelated to contracts, the reclassification to this heading of profit-sharing costs and the decline in other operating income.

21. RESTRUCTURING COSTS AND GAINS AND LOSSES ON DISPOSAL OF PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

• Restructuring costs

Restructuring costs for the period totalled €1.2 million, compared to €2.6 million in the previous financial year. During the financial year 2011/2012, these restructuring costs primarily related to the reorganisation of Faiveley Transport Italia.

• Disposal of property, plant and equipment and intangible assets

	31 March 2012	31 March 2011
Sales price of assets sold	189	155
Carrying value of assets sold	(393)	(630)
TOTAL	**(204)**	**(475)**

22. NET FINANCE INCOME/(COST)

	31 March 2012	31 March 2011
Gross cost of financial debt	(12,968)	(12,008)
Income from cash and cash equivalents	2,268	1,230
NET COST OF FINANCIAL DEBT	**(10,700)**	**(10,778)**
Financial instrument income	4,414	3,440
Income linked to exchange differences	9,552	20,750
Proceeds from sale of marketable securities	–	94
Reversal of financial provisions	153	314
Income from vendor loan	96	410
Dividends received	11	7
Other	103	379
OTHER FINANCE INCOME	**14,330**	**25,395**
Financial instrument charges	(3,180)	(4,926)
Charges linked to exchange differences	(12,778)	(19,589)
Interest charges on retirement commitments	(1,046)	(1,567)
Charges to financial provisions	(3)	(616)
Charges on bank guarantees	(725)	(766)
Reversal of discounting the value of put options held by minority shareholders	(665)	–
Other	(419)	(576)
OTHER FINANCE COSTS	**(18,815)**	**(28,041)**
NET FINANCE COST	**(15,185)**	**(13,425)**

The increase in the net finance cost for the year was due to:
- the net cost of financial debt for the year, i.e. €(10.7) million compared to €(10.8) million in the previous year;
- a slightly unfavourable net realised exchange loss, offset by exchange gains, for €(0.3) million;
- the increase in value of derivatives, decreased by unrealised exchange losses, resulting in a net impact of €(1.7) million;
- other financial income and expense items, comprising bank guarantees, interest on pension commitments, the effect of the reversal of discounting the value of put options held by minority shareholders and other financial income and expenses, resulting in a net impact of €(2.5) million.

23. INCOME TAX

23.1. Analysis by type

	31 March 2012	31 March 2011
Current tax - continuing operations	29,761	31,159
Deferred tax - continuing operations	(2,849)	937
TOTAL INCOME TAX - CONTINUING OPERATIONS	**26,912**	**32,096**
Tax on discontinued operations	–	–
TOTAL TAX	**26,912**	**32,096**

For the year ended 31 March 2012, the effective tax rate was 34.5% (compared with 28.3% for the year ended 31 March 2011) and the income tax rate paid was 38.1% (compared with 27.5% for the year ended 31 March 2011). .

23.2. Effective tax rate

	31 March 2012	31 March 2011
Pre-tax profit from continuing operations	**78,087**	**113,241**
Pre-tax profit from operations sold or held for sale	–	–
Statutory tax rate of the parent company	34.43%	33.33%
THEORETICAL TAX CREDIT / CHARGE	**(26,885)**	**(37,743)**
Impact of:		
• permanent differences between profits for accounting purposes and taxable profits	(1)	708
• differences between the tax rates applicable to the parent company and to the subsidiaries	1,298	6,158
• impact of other taxes (CVAE in France and IRAP in Italy)	(3,272)	(3,082)
• the liability method (changes in tax rates)	(197)	237
• tax saving achieved through offset of tax losses carried forward	–	757
• recognition of future savings on tax losses and prior temporary differences (FT Brasil and FT USA)	5,428	–
• change in deferred tax assets in respect of tax losses carried forward not recognised for the financial year	(1,614)	(59)
• change in deferred tax assets not recognised	(1,242)	(132)
• tax credits	113	189
• tax adjustments in respect of earlier periods	(548)	(502)
• other differences	8	1,373
TAX CHARGE	**(26,912)**	**(32,096)**
Effective tax rate	**34.5%**	**28.3%**

At 31 March 2012, income tax was affected by the reclassification of CVAE during the 2010/2011 financial year (see Note C-6.4 above). The impact on the financial statements for the year was an income tax charge of €1,962 thousand and a net deferred tax asset of €140 thousand.

23.3. Breakdown of tax losses carried forward (tax bases) by expiry date

Year ended	31 March 2012	31 March 2011
Losses expiring within 4 years	7,109	521
Losses expiring in 5 years and over	7,245	5,524
Losses that may be carried forward indefinitely	26,916	28,375
TOTAL	**41,270**	**34,420**
Tax losses not recognised as deferred tax assets	*24,767*	*28,370*
Tax losses recognised as deferred tax assets	*16,503*	*6,050*
Limits on the use of tax losses recognised as deferred tax assets:		
Losses expiring within 4 years	*5,743*	*520*
Losses expiring in 5 years and over	*438*	*5,524*
Losses that may be carried forward indefinitely	*10,322*	*6*

Retirement and other post-employment benefits	5,886	6,074
Charges associated with share-based payments	–	141
TOTAL PAYROLL COSTS	**236,174**	**220,113**
Managers	953	976
Supervisors and employees	2,414	2,129
Operatives	2,102	2,009
TOTAL WORKFORCE	**5,469**	**5,114**

26. POST-BALANCE SHEET EVENTS

On 12 April 2012, Faiveley Transport carried out a USD 75 million bond issue through a private placement made up of two tranches:

- USD 30 million with a 10-year final maturity, redeemable between 2017 and 2022;
- USD 45 million of bullet loan with a 10-year maturity.

This private placement, which bears an average fixed rate of 4.91%, has been subscribed by two US-based institutional investors. It allowed Faiveley Transport to secure long-term USD funding requirements, particularly those related to the acquisition of Graham-White Manufacturing Co. finalised last February.

27. RELATED-PARTY TRANSACTIONS

The aim of this note is to present the material transactions entered into between the Group and its related parties as defined by IAS 24.

The parties related to the Faiveley Transport Group are the consolidated companies (including those companies that are proportionally consolidated and those consolidated using the equity method), the entities and individuals that control Faiveley Transport and the Group's senior management.

Transactions entered into between the Faiveley Transport Group and its related parties are at arm's length terms.

27.1. Transactions with related companies

A list of consolidated companies is provided in Note G.

Transactions carried out and balances outstanding with fully consolidated companies at the balance sheet date are fully eliminated on consolidation.

Only the following are included in the notes below:

- data relating to such intra-Group transactions, when they involve companies over which the Group exercises joint control (proportionally consolidated) and those over which the Group has significant influence (accounted for using the equity method) concerning the portion not eliminated on consolidation;
- material transactions with other Group companies.

a) Transactions with consolidated companies

- With joint ventures

Joint ventures are proportionally consolidated companies:

- Qingdao Faiveley Sri Rail Brake Co. Ltd.: 50/50 joint venture formed in 2006 to enable the Group to penetrate the Chinese brake market.
- Datong Faiveley Couplers System Co. Ltd.: 50/50 joint venture formed in 2007 with Datong Yida Foundry Co. Ltd, with the aim of manufacturing and selling couplers.
- ShiJiaZhuang JiaXiang Precision Machinery Co. Ltd.: on 20 December 2007, the Group acquired 50% of the shares of this Chinese company which specialises in the development and production of compressors for the railway market.

Transactions with joint ventures not eliminated on consolidation:
The consolidated financial statements include transactions carried out by the Group with its joint ventures as part of its normal business activities.

These transactions are normally carried out at arm's length terms.

- With François Faiveley Participations

Contract of assistance
Under the terms of a contract of assistance, Faiveley Transport recognised the following amounts in its expenses and income for the financial year, corresponding to the rebilling of rent and the provision of services.

€	Faiveley Transport expenses	Faiveley Transport income
Contract of assistance, provision of services	365,000	1,020
Re-billing of rent and utility expenses	–	2,150

Fraction of financial investments, receivables, debts, expenses and income pertaining to these related companies:

€ thousands	2011/2012	2010/2011
Trade receivables	1	1
Borrowings and various financial liabilities	(1,938)	(1,908)
Trade payables	–	–
Rebilling of rents	4	5
Provision of services	(365)	(365)
Financial income	–	–
Financial costs	(30)	(24)

27.2. Senior management and non-executive officers' remuneration

Senior management and non-executive officers comprise mainly the members of the Management Board, the Supervisory Board and the Executive Committee.

The Remuneration Committee determines the remuneration to be allocated to executive officers; it is responsible for assessing and determining the variable portion of the remuneration of the members of the Management Board, which is based on performance targets and the financial statements audited by the Statutory Auditors.

The following table provides details, in aggregate and for each category, of the components of senior management's remuneration:

€	2011/2012	2010/2011
Short-term benefits(1)	6,228,772	6,591,515
Termination benefits(4)	–	646,330
Post-employment benefits(2)	29,781	(74,713)
Share-based compensation(3)	–	–
Other long-term benefits	(291)	723
Directors' fees	138,400	138,800
TOTAL	**6,396,662**	**7,302,655**

(1) This category comprises fixed and variable remuneration (including employers' costs), profit sharing and incentive payments, supplementary contributions and benefits in kind paid during the year.
(2) Change in retirement provisions.
(3) Expense recognised in the income statement.
(4) At 31 March 2011, termination benefits concerned Etienne Haumont, who resigned from his position as a member of the Management Board on 1 September 2010 and from his duties as Chief Financial Officer on 24 September 2010.

27.3. Agreements entered into with senior management

– With Thierry Barel

Following the appointment of Thierry Barel as Chairman of the Management Board and Chief Executive Officer on 1 April 2011, the terms and conditions governing the termination of his duties have been defined. Thierry Barel will thus be entitled to compensation based on performance criteria, not exceeding eighteen months of total gross remuneration, in the event of his dismissal by the Supervisory Board.

– With Robert Joyeux

- Memorandum of understanding with managers
As part of the transactions relating to the reorganisation of its capital structure, Faiveley Transport concluded a memorandum of understanding and an amendment to this MOU on 16 October 2008 and 17 November 2008, respectively, with the managers and their spouses who were partners in Faiveley Management SAS.

Within the framework of the MOU of 16 October 2008, Robert Joyeux received 140,610 Faiveley Transport shares in exchange for the 164,430 Faiveley Management shares that he transferred to Faiveley transport. Robert Joyeux also committed to retain all his Faiveley Transport shares for a period of two years starting on 23 December 2008 and two thirds of his shares for a period of three years starting on 23 December 2008. This last clause was not applicable during the financial year. Furthermore, for a period of six years starting on 23 December 2008, any disposal of a block of more than 10,000 Faiveley Transport shares is subject to a Faiveley Transport pre-emption right.

- Amendment to the consulting and support contract of 22 April 2011
On 27 March 2012, an amendment to extend the consulting assignment provided by Robert Joyeux to the General Management of the Company was submitted for approval to the Supervisory Board. The Supervisory Board authorised the Chairman of the Management Board to sign this amendment.

– With Didier Alix

On 22 July 2011, an amendment to the credit agreement of 22 December 2008, concluded with a pool of nine banks, was presented to and authorised by the Supervisory Board.

One of the banks involved in the signing of this amendment is Société Générale. Didier Alix, member of the Company's Supervisory Board, acts as an advisor to the Chairman of this bank.

28. DIVIDENDS PAID AND PROPOSED

On 19 September 2011, a dividend of €1.20 per share was paid in respect of 13,948,730 shares, i.e. a total dividend of €16,738,476 for the 2010/2011 financial year.

The difference between the number of shares in respect of which dividends were paid and the total shares making up the share capital, i.e. 455,981 shares, corresponds to the treasury shares held by Faiveley Transport at the time of the distribution of the dividend.

	Number of shares	Treasury shares	Number of shares to which dividends have been paid	Dividends paid
Ordinary shares	6,728,594	455,981	6,272,613	7,527,136
Shares with double voting rights	7,676,117	–	7,676,117	9,211,340
	14,404,711	**455,981**	**13,948,730**	**16,738,476(1)**

(1) Including €7,578,458 to Financière Faiveley and €1,391,146 to François Faiveley Participation (F.F.P.).

In respect of the 2011/2012 financial year, the General Meeting will be asked to approve the payment of a dividend to shareholders of €12,422,029.20, being €0.85 per share. This distribution will be taken from the account "Retained Earnings". It will be payable with effect from 20 September 2012. It was not recognised as a liability at 31 March 2012.

F. Off-balance sheet commitments (€ thousands)

1. LEASES

• Operating leases

The operating leases entered into by the Faiveley Transport Group relate mainly to buildings and furniture.

The income and expenses recognised in respect of operating leases over the last two financial years break down as follows:

	2011/2012	2010/2011
Operating lease expenses	(10,575)	(9,182)
Sub-letting income	484	455
TOTAL	**(10,091)**	**(8,727)**

The future minimum payments to be made in respect of operating leases which are non-cancellable and had not expired as at 31 March 2012 are as follows:

	Under 1 year	1 to 5 years	Over 5 years
Total future rents	7,921	24,795	21,529

2. OTHER COMMITMENTS GIVEN

	2011/2012	2010/2011
Deposits, securities and bank guarantees given to customers	226,377	217,724
Guarantees and securities given by the parent company to customers	403,046	308,065
Borrowings guaranteed by pledges:		
• Mortgages of buildings	7,685	8,149
• Share pledge *	–	289,317
• Trade receivables pledged	–	1,114
• Equipment pledged	–	–

* Pledge of equity investments granted as guarantee for the bank loans; this was raised as part of the renegotiation of the syndicated facility in July 2011.

The off-balance sheet commitments above entitled "guarantees, securities and bank guarantees" is related to guarantees or securities provided to the banks essentially in favour of customers with whom commercial contracts have been signed. These guarantees are generally issued for defined periods and for defined amounts. These are principally guarantees for the repayment of deposits and guarantees for the satisfactory completion of contracts. Bank counter-guarantees may be issued for the benefit of banks supplying credit lines, and guarantees may also be issued for the benefit of certain subsidiaries of the Group.

The off-balance sheet commitments above entitled "guarantees and securities given by the parent company" are guarantees agreed by the parent company Faiveley Transport in favour of customers who have signed commercial contracts with subsidiaries of the Group. As for bank guarantees, these are issued for defined periods and for defined amounts and essentially relate to guarantees for the repayment of deposits and guarantees for the satisfactory completion of contracts.

3. COMMITMENTS RECEIVED

Other guarantees from suppliers: €2,297 thousand.

G. Consolidation scope and methods

1. LISTING OF CONSOLIDATED COMPANIES AND CONSOLIDATION METHODS

Faiveley Transport is the Group's holding company.

The following companies, in which Faiveley Transport directly or indirectly controls more than 50% of the share capital, are fully consolidated.

STATUTORY AUDITORS' **REPORT**

++++++++

On the consolidated financial statements

For the year ended 31 March 2012

This is a free translation into English of the statutory auditors' report issued in French and is provided solely for the convenience of English speaking users. The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. This information is presented below the opinion on the consolidated financial statements and includes an explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the consolidated financial statements taken as a whole and not to provide separate assurance on individual account captions or on information taken outside of the consolidated financial statements.
This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France

To the Shareholders ,

In compliance with the assignment entrusted to us by the Annual General Meeting, we hereby report to you, for the year ended 31 March 2012, on:

- the audit of the accompanying consolidated financial statements of Faiveley Transport SA;
- the justification of our assessments;
- the specific verification required by law.

These consolidated financial statements have been approved by the Management Board. Our role is to express an opinion on these consolidated financial statements based on our audit.

I. OPINION ON THE CONSOLIDATED FINANCIAL STATEMENTS

We conducted our audit in accordance with professional standards applicable in France; those standards require that we plan and perform the audit to obtain reasonable assurance regarding whether the consolidated financial statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence regarding the amounts and disclosures in the consolidated financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made, as well as the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the consolidated financial statements give a true and fair view of the assets and liabilities and of the financial position of the Group as at 31 March 2012 and of the results of its operations for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

II. JUSTIFICATION OF OUR ASSESSMENTS

In accordance with the requirements of Article L. 823-9 of the French Commercial Code (*Code de Commerce*) relating to the justification of our assessments, we bring to your attention the following matters:

- At the year-end, the Group performs impairment testing on goodwill and intangible assets with indefinite lives and assesses whether there is an indication of impairment of non-current assets, in accordance with the terms and conditions described in Note E-1 to the financial statements. We have reviewed the methods for implementing this impairment testing, the cash flow forecasts and assumptions used by the management, as well as estimates resulting from the latter. We have verified that Note E-1 provides appropriate disclosure.
- The Group recognises income generated on contracts using the percentage of completion method in accordance with the terms and conditions described in Note C-6-1 to the financial statements. These results are determined based on costs and revenue associated with the contracts, as estimated by executive management. Based on the information provided to us, our work consisted in assessing the financial information and the assumptions on which these estimates have been based, in reviewing the calculations performed by the Company, in comparing estimates of revenue on completion from previous periods with actual results, and in examining the procedures used by executive management to approve these estimates.
- The Group records provisions to cover miscellaneous liabilities and charges as described in Note C-15-2. Our work consisted in examining the financial information and the assumptions on which theses estimates have been based, in reviewing the calculations performed by the Company, in comparing accounting estimates from previous periods with actual results and in examining the procedures used by executive management to approve these estimates. On this basis, we assessed the reasonableness of estimates made.

These assessments were made as part of our audit of the consolidated financial statements taken as a whole, and therefore contributed to the opinion we have formed, which is expressed in the first part of this report.

III. SPECIFIC VERIFICATION

As required by law, we also verified in accordance with professional standards applicable in France the information presented in the Group's management report.

We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

Neuilly-sur-Seine and Dijon, 16 July 2012

IV. NOTES TO THE PARENT COMPANY FINANCIAL STATEMENTS

Notes to the parent company financial statements at 31 March 2012. Total assets on this date amounted to €1,446,061 thousand, and the income statement reflected a net loss of €10,999 thousand. The financial period was of 12 months and covered the period from 1 April 2011 to 31 March 2012.

A. Significant events

CHANGES IN GROUP GOVERNANCE

On 1 April 2011, following Robert Joyeux's resignation from his duties as Chief Executive Officer and Chairman of the Management Board of Faiveley Transport on 31 March 2011, Thierry Barel, previously Deputy Chief Executive Officer, was appointed Chief Executive Officer and Chairman of the Management Board. On the same day, Guillaume Bouhours was appointed as a member of the Management Board.

RELOCATION OF HEAD OFFICE

On 15 July 2011, Faiveley Transport relocated its head office to the following address:
Immeuble le Delage, Hall Parc, Bâtiment 6A, 3 rue du 19 mars 1962
92230 - Gennevilliers

RENEGOTIATION OF THE SYNDICATED CREDIT FACILITY

On 27 July 2011, Faiveley Transport signed an amendment to the syndicated credit facility set up in December 2008. This amendment was granted unanimously by the nine contributing banks, which thus confirmed their confidence in the Group's credit rating.

The total amount of funding remained unchanged, including an amortising term loan of €343 million (balance at the end of June 2011) and a revolving credit facility of €49 million.

The main amendments included:

- a 2.5-year extension of the loan maturity to 23 June 2016 instead of 23 December 2013;
- a more favourable amortisation profile, with mandatory annual instalments of €35 million, compared to €49 million previously;
- new covenants providing additional flexibility, with a leverage ratio (Net Debt/EBITDA) not exceeding 2.5x and a gearing ratio (Net Debt/Equity) not exceeding 150%;
- the option of using the revolving credit facility for merger and acquisition transactions;
- the release of pledging on shares of operating subsidiaries.

This refinancing transaction, carried out at favourable financial conditions, provides the Group with increased financial flexibility for the next five years and with the necessary resources to continue to expand, through both organic growth and acquisitions.

During the second half of the year, the Group put several financing facilities into place:

- a €20 million revolving facility, maturing on 18 November 2016, for the Group's general requirements or potential acquisitions;
- a €15 million revolving facility maturing on 23 June 2016, for the Group's general requirements or potential acquisitions, to be repaid in annual instalments of €1.5 million from 23 December 2012;
- a €30 million bridge loan to finance the acquisition of Graham-White Manufacturing Co., maturing on 14 January 2013 unless the acquisition is refinanced prior to that date. Since refinancing took place on 12 April 2012 (see below Note D1), this loan was repaid on 13 April 2012.

ACQUISITION OF GRAHAM-WHITE MANUFACTURING CO.

On 3 February 2012, Faiveley Transport, through its subsidiary Faiveley Transport USA, successfully completed the acquisition of 100% of Graham-White Manufacturing Co., a leading US designer and manufacturer of compressed air drying technology and brake components for locomotives and rail transit markets. Graham-White Manufacturing Co.'s annual sales reached more than USD 70 million in 2011, of which 90% was generated in the USA. This company employs 300 people and operates six facilities across the United States, with a central manufacturing site located in Salem, Virginia.

CHANGE IN THE SHARE CAPITAL OF THE COMPANY

As part of the acquisition of US company Graham-White Manufacturing Co., finalised on 3 February 2012, 209,441 new Faiveley Transport shares, representing 1.45% of the share capital of the Company were issued to former Graham-White Manufacturing Co. shareholders.

Therefore, Faiveley Transport now has a share capital of €14,614,152.

TAX AUDIT

The tax audit initiated in April 2011 was completed in December. Tax adjustments were only minor.

SHARE OPTION PLAN

The Combined General Meeting of 14 September 2011 delegated the Management Board powers for the allocation of ordinary shares of the Company free of charge, either new or already issued, within the limit of 1% of the share capital of the Company on the day of the said General Meeting.

At its meeting held on 4 January 2012, the Management Board decided to implement this delegation and to allocate free shares to a number of executives who already owned shares in the Company in a personal capacity.

At its meeting held on 5 March 2012, the Management Board set the final list of beneficiaries and the number of free shares to be granted. A total of 79,224 shares are thus to be granted to 151 beneficiaries. The allocation of the shares will be final at the end of a two-year vesting period, or four years for non-French residents, beginning on 5 March 2012.

B. Accounting rules and methods

1. APPLICATION OF ACCOUNTING RULES AND METHODS

The financial statements at 31 March 2012 have been prepared in accordance with accounting rules applicable in France:

- the law of 30 April 1983 and its application decree of 29 November 1983;
- the French General Accounting Plan 1999 as described by regulation 1999-03 of the Comité de la Réglementation Comptable and subsequent amendments.

The financial statements and the analyses for the year ending 31 March 2012 have been prepared and presented in accordance with accounting rules and in compliance with the principles of:

- prudence;
- independence of financial years;
- going concern;
- consistency of methods.

The historic cost method was used to determine accounting values.

2. CHANGE OF METHODS DURING THE YEAR

No changes of methods have been introduced by the Company during the year.

3. MEASUREMENT METHOD

The measurement methods described below have been used for the various items included in financial statements.

The financial statements have been prepared taking account of the following provisions applicable to financial years beginning on or after 1 January 2005:

- CRC regulation n°2002-10 on asset amortisation and impairment;
- CRC regulation n°2004-06 on the definition, recognition and measurement of assets.

3.1. Non-current assets

Non-current assets are recognised at their acquisition cost or at their transfer value in the case of those related to the restructuring operations of previous financial years. In order to recognise an unfavourable technical variance, the latter must be assessed at each year-end. In case there is an indication of impairment, a writedown charge must be recognised in the financial statements.

3.2. Amortisation and depreciation of non-current assets

Depreciation and amortisation of non-current assets acquired before 1 April 1993 are measured either on a declining-balance or on a straight-line basis, in accordance with tax regulations. Subsequent acquisitions are amortised or depreciated solely on a straight-line basis, in order to more closely match economic reality. Accelerated tax depreciation is recognised as far as permitted by tax regulations.

The principal periods of amortisation and depreciation are as follows:

• Intangible assets	
– Software	1 to 10 years
– Patents	9 to 15 years
• Property, plant and equipment	
– Buildings	15 to 20 years
– Misc. equipment and fittings	10 years
– Machinery and industrial equipment	3 to 8 years
– Vehicles	4 years
– Office equipment	3 to 10 years
– IT equipment	3 to 5 years
– Furniture	5 to 10 years

3.3. Equity investments

Equity investments are measured at their purchase and/or contribution value. At the end of the financial year, a provision for impairment is established when the realisable value is lower than its acquisition value. The realisable value is the value in use for the Group, measured on the basis of future discounted cash flows.

3.4. Receivables from equity investments

Receivables from equity investments correspond to loans provided to Group companies, as well as current accounts receivable from subsidiaries (excluding current tax receivables resulting from the Group’s tax consolidation). A provision is established whenever there is a risk of non-recovery.

3.5. Accounts receivable and payable

Accounts receivable and payable are recorded at nominal value. Provisions have been made for bad and doubtful debts according to the likelihood of non-recovery, as estimated at the end of the financial year. Old accounts for which non-recovery has become a certainty are written off as an expense and the corresponding provisions reversed through the income statement.

3.6. Marketable securities

Marketable securities are recognised at their fair value on the basis of their quoted price or at their liquidation value at the year-end. Marketable securities are subject to impairment when their liquidation value at the financial year-end is lower than their acquisition value.

Treasury shares are included in this caption in accordance with CRC Regulation 2008-5 on treasury shares.

The value of treasury shares unallocated to the various share purchase and subscription plans and free share allocation plans is written down based on the average decline in the share price noted over the last month of the financial year.

3.7. Share capital

All capital increases are registered at the nominal value of the shares issued. Should the issue price be greater than the nominal value, the difference is recorded in the share premium reserve.

3.8. Provisions for liabilities and charges

Provisions represent liabilities whose due date or amount has not been precisely determined. At 31 March 2012, the provisions amounted to €1,884 thousand and included:

- provisions for litigations of €293 thousand;

- unrealised exchange losses of €69 thousand (discounted based on foreign-denominated liabilities and trade receivables and valued at the closing rate);
- seniority awards of €7 thousand;
- provisions for stock option and free share allocation plans, of €1,516 thousand.

3.9. Share purchase option plan of 27 September 2005

When beneficiaries of the share purchase option plan exercise their rights, a capital loss will be recognised in Faiveley Transport's financial statements. This loss has been estimated at €599 thousand at 31 March 2009 and spread over 7 years (the duration of the plan). At 31 March 2012, this provision was revised to €50 thousand based on options exercised and outstanding. During the 2011/2012 financial year, 40,506 options were exercised by their beneficiaries. On this occasion, an exceptional expense of €76 thousand and a €43 thousand provision reversal were recognised.

3.10. Share subscription option plan of 22 September 2009

When shares are subscribed to, a capital loss will be recognised in Faiveley Transport's financial statements in the case the purchase price of the shares allocated to this plan exceeds the subscription price. This loss has been estimated at €472 thousand at 31 March 2012, weighted by an exercise probability of 90% and spread pro rata according to the number of days which have passed, out of the 8 years of duration of the plan. At 31 March 2012, a provision of €134 thousand was recognised under personnel costs.

3.11. Free performance-based share allocation plan authorised by the General Meeting of 13 September 2010

When shares are allocated, a capital loss will be recognised in Faiveley Transport's financial statements for the purchase price of the shares allocated to this plan. This loss has been estimated at €3,753 thousand at 31 March 2012, weighted by a vesting probability of 51% and spread pro rata according to the number of days which have passed out of the 2-year vesting period of the plan. At 31 March 2012, a provision of €1,257 thousand was recognised under personnel costs.

3.12. Free share allocation plan authorised by the General Meeting of 14 September 2011

When shares are allocated, a capital loss will be recognised in Faiveley Transport's financial statements for the purchase price of the shares allocated to this plan. This loss has been estimated at €4,772 thousand at 31 March 2012, weighted by a vesting probability of 55% and spread pro rata according to the number of days which have passed out of the 2- or 4-year vesting periods of the plan. At 31 March 2012, a provision of €75 thousand was recognised under personnel costs.

3.13. Loans and borrowings

Loans and borrowings are valued at their nominal value and comprise:
- a loan of €326.6 million provided by the bank pool to finance the reorganisation of Faiveley Transport's shareholding structure;
- credit facilities of €94 million;
- accrued interest on financial debt of €0.2 million;
- bank overdrafts and cash pooling (managed by the Group treasury department) of €286.7 million;
- a loan of €20.3 million from its subsidiary Faiveley Transport Malmö;
- current accounts with Group companies of €510 million;
- the balance on the special reserve for employee profit-sharing of €0.06 million.

3.14. Financial instruments

– Exchange risk

Due to the nature of its operations, Faiveley Transport is exposed to exchange risks arising from its holding company activities (including exchange hedging for the benefit of subsidiaries), from its loan agreements and on inter-company balances.

In 2011/2012, the major currencies concerned are the US Dollar, the Pound Sterling, the Czech Koruna, the Swedish Krona and the Chinese Yuan. The risks are hedged through forward purchases or sales of currencies and tunnel options.

These external hedge transactions aim to protect the Group against unfavourable fluctuations in foreign currencies that could affect the profit on a contract and are subject to an internal counterpart agreement with subsidiaries.

Information on financial derivatives currently in place to hedge against exchange risk on forward purchases or sales are detailed in the notes to the consolidated financial statements (see Note E.16 – Financial instruments and financial risk management).

– Interest rate risk

The main interest rate risk to which the Group is exposed arises as a result of the syndicated debt, excluding the revolving facility. Faiveley Transport concluded a credit agreement with a pool of nine banks for fixed-term borrowings, the balance of which was €299.9 million and USD 35.7 million at 31 March 2012. This credit agreement is based upon variable Euribor and US Dollar Libor interest rates.

To manage its risk, the Treasury Department has implemented a hedging strategy using interest rate swaps and options.

The exposure of interest rates on Euro-denominated syndicated debt is hedged for between 66% and 85% of the total debt bearing a Euro interest rate, depending on fluctuations for the 2012/2013 period. The exposure of interest rates on US Dollar-denominated debt is 94% hedged.

The estimated cost of syndicated debt in 2012/2013, including hedges, is 2.13% for Euro-denominated debt and 3.19% for the US Dollar-denominated debt.

– Foreign exchange transactions

Income and expenses in foreign currencies are recorded at the exchange rate on the transaction date.

Foreign currency-denominated borrowings, receivables and cash are recorded in the balance sheet at the exchange rate on the balance sheet date. Any exchange difference arising from the revaluation of these items at these exchange rates is taken to "translation differences".

The unrealised exchange loss resulting from the determination of an overall foreign exchange position on assets and liabilities held on the balance sheet date is subject to a provision for foreign exchange risk.

3.15. Income statement

Faiveley Transport continues its activities of providing services to the Group as the holding company. Sales of €52.7 million achieved in 2011/2012 represented an increase of €3.8 million compared to €48.9 million reported in the previous year.
A significant portion of Faiveley Transport's costs corresponding to services provided to subsidiaries is rebilled. The operating loss was €1.6 million, unchanged compared to the previous financial year. Fixed costs that are not rebilled to subsidiaries increased; this increase was however offset by growth in royalties for the use of the Faiveley Transport brand.

The net finance expense was €9.9 million, compared to a net expense of €2.2 million in the previous year. In 2011/2012, dividends of €1.3 million were collected, compared to €0.4 million in 2010/2011.

Excluding dividends, the net finance expense declined by €8.7 million during the 2011/2012 financial year. This was due, on the one hand, to an increase of €2.2 million in interest expense, which relates to bank loans, higher drawdowns on credit facilities, interest on current accounts and bank overdrafts, partly offset by interest on loans to subsidiaries. Faiveley Transport also recorded virtually nil net foreign exchange gains during the year, compared to an income of €4.4 million in the previous year, due to the unwinding of SEK and USD hedges. In addition, a €0.6 million provision for writedown of treasury shares was recognised during the year, whilst the reversal of a provision for foreign exchange risks was recognised in the previous year for €1.5 million.

The €0.8 million income tax refund recognised for the year ended 31 March 2012 reflects the tax consolidation gain of €3.9 million achieved during the period, reduced by the tax charge generated by the German subsidiaries, Faiveley Transport Holding GmbH & Co KG and Faiveley Transport Leipzig GmbH & Co KG for €3 million (corporate tax), increased by other tax credit of €0.1 million.

C. Notes to balance sheet and income statement

1. NON-CURRENT ASSETS

• Changes in the period

	Gross at 1 April 2011	Acquisitions[2]	Disposals	Gross at 31 March 2012
Intangible assets[1]	389,917	2,498	–	392,415

Advances and prepayments on non-current assets	–	–	–	–
TOTAL	**401,857**	**4,312**	**(678)**	**405,491**

(1) This caption includes the €384.8 million unfavourable technical variance recognised as part of the transfer of all assets and liabilities of Faiveley Transport and Faiveley Management during the financial year ended 31 March 2009. This technical variance was subject to an impairment test at 31 March 2012, which did not highlight the need for a writedown charge to be recognised in the financial statements.
The remainder of this heading primarily includes IT software development costs.
(2) Including the reclassification of €1.4 million in intangible assets in progress following their commissioning.

• Amortisation, depreciation and writedowns

	At 1 April 2011	Charges	Decreases	At 31 March 2012

TOTAL	**14,404,711**	**209,441**	**–**	**14,614,152**	**1**

– Treasury shares

The Company directly and indirectly holds 2.93% of its share capital.

– Employee participation in the share capital of the Company

FCPE Faiveley Actions holds 15,360 shares (0.11%) in the Company.

– Share purchase option plan of 27 September 2005

On request from Faiveley Transport, Faiveley S.A. (now called Faiveley Transport) implemented a share option plan for the benefit of key Faiveley Transport Group management (excluding the managers who invested in Faiveley Management).

This share option plan, for a maximum of 325,000 Faiveley S.A. shares, was approved by the General Meeting of 27 September 2005. Granted for a period of thirty-eight months, this authorisation lapsed on 27 September 2008.

In order to meet its obligation to transfer these shares to the plan beneficiaries, Faiveley Transport bought back some of its own shares in the market at the end of 2005. At 31 March 2012, the Company held 427,528 of its own shares (including 10,181 shares via its liquidity contract). The options to purchase shares, if exercised, will give rise to the purchase of existing ordinary shares in Faiveley Transport.

- Principle features of the current share purchase option plan

Date of allocation	Number of shares allocated	Subscription price*	Options cancelled	Options exercised	Number of options outstanding	Of which to Executive Committee members
24 November 2005	221,760	26.79	47,040	160,126	14,594	13,440
29 December 2005	6,720	29.75	–	6,720	–	–
22 June 2006	31,360	30.48	4,480	21,719	5,161	–
25 October 2006	6,720	33.77	–	6,720	–	–
15 November 2006	4,480	34.13	–	4,480	–	–
1 December 2006	11,200	34.01	–	7,330	3,870	–
2 April 2007	26,880	42.80	–	11,220	15,660	–
19 February 2008	26,880	32.31	–	20,560	6,320	6,720
29 March 2008	13,440	34.08	4,480	130	8,830	–
16 July 2008	22,600	40.78	–	–	22,600	22,600
TOTAL	**372,040**	**–**	**56,000**	**239,005**	**77,035**	**42,760**

* The exercise price is equal to the average price of the twenty trading days prior to the date of the Management Board deciding on the allocation, less a discount of 5%.

Following the departure of certain option holders since the Management Board implemented the plan and options exercised until that date, options granted at 31 March 2012 related to 77,035 shares and 15 beneficiaries.

The options can be exercised from the second anniversary of their grant date by the Chairman of the Management Board, subject to the presence of the beneficiaries within the Faiveley Transport Group on the day of exercise and their acceptance of the option regulations. To date, 239,005 options have been exercised.

– Share subscription option plan of 22 September 2009

The Combined General Meeting of 22 September 2009 delegated the Management Board powers in relation to:
- granting share subscription and/or purchase options;
- issuing shares or marketable securities giving right to the allocation of new or already issued shares of the Company, with, in the case of the allocation of new shares, the cancellation of the pre-emption right.

At its meeting of 23 November 2009, the Management Board decided to allocate, from that date and up to 23 November 2017, options giving right to subscribe for new shares of the Company, to be issued as part of a capital increase, for a total amount not exceeding €144,000, corresponding to 144,000 new shares of a par value of €1 each. The new shares will be issued at a price of €54.91 each.

- Main features of the current share subscription option plan

Date of allocation	Number of shares allocated	Subscription price	Options cancelled	Options exercised	Number of options outstanding	Of which to Executive Committee members
23 November 2009	144,000	54.91	14,000	–	130,000	95,000
TOTAL	**144,000**	**–**	**14,000**	**–**	**130,000**	**95,000**

– Free performance-based share allocation plan authorised by the General Meeting of 13 September 2010

Faiveley Transport's Combined General Meeting of 13 September 2010 delegated the Management Board powers for the allocation of free performance-based shares, either existing or to be issued, within the limit of 1% of the share capital at 13 September 2010.

At its meetings of 3 December 2010 and 24 February 2011, the Management Board allocated a total of 69,700 existing shares to 43 beneficiaries.

- Main features of the current free share allocation plan

Allocation date	Number of free shares granted	Free shares cancelled	Of which to Executive Committee members	Free shares outstanding
3 December 2010	64,500	5,000	32,500	59,500
24 February 2011	5,200	2,400	–	2,800

– Free share allocation plan authorised by the General Meeting of 14 September 2011

The Combined General Meeting of 14 September 2011 delegated to the Management Board its powers in relation to:
- setting the conditions and where appropriate, setting the allocation criteria for ordinary shares;
- within the legal conditions and limits, setting the dates on which the allocations will proceed;
- determining the identity of beneficiaries, the number of ordinary shares allocated to each of them and the means of allocation of ordinary shares.

This authorisation is valid for thirty-eight months, from this date, and may not exceed 1% of the share capital on 14 September 2011.

At its meeting of 5 March 2012, the Management Board used this authorisation and granted a total of 79,224 free shares to 151 beneficiaries.

- Main features of the current free share allocation plan

Allocation date	Number of free shares granted	Free shares cancelled	Of which to Executive Committee members	Free shares outstanding
5 March 2012	79,224	–	15,200	79,224

5.2. Share premium

The share premium represents the difference between the nominal value of securities and the amount, net of costs, received in cash or kind at the time of the issue. The change for the financial year relates to the capital increase (see section 5 above).

6. REGULATED PROVISIONS AND PROVISIONS FOR LIABILITIES AND CHARGES

	1 April 2011	Charges	Used reversals	Unused reversals	31 March 2012
Accelerated depreciation	–	–	–	–	–
REGULATED PROVISIONS	**–**	**–**	**–**	**–**	**–**
Provisions for liabilities	87	69	(57)	–	99
Provisions for taxes	–	–	–	–	–
Provisions for litigation	770	72	(430)	(150)	262
Provisions for option plans (1)	94	1,464	(42)	–	1,516
Provisions for employee compensation	9	–	(2)	–	7
PROVISIONS FOR LIABILITIES AND CHARGES	**960**	**1,605**	**(531)**	**(150)**	**1,884**

(1) The €1,516 thousand provision for option plans includes €50 thousand relating to the option plan of 27 September 2005, €134 thousand for the subscription option plan of 22 September 2009, €1,257 thousand for the free share allocation plan of 13 September 2010 and €75 thousand for the free share allocation plan of 14 September 2011.

7. LOANS AND BORROWINGS

	Less than 1 year	More than 1 year	31 March 2012	31 March 2011
Loans and borrowings from credit institutions	353,517	354,034	707,551	595,308
Employee profit-sharing	–	65	65	65
Other financial liabilities (1)	10,156	10,156	20,312	27,929
Current trade payables	510,347	–	510,347	436,055
TOTAL	**874,020**	**364,255**	**1,238,275**	**1,059,357**

(1) Other borrowings, at 31 March 2012, correspond to the loan of €20.3 million contracted with its subsidiary Faiveley Transport Malmö.

During the financial year, loans and borrowings from credit institutions increased by €112.2 million. This substantial rise primarily related to drawdowns of €94 million on credit facilities and a €58.6 million increase in bank overdrafts, offset by the repayment of €40.4 million on loans entered into on 23 December 2008.

For all its sources of financing, the Faiveley Transport Group must comply with the following four financial conditions:

- leverage ratio (Consolidated Net Debt/Consolidated EBITDA): must not exceed 2.5. At 31 March 2012, the ratio was 1.77;
- gearing ratio (Consolidated Net Debt /Consolidated Equity): must not exceed 1.50. At 31 March 2012, the ratio was 0.41;
- total bank guarantees must not exceed 22% of the order book. At 31 March 2012, this was 13.4%;
- "Consolidated EBITDA/Cost of Consolidated Net Financial Debt" must not be less than 3.5. At 31 March 2012, the ratio was 11.4.

Other financial liabilities decreased by €7.6 million. This decline was due to the repayment of the Euro-denominated loan granted by the Faiveley Transport Malmö subsidiary.

Current trade payable balances increased by €74 million at 31 March 2012.

8. OTHER LIABILITIES

	Less than 1 year	More than 1 year	31 March 2012	31 March 2011
Trade payables	14,987	–	14,987	13,448
Tax and social security liabilities (1)	7,321	–	7,321	9,172
Tax consolidation	2,124	–	2,124	4,811
Other	718	–	718	2,398
TOTAL	**25,150**	**–**	**25,150**	**29,829**

(1) The tax liability relating to the company Faiveley Transport Holding GmbH & Co KG and Faiveley Transport Leipzig GmbH & Co KG was recorded under tax and social security liabilities for €296 thousand. At 31 March 2011, this liability was €1,415 thousand.

(1) The exceptional income in 2010/2011 was primarily due to the technical dispute with Acela Amtrak, arbitrated in November 2010.

17. INCOME TAX

17.1. Analysis of income tax between the current tax charge, exceptional income and accounting profit

	Before tax	Tax	After tax
Profit/(loss) from ordinary activities	(11,591)	–	(11,591)
Exceptional income	(243)	–	(243)
Effect of tax consolidation	–	835	835
ACCOUNTING PROFIT/(LOSS)	**(11,834)**	**835**	**(10,999)**

17.2. Tax consolidation

Faiveley Transport heads a tax consolidation that comprises Faiveley Transport Tours, Faiveley Transport Amiens, Faiveley Transport Gennevilliers and Faiveley Transport NSF.

Tax savings achieved as part of this tax consolidation are recognised and retained by the parent company. For the year ended 31 March 2012, the tax consolidation generated a tax saving of €3.9 million, offset by the €3 million tax charge of its German subsidiaries (corporate tax).
Without the tax consolidation, the taxable profit of Faiveley Transport alone, which was a loss of €12.8 million, would not have attracted any income tax.

At 31 March 2012, tax losses carried forward were €1.2 million. Since these losses originated prior to the merger between Faiveley S.A. and Faiveley Transport, they may be offset against any of Faiveley Transport's future profits.

17.3. Exceptional tax assessments

Nil.

17.4. Deferred and unrealised tax position

Description	Amount
Taxes payable on:	
Regulated provisions:	–
Provisions for price increases	–
TOTAL INCREASE	**–**
Prepaid tax on:	
Non-deductible temporary timing differences on expenses (deductible in subsequent year):	
• Provision for Directors' fees	150
• Paid holidays	948
• Liability translation adjustment	2,945
• Organic contribution	81
TOTAL DECREASE	**4,124**
NET DEFERRED TAX POSITION	**4,124**

18. TRANSLATION DIFFERENCES

Positive and negative translation differences arise on the translation of trade receivables and payables and on borrowings, loans and foreign currency denominated bank accounts at balance sheet date exchange rates.

Type of translation difference	Unrealised losses (asset)	Provision for exchange of loss	Unrealised gains (liabilities)
Subsidiary loans	–	–	2,818
Subsidiary borrowings	–	–	–
Bank borrowings	–	–	–
Foreign currency-denominated bank accounts	7	7	87
Foreign currency-denominated trade receivables	11	11	39
Foreign currency-denominated trade payables	51	51	1
TOTAL	**69**	**69**	**2,945**

D. Other information

1. POST-BALANCE SHEET EVENTS

On 12 April 2012, Faiveley Transport carried out a USD 75 million bond issue through a private placement made up of two tranches:
- USD 30 million with a 10-year final maturity, redeemable between 2017 and 2022;
- USD 45 million of bullet loan with a 10-year maturity.

This private placement, which bears an average fixed rate of 4.91%, has been subscribed by two US-based institutional investors. It allowed Faiveley Transport to secure long-term USD funding requirements, particularly those related to the acquisition of Graham-White Manufacturing Co. finalised last February.

2. INFORMATION ON NON-TAX DEDUCTIBLE EXPENSES

Non-tax deductible expenses were €26,042 at 31 March 2012.

3. AVERAGE WORKFORCE

The average workforce includes employees allocated to international offices. The decline was due to the transfer of employees of the Beijing office to the new local subsidiary created in April 2011.

	2011/2012	2010/2011
Managers	65	68
Supervisors	2	2
Employees	11	19
TOTAL	**78**	**89**

4. DIRECTORS' REMUNERATION

Supervisory Board members received a total of €138,400 thousand in attendance fees.

5. IDENTITY OF PARENT COMPANY

Faiveley Transport fully consolidates the subsidiaries in which it directly or indirectly holds over 50% of the share capital. Companies, in which Faiveley Transport exercises joint control, whether directly or indirectly, are proportionally consolidated.

6. TRANSACTIONS WITH RELATED COMPANIES AND PARTIES

– With related companies

Share of financial investments, receivables, payables, income and expenses concerning related parties:

Related companies	2011/2012	2010/2011
Equity investments	499,919	417,944
Receivables from associates	156,705	138,218
Trade receivables	47,114	41,942
Other receivables	75	1,310
Loans and other borrowings	530,659	463,983
Trade and other payables	12,057	10,576
Other liabilities	2,124	4,879
Provision of services	52,965	49,273
Operating expenses	23,535	20,069
Financial expenses	4,938	2,718
Financial income	5,967	4,594

– With related parties

No significant transaction and/or potential transactions were concluded at arm's length.

7. OFF-BALANCE SHEET COMMITMENTS

7.1. Commitments given

	2011/2012	2010/2011
Deposits, securities and guarantees given to financial institutions	38,622	42,539
Retirement benefits (1)	500	452
Parent company guarantees	403,046	308,065
Debts guaranteed by pledges:		
Mortgages of buildings	–	–
Share pledge (2)	–	289,317
Equipment pledged	–	–

(1) Retirement assumptions:
The discount rates are determined by reference to the yields on AAA bonds for the equivalent periods to the commitments at the date of valuation.
The assumptions adopted to calculate the retirement commitments are disclosed in the table below:

	2011/2012	2010/2011	2009/2010
Discount rate	3.85%	4.80%	4.60%
Inflation rate	2%	2.00%	2.00%
Average rate of salary increase	3%	3.00%	3.00%
Yield expected on investments	N/A	N/A	N/A

(2) Shares pledged: this was raised as part of the renegotiation of the syndicated facility in July 2011.

7.2. Finance and long term lease commitments

Description	Other non-current assets	Total
Opening value	1,079	1,079
Depreciation	–	–
NET VALUE	**1,079**	**1,079**
Lease payments for the financial year	11	11
TOTAL	**11**	**11**

• 1 year or less	–	–
• 1 to 5 years	–	–
• more than 5 years	–	–
TOTAL	**–**	**–**

Types of leases	Facilities	IT hardware	Motor rental	Total
Lease payments for the financial year	–	432	123	555
TOTAL	**–**	**432**	**123**	**555**
Lease payments due:				
• 1 year or less	48	462	99	609
• 1 to 5 years	2,351	470	72	2,893
• more than 5 years	2,642	–		2,642
TOTAL	**5,041**	**932**	**171**	**6,144**

7.3. Hedging commitments

– Interest rate risk

The main interest rate risk to which the Group is exposed originates from the syndicated debt, excluding the revolving facility.

To manage its interest rate risk, the Treasury Department has implemented a hedging strategy using interest rate swaps and options.

The exposure to interest rates on Euro-denominated borrowings is hedged for between 66% and 85% of the total debt drawn down based on Euro interest rate fluctuations for the 2012/2013 period. The US Dollar-denominated debt is 94%.

The estimated cost of bank debt for 2012/2013, including hedges is 2.13% for the Euro-denominated debt, and 3.19% for the US Dollar-denominated debt.

- Instruments recognised under equity

	Euro borrowings		USD borrowings			
	Nominal value (€ thousands)	Fair value (€ thousands)	Nominal value (USD thousands)	Fair value (USD thousands)	Nominal value (€ thousands)	Fair value (€ thousands)
Swaps	150,000	(2,462)	35,791	(589)	26,798	(441)
Tunnels	42,500	(561)	–	–	–	–
Caps	70,000	(204)	–	–	–	–
TOTAL	**262,500**	**(3,227)**	**35,791**	**(589)**	**26,798**	**(441)**

– Exchange risks

The Group operates in foreign countries and is therefore exposed to exchange risk as a result of various foreign currency exposures.

The principal currencies concerned are the Chinese Yuan, the US Dollar, the Pound Sterling, the Czech Koruna and the Swedish Krona. The management of the exchange risk of commercial contracts is centralised by the Group Treasury Department and comprises two parts: the certain and the uncertain risk.

- Exchange risk management relating to tenders in foreign currencies (uncertain risk):
  The Faiveley Transport Group is required to submit tenders denominated in foreign currencies. The Group's hedging policy is not to use hedge instruments during the offer phase, unless when specifically decided by Management. The aim is to manage the exchange risk through normal commercially available means. If necessary, the Group Treasury Department uses mainly exchange options.
- Exchange risk management relating to commercial contracts (certain risk):
  Commercial contracts in foreign currencies (most often successful tenders) are hedged by the Group Treasury Department from contractual commitment. Instruments used mainly include forward purchases and sales and exchange swaps. Group Treasury may also use options.

The Group's policy is to systematically hedge the full value of future transactions expected in every major currency. The minimum trigger threshold for a foreign exchange hedge is €250 thousand.

Various cash flows are hedged against for a minimum of 80% of the annual budget.
In addition to commercial contracts, all financial positions and management fees are systematically hedged against.

- Forward sales used to hedge business transactions at 31 March 2012

	Nominal value		Fair value
	(€ thousands)	(thousands of foreign currency)	(€ thousands)
Australian Dollar	7,660	9,917	(1)

TOTAL	**212,683**	**–**	**2,356**

– Derivative instruments

The fair value of derivative instruments used to hedge against foreign exchange, interest rate and raw material risks was recognised in the balance sheet as follows:

At 31 March 2012	Financial instruments - Assets	Financial instruments - Liabilities	Unrealised capital gains/ (losses) taken to equity
Interest rate hedges(1)	–	3,623	(3,557)
Raw material hedges(1)	–	4	(4)
Foreign exchange hedges	5,003	4,018	116
• *fair value hedges*	*3,270*	*3,006*	–
• *cash flow hedges*	*184*	*78*	*116*
• *not eligible for hedge accounting*	*1,549*	*934*	–
TOTAL	**5,003**	**7,645**	**(3,445)**

(1) Cash flow hedges

At 31 March 2011	Financial instruments - Assets	Financial instruments - Liabilities	Unrealised capital gains/ (losses) taken to equity
Interest rate hedges(1)	1,135	1,603	(635)
Raw material hedges(1)	–	25	(25)
Foreign exchange hedges	6,484	6,424	278
• *fair value hedges*	*4,776*	*4,615*	–
• *cash flow hedges*	*352*	*102*	*278*
• *not eligible for hedge accounting*	*1,356*	*1,707*	–
TOTAL	**7,619**	**8,052**	**(382)**

(1) Cash flow hedges

7.4. Commitments received

Nil.

7.5. Individual Training Right (ITR)

The employees of Faiveley Transport are entitled to request additional training. A total of 110 hours of training in respect of the ITR was requested by employees during the financial year. At 31 March 2012, a total of 3,255 unused training hours had been accumulated.

7.6. Share purchase option plan of 27 September 2005

On request from Faiveley Transport, Faiveley S.A. implemented a share purchase option plan for the benefit of key Faiveley Transport Group management (excluding the managers who invested in Faiveley Management S.A.S.).

This share option plan, for a maximum of 325,000 Faiveley Transport shares, was approved by the General Meeting on 27 September 2005 and was implemented by the Management Board. The table in Note C.5.1 "Share capital", details the share allocations. At 31 March 2012, 77,035 shares were outstanding.

The options are exercisable as of the second anniversary date of their allocation by the Chairman of the Management Board, provided the beneficiary is still employed by the Faiveley Transport Group on the day of exercise and has accepted the options terms and conditions. The shares are not transferable until the 4th anniversary of the allocation of purchase options. It should be noted that 239,005 share purchase options have been exercised at 31 March 2012.

7.7. Share subscription plan of 22 September 2009

The Combined General Meeting of 22 September 2009 delegated to the Management Board powers in relation to:
- granting share subscription and/or purchase options;
- issuing shares or marketable securities giving right to the allocation of new or already issued shares of the Company, with, in the case of the allocation of new shares, the cancellation of the pre-emption right.

At its meeting of 23 November 2009, the Management Board decided to grant, on this date and up to 23 November 2017, options giving right to subscribe to new shares in the Company, to be issued through a share capital increase not exceeding an overall nominal amount of €144,000, corresponding to 144,000 new shares at a par value of €1 each. The new shares will be issued at a price of €54.91.

7.8. Free performance-based share allocation plan authorised by the General Meeting of 13 September 2010

The Combined General Meeting of 13 September 2010 delegated the Management Board powers to allocate free shares of the Company, either new or already issued. The General Meeting established a minimum vesting period of two years following which the allocation of ordinary shares to beneficiaries will be final, subject to the potential terms and conditions set out by the Management Board, and a retention period of a minimum of two years from the date of final allocation of the shares.

In its meetings held on 3 December 2010 and 24 February 2011, the Management Board decided to allocate a total of 69,700 shares to 43 beneficiaries. At 31 March 2012, 7,400 performance-based shares previously granted have been cancelled.

7.9. Free share allocation plan authorised by the General Meeting of 14 September 2011

The Combined General Meeting of 14 September 2011 delegated the Management Board powers to allocate free shares of the Company, either new or already issued. The General Meeting established a minimum vesting period of two years following which the allocation of ordinary shares to beneficiaries will be final, subject to the potential terms and conditions set out by the Management Board, and a retention period of a minimum of two years from the date of final allocation of the shares.

However, the General Meeting authorised the Management Board, to the extent that the minimum vesting period for some or all of the allocations would be a minimum of four years, not to impose a retention period for the shares in question.

In its meeting held on 5 March 2012, the Management Board decided to implement this authorisation and allocate a total of 79,224 shares to 151 beneficiaries.

8. STATUTORY AUDITORS' FEES

Statutory Auditors' fees are included in Note H of the 2011/2012 consolidated financial statements.

9. LIST OF SUBSIDIARIES AND EQUITY INVESTMENTS (€ THOUSANDS)

STATUTORY AUDITORS' **REPORT**

++++++++

On financial statements

For the year ended 31 March 2012

This is a free translation into English of the statutory auditors' report issued in French and is provided solely for the convenience of English speaking users. The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. This information is presented below in the opinion on the financial statements and includes an explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the financial statements taken as a whole and not to provide separate assurance on individual account captions or on information taken outside of the financial statements.
This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

To the Shareholders,

In compliance with the assignment entrusted to us by the Annual General Meeting, we hereby report to you, for the year ended 31 March 2012, on:
- the audit of the accompanying financial statements of Faiveley Transport;
- the justification of our assessments;
- the specific verifications and information required by law.

These financial statements have been approved by the Management Board. Our role is to express an opinion on these financial statements based on our audit.

I. OPINION ON THE FINANCIAL STATEMENTS

We conducted our audit in accordance with professional standards applicable in France; those standards require that we plan and perform the audit to obtain reasonable assurance regarding whether the financial statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence regarding the amounts and disclosures in the financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made as well as the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

In our opinion, the financial statements provide a true and fair view of the assets and liabilities and of the financial position of the Company as at 31 March 2012 and the results of its operation for the year then ended in accordance with French accounting principles.

II. JUSTIFICATION OF OUR ASSESSMENTS

In accordance with the requirement of Article L. 823-9 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the following matters:

As indicated in the Notes B.3.1 and B.3.3 to the financial statements, an impairment test is performed concerning the technical loss at each year-end and investments are valued at their value in use for the Company at the year-end. Our procedures consisted in assessing the financial information and assumptions on which these estimates are based and reviewing the calculations performed by the Company. On this basis, we assessed the reasonableness of estimates made.

These assessments were made as part of our audit of the financial statements taken as a whole, and therefore contributed to the opinion we formed, which is expressed in the first part of this report.

III. SPECIFIC VERIFICATIONS AND INFORMATION

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by French law.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report of the Management Board and in the documents addressed to shareholders with respect to the financial position and the financial statements.

Concerning the information given in accordance with the requirements of Article L. 225-102-1 of the French Commercial Code relating to remunerations and benefits received by the directors and any other commitments made in their favour, we have verified its consistency with the financial statements, or with the underlying information used to prepare these financial statements and, where applicable, with the information obtained by your Company from companies controlling your company or controlled by it. Based on this work, we attest to the accuracy and fair presentation of this information.

In accordance with the French law, we have verified that the required information concerning the identity of shareholders and holders of the voting rights has been properly disclosed in the management report.

STATUTORY AUDITORS' SPECIAL REPORT

++++++++

On related-party agreements and commitments

Annual General Meeting to approve the financial statements for the year ended 31 March 2012

This is a free translation into English of the Statutory Auditors' special report on related-party agreements and commitments issued in French and is provided solely for the convenience of English speaking readers. This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

To the Shareholders,

In our capacity as Statutory Auditors of your Company, we hereby report to you on related-party agreements and commitments.

It is our responsibility to report to shareholders, based on the information provided to us, on the main terms and conditions of the agreements and commitments that have been disclosed to us or that we may have identified as part of our engagement, without commenting on their relevance or substance or identifying any undisclosed agreements or commitments. Under the provisions of Article R.225-58 of the French Commercial Code, it is the responsibility of shareholders to determine whether the agreements and commitments are appropriate and should be approved.

Where applicable, it is also our responsibility to provide shareholders with the information required by Article R.225-58 of the French Commercial Code in relation to the implementation during the year of agreements and commitments already approved by the Annual General Meeting.

We performed the procedures that we deemed necessary in accordance with the professional guidelines of the French National Institute of Statutory Auditors (Compagnie nationale des commissaires aux comptes) applicable to such engagements. These procedures consisted in verifying that the information given to us is consistent with the underlying documents.

I. AGREEMENTS AND COMMITMENTS SUBMITTED FOR THE APPROVAL OF THE ANNUAL GENERAL MEETING

Agreements and commitments authorised during the year

In accordance with Article L. 225-86 of the French Commercial Code, we were informed of the following agreements and commitments authorised by the Supervisory Board.

With Thierry Barel

(Supervisory Board Meeting of 9 June 2011)

As a result of his appointment as Chairman of the Management Board, Thierry Barel resigned and, consequently, put an end to his employment contract with the Company.

On this occasion, the Remuneration Committee of the Supervisory Board examined the adjustments related to the end of Thierry Barel's employment contract and suggested that, in case of his dismissal by the Supervisory Board, he could receive an indemnity based on performance standards. The indemnity could amount to a maximum of eighteen months of total remuneration.

The performance for the measurement of this indemnity is the rate of the achievement of annual goals set by the Supervisory Board. These annual goals are used for the calculation of the annual variable remuneration. The measurement of this performance is the average of the performance accomplished by Thierry Barel during the three years for which results have been published and preceding his dismissal by the Supervisory Board.

With Didier Alix

(Supervisory Board Meeting of 22 July 2011)

Your Company concluded an amendment to the credit agreement of 22 December 2008 with a pool of nine banks. The main changes are as follows:

- extension of the term of loans (last redemption date in June 2016 compared to December 2013 in the original agreement);
- lifting of guarantees granted under the original agreement;
- option to have recourse to non-bank debt with a higher amount than the one originally specified in the agreement;
- relaxing of the bank covenants.

One of the banks concerned by the signature of this amendment is Société Générale. Didier Alix, member of the Supervisory Board of your Company, holds the position of Adviser to the Chairman. As Didier Alix did not take part in the vote, the Supervisory Board authorised the Management Board to sign this amendment.

With Robert Joyeux

(Supervisory Board Meeting of 27 March 2012)

The Supervisory Board authorised the Chairman of the Management Board to sign an amendment to the consulting and assistance agreement of 22 April 2011, signed between the Company and Robert Joyeux. As a member of the Supervisory Board since the General Meeting of 14 September 2011, Robert Joyeux did not take part in the vote.

This amendment is designed to extend the term of the consulting mission provided by Robert Joyeux to the management of the Company and to define the additional fees for €194,000 exclusive of tax, which will be received by Robert Joyeux on this occasion.

II. GREEMENTS AND COMMITMENTS ALREADY APPROVED BY THE ANNUAL GENERAL MEETING

Agreements and commitments approved in previous years which remained in force during the year.

In accordance with Article R.225-57 of the French Commercial Code, we were informed that the following agreements and commitments, approved by your Annual General Meeting in previous years, remained in force during the year ended 31 March 2012.

With Robert Joyeux

Memorandum of understanding with the managers and amendment n°1 – Sale and transfer of Faiveley Management shares to Faiveley S.A. (which became Faiveley Transport on 22 September 2009).

As part of its capital restructuring operations, Faiveley Transport signed a memorandum of understanding on 16 October 2008 and an amendment to this memorandum of understanding on 17 November 2008 with the managers and their spouses who are shareholders of Faiveley Management SAS.

Within the framework of the memorandum of understanding of 16 October 2008, Robert Joyeux received 140,610 Faiveley Transport shares in exchange for 164,430 Faiveley Management shares provided to Faiveley Transport. Robert Joyeux is committed to retaining all his Faiveley Transport shares for two years with effect from 23 December 2008 and two third of his shares for three years with effect from 23 December 2008. This later agreement had not been applied during the year.

Furthermore, for a period of six years with effect from 23 December 2008, any disposal of any block of 10,000 shares in Faiveley Transport is subject to a pre-emption right of Faiveley Transport.

With François Faiveley Participations SAS

In application of the technical, commercial and administrative assistance agreement concluded between FFP and Faiveley Transport on 26 June 2004, and in respect of the re-invoicing of rents and services provided, Faiveley Transport recorded the following amounts as income and expense during the year ended 31 March 2012.

In euro	Faiveley Transport expenses	Faiveley Transport income
Assistance agreement and provision of services	365,000	1,020
Re-invoicing of rents and charges	–	2,150

DRAFT RESOLUTIONS TO BE SUBMITTED TO THE COMBINED GENERAL MEETING

Of 14 September 2012, called to consider the financial statements for the year ending 31 March 2012

I. RESOLUTIONS IN THE ORDINARY SESSION

First resolution

Approval of the parent company financial statements for the year ending 31 March 2012

The General Meeting, with the required quorum and majority for Ordinary General Meetings, having considered the management report of the Management Board and the observations of the Supervisory Board on the operations of the Company for the financial year ending 31 March 2012 and on the financial statements of that year, and having considered the Statutory Auditors' report on the execution of their assignment for this financial year, approves the company financial statements for the year ending 31 March 2012, as presented, showing a loss of €10,998,977.46, and the transactions recorded in these financial statements and summarised in these reports.

Consequently, the General Meeting discharges the Management Board for the execution of their duties for this financial year.

Second resolution

Allocation of profit for the year ending 31 March 2012

The General Meeting, with the required quorum and majority for Ordinary General Meetings, on the proposal of the Management Board, agrees to allocate the profit for the year ending 31 March 2012 as follows:

• Loss for the financial year	(€10,998,977.46)
• Added to:	
– Retained earnings from prior years	€67,796,499.37
• Distributable profit	€56,797,521.91
– Transfer to legal reserve:	(€20,944.10)
– Cash dividend of €0.85 per share:	(€12,422,029.20)

The balance of €44,354,548.61 will be transferred in full to retained earnings.

Taking account of these allocations, the Company shareholders' equity will be €165,384,526.63.

The dividend will be payable from 19 September 2012.

Pursuant to Article 158 of the General Tax Code, the dividend distributed will entitle individual shareholders only to a rebate of 40% on the amount received.

According to the provisions of Article 243(ii) of the General Tax Code, the General Meeting notes the amount of dividends distributed in the last three financial years:

Year	Dividend
2008/2009	€1.00
2009/2010	€1.20
2010/2011	€1.20

If, at the time of the payment the Company holds treasury shares, the distributable profit corresponding to the unpaid dividend due to the holding of the shares shall be allocated to the account "retained earnings.

Third resolution

Approval of the Consolidated Financial Statements for the year ended 31 March 2012

The Annual General Meeting, with the required quorum and majority for Ordinary General Meetings, having considered the management report of the Management Board and the observations of the Supervisory Board on the operations of the Group for the financial year ended 31 March 2012 and on the consolidated financial statements of that year, and having considered the report on the consolidated financial statements from the Statutory Auditors in the execution of their assignment for this financial year, approves the Consolidated Financial Statements of the year ended 31 March 2012, as presented, and the transactions recorded in these financial statements and summarised in these reports.

Fourth resolution

Directors' fees

The General Meeting, with the required quorum and majority for Ordinary General Meetings sets the amount for fees allocated to the Supervisory Board for the financial year ended 31 March 2012, at €260,000.

Fifth resolution

Approval of the transactions and agreements referred to under Articles L. 225-86 and subsequent of the Commercial Code

The General Meeting, with the required quorum and majority for Ordinary General Meetings, having considered the Statutory Auditors' special report on the agreements referred to under Articles L. 225-86 and subsequent of the Commercial Code, notes and approves the terms of this report and the agreements mentioned therein.

Sixth resolution

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to renew the term of office of Philippe Alfroid as member of the Supervisory Board for a period of three years, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2015.

Seventh resolution

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to renew the term of office of François Faiveley as member of the Supervisory Board for a period of three years, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2015.

Eighth resolution

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, with the required quorum and majority for Ordinary General Meetings, decides to renew the term of office of Didier Alix as member of the Supervisory Board for a period of three years, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2015.

Ninth resolution

Authorisation given to the Management Board to trade in the shares of the Company

The General Meeting, with the required quorum and majority for Ordinary General Meetings, having considered the report of the Management Board, authorises the Management Board, with the facility to sub-delegate to its Chairman and/or one of its members, with the approval of the Chairman and within legal limits, pursuant to Articles L. 225-209 and subsequent of the Commercial Code, to purchase or sell shares in the Company.

The General Meeting decides that transactions may be carried out to:

- ensure the liquidity and to support the market for Faiveley Transport shares by an investment services provider via a liquidity contract that complies with the ethics charter recognised by the Autorité des Marchés Financiers;
- grant them to employees and senior executives of the Group according to the terms and conditions provided by law (options to purchase shares, employee profit-sharing, allocation of free shares);
- cancel them by way of reduction in capital within the limits set by law;
- retain them within the limit of 5% of the capital and use them in exchange or payment, in particular as part of acquisitions initiated by the Company, by way of public offer or other;
- implement any other market practice that is permitted by the Autorité des Marchés Financiers and more generally all transactions complying with applicable regulations.

Company shares may be purchased providing the total number of shares held by the Company following these purchases does not exceed 10% of the shares comprising the capital of the Company, this percentage being applied to capital adjusted according to the transactions that may occur subsequent to the current General Meeting.

The purchases, disposals, exchange or transfer may be made by any means, on the market or principal to principal, including by acquisition or disposal of blocks, or by recourse to derivative financial instruments, under the conditions provided by market authorities and regulations. The maximum share capital acquired, disposed of, exchanged or transferred by of a block of securities may relate to the entire buyback programme.

The maximum purchase price is set at €70 per share.

The General Meeting delegates to the Management Board the power to adjust the above purchase price in order to take account of the incidence of possible financial transactions on the value of the share. In particular, in the event of an increase in capital by incorporation of reserves and the issue of free shares, the price indicated above will be adjusted by a coefficient of a multiplier equal to the ratio of the number of securities comprising the share capital before the transaction and after the transaction.

The total amount allocated to the repurchase programme is €51 million.

This authorisation remains valid for eighteen months with effect from this day.

The General Meeting confers all powers to the Management Board, with the facility to delegate, to decide and implement the buyback programme, and in particular to issue stock exchange instructions, conclude all agreements, carry out all formalities and make declarations to the Autorité des Marchés Financiers and any other organisation, and in general, do everything necessary to complete the transactions carried out under the present authorisation.

This resolution replaces and cancels the authorisation granted by the seventh resolution approved by the Combined General Meeting of 14 September 2011.

II. RESOLUTION IN EXTRAORDINARY SESSION

Tenth resolution

Amendments to Articles 7, 18, 32, 39 and 50 of the bylaws (Codification of the Decree of 23 March 1967)

The General Meeting, with the required quorum and majority for Extraordinary General Meetings, having considered the report of the Management Board, decides to amend Articles 7, 18, 32, 39 and 50 of the bylaws, by cancelling references to the Decree of 23 March 1967 and replacing them by the corresponding articles of the Commercial Code.

In Article 7 of the bylaws, the reference to Article 62 of the Decree of 23 March 1967 is thus replaced by a reference to Article R. 225-6 of the Commercial Code.

In Article 18 of the bylaws, the reference to Articles 113 and 113-1 of the Decree of 23 March 1967 is thus replaced by a reference to Articles R. 223-53 and R. 223-54 of the Commercial Code.

In Article 32 of the bylaws, the reference to Article 123 of the Decree of 23 March 1967 is thus replaced by a reference to Article R. 225-66 of the Commercial Code.

In Article 39 of the bylaws, the reference to Article 149 of the Decree of 23 March 1967 is thus replaced by a reference to Article R. 225-106 of the Commercial Code.

In Article 50 of the bylaws, the reference to Articles 266 and subsequent of the Decree of 23 March 1967 is thus replaced by a reference to Articles R. 237-1 and subsequent of the Commercial Code.

Eleventh resolution

Amendments to Articles 16, 20, 23, 25, 28 and 35 of the bylaws (Update following the various legislative reforms)

The General Meeting, with the required quorum and majority for Extraordinary General Meetings, having considered the report of the Management Board, in order to take account of the changes introduced by recent reforms on company law and to bring the bylaws in conformity with applicable legislation, decides to modify the following articles:

- Firstly, Article 16 of the bylaws which now reads:

  " ...
  No person may be appointed as a member of the Management Board if he/she does not meet the qualifying requirement required for directors of sociétés anonymes (French limited companies), is affected by conflicts of interests, disqualification or prohibitions to exercise these duties, if he/she has been a statutory auditor of the Company over the last five financial years, a member of the Supervisory Board, is already a member of the management board of two other companies or acts as chairman of two other limited companies.
  ... "

  The remainder of Article 16 of the bylaws is unchanged.

- Secondly, Article 20 of the bylaws which now reads:

  "...
  VI. – Minutes of deliberations
  An attendance register is maintained and signed by the Supervisory Board members who attended the Supervisory Board meeting.
  Minutes are produced after each meeting, specifying the name of members of the Supervisory Board attending the meeting, excused or absent. They must mention the presence or absence of persons convened to the meeting of the Supervisory Board and the presence of any other person who attended all or part of the meeting.
  If necessary, the minutes record the duty of confidentiality imposed on persons attending the meeting pursuant to the Chairman's declaration, which should also be recorded.
  The minutes must be signed by the Chairman and at least one member of the Supervisory Board. In the event that the Chairman is unable to act, the minutes are signed by at least two board members.
  The minutes are retained and drafted in accordance with applicable legal provisions. Copies or excerpts of minutes of the deliberations are validly certified by the Chairman of the Supervisory Board, the Vice-Chairman, the Secretary, a member of the Management Board or any person duly empowered to this effect.
  In the event of the Company's liquidation, copies or excerpts may only be validly certified by a liquidator."

  The remainder of Article 20 of the bylaws is unchanged.

- Thirdly, Article 23 of the bylaws, which now reads:

  "...
  III.- Ordinary agreements
  Agreements performed in the ordinary course of business and carried out on an arm's length basis are not subject to the legal authorisation and approval procedure referred to under Articles L. 225-86 and subsequent of the Commercial Code."

  The remainder of Article 23 of the bylaws is unchanged.

- Fourthly, Article 25 of the bylaws, which now reads:

  "The statutory auditors are vested with the duties and powers assigned to them by Articles L. 225-218 and subsequent of the Commercial Code.
  The statutory auditors are convened to all Management Board and Supervisory Board meetings held to examine or approve the financial statements for the prior year or prior interim period, as well as all General Meetings.
  The statutory auditors are convened to these meetings by registered letter with acknowledgment of receipt."

- Fifthly, Article 28 of the bylaws, which now reads:

  "...
  I.- Role and jurisdiction
  The Ordinary General Meeting may make any decision other than those that are reserved for the Extraordinary General Meeting by the law and these bylaws.
  The Ordinary General Meeting meets at least once a year within six months of year-end. However, this deadline may be extended by an order of the President of the Commercial Court at the request of the Management Board.

It exercises the powers conferred upon it by the law, in particular:
- hearing the reading of the Management Board's management report on Company operations and the Statutory Auditors' reports;

…
- ratifying the relocation of the head office, as decided by the Supervisory Board.

It also authorises the purchase of a property belonging to a shareholder.
… "

The remainder of Article 28 of the bylaws is unchanged.

• Sixthly, Article 35 of the bylaws, which now reads:
"I.- Shareholders' representation
Shareholders may be represented by another shareholder, by their spouse or by their partner with whom a French civil solidarity pact has been signed. They may also be represented by any other individual or legal entity of their choice.
…"

The remainder of Article 35 of the bylaws is unchanged.

Twelfth resolution

Authorisation to the Management Board to proceed with the allocation of free shares, either existing or to be issued

The General Meeting, with the required quorum and majority for Extraordinary General Meetings, having considered the report of the Management Board and the special report of the Statutory Auditors, authorises the Management Board, pursuant to Articles L. 225-197-1 and subsequent of the Commercial Code, to proceed, on one or more occasions, with the allocation of free ordinary shares in the Company, existing or to be issued, for the benefit of senior executives as defined by law and to certain members of the personnel of the Company and companies related to it.

The General Meeting sets the period of acquisition at the end of which the allocation of ordinary shares by the beneficiaries becomes final, subject to potential conditions determined by the Management Board, to a minimum period of 2 years and sets the period of compulsory retention of the shares by the beneficiaries, at a minimum of 2 years with effect from the final allocation date of the shares.

However, the General Meeting authorises the Management Board not to impose any retention period for the shares concerned, to the extent that the vesting period of one or several allocations is a minimum of four years.

The General Meeting decides that the total number of free shares allocated pursuant to this resolution may not exceed 1% of the share capital at the date of the current General Meeting.

The General Meeting notes that free shares allocated may be existing shares or shares to be issued, and authorises the Management Board, in the event of an allocation of free shares to be issued, to increase the share capital, at the end of the acquisition period, by the capitalisation of reserves, profits or issue premiums for the benefit of the beneficiaries of the said shares, with this decision carrying the full waiver by shareholders of their pre-emption right to subscribe for the benefit of beneficiaries of free shares from the reserves, profit or premiums thus capitalised, with stipulation that the increase in capital will be carried out by the sole fact of the final allocation of shares to the beneficiaries.

The General Meeting grants all powers to the Management Board, which will be supported by the Remuneration Committee, within the limits set above, to:
- set the conditions and, where appropriate, the allocation criteria for ordinary shares;
- within the legal conditions and limits, set the dates on which the allocations will proceed;
- determine the identity of beneficiaries, the number of ordinary shares allocated to each of them and the means of allocation of ordinary shares.

The General Meeting sets the validity of this authorisation at thirty-eight months from this date. This authorisation cancels any amounts unused by the Management Board by virtue of the previous authorisation granted by the General Meeting of 14 September 2011.

The Management Board will inform the Ordinary General Meeting every year of transactions carried out by virtue of the present authorisation in a special report, pursuant to Article L. 225-197-4 of the Commercial Code.

III. RESOLUTIONS RELATIVE TO BOTH MEETINGS

Thirteenth resolution

Powers for formalities

The Annual General Meeting confers full powers to the bearer of copies or extracts of the minutes recording its decisions to carry out all the legal formalities of publication.

/02

CORPORATE GOVERNANCE

REPORT BY THE CHAIRMAN OF THE SUPERVISORY BOARD

++++++++

On the operation of the Supervisory Board and on internal control within Faiveley Transport

Dear Shareholders,

Pursuant to the provisions of Article L. 225-68 of the Commercial Code, I hereby inform you by the present report:

- of the conditions for the preparation and organisation of the work of your Supervisory Board during the financial year ended 31 March 2012;
- the principles and rules agreed by the Board to determine the remuneration and benefits of all kind granted to senior executives;
- of the internal control procedures implemented by the Company;
- other information required by Article L. 225-68 of the Commercial Code.

The current report was discussed and approved by the Supervisory Board at its meeting of 6 June 2012.

I. PREPARATION AND ORGANISATION OF THE SUPERVISORY BOARD'S WORK

1.1. Functioning of the Board

The Supervisory Board continuously ensures, by all appropriate means, control over the Company's management by the Management Board. The Supervisory Board is kept up-to-date by the Management Board on a regular basis through quarterly reports on the businesses and operations of the Company and its subsidiaries.

As part of its legal duties, the Supervisory Board exercises permanent control over the Company's management by the Management Board. At all times of the year, it carries out verifications and checks that it considers appropriate and may request documentation it considers useful to the completion of its duties. The Management Board presents an operating report to the Supervisory Board at last once per quarter.

The Supervisory Board appoints the members of the Management Board and sets their remuneration. It can also dismiss them in accordance with the bylaws. It appoints the Chairman of the Management Board and can also appoint the Chief Executive(s).
The Supervisory Board checks and monitors the half-year and full-year parent company and consolidated financial statements prepared by the Management Board.

At the Ordinary General Meeting, it presents a report containing its observations on the Management Board's report as well as on the financial statements for the year.

The Supervisory Board approves and monitors the execution of the medium and long-term strategy presented by the Chairman of the Management Board. It monitors the quality of information provided to shareholders as well as the markets, via the financial statements or when major transactions are effected.

In addition to the provisions of the bylaws, prior approval by the Supervisory Board is required for all significant transactions in respect of the scope of the Company's business (acquisitions, disposals, internal restructuring) or outside the approved strategy of the business. It is regularly informed of the financial position, the cash position and the commitments of the Company.

The Chairman calls the Supervisory Board as often as required in the interests of the Company and at least once per quarter following the release of the periodic report by the Management Board.

The Supervisory Board's deliberations are not valid unless at least half its members are present and decisions are made by a majority of members. In the event of a tie, the Chairman has the deciding vote.

At any one meeting, Directors may hold no more than one proxy received from a Director who could not attend.

In order to conform to the AFEP-MEDEF corporate governance code for listed companies of December 2008, the Supervisory Board added to the agenda of its meeting on 22 April 2010 a revision to its internal regulations providing and specifying:

- its powers,
- it operating rules,
- the terms and conditions of meetings and the organisation and preparation of the work of the Board,
- the information required by members of the Supervisory Board in carrying out their duties.

Following the recommendation of the AMF (the French Financial Market Authority) of 3 November 2010 on the prevention of insider trading violations by management, at its meeting on 24 February 2011, the Supervisory Board decided to clearly define the trading restriction periods during which management and permanent insiders are prohibited from effecting transactions on the Company's securities. The Supervisory Board also amended its internal regulations and brought the Company's Code of Conduct into compliance at the same meeting. The Supervisory Board's internal regulations are available on the Company's website. A calendar of restriction periods is forwarded to all members of the Supervisory Board, the Management Board and permanent insiders of the Company at the beginning of each financial year.

Moreover, at the meeting held on 24 March 2011, the Supervisory Board reviewed the provisions of the law of 27 January 2011 concerning the fair representation of women and men on boards of directors and supervisory boards and decided to comply with the requirements of this regulation. Hélène Auriol-Potier and Nicoletta Giadrossi-Morel were appointed members of the Supervisory Board by the General Meeting of 14 September 2011 and may be deemed independent in accordance with criteria set by the Charter adopted by the Supervisory Board on the matter.

In light of their legal assignments, each member of the Supervisory Board is bound by the basic obligations of loyalty, confidentiality and due diligence.

The Board adopted a Charter for members of the Supervisory Board that defines the criteria adopted to qualify as an Independent Director, as well as the obligations of members of the Supervisory Board. This Charter is also available at the registered office of the Company.

It specifically states that at least two of the members of the Supervisory Board must meet the qualification of Independent Director.

Aside from the required expertise and experience, a member of the Supervisory Board is deemed independent where he/she has no direct or indirect relationship, of whatever nature, with the Company, its group or its management that may compromise the exercise of freedom of judgment and their completely objective participation in the work of the Supervisory Board.

To be considered an Independent Director, a member of the Supervisory Board must satisfy the following criteria:
- they must not be or have been an employee or executive of the Company or an employee or director of a company that has been consolidated during the past five years;
- must not be a senior executive of a company where the Company, directly or indirectly, holds a position as Director or has an employee appointed as such, or where a senior executive of the Company holds, or has held in the last five years, the position of Director;
- must not be a customer, supplier, commercial partner, merchant banker or financing banker:
  - that is of significance to the Company or its group,
  - or where the Company or its group represent a significant part of the activities;
- must not be directly or indirectly related, nor have been directly or indirectly related during the last five years, to such a customer, supplier, commercial partner, merchant banker or investment banker;
- must not have any close family relationship with a senior executive of the Company;
- must not have been an auditor to the business during the previous five years;
- must not have been a member of the Supervisory Board for more than twelve years;
- must not hold, directly or indirectly, a shareholding equal to or greater than 10% in the share capital or voting rights of the Company or in any one of the companies of its Group, nor be related in any way whatsoever to a shareholder holding more than 10% of the capital or the voting rights of the Company or a company of its Group.

Every year, at the meeting to consider the financial statements of the year just ended, the Supervisory Board examines the position of each of its members on a case by case basis with regard to the criteria of this clause, and brings the conclusions of its examination to the attention of the shareholders in its annual report so that the Independent Directors are identified. Thus, the members of the Supervisory Board deemed to be independent are:
- Hélène Auriol-Potier;
- Christian Germa;
- Nicoletta Giadrossi-Morel;
- Maurice Marchand-Tonel.

Christian Germa was a Director of Faiveley Transport before all the assets and liabilities of this company were transferred to Faiveley S.A. (subsequently renamed Faiveley Transport). Following discussions within the Supervisory Board, Christian Germa has been deemed an "independent member". The Supervisory Board noted that he exercises his professional activities in a field which is wholly unrelated to the railway industry, that he is neither related nor connected in a private capacity with the principal shareholder, and that he is not a key shareholder of the Company.

Finally, beyond the sole statutory requirements, internal regulations require that each member of the Supervisory Board be a shareholder in a personal capacity. It was decided that each member of the Supervisory Board should acquire at least two hundred (200) Company shares. During this financial year, board members regularised their status to conform to this new provision of the internal regulations.

1.2. Frequency of meetings

During the last financial year, the Supervisory Board met nine times.

The agendas of the Board meetings were as follows:
- On **1 April 2011**, with the following agenda:
  - Approval of the minutes of the previous meeting,
  - Appointment of a new Chairman of the Management Board,
  - Appointment of a new member of the Management Board,
  - Remuneration of the members of the Management Board,
  - Miscellaneous.

- On **21 April 2011**, with the following agenda:
  - Approval of the minutes of the previous meeting,
  - Review of annual sales for the year ended 31 March 2011,
  - Review of the recommendations of the AFEP-MEDEF with regards to the incompatibility between a work contract and a term of office,
  - Review of the procedure for the renewal of the term of office of the Statutory Auditors,
  - Review of the timetable of future Supervisory Board, Audit and Risk Committee, Remuneration Committee and Steering Committee's meetings,
  - Miscellaneous.

- On **9 June 2011**, with the following agenda:
  - Approval of the minutes of the previous meeting,
  - Presentation by the Management Board and observations of the Board on the parent company and consolidated financial statements for the year ending 31 March 2011,

- Presentation of the Audit and Risk Committee's report,
- Presentation and approval of the Supervisory Board's report on the management report prepared by the Management Board for the Annual General Meeting,
- Presentation and approval of the Chairman's draft report on internal audit procedures and preparation and organisation of the Board's work for the Annual General Meeting,
- Review of draft resolutions submitted by the Management Board at the Annual General Meeting,
- Review of the list of related-party agreements over the previous year under Article L. 225-86 of the Commercial Code,
- Renewal of the terms of office of members of the Management Board,
- Presentation of the conclusions of the Remuneration Committee on the remuneration of Board members and amendments related to the termination of the employment contract of the Chairman of the Management Board,
- Relocation of head office,
- Approval of a related-party agreement under Article L. 225-86 of the Commercial Code,
- Miscellaneous.

• On **22 July 2011**, with the following agenda:
- Approval of the minutes of the previous meeting,
- Review of sales for the first quarter of 2011/2012,
- Review of draft resolutions to be submitted by the Management Board at the Annual General Meeting,
- Selection of female applicants to the Supervisory Board to be submitted to the next General Meeting,
- Choice of new Statutory Auditors to be appointed during the next General Meeting,
- Request for the Management Board's preliminary authorisation regarding the issue of guarantee on behalf of the Company SFRT, governed by Chinese law,
- Miscellaneous.

• On **14 September 2011**, with the following agenda:
- Approval of the minutes of the previous meeting,
- Welcome to Hélène Auriol-Potier, Nicoletta Giadrossi-Morel and Robert Joyeux as new members of the Supervisory Board,
- Appointment of the Chairman and Vice-Chairman of the Supervisory Board,
- Miscellaneous.

• On **19 October 2011**, with the following agenda:
- Approval of the minutes of the previous meeting,
- Review of sales for the first half of the 2011/2012 financial year presented by the Management Board and outlook,
- Review of opportunities for acquisitions,
- Miscellaneous.

• On **23 November 2011**, with the following agenda:
- Approval of the minutes of the previous meeting,
- Presentation and approval of interim financial statements approved by the Management Board on 23 November 2011,
- Update on on-going acquisitions,
- Implementation by the Management Board of a free performance-based share distribution plan: presentation of plan regulations and mechanisms, retention obligation for senior executives executive and eligible beneficiaries,
- Implementation by the Management Board of the delegation of authority granted by the Shareholders' General Meeting of 14 September 2011 to increase the share capital by private placement, with waiver of the subscription right, pursuant to Articles L. 225-129 and subsequent of the Commercial Code,
- Miscellaneous.

• On **24 January 2012**, with the following agenda:
- Approval of the minutes of the previous meeting,
- Review of sales for the 3rd quarter of the 2011/2012 financial year and the draft press release,
- Annual authorisation of guarantees, sureties and securities granted to the Management Board,
- Monitoring of transactions related to the acquisition and financing of Graham-White Manufacturing Co.,
- Allocation of free shares of the Company to senior executives (in respect of the plan set out by the Management Board on 23 November 2011),
- Miscellaneous.

• On **27 March 2012**, with the following agenda:
- Approval of the minutes of the previous meeting,
- Review of the 2012/2013 budget,
- Allocation of free shares of the Company to senior executives (in respect of the plan set out by the Management Board on 23 November 2011),
- Miscellaneous.

1.3. Convening meetings of the Supervisory Board members

In accordance with Article 20-III of the bylaws, the advance notice required for formal meetings of the members of the Supervisory Board is four days.

Each member has the option of being represented by another member at the board meetings.

The meetings are chaired by the Chairman of the Supervisory Board, or in his absence, by the Vice-Chairman.

1.4. Information for Supervisory Board members

Before a meeting, each member receives Group financial information and a file detailing the items included on the agenda for the meeting.

1.5. Directors' fees

Details are provided in the Management Report of the Management Board.

1.6. Location of the meetings

In general, meetings of the Supervisory Board take place at the registered office, however, occasionally, certain meetings are held in other locations.

1.7. Minutes of the meetings

Minutes of Supervisory Board meetings are drafted at the end of each meeting and are immediately forwarded to all board members.

1.8. Summary of 2011/2012 activity

During the year ended 31 March 2012, the Board met nine times. The attendance rate was 82.8%. All nine meetings were chaired by the Chairman of the Supervisory Board, Philippe Alfroid.

During the financial year, all Management Board members attended meetings and presented items on the agenda within their respective areas of expertise to the Supervisory Board.

The Group's Legal Counsel attended all Board meetings and acted as secretary to the meetings.

Pursuant to Article L. 225-238 of the Commercial Code, the Statutory Auditors were invited to the Board meetings at which the interim and year-end financial statements were presented and approved.

1.9. Rules governing directors' remuneration and other benefits

Remuneration of executives, detailed in the Management Board's report, is determined by the Remuneration Committee and the Supervisory Board. All the information required under Article L. 225-102-1 of the Commercial Code is presented in the Management Board's report.

The setting and granting of Directors' fees is decided at a meeting between the Chairman and the Vice-Chairman of the Supervisory Board, which specifically take account of the following criteria:

- Board meeting attendance;
- work carried out as part of the various committees;
- time devoted;
- personal expertise and contributions to the Board's deliberations.

The functioning of the Supervisory Board is then assessed by the Chairman and the Vice-Chairman. The frequency of meetings, the members' contribution to work carried out, work methods, governance rules and the composition of the Board are reviewed carefully in order to propose the improvements deemed necessary.

Directors' fees totalling €138,400 were allocated in respect of the financial year ending 31 March 2011.

In its decision dated 28 November 2008, the Supervisory Board adopted the principles of the AFEP-MEDEF corporate governance code. This Code includes:

- the October 2003 corporate governance code for listed companies, updated in April 2010;
- the October 2008 recommendations on Directors' remuneration.

The Supervisory Board has reservations concerning the rule against concurrently holding a term of office and an employment contract: it favours suspending employment contracts of senior executives at the time of their appointments as Chairman and Chief Executive Officer or as Chief Executive Officer, where their length of service in the business is at least ten years at the time of their appointment.

Upon the appointment of Thierry Barel as Chairman of the Management Board, his contract of employment was terminated. Changes made upon the termination of Thierry Barel's contract of employment have been discussed by the Supervisory Board which granted its prior approval in accordance with Articles L. 225-86 and L. 225-90-1 of the Commercial Code. The Supervisory Board has also defined the terms and conditions for the termination of Thierry Barel's duties as Chairman of the Management Board. Thus, should he be dismissed by the Supervisory Board, Mr Barel may avail of compensation based on performance criteria, up to a maximum amount of 18 months of total remuneration.

Only Thierry Barel is remunerated in his capacity as Chairman of the Management Board, the other members of the Management Board may not receive specific remuneration for their role as member of the Management Board. In addition, the members of the Management Board who are also managing directors of group companies do not receive any specific benefits for their roles.

The Management Board meeting of 29 December 2005 approved the terms of its internal regulations, by which all members are individually bound. The internal regulations specify the powers and duties of the Management Board and the procedures governing meetings and decision-making. A copy of the internal regulations is available at the registered office of the Company.

With regards to third parties and according to the bylaws, only the Chairman of the Management Board may represent the Company, unless decided otherwise by the Supervisory Board. Thierry Barel is the sole Chief Executive Officer and has no specific limits on his powers.

Management Board members were reappointed for a three-year term during a meeting of the Supervisory Board on 9 June 2011. The Management Board is currently made up of three people.

The Remuneration Committee is responsible for defining the share purchase and subscription option policy, as well as the policy governing the allocation of free shares to Directors and Executive Officers, in close collaboration with the Group's Human Resources Department. This policy is then implemented by the Management Board, which acts strictly within the bounds of the delegation granted to it by the shareholders' General Meeting.

II. INTERNAL CONTROL AND RISK MANAGEMENT PROCEDURES

The Company has developed internal control and risk management procedures to ensure rigorous financial management and the control of risks associated with its business activities. The procedures are also aimed at ensuring that reliable information is provided regarding the Company's financial situation and in the financial statements provided to shareholders.

The internal control standard adopted by the Company is that of the Committee of Sponsoring Organizations of the Treadway Commission (COSO). According to this standard, internal control is a process which aims to provide reasonable assurance that the following objectives are met: the realisation and optimisation of transactions, reliability of financial information and compliance with the law and regulations in force. As with all systems of internal control, it cannot provide an absolute guarantee that all risks will be eliminated. As a result, the

Group's internal control system respects the operational framework recommended by COSO: organisation and principles of control, risk assessment processes, the actual control activities, documentation and communication of rules regarding control, supervision of the internal control system.

As regards internal control, the Company uses the general principles defined by the AMF (French Financial Market Authority).

2.1. Group objectives for internal control and risk management procedures

Internal control procedures implemented within the Faiveley Transport Group, which represents 100% of Group sales, meet the following objectives:

- to establish accurate, reliable reporting on the Company's accounting and financial information;
- to ensure that the information forwarded to the Supervisory Board of Faiveley Transport and to General Meetings is reliable and is a true reflection of the Company's business;
- to ensure that the operations carried out within the Company comply with current legislation and regulations in force and with the objectives laid down by General Management;
- to ensure adequate internal distribution of relevant and reliable information, enabling each participant to fulfil his/her responsibilities;
- to establish an organisation with clearly defined responsibilities, adequate resources and expertise, which relies on appropriate IT systems, operating procedures and methods, and appropriate tools and practices;
- to compile and analyse major identifiable risks in light of the Company's objectives and to ensure that procedures are implemented to manage these risks;
- to ensure that published financial statements and other information disclosed to the market is reliable.

One of the main objectives of the internal control system is to anticipate and manage the risks inherent to the Company's business and the risk of errors or fraud, particularly in the area of accounting and finance.

Internal control is an integral part of the Group's corporate governance strategy. In addition to the specialised committees described below, Faiveley Transport management has formed a Steering Committee that meets every month in order to thoroughly and consistently monitor the operational and financial performance of the railway business, to supplement the specialised committees referred to hereafter.

2.2. Internal control procedures and risk management

The objective of internal control is to ensure the prevention and management of risks arising from the operations of Group entities and the risk of errors or fraud, particularly of a financial and accounting nature. It seeks to ensure compliance with the law and applicable regulations, as well as the reliability of financial and accounting information.

The Group has established a structure, procedures and processes with the purpose of identifying, evaluating and reducing risks. The goal is also to allocate the resources necessary to manage risks, in line with the strategic and operational objectives of the Group.

As with all systems of internal control, it can offer reasonable assurance but cannot provide an absolute guarantee that these risks will be completely eliminated.

The internal control and risk management mechanisms in place within the Group are thus aimed at promoting:

- internal control in terms of the control environment: the Group's control environment is based on:
  - reference documents comprising, among other items, a body of rules summarised in a 'Corporate Manual' including the best practice rules for management, submission of tenders, quality procedures, human resource management, insurance and finance,
  - "Financial and Accounting Policies", a Group standardised benchmark document, covering accounting standards, accounting rules and practices, consolidation, reporting and cash management procedures;
- a clear internal organisation appropriate to the Group's business model;
- information systems adapted to the Group's business and organisation;
- identification of major Group risks (market, industrial and environmental risks);
- protection and monitoring activities: IT security, the implementation of corrective action plans by operational entities as part of continuous improvement;
- internal communication: the Group distributes relevant and reliable information mainly via the Group Intranet site. An internal newsletter is regularly distributed within the Group.

Moreover, in its control functions, the Supervisory Board now follows the principles set down by the new corporate governance code for listed companies, published by AFEP-MEDEF in December 2008 and updated in April 2010.

2.3. Implementation of internal controls

In order to meet objectives and to structure internal control activities, the Group has two types of procedures:

- operational procedures;
- internal control procedures relating to the preparation and processing of financial and accounting information.

2.3.1. CONTENT OF OPERATIONAL PROCEDURES

The principal standardised operating procedures are as follows:

- a "Corporate" manual whose major components concern:
  - management organisation, and the roles and responsibilities of their major duties,
  - key performance indicators,
  - key processes: "management reviews" and "projects reviews",
  - sales-related procedures,
  - financial procedures,
  - quality management,
  - health, safety and environmental procedures,
  - human resource procedures;
- compilation of "Quality" instructions describing certain common operational processes for the entire Group;
- an "Insurance" manual, which was redrafted after all Group policies for civil liability and damages were placed with the same broker;

- a collection of procedures and rules implemented by most Group subsidiaries as part of ISO certification. These rules relate to the management of production and purchasing.

2.3.2. INTERNAL CONTROL PROCEDURES IN RESPECT OF THE PREPARATION AND PROCESSING OF FINANCIAL AND ACCOUNTING INFORMATION

Since 2006, the Company has been using a reporting and consolidation tool integrated into Hyperion. This constitutes a very significant improvement, both in terms of timing and quality of data production, and in terms of the evaluation of subsidiaries' performance and projects.

2.3.3. RISK MANAGEMENT TOOLS

In 2007, the Group started to work on the harmonisation and the gradual updating of all its technical and IT architecture. Standard IT tools (ERP) have been rolled out in operational units. The improvement in IT tools thus contributed to the structuring of internal controls and led in time to the achievement of gains in productivity.

The importance of the changes brought about currently requires close monitoring by the Group's management of the rollout of the base configuration.

The Group has already set up a framework of procedures to improve its internal controls, to harmonise practices within the Group and to optimise its operations.

The Group gives particular attention to the management of human resources, and has set up procedures to manage the remuneration of operational managers with the assignment of stated objectives and the measurement of their achievement, thus ensuring consistency in objectives and in the remuneration policy for managers throughout the entire Group.

Monthly reporting by subsidiaries is consolidated using a unique tool (Hyperion) under the responsibility of the Group's management control.

The Group has set up a number key performance and financial indicators to enable monitoring in a common language within the Group. The budgetary process is carried out with the participation of operational management and with strategic overviews decided by the Management Board. Budgetary reviews are carried out by the legal entity with the involvement of the Executive Committee.

A benchmark of key controls has been prepared, with the objective being to identify all the essential Group controls for processes considered critical by the Group's Management (Faiveley Management System). This includes dividing the business into key processes and sub-processes considered applicable to the entire business at a central and local level. This process, which was already in place within industrial management, was extended this year to financial and commercial processes.

Lastly, an approval process for tenders was set up at commercial and financial level to monitor the conditions under which the various product lines offer their equipment and services to customers.

2.4. Internal control and risk management procedures relating to the preparation and processing of accounting and financial information

Accounting and financial operations are carried out by the Finance Department for the parent company, subsidiaries and all entities.

This department is responsible for:
- supplying General Management, at any given time, with relevant documents and indicators to manage the company's operations;
- continually anticipating and contributing to the definition of action plans, their implementation and on-going monitoring with the company's General Management;
- ensuring the reliability of information supplied by the Company's accounting and financial information system.

The financial statements are drawn up according to:
- IFRS applicable to listed companies;
- rules laid down by Faiveley Transport, regarding the drafting of interim and annual financial statements for the parent company and subsidiaries.

As part of the changeover to IFRS within the Group, the Finance Department has introduced a number of accounting procedures and regulations which are part of the internal control framework and are covered by audits conducted by Group and local auditors.

The preparation of accounting and financial information is carried out within the Finance Department by the Consolidation Department, which summarises accounting data and produces the Group's consolidated financial statements.

It forwards a timetable of tasks and checks to be carried out for the end of each accounting period to plants and subsidiaries. The timetable also schedules the work of Statutory Auditors to ensure certification within an acceptable timeframe in order to allow for the approval of the financial statements.

The Group's Financial Controlling is implemented under the leadership of the Controlling Director. The financial controllers at head office supervise the monitoring and reporting of subsidiaries and projects in their area. They have the power to investigate and take action in conjunction with finance managers and controllers at subsidiaries.

Their work results in reports which provide a view of the accounting and financial position of subsidiaries and projects, of compliance with Group procedures and which define improvement plans to be carried out.

2.5. Internal control players

During the year ending 31 March 2012, the various internal control players operated as follows:

THE STEERING COMMITTEE

The Steering Committee includes the members of the Company's Management Board and certain members of the Supervisory Board. They meet monthly to evaluate operational and financial

performance, to discuss business matters and to define the strategic direction of the Group in its various businesses and in different markets, and each year, they supervise the preparation of the annual budget.

THE REMUNERATION COMMITTEE

The Remuneration Committee has three members. It is chaired by the Chairman of the Supervisory Board, Philippe Alfroid. François Faiveley and Christopher Spencer are also members.

The Remuneration Committee meets at least twice annually and its task is to determine the remuneration of General Management at the Faiveley Transport Group.

The Remuneration Committee deals specifically with the remuneration of senior executives; its task is to evaluate and confirm the allocation of the variable part of the remuneration of the Chairman of the Management Board of Faiveley Transport, based on individual performance objectives and on financial statements audited by the Statutory Auditors.

THE AUDIT AND RISK COMMITTEE

The Audit and Risk Committee has four members: Christian Germa (Chairman), Maurice Marchand-Tonel, Philippe Alfroid and Christopher Spencer. Serge Choumaker, a member of the Supervisory Board representing employee shareholders, is also involved due to his role as the Group's Director of Accounting & Consolidation. The operating principles of the Audit and Risk Committee are consistent with the findings of the Audit Committee's final report, published by the Financial Market Authority in July 2010.

Its specific task is to examine the interim and annual financial statements and the internal control procedures of Faiveley Transport Group.

In order to carry out this assignment, the Audit and Risk Committee interviews the Statutory Auditors and the Chief Financial Officer of the Group, it examines the scope of the consolidated companies, it consults external experts where necessary and proceeds with an examination of risks and of significant off-balance sheet commitments. In addition, it examines the Statutory Auditors' fees and the terms and conditions of their reappointment. It is also involved in the preparation of the Group's financial communication of the half-year and full-year financial statements and significant transactions (acquisitions, disposals, etc.).

The Audit and Risk Committee meets to approve the interim and year-end financial statements. It issues recommendations and prepares a report for the Supervisory Board of Faiveley Transport.

THE MANAGEMENT BOARD OF FAIVELEY TRANSPORT

The Board is responsible for the organisation and the implementation of accounting and financial internal controls, as well as the preparation of the financial statements prior to their approval.

The Management Board approves the financial statements and the Supervisory Board carries out the verification and checks that it deems necessary on the financial statements.

THE EXECUTIVE COMMITTEE

In addition to the Committees described above, there is an Executive Committee for the business, comprising the CEO, the Chief Financial Officer, and the heads of operational and cross-divisional departments. It deals with all matters concerning the operation and running of the Company and it meets once a month.

Depending on the agenda prepared at the previous meeting, non-members of the committee are invited to deal with matters within their area of responsibility.

THE FINANCE DEPARTMENT

Its role as regards internal control primarily consists of:
- financial controlling: monitoring the budgeting control processes;
- accounting and consolidation: monitoring the quality and reliability of subsidiaries' financial statements and of the consolidated financial statements;
- treasury: reliability of cash generation, delegation of authority, and management of exchange rate and interest rate risk;
- legal department: monitoring of contractual and insurance risk.

Financial controlling is undertaken by a team of controllers at the head office and in each subsidiary. The Finance Department organises periodic reviews to monitor industrial activities and business projects. Every month it issues a report for General Management and operational and cross-divisional departments.

INTERNAL CONTROL DEPARTMENT

In order to strengthen its internal control structure, Group Management decided to recruit a Director of Internal Control. The Director of Internal Control will be based at head office and will report directly to the Group's Chief Financial Officer. The aim of this role will be to support the implementation of internal controls through on-site audits to verify the application of Group procedures and key controls. To ensure transparency, all reports drafted during these audits will be passed on to the members of the Audit Committee and to the Group's CEO. A team made up of three to five "associate auditors", chosen from amongst more experienced Group personnel, will be created to support the Director of Internal Control in his missions.

THE DEPARTMENT HEADS' COMMITTEE

This is led by the CEO of each industrial subsidiary. It highlights Group indicators and deals with problems raised at previous meetings by reviewing the solutions implemented. It meets once a month.

THE QUALITY DEPARTMENT

The quality system is steered by a quality department within each industrial subsidiary and involves the senior management of each entity and subsidiary. It is subject to structured documentation which includes the description of processes as well as quality procedures.

The monitoring of the quality system is carried out by a steering committee for continuous improvement.

2.6. Monitoring of subsidiaries

Faiveley Transport has a majority or joint shareholding in each of its subsidiaries. Therefore, it has a strong presence on the Management Board and within the managerial structure of each of its subsidiaries.

A monthly management report is provided on D+3 then D+7 to the parent company by each subsidiary. The parent company then decides whether to take any appropriate action depending on the information received.

In November 2010, the Audit and Risk Committee requested an external audit of the Chinese companies F.M.T. Shanghai Ltd and Qingdao Faiveley SRI Rail Brake Co. Ltd. These audits were conducted by Deloitte's Shanghai office. The findings of these audits are discussed below (2.8 External Controls).

2.7. Standardisation of information technology systems

In spring 2007, Group Management decided to commit to a programme for the integration of IT systems for the whole Group.

A global "Moving Forward" programme was initiated to:
- reduce the complexity of the Group's organisation and to gain speed;
- standardise processes and better share information;
- create more added-value for the Group and its customers.

2.8. Third-party relationships

Supervision is carried out by independent certification agencies. The majority of the companies within the Group have ISO 9001-2000 certification and the Group quality management system is regularly audited by an external agency.

At 31 March 2012, more than ten Group entities, including the Group's main industrial sites were subject to ISO 14001 certification relating to environmental safety management systems.

Deloitte Shanghai conducted an audit at the end of 2010 of certain Chinese subsidiaries of the Group following a request by the Audit and Risk Committee. Its findings were shared with members of the Audit Committee on 16 December 2010. Based on this information, a number of corrective actions were initiated in early January 2011, in order to strengthen and/or implement new and more satisfactory controls. The implementation of these actions continued into 2011/2012.

Finally, it should be noted that the Group changed one of its auditors following a call for tenders carried out at the beginning of 2011: PricewaterhouseCoopers replaced Deloitte for the financial year beginning 1 April 2011. The scope of audit was changed since all international subsidiaries which were previously audited by various local audit firms or subsidiaries of international firms were granted to PricewaterhouseCoopers. Methods that are beneficial for the company in terms of control and validation of accounting and financial methods will naturally follow this appointment and the use of a single firm for all subsidiaries.

The auditors are PricewaterhouseCoopers Audit and Expertise Comptable et Audit (ECA). As part of their audit of annual and consolidated accounts of the company, the auditors are required to make recommendations regarding internal controls related to accounting and financial information. Accordance with their professional standards, the auditors communicate to the audit committee include the management and their assessment of internal control group. Corrective actions have already been incurred, for each subsidiary, the information provided by the auditors to the audit committee and the Group Management.

2.9. Shareholders information

All information on specific terms and conditions relating to shareholders' participation in general meetings is included in the Company's bylaws, in particular under Title V, Articles 26 and subsequent.

Please also note that items likely to have an impact in the event of a public offering, pursuant to Article L225-100-3 of the Commercial Code, appear in chapter 6 of the Company's Reference Document.

2.10. Action plan for the forthcoming financial year

The operational departments and the Finance Department of Faiveley Transport will continue to review key processes, business by business. The Finance Department will establish the new Internal Control Department, as described above. At year-end 2012, the auditors will conduct further reviews of internal controls in order to ensure that corrective actions taken as a result of their recommendations have been implemented.

Chairman of the Supervisory Board

STATUTORY AUDITORS' **REPORT**

++++++++

Prepared in accordance with Article L. 225-235 of the French Commercial Code, on the report prepared by the Chairman of the Supervisory Board

For the year ended 31 March 2012

This is a free translation into English of the Statutory Auditors' report issued in the French language and is provided solely for the convenience of English speaking readers. This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

To the Shareholders,

In our capacity as Statutory Auditors of Faiveley Transport and in accordance with Article L. 225-235 of the French Commercial Code (*Code de commerce*), we hereby report to you on the report prepared by the Chairman of your Company in accordance with Article L. 225-68 of the French Commercial Code for the year ended 31 March 2012.

It is the Chairman's responsibility to prepare, and submit to the Supervisory Board for approval, a report describing the internal control and risk management procedures implemented by the company and providing the other information required by Article L. 225-68 of the French Commercial Code in particular relating to corporate governance.

It is our responsibility :
- to report to you on the information set out in the Chairman's report on internal control and risk management procedures relating to the preparation and processing of financial and accounting information, and
- to attest that the report sets out the other information required by article L. 225-68 of the French Commercial Code, it being specified that it is not our responsibility to assess the fairness of this information.

We conducted our work in accordance with professional standards applicable in France.

I. INFORMATION CONCERNING THE INTERNAL CONTROL AND RISK MANAGEMENT PROCEDURES RELATING TO THE PREPARATION AND PROCESSING OF FINANCIAL AND ACCOUNTING INFORMATION

The professional standards require that we perform procedures to assess the fairness of the information on internal control and risk management procedures relating to the preparation and processing of financial and accounting information set out in the Chairman's report. These procedures mainly consisted of:
- obtaining an understanding of the internal control and risk management procedures relating to the preparation and processing of financial and accounting information on which the information presented in the Chairman's report is based, and of the existing documentation;
- obtaining an understanding of the work performed to support the information given in the report and of the existing documentation;
- determining if any material weaknesses in the internal control procedures relating to the preparation and processing of financial and accounting information that we may have identified in the course of our work are properly described in the Chairman's report.

On the basis of our work, we have no matters to report on the information given on internal control and risk management procedures relating to the preparation and processing of financial and accounting information, set out in the Chairman of the Supervisory Board report, prepared in accordance with Article L. 225-68 of the French Commercial Code.

II. OTHER INFORMATION

We attest that the Chairman's report sets out the other information required by Article L. 225-68 of the French Commercial Code.

Neuilly-sur-Seine and Dijon, 16 July 2012

(1) The variable part is measured in relation to both Group and individual objectives. Group objectives are based on EBITDA and cash generation. Individual objectives are specified at the start of each financial year with line supervisors and are also presented to the Remuneration Committee in respect of Executive Committee members. A decision on the final vesting of the variable part of remuneration based on individual objectives (bonus) is reached following individual interviews and, as regards Group objectives, based on the audited financial statements. These recommendations are subsequently debated within the Remuneration Committee. The Chairman of the Remuneration Committee then presents a summary to the Supervisory Board.

(2) Erwan Faiveley is an employee of F.F.P, holding company of the Faiveley Family.

III. DIRECTORS' FEES AND OTHER REMUNERATION RECEIVED BY MEMBERS OF THE SUPERVISORY BOARD

Members of the Supervisory Board	Amounts paid during the 2010/2011 financial year	Amounts paid during the 2011/2012 financial year

2012/2013 FINANCIAL REPORT

Faiveley
TRANSPORT

FINANCIAL REPORT

1. MANAGEMENT REPORT OF THE **MANAGEMENT BOARD**

To the Combined General Meeting of 12 september 2013

Ladies and gentlemen,

We have convened this General Meeting, in compliance with legal and regulatory requirements, to submit for your approval the Faiveley Transport annual and consolidated financial statements for the year ended 31 March 2013.

These financial statements have been prepared in accordance with Articles L. 232-1 and L. 233-16 of the Commercial Code.

The parent company and consolidated financial statements were approved by the Management Board on 31 May 2013, and were presented to the Supervisory Board and approved at their meeting of 31 May 2013.

This report has been compiled pursuant to Articles L. 232-1 paragraph 2 and L. 233-26 of the Commercial Code. It was made available to the shareholders prior to the General Meeting in accordance with legal and regulatory requirements.

The annual financial statements of Faiveley Transport and the consolidated financial statements have been compiled in accordance with legal and regulatory rules of presentation and valuation.

Highlights:

- To partly refinance the acquisition of US company Graham-White Manufacturing Co., completed on 3 February 2012, and diversify its financing sources, on 12 April 2012 the Group finalised its first private placement bond issue in the US with two institutional investors, for a total of US$75 million. This bond issue was made up of two tranches: one for US$30 million, with a 10-year final maturity and redeemable between 2017 and 2022, and a US$45 million bullet loan with a 10-year maturity. The average fixed interest is 4.91% per year.
- Faiveley Transport won its legal action against Wabtec in the United States. On 6 February 2013, the New York Court of Appeals upheld the jury's verdict against Wabtec, awarding the companies Faiveley Transport USA, Faiveley Transport Nordic, Faiveley Transport Amiens and Ellcon National US$15 million plus US$0.8 million in interest. This decision particularly punishes the trade secret misappropriation, acts of unfair competition and unjust enrichment relating to the manufacture of brake cylinders and actuators that make up brake systems.
- In accounting terms, the Wabtec accrued income was recorded in the balance sheet under "Other current assets" for an amount of €12.3 million (US$15.8 million). In the income statement, only the portion corresponding to damages for the period between 2007 and the end of March 2013 was recognised, *i.e.* €8.6 million (before expenses). The balance of €3.7 million, corresponding to damages for future periods, was recognised as a liability in the balance sheet under "Current liabilities". The total positive impact on the 2012/2013 operating profit was €6.2 million, after taking into account legal costs. This positive impact is composed of €1.7 million corresponding to the refund of costs incurred in the past and recognised under "other income", and €4.5 million corresponding to net damages recognised under gross profit.
- The Combined General Meeting of 14 September 2012 delegated authority to the Management Board to proceed with the allocation of free ordinary shares in the Company, either in existing shares or shares to be issued, within the limit of 1% of the share capital on the date of the General Meeting.

  As its meeting held on 24 October 2012, the Management Board decided to implement this delegation and to allocate 10,000 free performance-based shares to a beneficiary.

  At its meeting held on 3 December 2012, the Management Board also decided to implement this delegation and to allocate free shares. This decision was made as part of an employee shareholding plan aimed at a broader population of executives. The programme provides that an employee holding shares in the Company in a personal capacity will be granted two free shares for every share held, not exceeding a limit set for each level of management.

  At its meeting held on 15 January 2013, the Management Board established the final list of beneficiaries and the number of free shares to be granted. A total of 72,386 shares are thus to be granted to 179 beneficiaries. The allocation of the shares will be final at the end of a two-year vesting period, or four years for non-French residents.

  Thierry Barel and Guillaume Bouhours, both beneficiaries of free shares under this plan, are subject to an additional retention condition in their capacity as corporate officers. They must retain at least 50% of shares granted to them by the Management Board under this new plan after the end of the vesting period defined by plan regulations. This rule will apply as long as they do not hold shares of the Company, acquired in the various plans to grant stock options or free shares of the Company, worth at least the equivalent of one year's net salary.

1.1 GROUP OPERATIONS 2012/2013 AND CONSOLIDATED FINANCIAL STATEMENTS

In accordance with legal provisions, the financial statements of companies under direct or indirect control of Faiveley Transport were consolidated at 31 March 2013 with those of the parent company. The principles and conditions of this consolidation for the financial year 2012/2013, the related consolidation scope and the restatements undertaken in accordance with the accounting techniques of consolidation are presented in the notes to the consolidated financial statements.

1.1.1 CONSOLIDATION METHODS

The year ended 31 March 2013 had a normal duration of 12 months. The Group's functional and presentation currency is the Euro. Figures are expressed in thousands of Euros unless indicated otherwise.

1.1.2 CHANGE IN GROUP STRUCTURE

The financial year saw a merger between Faiveley Transport Ibérica SA (acquiring company) and Transequipos SA. For accounting and tax purposes, this merger is retroactive to 1 April 2012.

1.1.3 SUBSIDIARY OPERATIONS

↗ ANNUAL SALES

By region of delivery	2012/2013	2011/2012
Europe	563,225	544,978
Americas	155,368	106,263
Asia-Pacific	262,640	243,043
Rest of World	6,473	6,239
TOTAL GROUP	**987,706**	**900,523**

Faiveley Transport generated sales of €988 million for the full 2012/2013 financial year, an increase of 9.7% compared to the previous year. On a like-for-like basis, organic growth was 3.3%, in line with forecasts made at the beginning of the year. Over the year, the acquisition of Graham-White had a positive contribution of 4.5% and there was a positive foreign exchange effect of 1.9%.

On a like-for-like basis, this sales growth reflects the following developments by region:

- in Europe, organic sales growth was 3%, with a strong business activity in Italy, as well as an increase in project deliveries, especially in France, in the UK and in Benelux;
- sales in the Asia-Pacific region grew by 5%, primarily driven by the significant increase in project deliveries in Russia, as well as by growth in South-East Asia and India. Sales to China were virtually unchanged during the financial year;
- North and South America reported organic growth of 4%, thanks to the delivery of projects in the "Transit" segment, which offset the decline in the "Freight" segment.

The Services activity achieved an excellent year with sales growth of 22%, including organic growth of 9% and the contribution of the acquisition of Graham-White (primarily a Service business).

During the financial year, revenues from the original equipment business were stable on a like-for-like basis.

The growth experienced by the Group confirms both the strength and balance of its strategic business model, with a presence in all geographic regions and all market segments and a wide product range, both in original equipment and in services.

↗ SALES BY ACTIVITY

	2012/2013	2011/2012
Energy & Comfort	22%	19%
Brakes & Safety	20%	26%
Access & Information	17%	19%
Services	41%	36%

The Services activity achieved sales growth of 22% during the financial year, including organic growth of 9%, and now accounts for 41% of the Group's total sales. This significant increase reflects the success of sales initiatives aimed at expanding the Group's range of services, as well as buoyant Italian and French markets and the contribution of the recent acquisition of Graham-White (primarily a Services business).

Within original equipment operations, Energy & Comfort experienced a year of strong growth whilst the relative share of Brakes & Safety fell, due in particular to the slowdown in the American freight market and the fall in the number of locomotive deliveries in China.

1.1.4 CONSOLIDATED IFRS FINANCIAL STATEMENTS OF FAIVELEY TRANSPORT

1.1.4.1 Published financial statements

INCOME STATEMENT

	2012/2013	2011/2012
Sales	**987,706**	**900,523**
EBITDA[(1)] *% of sales*	127,454 *12.9%*	108,219 *12.0%*
Profit from recurring operations *% of sales*	112,299 *11.4%*	94,689 *10.5%*
Operating profit *% of sales*	**111,110** *11.2%*	**93,272** *10.4%*

Net earnings per share	**4.17**	**3.38**

(1) Operating profit + amortisation and depreciation.
(2) Excluding treasury shares.

Operating profit

Profit from recurring operations totalled €112.3 million, or 11.4% of sales.

After allocation of restructuring costs and net proceeds from the disposal of non-current assets, the Group's operating profit increased by 19% to €111.1 million, or 11.2% of sales, a year-on-year increase of 0.8 margin percentage point. Sales growth and strict control over sales, general and administrative costs led to this significant increase despite a decline in the gross margin rate. The main events of the financial year include the positive effect of the successful trial against Wabtec in the US (with a €6.2 million positive impact on operating profit out of a total net gain of €10 million) and a major loss provision booked on the RER Brussels project, due to technical difficulties in the development of sliding steps and on-board doors.

The various items making up operating profit may be analysed as follows:

	2012/2013	2011/2012
Sales	987,706	900,523
Gross profit	248,335	233,801
Administrative costs	(76,532)	(78,719)
Sales and marketing costs	(43,790)	(39,898)
R&D costs	(13,363)	(11,111)
Other income and expenses from recurring operations	(2,351)	(9,384)
Profit from recurring operations	**112,299**	**94,689**
Net expense from non-recurring operations	(1,189)	(1,417)
OPERATING PROFIT	**111,110**	**93,272**

RECOGNITION OF DAMAGES AND INTEREST AWARDED IN THE WABTEC TRIAL

Compensation of €8.6 million recognised in the income statement was €6.2 million after taking account of lawyers' fees incurred during the financial year. €4.5 million of this net income was recognised under "Gross Profit" (compensation for past damage) and €1.7 million in "Other income and expenses from recurring operations" (reimbursement of lawyers' fees incurred in previous financial years).

GROSS PROFIT

The Group's gross profit for the year ended 31 March 2013 totalled €248.3 million (25.1% of sales) compared to €233.8 million (26.0% of sales) for the year to 31 March 2012.

As in the first half of the year, an improved harmonisation in expense allocation between fixed costs and cost of sales accounted for a 0.2 percentage point decline in gross margin, with no impact on operating profit. Excluding this effect, the 0.7 percentage point decline in gross margin was primarily due to the ramp-up of the major new platforms incurring significant engineering costs and, for some of these platforms, technical development issues.

SALES, GENERAL AND ADMINISTRATIVE COSTS

Sales, general and administrative costs were €120.3 million in the 2012/2013 financial year, compared to €118.6 million in the previous year, which was a year-on-year increase of 1.4%.

These costs accounted for 12.2% of sales, compared to 13.2% at 31 March 2012.

On a constant consolidation scope (excluding the acquisition of Graham-White and the harmonisation of expense allocation) and foreign exchange rates, these costs decreased by 2.3% due to continuation of the cost cutting policy implemented by the Group since 2009/2010.

RESEARCH AND DEVELOPMENT COSTS

Research and Development costs are taken to the balance sheet if they meet the capitalisation criteria set by IAS 38. If not, they are recognised as expenses.

The Group's research and development costs that were recognised as expenses were €13.4 million (1.4% of sales) during the 2012/2013 financial year, compared to €11.1 million (1.2% of sales) for the year ended 31 March 2012.

OTHER OPERATING INCOME AND EXPENSES

Other operating income and expenses correspond to a net expense of €2.4 million during the financial year compared to a net expense of €9.4 million for the year ended 31 March 2012.

The reduction in this item during the financial year was primarily due to lower non-contract related provisions, as well as to the recognition of €1.7 million in compensation awarded in the Wabtec case (income that corresponds to the reimbursement of costs incurred in previous financial years).

PROFIT FROM RECURRING OPERATIONS

As a result, profit from recurring operations increased by 18.6% compared to the previous financial year. It totalled €112.3 million (11.4% of sales) compared to €94.7 million (10.5% of sales) the previous financial year.

NET EXPENSE FROM NON-RECURRING OPERATIONS

The majority of the net expense from non-recurring operations was due to restructuring costs and the net proceeds from the disposal of property, plant and equipment and intangible assets.

Restructuring costs amounted to €1 million during the period compared to €1.2 million the previous financial year. During the 2012/2013 financial year, these costs primarily related to the Chinese platform door subsidiary.

As at 31 March 2012, the loss on the disposal of non-current assets for the period was €0.2 million.

Consolidated net profit

The consolidated net profit was €63.6 million compared to €51.2 million the previous financial year, an increase of 24.3%.

Net profit was influenced by the following items:

NET FINANCE COST

Net finance cost improved to €13.6 million at 31 March 2013, compared to a net cost of €15.2 million at 31 March 2012. This charge is analysed as follows:

- the net cost of financial debt for the year, which totalled €10.6 million compared to €10.7 million the previous financial year. The sharp fall in market rates combined with improved hedging offset the additional interest burden related to the debt incurred to acquire Graham-White;
- financial instruments resulted in a net negative impact of €1.4 million;
- a favourable impact on the realised and unrealised exchange adjustments for €1.1 million;
- other financial income and expenses resulting in a net negative impact of €2.8 million, comprising interest on bank guarantees, interest on pension commitments, the effects of the reversal of discounting the value of minority shareholder put options and other financial income and expenses.

INCOME TAX

Income tax was €33.9 million compared to €26.9 million for the year to 31 March 2012. This rise was due to the increase in profit before tax from €78 million for the year to 31 March 2012 to €97.5 million for the year to 31 March 2013. As a percentage, the effective tax rate was 34.7% for the year compared to 34.4% for the previous year. This increase is analysed as follows:

- the poor results recorded by the Chinese subsidiaries, in particular by the two platform door subsidiaries, FTMT Shanghai and Faiveley Transport Far East, which benefit from a reduced tax rate;
- for the French subsidiaries, the tax law no longer allows a 100% deduction of financial charges but now rather an 85% deduction, a new 3% tax on dividends has been introduced and the relative significance of the CVAE charge, which has been recognised as income tax since the 2010/2011 financial year, increased with similar amounts in both years (approximately €2 million).

The income tax rate paid was 30.3%, compared with 38.1% for the year to 31 March 2012.

NET PROFIT FROM DISCONTINUED OPERATIONS

Nil.

MINORITY INTERESTS

Minority interests comprise shares held by minority shareholders in Shanghai Faiveley Railway Technology (51%-owned), Faiveley Transport Schweiz AG (80%-owned), Nowe GmbH (75%-owned) and Amsted Rail-Faiveley LLC (67.5%-owned).

Group share of net profit

Taking the above-mentioned items into account, the Group's consolidated net profit for the year increased by 25% to €59.3 million, compared to €47.4 million the previous year.

Net earnings per share was €4.17 compared to €3.38 for the year to 31 March 2012, an increase of 23%. Net earnings per share is calculated after deducting treasury shares held by Faiveley Transport at the end of the financial year, *i.e.* 382,050 shares at 31 March 2013 and 427,528 shares at 31 March 2012.

SUMMARISED BALANCE SHEET

	2012/2013	2011/2012
Goodwill	651,235	648,981
Net non-current assets	120,260	114,752
Deferred tax assets	44,816	43,598
Current assets	482,715	457,151
Cash and cash equivalents	174,958	210,247
TOTAL ASSETS	**1,473,984**	**1,474,729**
Equity	559,860	505,145
Current and non-current provisions	116,918	116,566
Deferred tax assets	28,271	22,090
Current and non-current financial debt	377,441	448,285
Current liabilities	391,494	382,643
TOTAL EQUITY AND LIABILITIES	**1,473,984**	**1,474,729**

Goodwill

Goodwill increased by €2 million, from €649 million at 31 March 2012 to €651 million at 31 March 2013.

This change was primarily due to:

- the €0.5 million (US$0.6 million) adjustment of Graham-White's acquisition goodwill during the allocation period;
- the translation adjustments of the Ellcon National, Amsted Rail and Graham-White Manufacturing Co. goodwill (assessed in US$) totalling €4.6 million;

- the downward adjustment of Nowe GmbH's acquisition goodwill totalling €2.8 million, following the discounting of the put option held by minority shareholders.

Net non-current assets

Net non-current assets increased from €114.8 million at 31 March 2012 to €120.3 million at 31 March 2013, an increase of €5.5 million.

The constituents of non-current assets are detailed in the Notes E.2, E.3 and E.4, respectively, to the consolidated financial statements.

Working capital requirements (WCR)

	2012/2013	2011/2012
Inventories	144,453	144,000
Work-in-progress on projects	98,524	91,048
Advances and prepayments paid	3,893	3,811
Trade receivables	184,193	179,402
Other current assets	42,304	29,563
Advances and prepayments received	(120,860)	(124,674)
Current liabilities	(270,634)	(257,969)
WORKING CAPITAL REQUIREMENTS	**81,873**	**65,181**

At 31 March 2013, the net WCR[(1)] was €81.9 million, an increase of €16.7 million compared to 31 March 2012. This change was primarily due to an increase in work-in-progress on projects (up €7.5 million) following the launch or continuation of the engineering phase of numerous projects, a €4.4 million increase in trade receivables, a €12.7 million increase in trade payables, a €3.8 million decline in customer advances and the recognition of accrued income related to the compensation from the Wabtec legal action under other assets, totalling €12 million.

Cash and cash equivalents

	2012/2013	2011/2012
Short-term investments	22,035	41,080
Factoring (uncalled cash)	46,875	50,205
Banks (available cash)	105,925	118,817
Cash	133	144
TOTAL CASH AND CASH EQUIVALENTS	**174,958**	**210,246**

The programme to sell receivables under non-recourse agreements totalled €92.8 million at 31 March 2013, the same level as the previous year. This included €48.1 million from factoring (€46,9 million net of holdbacks) and €44.7 million from the sale of receivables.

Equity

Equity amounted to €559.9 million at 31 March 2013, compared to €505.1 million at 31 March 2012, an increase of €54.8 million.

This movement is primarily due to the impact of:

- the net profit for the year: €63.6 million;
- the payment of a cash dividend to shareholders of the parent company and other minority shareholders: €(15.4) million;
- the movement in translation differences: €4.3 million.

Current and non-current provisions

At 31 March 2013, current and non-current provisions totalled €116.9 million, compared to €116.6 million at 31 March 2012, a net increase of €0.3 million.

The various items comprising this movement may be analysed as follows:

- €5.2 million increase in provisions on contracts;
- €2.3 million decrease in provisions for pension commitments;
- €1 million decrease in provisions for restructuring;
- €1.6 million decrease in other provisions for risks and charges.

Net financial debt

Net financial debt, as defined in Chapter 3.3.6 Note E.13.4 to the consolidated financial statements, decreased by €36.8 million, from €213.4 million at 31 March 2012 to €176.5 million at 31 March 2013.

This change was due to:

- a €72.3 million decrease in financial debt;
- a €35.3 million decrease in cash and cash equivalents;
- a €0.2 million decrease in financial receivables.

From a financial point of view, this decrease in net financial debt during the year was due to the strong level of cash generation, with a free cash flow of €49 million during the 2012/2013 financial year.

As a result, the Group's financial structure strengthened during the year:

- the net debt to EBITDA ratio was 1.47 at 31 March 2013 compared to 1.77 at 31 March 2012;
- the net debt to equity ratio (gearing ratio) was 31.5% at 31 March 2013, compared to 42.2% at 31 March 2012.

From a financial point of view, Group equity includes treasury shares, which are held for transfer as part of the share purchase or subscription option plans. The exercise of share options (179,996 at the end of March 2013) would result in an increase of €8.9 million in Group cash and cash equivalents. The value of treasury shares not allocated to stock option plans amounted to €5.9 million at the 31 March 2013 share price (including treasury shares held as part of the liquidity contract). The total value of treasury shares therefore came to €14.9 million, compared to €17.5 million at 31 March 2012.

(1) Calculated based on net balance sheet values, on a current basis and after deducting losses on completion up to the value of projects in progress. The WCR used in the cash flow statement presented in the consolidated financial statements has been calculated excluding changes in the consolidation scope, movements in foreign exchange and before provisions for losses on completion deducted from the asset.

CASH FLOW STATEMENT

	2012/2013	2011/2012
Net profit	**63,611**	**51,175**
+ Movements in amortisation, depreciation and provision charges and other	27,929	19,997

Cash and cash equivalents at start of period	**206,823**	**192,711**
CASH AND CASH EQUIVALENTS AT END OF PERIOD	**165,913**	**206,823**

Self-financing capacity

At 31 March 2013, self-financing capacity was €91.5 million, a significant increase of 28.6% compared to the year-end at 31 March 2012 (€71.2 million).

This change was due to the increase in 2012/2013 net profit, *i.e.* €63.6 million, compared to €51.2 million in the previous year, offset by a €6 million increase in deferred tax. Amortisation and provision charges increased by €1.4 million during the year and the cost of share-based payments rose by €0.5 million.

Net cash from operating activities

Cash flow from operating activities rose by €4.5 million over the financial year, to €71.6 million. This increase is a result of a €20.4 million improvement in self-financing capacity, offset by the €15.9 million change in working capital requirements.

The change in working capital requirements was primarily impacted by the accrued compensation income following the successful legal action against Wabtec, recognised for an amount of €12.3 million under other current assets.

Apart from this effect, the operating working capital requirement increased slightly, up €7.6 million, primarily due to:

- the €7.5 million increase in work-in-progress on projects due to the launch or continuation of the engineering phase of numerous contracts secured on new train platforms over the last three years;
- the €4.4 million increase in trade receivables;
- the €12.7 million increase in trade payables;
- the €3.8 million reduction in customer advances.

Net cash used in investment activities

Investments in property, plant and equipment and intangible assets increased by €3.5 million during the year. Financial investments were stable compared to the previous year (€0.2 million).

Net cash from (used in) financing activities

The Faiveley Transport Group distributed cash dividends of €15.4 million, compared to €18.1 million in the previous year. In addition, stock options valued at €0.5 million were exercised during the year.

The change in borrowings was primarily due to the annual repayment of €34 million on the syndicated loan signed in December 2008 and reduced drawdowns on short-term credit facilities over the latter part of the 2012/2013 financial year.

1.1.4.2 Research and Development

The majority of the research and development conducted within the Group falls within the engineering included in contracts and is recognised as cost of sales.

In application of IFRS standards, €2.7 million in development costs was capitalised during 2012/2013, compared to €2.9 million in the previous year. The amortisation charge was €2.2 million for the year to 31 March 2013, compared to €1.9 million for the year to 31 March 2012.

At 31 March 2013, the total development costs recognised in balance sheet assets were €10.4 million, compared to €9.5 million at 31 March 2012. Development costs are amortised over 3 years.

1.1.4.3 Business developments since year-end

POST-BALANCE SHEET EVENTS

On 17 May 2013, Faiveley Transport acquired 100% of Schwab Verkehrstechnik AG, a leading designer and manufacturer of couplers and buffers for freight and rail transit markets. This company, which reported sales of CHF 23 million in 2012, is based in Schaffhausen (Switzerland) and has 42 employees.

2013/2014 OUTLOOK

Order book at 31 March 2013

The Group posted an order book of €1,616 million at 31 March 2013, reflecting a decline of 4.4% compared to 31 March 2012, down 5.2% on a like-for-like basis.

Enterprise Resource Planning System (ERP)

The basic configuration has been implemented at three pilot sites (Leipzig, Plzen and Gennevilliers). Following a stabilisation phase, a standardised version will be deployed throughout the Group, starting in 2013/2014.

Outlook

The Group expects organic growth between 0% and 3% for the 2013/14 financial year, with the following sales outlook by region:

- Europe should achieve moderate growth, particularly due to the start of serial production deliveries of certain major projects awarded to the Group over the last few years;
- Asia-Pacific sales should be broadly stable, with an acceleration of locomotive deliveries in China that should offset the decline in the Group's metro projects in this country. In Russia, the level of activity should be consolidated after two years of very strong growth. India is targeting significant sales growth due to the delivery of metro equipment;
- in North America, the freight market is expected at approximately 35,000 cars per year, in line with the level of business activity noted in the past few months. Against this backdrop, the Group will seek to pursue its development initiatives, particularly in the locomotive and service segments.

1.1.4.4 Cash and capital

SHARE CAPITAL OF FAIVELEY TRANSPORT

See chapter 1.3 Information on the share capital.

FINANCING CONDITIONS

a) Loans

SHORT-TERM BANK FINANCING

During the first half of the year, a new €25 million revolving facility was negotiated to meet the Group's general requirements. This facility was secured for a period of one year and was renewed in April 2013.

NON-BANK FINANCING

To partly refinance the acquisition of US company Graham-White Manufacturing Co. and diversify its financing sources, on 12 April 2012 the Group launched its first private placement bond issue in the US with two institutional investors, for a total of US$ 75 million, made up of two tranches:

- a first tranche of US$ 30 million with a 10-year final maturity, redeemable between 2017 and 2022;
- a second tranche of US$ 45 million of bullet loan with a 10-year maturity.

The average fixed rate is 4.91% per year.

FINANCIAL CONDITIONS

The above financing facilities are subject to a number of financial conditions, including three main ones:

- leverage ratio, which refers to Consolidated Net Debt/Consolidated EBITDA over a 12-month moving average to the end of each half-year accounting period, must not exceed 2.5.

  At 31 March 2013, the ratio was 1.47;
- gearing ratio, which refers to Consolidated Net Debt/Consolidated Equity, must not exceed 1.5 at the end of each half-year accounting period.

  At 31 March 2013, the ratio was 0.31;
- the "Consolidated EBITDA/Net Cost of Consolidated Financial Debt" ratio, which must not fall below 3.5 at the end of each half-year accounting period.

  At 31 March 2013, this ratio was 11.6.

b) Analysis of Faiveley Transport Group net debt

At 31 March 2012, Group debt was €213.4 million, comprising financial debt taken out from banks and two institutional investors totalling €433.5 million, offset by financial receivables of €9.9 million and cash and cash equivalents of €210.2 million (including short-term investments of €41 million and cash of €169.2 million).

At 31 March 2013, Group debt was €176.5 million, comprising financial debt taken out from banks totalling €361.2 million, offset by financial receivables of €9.7 million and cash and cash equivalents of €174.9 million (including short-term investments of €22 million and cash of €152.9 million).

Cash of €152.9 million included €46.9 million of uncalled factoring and €106 million of available cash.

It should be noted that Faiveley Transport holds 382,050 treasury shares that are designated, in their majority, to be purchased by managers within the share purchase or subscription option plans or to be allocated to managers who benefit from the free share allocation plans.

These shares are currently deducted from equity. The exercise of these stock options (179,996 at the end of March 2013) would result in a cash inflow for the Group of €8.9 million. Unallocated treasury shares were valued at €5.9 million at the 31 March 2013 stock market price (including treasury shares held as part of the liquidity contract).

RESTRICTIONS ON THE USE OF CAPITAL

The debt documentation includes limitations in terms of:

- lease finance;
- disposal of receivables;
- various financing;
- overdraft pursuant to a cash pooling agreement;
- seller loan;
- bank guarantees on long-term contracts.

FINANCING OF OPERATIONS AND EXPECTED SOURCES

Cash flow generation and available finance currently cover the Group's recurring capital expenditure requirements.

The recent financing transactions ensure the availability of medium-term resources.

Euro-denominated amortisable repayments are funded by cash flow generated outside the US, and the US dollar repayments by cash flow generated by the American subsidiaries, with the bullet portion due in June 2016 to be refinanced when required.

The conditions for the early repayment of Group debt notably include the loss of the majority control of voting rights by the Faiveley Family and failure to comply with financial ratios.

1.1.5 RISK FACTORS

1.1.5.1 Market risks relating to Group operations

The Group's long-term operations depend on multiple factors such as global economic growth, public policy relating to public transport as well as the price of raw materials.

Government measures to control public spending that are related to the high level of debt of certain states could result in a reduction in public investment in the rail transport market, with the risk of a heightened tax burden at a local level.

The Group also faces strong competition from both its traditional rivals and new contenders from emerging countries, particularly Asian, which benefit from cheaper labour. The impact of this increased competition could have an effect on the prices, payment terms, lead times and performance expected by the customer. Faiveley Transport has adjusted its industrial strategy in line with this new landscape and has adapted its product range to better meet its customers' expectations.

The Group remains competitive in most markets and considers that its order book, as well as all the measures taken, in particular its cost cutting plans and its plans to adapt the workforce to meet changing demand and its geographical coverage, should enable it to remain profitable and to withstand the competition.

CONTRACT EXECUTION RISK

Faiveley Transport's activity involves the signing of complex contracts where obligations regarding the reliability, safety and durability of equipment can have a relatively lengthy lifespan, linked to the life of the train or the metro which they are equipping. Risks related to the development of new technologies must be taken into account along with those linked to the obsolescence of components.

Sales and the profitability of projects depend on elements that sometimes fall outside the Group's control, such as the occurrence of unforeseen technical problems relating to the equipment provided, deferrals or delays in the execution of contracts, and financial difficulties faced by customers or suppliers. Profit margins on projects may also differ from those originally envisaged insofar as the costs and the productivity expected may vary during the execution of the contract. Accordingly, the profitability of certain contracts may significantly affect the Group's results and cash flow over a given period. Although these cases remain highly unusual, Faiveley Transport could be faced with bank guarantees payable on first demand from its customers for potentially large sums.

The Group has implemented strict risk control procedures that apply from the submission of the bid through to the performance phase of contracts. These risk control rules and procedures are formalised in the Group's Internal Control Manual.

Faiveley Transport cannot however guarantee that all these measures will be sufficient. Certain contracts may be subject to additional costs, delays or poor technical performance leading to the payment of penalties or compensation. Such difficulties may have a negative effect on the Group's results and financial position.

During the 2012/2013 financial year, the Group faced technical development problems relating to certain new train platform contracts secured over the previous three years. These problems led to substantial provisions, in particular on the RER Brussels contract for on-board doors.

SUPPLIER RISK

The organisation and management of quality, the selection and monitoring of suppliers and subcontractors, the follow up of complaints and the contractual environment are adapted to the nature of potential risks.

As regards suppliers, a selection process is in place that includes, in addition to the criteria of financial stability, a selection audit by the subsidiary's supplier Quality Department and a follow-up of performance. Every return or rejected component leads to the setting up of a working group dedicated to resolving the issue, in order to analyse the causes and make a decision as to changes to be made to prevent the same problem from reoccurring.

The production series are short. Orders for supply of raw materials and components are carried out by project. The most unfavourable case would thus be a design error impacting an entire project. This may represent several thousand parts. The nature of the fault can be rapidly understood due to the expertise of the teams who can recommend the relevant technical solutions.

As part of its business, the major operating entities of the Group may be confronted with a state of dependence on certain suppliers and/or subcontractors for certain components, or with certain suppliers or subcontractors being dependent on the Group.

The implementation of best purchasing practices and the management of purchases by type of commodity and by supplier enables us to accurately assess these risks of dependence and take the necessary steps.

Increased monitoring, due to the international economic crisis, was put into place in order to pre-empt the financial failure of any major supplier.

RISK RELATED TO THE DEVELOPMENT OF NEW PRODUCTS

Faiveley Transport designs and develops products with high-added technological value. The Group has to develop, within increasingly short time frames, new products that are both sophisticated and complex. The products must be adapted to any new regulatory standards within their markets. The time available for testing is steadily decreasing, whilst the risks may increase. It is sometimes necessary to modify products during the manufacturing process or when customers begin operating them.

Design and development are carried out as part of a customer project or in-house R&D programmes initiated by the Group. For each development project, a formal plan is prepared, split into fundamental tasks, implemented and updated by the project manager and project coordinators. The features taken into account at the start of the project are functional and performance requirements, regulatory and legal requirements where applicable, information from previous similar designs and all other requirements necessary for design and development. Project reviews are carried out and reports produced. The verification of the designs comprises execution of calculations, the completion of FMEA (Failure Mode Effects Analysis) as well as verification of the plans.

The internal validation of the design is carried out by test laboratories for the prototype stage on the basis of a formalised validation plan. Prototypes are validated by the customer through an FAI (First Article Inspection).

Every new order for parts is subject to a material check, dimension check, verification of compliance with legal and regulatory requirements and an environmental analysis.

The products carry an identification plate showing an identification number and serial number, enabling the date of construction to be found and the trial notes with the name of the related operator. The serial number of devices comprising a sub-assembly is identified from these notes. Small parts are traced by production batch.

Given the degree of technology involved in certain products, Faiveley Transport cannot guarantee that it will not encounter fresh problems or delays, despite the technical validation process introduced within the Group.

When issues arise, there is no guarantee that the total final costs will be absorbed by the amounts provided for, with a potential negative effect on the Group's financial performance and financial position.

Warranty provisions are calculated based on a specific percentage for each product manufactured and the reliability experienced over time. Percentages vary between 1% and 6% depending on products and are applied to sales achieved, project by project.

At 31 March 2013, the warranty provisions totalled €44.9 million.

The amounts provided in respect of the warranty and Customer Services, as well as litigation declared by customers and penalties payable are disclosed in the notes to the consolidated financial statements (Note E.12.3).

1.1.5.2 Financial risks and market risks

As part of its business, the Faiveley Transport Group is exposed to various types of market risks, in particular foreign exchange, interest rate, raw material, credit and liquidity risks. A description of these risks is provided below and additional information is disclosed in Note E.14 to the consolidated financial statements.

The Group's management of foreign exchange, interest rate and raw material risks seeks to minimise the potentially unfavourable effects of the financial markets on the Group's operating performance.

The Group uses derivative financial instruments to cover its exposure to fluctuations in foreign currency exchange rates. As part of its hedging policy, the Group may use currency swaps, forward hedges, exchange rate options and structured products.

The Group covers its exposure to interest rate risk by the use of swaps and options.

The Group hedges its raw material exposure through raw material swap contracts.

The Group does not use derivatives for speculative purposes.

EXCHANGE RISK

The main currencies concerned are the US Dollar, Hong Kong Dollar, Czech Koruna, Swedish Krona, Pound Sterling and Chinese Yuan.

The management of the exchange risk of commercial contracts, where permitted by regulatory requirements, is centralised by the Group Treasury Department and comprises two parts: the certain and the uncertain risk.

- Exchange risk management relating to tenders in foreign currencies (uncertain risk):

  The Faiveley Transport Group is required to submit tenders denominated in foreign currencies. The Group's hedging policy is not to put into place hedge instruments during the offer phase, unless when specifically decided by Management. The aim is to manage the exchange risk through normal commercially available means. If necessary, the Group Treasury Department uses mainly exchange options.

- Exchange risk management relating to commercial contracts (certain risk):

  Commercial contracts in foreign currencies (most often successful tenders) are hedged by the Group Treasury Department from contractual commitment with derivative instruments. Instruments used mainly include forward purchases and sales and exchange swaps. Group Treasury may also use options.

Information concerning derivative financial instruments currently in place to hedge the exposure to exchange risks for future purchases and sales is disclosed in the notes to the consolidated financial statements (Note E.14 – Financial instruments and financial risk management).

The Group's policy is to systematically hedge against currencies, except for certain very long-term contracts and certain currencies, which are faced with the technical limitations of hedging or prohibitive cost.

Recurring commercial exposure, excluding the subsidiaries' projects are hedged by Group Treasury based on an annual budgetary approach and through forward purchase or sale contracts.

The Group's exposure resulting from all its commercial contracts is detailed in the consolidated financial statements (Note E.14.4).

Intra-Group financing contracts are hedged by Treasury through exchange swap contracts.

Impacts on the income statement due to variations in the Euro (+/-10%) against major foreign currencies and on items not hedged against and recorded at 31 March 2013 are presented in the consolidated financial statements (Note E.14.4).

INTEREST RATE RISK

The interest rate risk to which the Group is exposed is mainly due to long-term loans amounting to €361.2 million at 31 March 2013 (see details in the consolidated financial statements, Note E.13), of which €292.6 million related to the syndicated debt.

The syndicated debt, excluding the revolving facility, is indexed on variable USD Euribor and Libor interest rates and can be hedged in accordance with the Group's interest rate risk policy. All revolving facilities, drawn or undrawn, bear a variable rate and are not subject to interest hedges. The same applies to the US private placement bond issue, which bears a fixed rate.

To manage this risk, the Treasury Department has implemented a hedging strategy using interest rate swaps, tunnels, caps and options.

The exposure to Euro interest rates is covered for between 77% and 83% of the total debt drawn down based on interest rate fluctuations for the 2013/2014 period.

The syndicated debt denominated in US dollars is no longer being hedged. However, taking into account the "US private placement" bond issue, exposure to interest rate changes is limited to 26% of the debt for the period 2013/2014.

The estimated cost of syndicated debt in 2013/2014 is 1.94%, including hedges and spreads for the debt in Euros. For the debt in US dollars, which includes the US Private Placement, the estimated cost is 3.87%. The total cost of the Group's debt for 2013/2014 is therefore estimated at 2.5%.

At 31 March 2013, outstanding Euro-denominated syndicated debt was €267.4 million, with corresponding interest rate hedges for €192.5 million of this. The amount of the US dollar-syndicated debt was US$32.1 million.

Net exposure and the sensitivity analysis are described in the notes to the consolidated financial statements (Note E.14.4.b Interest rate risk).

RAW MATERIAL RISK

The Faiveley Transport Group is exposed to increases in the cost of raw materials such as steel, cast iron, copper, aluminium and rubber, as well as to increases in transportation costs.

The Group has already anticipated these effects, both in the preparation of its tenders and in terms of its purchasing policy:

- certain contracts relating to projects include price indexation mechanisms that enable the Group to absorb a large part of the increases in raw material costs;
- the vulnerability of raw material purchases is taken into account when developing the purchasing budgets. These price changes are subject to rigorous control throughout the year by purchasing teams to limit their impact.

This information is disclosed in the notes to the consolidated financial statements (Note E.14.4.c).

CREDIT RISK

The Group enters into commercial relationships with third parties whose financial position is known to be healthy. The Group's policy is to verify the financial health of those customers wishing to obtain credit.

In the case of derivative instruments and cash transactions, counterparties are limited to the high-quality financial institutions that currently finance the Group.

The Group also practices debt factoring and the sale of receivables. Details of this are provided in the notes to the consolidated financial statements (Notes E.8 Current receivables and E.14.5 Credit risk).

LIQUIDITY RISK

The Company carried out a specific review of its liquidity risk and considers that it is in a position to meet its maturities.

The Group's Finance Department monitors all of the Group's liquidity in order to honour its financial commitments by maintaining a sufficient level of cash and financing facilities.

To partly refinance the acquisition of US company Graham-White Manufacturing Co. and diversify its financing sources, in the first half of the financial year, the Group was granted US$75 million *via* a private placement in the US.

In addition, a new €25 million credit facility with a one-year maturity was negotiated at the start of the financial year and renewed at the start of 2013/2014.

This debt is subject to a number of financial ratios. At 31 March 2013, the Group complied with all required ratios. The details of these covenants are commented in the notes to the consolidated financial statements (Note E.13 – Borrowings and financial debt).

Note E.14.6 to the consolidated financial statements provides additional information of the cash and cash equivalents position at 31 March 2013.

The Group had the following cash and cash equivalents at 31 March 2013:

	31 March 2013
Available credit lines (a)	145,244
Parent company cash (b)	(4,746)
Subsidiaries' cash and cash equivalents (c)	178,500
AVAILABLE CASH AND CASH EQUIVALENTS (1) = (a+b+c)	**318,998**
Financial liabilities due in less than one year (d)	37,311
Available credit lines maturing in less than one year and bank overdrafts (e)	106,928
NET CASH AND CASH EQUIVALENTS AVAILABLE DURING THE NEXT YEAR (1-d-e)	**174,759**

The "table of future cash flows", presented in the consolidated financial statements (Note E.14.6.b) provides a breakdown of future liabilities by maturity.

SHARE RISK

The Group does not hold a share portfolio but deposits excess cash balances. At 31 March 2013, it had certificates of deposits of €8.2 million, and fixed-term deposits of €13.8 million.

The risk of these instruments is deemed low.

1.1.5.3 Legal risks

This section provides a limited overview of the various forms of legal risks arising from the Group's operations and the execution of its contractual requirements. The Group considers that sufficient provision charges have been recognised to date to cover all risks and disputes.

When Faiveley Transport sells its products or signs sales contracts with the associated maintenance, it may be required to accept binding penalty clauses related in particular to delays, performance, availability of materials as well as relatively lengthy guarantee and obsolescence clauses. These contracts sometimes contain clauses enabling the customer to terminate the contract or return the product if performance requirements or delivery schedules are not met. These clauses, as well as the development, design and manufacturing of new products phase, can, in the event of problems, result in unforeseen costs related particularly to the application of penalties for delay and product modification as well as claims and disputes with the customers concerned.

RISK OF NON-CONFORMITY

The Faiveley Transport Group may be confronted by the usual risks encountered by all industrialists that produce and sell manufactured products, which entail liability for faulty products.

A Group subsidiary may be held liable by another professional (car builder, operator and maintenance) in the event of non-conformity of products delivered or non-compliance by the seller of contractual commitments in terms of timescale, reliability, life, etc. Guarantees concerning the proper operation of products delivered are granted for longer or shorter periods (between 12 or 36 months on average) according to the demands of the final customer, the type of project and its specific features. The risk related to this contractual guarantee is evaluated upstream and included in the price of the product.

Product risk is identified very early on, due to the understanding and technical feasibility study of the project by a specialised and dedicated team within the design office, as well as the selection of dual source suppliers to avoid any sudden interruption in the delivery of components or materials.

In order to limit the risk of non-conformity, the Group also uses the contractual technique that restricts certain types of damages between professionals, and even eliminates some of them (loss of profit, damage to image, loss of customer base or sales).

In addition, the Faiveley Transport Group uses insurers to cover operational civil liability and products adapted to its business and in compliance with customer requirements.

As part of equipment contracts, the Group's subsidiaries are contractually bound to maintain equipment with a life span of several decades. A specific plan is set up to manage obsolescence of each project, with the assistance of the manufacturer and/or operator. The requirement to keep equipment operational and reliable during this time period imposes on the equipment supplier the need to ensure leading edge technology and to set up a stock of spare parts in order to avoid a sudden break in supply. Contractual obligations (duty to alert, end of life orders, selection of a second source, etc.) are imposed on the Group's own suppliers.

In French contracts, the legal liability for hidden defects also applies throughout the life of the product even though, between professionals, its application may be expressly excluded by contract.

Liability as a result of product defects may also have an effect in terms of risk, even if the user often only knows the operator, while the chain of contract prevails between the operator, the car builder, the equipment manufacturer and the supplier.

At 31 March 2013, a €30.4 million provision for risk of non-conformity of products sold was recognised in the financial statements. These risks were estimated by project managers and engineers.

RISK OF COUNTERFEIT

In the area of intellectual property, the Faiveley Transport Group holds a portfolio of patents and brands that provide it with competitive advantages. Every entity with a design office has set up a process to monitor technology to detect all inventions patented by third parties that may thwart its future developments.

Groups within the leading technical project teams have been organised internally to detect every risk related to the counterfeiting of intellectual and/or industrial property rights that may be held at third-party premises.

The Group avoids granting licences to countries where counterfeiting is not easily punished.

Across the selection of specialists in intellectual property, the Group has built a portfolio of patents and brands that is regularly analysed and evaluated. On behalf of the Group, these specialists carry out surveillance of all similar patents and/or brands and take the necessary steps to protect the Group's rights in that area, both in France and abroad.

The technology, as well as the expertise held by the Group, are also automatically protected by terms of secrecy, which is reflected in the signature of confidentiality agreements with both customers and suppliers very early in the pre-contract relationship.

It should be noted here that, as part of an arbitration procedure carried out under the auspices of the International Chamber of Commerce, Faiveley Transport Malmö sought the conviction of Wabtec Corporation for the misappropriation by Wabtec, since 1 January 2006, of intellectual property relating to friction brake cylinders (BFC- TBU brakes), as well as two other braking product concepts (PB-PBA actuators) that are unique to Faiveley Transport. On 24 December 2009, the arbitration was notified to the parties: the arbitration award confirmed that Faiveley Transport is still the owner of trade secrets in relation to the manufacture of the products, and that Wabtec had breached the license agreement once it had been cancelled, as well as certain obligations resulting from this agreement. Furthermore, the award confirmed that certain aspects of the reverse engineering process implemented by Wabtec to obtain a product that is utterly different from Faiveley Transport's may be deemed tainted.

Faiveley Transport Malmö was awarded US$3.9 million in damages plus interest from Wabtec.

Wabtec was also ordered to pay the royalties that Faiveley Transport should have received in respect of products sold by Wabtec on orders resulting from contracts signed before the licence expired and delivered from 2006. In addition, Wabtec was ordered to cease using manufacturing drawings and other documents relating to these products, except for those that enable Wabtec to fulfil orders resulting from contracts signed before the licence agreement was revoked.

The enforcement order of the arbitration award in the US was granted by a New York Court on 10 May 2010. Wabtec implemented this final judgment.

Following the favourable outcome of the arbitration, on 14 May 2010, Faiveley Transport initiated a new legal action against Wabtec before the courts of New York, through its subsidiaries Ellcon National, Faiveley Transport USA, Faiveley Transport Nordic and Faiveley Transport Amiens, in compensation for damages suffered in the US on the basis of unfair competition and the violation of trade secrets. In a ruling on 13 April 2011, the district court in New York acknowledged that Wabtec was responsible to the corporate plaintiffs for acts of unfair competition, misappropriation of confidential and secret information, which was the property of Faiveley Transport, and unjust enrichment concerning the friction brake cylinders (BFC-TBU) and PB-PBA actuators.

On 28 June 2011, a jury in the New York Federal Court rendered a verdict against Wabtec for damages in the amount of US$18.1 million, plus interest, to Faiveley Transport USA, Faiveley Transport Nordic, Faiveley Transport Amiens and Ellcon National for market losses suffered in North America due to the dishonest conduct of Wabtec Corporation. Wabtec appealed this ruling on 26 August 2011. At the same time, the plaintiffs filed a counter-appeal contesting the judge's decision to reject their request for punitive damages. The New York Court of Appeals gave its ruling on 6 February 2013, upholding the order for Wabtec to pay the sum of US$15 million in compensation to the plaintiffs. The judge set the interest at US$0.8 million.

In May 2008, the US company Wabtec Corporation issued a writ against Faiveley Transport USA in the Pennsylvania courts for unfair competition on US soil. No figure was attributed to their claim. This proceeding was in response to the two procedures described above, launched by Faiveley Transport Group. On 23 September 2011, Wabtec waived the benefit of this proceeding after it was announced that the Faiveley Transport Group had obtained a favourable outcome before the New York Courts.

TAX RISK

The Group has set up the rules required to understand the subject in an international context and regularly uses external consultants, case by case, country by country, to best protect its interests.

A Tax Department was created within the holding company in January 2013.

Every Group subsidiary is led by a local team that must ensure that their business is conducted in compliance with the local regulations in force.

The tax audit instituted on Faiveley Transport Leipzig during the 2012/2013 financial year is being finalised. The adjustments notified to date relate for the most part to temporary items. A provision was recognised in the financial statements at 31 March 2013.

OTHER RISKS

- **Anti-competition risks:** the Group's business sector is not significantly exposed to this type of risk. In fact, the modest number of players as well as the system for public tenders is not open to this kind of illegal behaviour.
- **Corruption risks:** certain contractual requirements have been specifically considered and prepared to protect the Group against any abuse in this area. An ethics charter was set up and the Purchasing Department has formalised a Code of Conduct for its teams to protect itself against any abuse in this area.
- **Illegal practices:** certain Group companies and/or employees may be subject to investigations by the judicial authorities. These investigations could result in the Group being fined. The Group has internal control rules and procedures to manage the risks related to these illegal practices, which have been strengthened particularly in recent years. Within this context, Faiveley Transport has given every employee an ethics charter which requires strict compliance with the rules set out in particular to prevent corruption. However, given the extent of its geographic coverage, Faiveley Transport cannot guarantee that problems will not arise, or that such difficulties will not have a significant effect on its image or its financial performance.
- **Risks related to acquisitions, sales and other transactions:** the Group continues to make company acquisitions as well as to create joint ventures with foreign partners. In February 2012, Faiveley Transport finalised the acquisition of Graham-White Manufacturing Company. During the last few financial years, the Group also created joint ventures, in particular in China and the United States. These transactions can involve risks linked to the valuation of associated assets and liabilities, as well as in the integration of staff, operations, technologies and the products acquired. The Group does not have total assurance that these operations or companies do not include any unforeseen liabilities at the time the transaction is completed. Nevertheless, the Group minimises the risks by requesting that the seller provide guarantees proportionate to the size of the transaction as well as conducting extensive investigations with the assistance of external consultants.

1.1.5.4 Industrial and environmental risks

In this area, the Group has identified accurately and thoroughly the various classes of risks it may confront due to the nature of its business.

These classes are the following:

HEALTH AND SAFETY RISKS

In the countries in which it operates, the Group faces a significant amount of legislation and standards related to environmental protection that is increasingly restrictive, particularly in relation to air and water emissions, the use of hazardous products and waste disposal and decontamination methods. In the majority of countries in which the Group has industrial facilities, permits, licences, and/or authorisations or prior notifications are required for operations. These sites must comply with and are subject to regular inspections by the competent authorities.

The procedures aimed at ensuring the correct application of environmental, health and safety regulatory provisions are decentralised and controlled by each site. Environmental, health and safety costs are budgeted at site or activity level.

In each of the Group's industrial site, a safety coordinator manages all aspects of site "health, safety and environment" on a daily basis, making the necessary checks in the factory, studying and recording the products received, updating the job files and organising training.

The objective of general management is to integrate safety into the management system for quality and the environment (QHSE approach), an approach heavily promoted and supported by the Group's insurers.

The job files summarising the risks of various activities and specifying the required individual protection equipment are displayed at all workstations. Every accident with work stoppage is subject to a detailed analysis of the circumstances and causes and where necessary, leads to action being taken to prevent any recurrence.

At French sites, a single administrative document has been established and a fire work permit has been instituted for all third parties liable to work using hot spots on the premises.

Improvements have been made to the storage of chemicals and paint to avoid risk of fire.

CONTINUITY OF BUSINESS AFTER A DISASTER

Each industrial site has identified potential emergency and accident situations and set up regularly tested emergency plans.

Concerning the risk of production interruption following a fire or flood, it should be noted that the major industrial sites have set up emergency procedures describing the steps to take following a large scale incident that could fully or partly paralyse the operation of the site in question.

Business continuity plans are being developed at the Group's major sites in order to take the necessary steps and reduce consequences as soon as possible after an incident. A list of companies that can provide repair equipment as well as those specialising in decontamination of electrical devices, has been compiled.

Those in charge of taking the major tasks after a disaster have been designated in advance to design the most adequate response. Taking account of the size of these sites as well as, in some cases, the proximity of other Group establishments in the same geographical area, it is necessary to consider specific and rapid solutions to reduce the consequences of a large scale incident.

The majority of production tasks can be outsourced and are for the most part manual. The machines, though expensive, can be acquired relatively rapidly. In addition, the interdependence of sites is limited.

INCREASED COST OF RAW MATERIAL AND TRANSPORT RISK

This information is detailed in § 1.1.5.2 and in the notes to consolidated financial statements (Note E.14.4.c).

ENVIRONMENTAL RISK

The industrial sector in which the Group operates is subject to compliance with restrictive and multiple environmental standards. The production processes require the use of chemical products (paint, glue, surface treatment, etc.) that may pose a risk to the environment.

The major French sites are ICPE-classified (classified sites for the protection of the environment) and subject to a declaration system, and even authorisation from the competent regional authorities for some of them.

The administrative authorities may also require steps to be taken to prevent or treat, going as far as ordering the closure of sites, in the event of serious violations of applicable regulations in the area of labour and/or environmental law. The Faiveley Transport Group may also be held liable by third parties under the regulations protecting the environment and the general principle of criminal liability.

The Group is fully aware of the importance of managing compliance with regulations in the area of the environment by dedicating a senior engineer to the aspects of safety – health – environment, who must verify every day whether the site they are responsible for is compliant with the various applicable standards.

Audits carried out by the insurers have disclosed some weaknesses in the manner of understanding this risk. Even though the quantity of pollutants used in the business sector is very small, the Group may be called on to pay rehabilitation costs, fines or damages-interest relative to non-compliance with environmental standards.

The factories of Saint-Pierre-des-Corps and Amiens are both in industrial parks with a SEVESO classified site that stores oil and chemical products. Any issue on these sites close to the Group's production units could have a negative effect on their production capacity.

The sites of Saint-Pierre-des-Corps (Electromechanical) and La Ville-aux-Dames (Electronics) are situated in the flood plains of the Loire and Cher rivers. According to the risks map and the IGN69 system, the two sites are in an area of medium level risk. The two sites at Saint-Pierre-des-Corps are in a Natura 2000 area.

In addition, the Graham-White sites are located in areas at risk of flooding especially in the event of severe storms.

As the constraints of safety, environment and pollution are becoming ever greater, the Group is conscious that it may be obliged to incur expenditure, notably to enhance the procedures for monitoring soil, water and air pollution. However, these investments would not be significant for the Group.

In addition, in order to comply with European Directive n° 2004/35, the Group has decided to subscribe to additional guarantees in terms of insurance. Environmental damage and soil and water clean-up cover was added to the accidental and gradual environmental damage policies.

The Group is already committed to areas of improvement in the storage of products posing a danger to the environment (retention tank, anti-fire cabinets, management of condensates from compressors, elimination of PCB transformer, etc.) and the reduction in the emission of volatile organic compounds. The use of toxic products for surface treatment such as chromic acid and hydrofluoric acid, requires adequate and regular monitoring (once a quarter), which is carried out by each applicable site.

Below are specific matters facing the Group at present:

- Faiveley Transport Amiens, as the last remaining operator of classified facilities in Sevran, at 4 boulevard Westinghouse, a site occupied by Sab Wabco until 1999 for the production of cylinders for braking systems, was declared to be a polluted site and therefore likely to create pollution or represent an on-going risk for people and the environment, according to an order from the Prefect on 11 April 2005. This order requested that Faiveley Transport Amiens conform to certain procedures to remediate the site. It should be mentioned here that the land concerned was sold on 16 September 2002 by Faiveley Transport Amiens and that the acquirer, in an express condition of the transfer document, agreed to make it his personal business and to take full responsibility for all potential clean-up work deemed necessary under the administrative proceeding launched by the Prefecture of Seine Saint-Denis, regarded as complete as of the notification of the order mentioned above. The site was again sold under a legal deed signed on 16 December 2009. The new owner committed to carry out the remediation, pollution clean-up and soil improvement of the site, under his own responsibility and at his own expense, in line with current and future guidelines, formal notices and administrative rulings that have been or are liable to be taken against Faiveley Transport Amiens (formerly Sab Wabco) and to handle all complaints, legal actions, claims or proceedings related to the environmental condition of the building, its soil and subsoil. The new owner is a specialist in this type of work.

  On 21 June 2011, the Administrative Court of Montreuil dismissed the Commune of Sevran's claim disputing the implicit decision of the prefect of Saint-Denis to take no action and to close the investigation related to the request to remediate the site concerned. This decision was not appealed in the two months following the notification of the Administrative Court's judgment. This proceeding was thus closed.

- In 2003, the Brazilian subsidiary of the Sab Wabco Group, not yet acquired by the Faiveley Transport Group, sold land to the company Cyrela. A risk of soil pollution was identified in 2004, subsequent to the purchase of the Sab Wabco Group by Faiveley Transport, as a result of which the latter bore the costs of soil decontamination. Due to this risk of pollution, Cyrela retained a part of the sale price (R$3.7 million, or €1.6 million, remains outstanding).

  The situation is currently as follows: decontamination work continues under the agreed conditions. Site meetings are regularly held with the contractor and local authorities to assess soil quality. On completion of the work that will allow the contaminated soil to achieve a level of quality acceptable to local authorities, Cyrela may request building permits. At the issuance of these permits, the amount withheld may be released and the payment made.

  At 31 March 2013, a provision of R$1.3 million had been recognised in relation to this issue (€0.5 million).

- On 19 January 2011, Faiveley Transport Amiens received a prefectural order requiring it to proceed with monitoring and diagnostic measures for the water table at its site situated at Zone Industrielle Nord, Rue André Durouchez, 80000 Amiens, France. It must prepare a management plan to carry out groundwater monitoring, to look for sources of soil pollution and proceed with the development of a management plan for pollution found at its site, in accordance with the Circular of 8 February. The Company has taken action which allows it to meet the provisions of this order.

- On 29 June 2012, Faiveley Transport Amiens received from both SCI GDLMA and Together, whose interests are related, a summons seeking to secure the payment of a lump sum of €760 thousand per plaintiff, liable to be adjusted, on the grounds of failure to meet disclosure requirements and in relation to the warranty for hidden defects of plots of land located respectively in Sevran and Livry Gargan, which the two companies deem to be polluted. These plots were sold in 1989, 1992 and 1993 by Sab Wabco. Faiveley Transport Amiens sought the inadmissibility of the claims before the competent court on the grounds that they exceeded the statute of limitation. Status hearings are in progress.

- At the end of March 2013, the company Graham-White Manufacturing Co. incorporated a reserve of US$4.5 million into its accounts, designed to cover potential environmental risks at its American sites.

Although the Group is involved in the decontamination of certain industrial facilities or other sites, it considers its sites to be in compliance with their operating licence and its operations in general to be in line with current environmental laws and regulations.

1.1.5.5 IT risk

The Group's unwavering concern is to protect its IT infrastructure, data and application software. Centralised applications are hosted with several partners who ensure the physical security of the hardware and software protection access within a "Service Level Acceptance" agreement.

The Group's policy is to roll out more and more centralised applications that make communication and mobility increasingly easier. The Group attaches great attention to anti-intrusion systems (firewalls) and information access security profiles.

The Group is committed to an ambitious project to be completed by 2016, which primarily covers:

- further standardising the FAIVELEY network into a single Windows domain through the rollout of ACTIVE DIRECTORY;
- virtualising servers and workstations through the use of CITRIX technologies;
- streamlining administrative processes through the rollout of a core solution *via* a single ERP;
- implementing a PDM (Product Data Management) system to manage engineering in the design offices;
- rolling out a CRM (Customer Relationship Management) system;
- introducing a shared reporting and performance indicator management system (Business Intelligence).

To secure the rollout of a single ERP, the Group Management has set up a project platform at the Group level, and enlisted the help of external consultants. The pilot phase now being complete, the industrial rollout will begin in 2013 and will take three years.

1.2 REPORT ON FAIVELEY TRANSPORT'S PARENT COMPANY FINANCIAL STATEMENTS AT 31 MARCH 2013

1.2.1 PARENT COMPANY FINANCIAL STATEMENTS (FRENCH GAAP)

1.2.1.1 Income statement

	2012/2013	2011/2012
Sales	**56,747**	**52,681**
EBITDA* *% of sales*	4,879 *8.60%*	(681) *(1.29%)*
Profit from recurring operations *% of sales*	4,061 *7.16%*	(1,599) *(3.03%)*
Operating profit/(loss) *% of sales*	**4,061** *7.16%*	**(1,599)** *(3.03%)*
Net finance income/(expense)	27,282	(9,992)
Exceptional income/(expense)	(46)	(243)
Income tax	(4,534)	835
NET PROFIT/(LOSS)	**26,762**	**(10,999)**

** Operating profit plus amortisation and depreciation.*

Faiveley Transport continues to provide services for the Group, as the holding and management company. The €56.7 million sales achieved in 2012/2013 grew by €4 million compared to the previous year (€52.7 million).

Costs incurred by Faiveley Transport for services provided to subsidiaries were rebilled. The operating profit was €4 million, compared to a loss of €1.6 million in the 2011/2012. This improvement is mainly due to the net proceeds of €1.7 million relating to the Wabtec compensation received (whilst for the previous financial year €0.6 million in fees had been recognised) by the rebilling of the final charge of €1.3 million to the subsidiaries due to the allocation of free shares which ended in December 2012, as well as by better control of certain expense items.

The net finance income was €27.3 million, compared to a net expense of €10 million in the previous year. In 2012/2013, dividends of €37.5 million were collected, compared to €1.3 million in 2011/2012, due to the implementation of a more active policy relating to the transfer of the dividends of subsidiaries from the 2012/2013 financial year onwards.

Excluding dividends, the net finance income increased by €1.2 million. This was primarily due to the €2.1 million decrease in the interest expense, foreign exchange gains of €0.6 million, a €0.8 million positive movement in financial provision reversals and charges, offset by the waiver of a €2.6 million financial liability in relation to its subsidiary o.o.o Faiveley Transport.

The €4.5 million income tax charge recognised at 31 March 2013 reflects the tax consolidation charge of €0.6 million recorded during the period, increased by the €3.9 million corporate tax charge generated by the German subsidiaries Faiveley Transport Holding GmbH & Co. KG and Faiveley Transport Leipzig GmbH & Co. KG.

1.2.1.2 Balance sheet

	2012/2013	2011/2012
Net non-current assets	1,066,019	1,057,476
Current assets	81,419	54,288
Cash and cash equivalents	331,719	334,297
TOTAL ASSETS	**1,479,157**	**1,446,061**
Equity	192,508	177,807
Provisions	2,396	1,884
Financial debt	1,249,122	1,238,275
Other liabilities	35,131	28,095
TOTAL EQUITY AND LIABILITIES	**1,479,157**	**1,446,061**

Net non-current assets take account of the recognition of a €384.8 million technical deficit, registered on the transfer of Faiveley Transport and Faiveley Management's assets and liabilities to Faiveley SA, intangible assets of €17.5 million, property, plant and equipment of €0.7 million, equity investments of €501.4 million, receivables of €161.2 million attached to these investments and other financial investments of €0.4 million.

Equity investments increased by €1.5 million during the year. This increase was due to the payment in full of the capital of the Chinese subsidiary Faiveley Transport Systems Technology (Beijing). Furthermore, receivables attached to equity investments increased by €4.5 million, primarily due to an increase in current accounts. Loans to subsidiaries decreased by €6 million.

Current assets increased by €27 million during the year. This was primarily due to the €12 million Wabtec compensation and dividends of €15 million to be collected from the Swedish subsidiary.

Cash and cash equivalents decreased by €2.6 million during the year. This resulted from a €10.5 million improvement in cash balances and a €13.1 million decline in marketable securities. On the liability side, bank overdrafts increased by €38 million.

Equity increased from €177.8 million at 31 March 2012 to €192.5 million at 31 March 2013. This €14.7 million positive movement may be analysed as follows:

- payment of dividends: €12 million;
- profit for the year: €26.7 million.

Provisions increased by €0.5 million to €2.4 million. An additional charge of €0.1 million was booked to serve the share subscription plan and the free share allocation plan (€0.2 million and €1.4 million, respectively). Provisions for litigations increased by €0.3 million, showing a balance of €0.5 million at 31 March 2013.

Financial debt was valued at nominal value and comprised:

- the €56.9 million bond-type issue (USPP);
- the €292.6 million syndicated loan granted by a banking pool;
- current bank and cash pooling overdrafts (Group cash management) for €324.5 million;
- the loan subscribed from the Faiveley Transport Malmö subsidiary, for €10.2 million;
- credit current accounts with Group companies, for €563.4 million;
- accrued interest in relation to the above financial debt, for €1.4 million;
- the balance of the special reserve for employee profit sharing, for €65 thousand.

Other liabilities also increased by €7 million during the year. This change was primarily due to the increase in trade receivables, including legal fees of €2.3 million relating to the Wabtec dispute, and the increase in tax liabilities in France for €2.3 million and tax liabilities of the Leipzig and Witten subsidiaries for €1.2 million.

1.2.2 EVENTS AFTER 31 MARCH 2013

On 17 May 2013, Faiveley Transport acquired 100% of Schwab Verkehrstechnik AG, a Swiss leading designer and manufacturer of couplers and buffers for freight and rail transit markets.

1.2.3 RESEARCH AND DEVELOPMENT COSTS

None in the Faiveley Transport parent company financial statements.

1.2.4 CHANGE OF METHOD DURING THE YEAR

Nil.

1.2.5 INFORMATION ON NON-TAX DEDUCTIBLE CHARGES

Non-tax deductible charges at 31 March 2013 amounted to €16,431. They generated a tax charge of €5,918.

1.2.6 INFORMATION ON PAYMENT TERMS

At 31 March 2013, trade payables posted to the balance sheet totalled €11,6 million, of which €9,1 million related to international intercompany invoices, due in 60 days at month-end, payable on the 5th of the month.

The ageing analysis was as follows:

	30 days	60 days	+ 60 days	Total
Trade payables at 31 March 2013	2,627	535	8,413	11,575
Trade payables at 31 March 2012	1,361	931	10,073	12,365

1.2.7 TREASURY SHARES

The Company directly and indirectly holds 2.61% of its share capital.

1.2.8 ANALYSIS OF RESULTS AND ALLOCATION OF THE 2012/2013 NET PROFIT

TABLE OF RESULTS OF FAIVELEY TRANSPORT FOR THE LAST FIVE YEARS

Attached to this report, pursuant to the provisions of Article R. 225-102 of the Commercial Code, is the table of the results of the Company for each of the last five years.

PROPOSED ALLOCATION OF NET PROFIT

We would ask you to approve the annual financial statements (balance sheet, income statement and notes) as presented to you, showing a net profit of €26,762,496.06.

We would also ask you to approve the following allocation of net profit for the financial year ended 31 March 2013:

- Profit for the year €26,762,496.06
- Increased by:
  Retained earnings €44,715,256.31
- Distributable profit: €71,477,752.37
- – Less dividend payment, *i.e.* €0.95 per share: (€13,883,444.40)

The balance of €57,594,307.97 will be allocated in full to "Retained earnings".

The dividend will be payable with effect from 19 September 2013.

Taking account of the allocation, the equity of the Company amounts to €178,624,285.99.

Should the Company hold treasury shares at the time of the payment, the distributable profit corresponding to the unpaid dividend due to the holding of the shares will be allocated to the account "Retained earnings".

It should be noted that over the last three financial years, the following sums were paid in dividends: €12,422,029.20 for the financial year 2011/2012, €17,285,653.20 for the financial year 2010/2011 and €17,285,653.20 for the financial year 2009/2010.

1.3 INFORMATION ON THE SHARE CAPITAL

1.3.1 BYLAW CONDITIONS GOVERNING REVISIONS TO THE SHARE CAPITAL AND CORPORATE RIGHTS

The share capital is increased, either by the issue of new shares, or by an increase in the nominal value of existing shares.

New shares are fully paid, in cash, by offset against current liabilities of the Company, by capitalisation of reserves, profits or share premium, by transfer in kind or by conversion of bonds. New shares are issued at their nominal value, or at that amount increased by a share premium.

An Extraordinary General Meeting is the only competent body to decide to increase the share capital, based on a report by the Management Board. A reduction in share capital is authorised or decided by an Extraordinary General Meeting that may delegate to the Management Board all powers to effect the transaction. A capital increase must be completed within five years from the date of the General Meeting that decided or authorised it.

1.3.2 SHARE CAPITAL ISSUED AND AUTHORISED UNISSUED SHARE CAPITAL

1.3.2.1 Share capital issued

At 31 March 2013, the share capital of the Company was €14,614,152. It comprised 14,614,152 shares of €1 nominal value each, fully paid, all of the same class.

REVISION TO THE SHARE CAPITAL AND RIGHTS ATTACHED TO SHARES

Any revision to the share capital or rights attached to securities that comprise it is subject to the law; the bylaws do not provide for specific requirements.

FORM AND REGISTRATION OF SHARES

Shares are held in nominative or bearer form at the choice of the shareholder. Both these categories are subject to the law that relates to them.

EXISTENCE OF THRESHOLDS IN THE BYLAWS

Apart from the legal requirement to inform the holding company of certain fractions of the share capital, there is no particular requirement in the bylaws.

IDENTIFICATION OF BEARER SHAREHOLDERS

Except in instances specified by the law, fully paid up shares are either held in nominative or bearer form, at the shareholders' discretion. Shares are registered in accordance with the terms and conditions provided for by law.

The Company is authorised to use, at any time, the legal provisions in respect of identification of holders of securities giving, immediately or in time, the right to vote at Shareholders' Meetings.

COMPANY SHARE REGISTRAR

The Company has delegated its share registrar service to Société Générale Securities Services: 32, rue du Champ de Tir – BP 81236 – 44312 Nantes Cedex.

TRANSFER OF SHARES

Company shares may be freely transferred between living persons or upon the death of the holder. Transfers of Company shares involving third parties and the Company are completed by way of an account-to-account transfer order. Shares in the Company that are not fully paid in respect of payments due cannot be transferred.

1.3.2.2 Authorised unissued share capital

DELEGATION OF AUTHORITY TO INCREASE THE SHARE CAPITAL

At the Combined General Meeting of 14 September 2011, a resolution (nineteenth resolution) was approved by the shareholders to delegate authority to the Management Board to increase the share capital, with waiver of the pre-emption right, through a private placement to qualified investors or for the benefit or a restricted circle of investors.

This resolution was adopted by a qualified majority.

Pursuant to Articles L. 225-129, L. 225-129-2, L. 225-135 and L. 225-136 of the Commercial Code, the Management Board was authorised to increase the share capital, with waiver of the pre-emption right, with the facility of effecting the transaction in one or more offerings in accordance with section 2 of Article L. 411-2 of the Monetary and Financial Code, and not exceeding 10% of the share capital of the Company on the date of the General Meeting.

This authorisation was given for a period of 26 months from 14 September 2011.

On 3 February 2012, the Management Board implemented this delegation, having been granted approval of the planned transactions by the Supervisory Board on 23 November 2011.

As part of the acquisition of US company Graham-White Manufacturing Co., the acquisition contract, concluded on 22 December 2011 and amended on 10 January 2012, provided for the acquisition price of the Graham-White Manufacturing Co. shares to be partly paid to the sellers in new Faiveley Transport shares.

As a result, on 3 February 2012, the Management Board decided to increase the share capital of the Company by a nominal amount of €209,441, thereby increasing it from €14,404,711 to €14,614,152 through the issue of €209,441 new shares in the Company with a par value of €1 each, to be issued at a price of €53.086 per share. The total subscription price was therefore €11,118,384.93. The issue price corresponds to the weighted average of the share price over the last three trading days preceding the date the subscription price of the capital increase is set, less a discount of 5%.

1.3.3 SHAREHOLDERS AND VOTING RIGHTS AT 31 MARCH 2013

1.3.3.1 Analysis of shareholders and voting rights

According to the list of nominative shareholders provided by Société Générale and the identification of a certain number of bearer shareholders, the shareholders and the voting rights in the Company at 31 March 2013 were as follows:

Principal shareholders at 31 March 2013	Number of shares	% of capital	Single voting rights	Double voting rights	Total voting rights	% voting rights
Financière Faiveley	6,315,412	43.21%	26,237	6,289,175	12,604,587	56.64%
François Faiveley Participations (FFP)	1,159,288	7.93%	208,165	951,123	2,110,411	9.48%
François Faiveley	225	0.00%	-	225	450	0.00%
Thierry Faiveley	214,524	1.47%	214,524	-	214,524	0.96%
Erwan Faiveley	612	0.00%	607	5	617	0.00%
TOTAL FAIVELEY FAMILY	**7,690,061**	**52.62%**	**449,533**	**7,240,528**	**14,930,589**	**67.09%**
Directors and senior executives(1)	152,894	1.05%	17,063	135,831	288,725	1.30%
Treasury shares	382,050	2.61%	-	-	-	0.00%
Nominative shares(2)	724,493	4.96%	79,320	645,173	1,369,666	6.15%
Free float	5,664,654	38.76%	5,664,654	-	5,664,654	25.46%
TOTAL	**14,614,152**	**100.00%**	**6,210,570**	**8,021,532**	**22,253,634**	**100.00%**

(1) Excluding Erwan Faiveley and François Faiveley.
(2) Excluding the Faiveley family, senior executives and treasury shares.

To the knowledge of the Company, no other shareholder held more than 5% of the voting rights at 31 March 2013.

1.3.3.2 Analysis of the share capital over the last three years

	2012/2013 % of capital	2011/2012 % of capital	2010/2011 % of capital
Nominative shares	58.06	58.66	60.15
Free float	41.94	41.34	39.85

1.3.3.3 Share capital of the Company subject to pledges

Name of shareholder registered as pure nominative form	Beneficiaries	Start date of pledge	Expiry date of pledge	Condition for release of pledge	Number of shares pledged at 31 March 2013	% of capital pledged
Financière Faiveley	Société Générale and Crédit Lyonnais	24/03/2006	31/03/2016	Full repayment of loan granted	70,400	0.482
François Faiveley Participations	Société Générale	October 2012	October 2019	Full repayment of loan granted	218,818	1.497
François Faiveley Participations	Crédit Lyonnais	24/03/2006	30/03/2013	Full repayment of loan granted	2,031	0.014

1.3.4 MOVEMENTS IN THE SHARE CAPITAL DURING THE LAST SIX YEARS

Date	Transactions	Increase in capital (€)	Cumulative number of shares	Capital (€)
31 March 2007	Nil	Nil	12,529,585	12,529,585

31 MARCH 2013	**NIL**	**NIL**	**14,614,152**	**14,614,152**

1.3.5 EMPLOYEE INTEREST IN THE COMPANY'S SHARE CAPITAL

At 31 March 2013, FCPE Faiveley Shares held 15,360 shares (0.10%) in the Company and employee shareholding accounted for 1.01% of the share capital.

1.3.6 BUYBACK BY THE COMPANY OF ITS OWN SHARES

At 31 March 2013, the Company held 382,050 of its own shares, representing 2.61% of its share capital. The book value of these shares was €19,190,175.68 and their market value was €14,897,412.73.

The Combined General Meeting of 14 September 2012 was called to approve a new share buyback programme in its ninth resolution. A description of this programme, prepared in accordance with the provisions of Article 241-2 of the AMF General Regulations, is presented hereafter, as provided by Article 241-3-III of the same regulations. As a result, it will not be subject to a specific publication.

1.3.6.1 Objectives of the share buyback programme authorised by the Combined General Meeting of 14 September 2012:

Shares may be bought back to:

- ensure the liquidity and to support the market for Faiveley Transport shares by an investment services provider *via* a liquidity contract that conforms to the ethics charter recognised by the Autorité des Marchés Financiers;
- grant them to employees and management of the Group according to the terms and conditions of the law (options to purchase shares, employee profit-sharing, allocation of free shares);
- cancel them by way of reduction in capital within the limits set by law;
- retain them within the limit of 5% of the capital and use them in exchange or payment, notably as part of acquisitions initiated by the Company, by way of public offer or other;
- implement any other market practice that is permitted by the Autorité des Marchés Financiers and more generally all transactions that conform to the regulations in force.

1.3.6.2 Maximum percentage of the share capital, maximum number and features of shares the Company is proposing to buy back and maximum purchase price

Purchase of shares in the Company may relate to a number of shares such that the number of shares held following these purchases does not exceed 10% of the shares comprising the share capital of the Company, knowing that the percentage will apply to the capital adjusted according to transactions that may occur subsequent to this General Meeting.

The maximum purchase price is set at €70 per share.

The maximum amount allocated to the buyback programme is €51 million.

Taking account of the 382,050 shares already directly or indirectly held by the Company at 31 March 2013, the maximum number of shares that the Company may acquire as part of this share buyback programme would be 1,079,365.

1.3.6.3 Validity of the share buyback programme

This authorisation will remain valid for eighteen months, *i.e.* until 14 March 2014.

During the year ended 31 March 2013, the Company did not buy back any Faiveley Transport shares, excluding those carried out by an investment service provider through a liquidity contract.

At the Combined General Meeting to be held on 12 September 2013, a draft resolution providing for the renewal of this buyback programme for a further period of eighteen months will be submitted to shareholders for approval.

Should this resolution be adopted at the next General Meeting, the authorisation granted to the Management Board will supersede that provided by the General Meeting of 14 September 2012.

1.3.7 CONTRACT TO STIMULATE TRADING OF THE FAIVELEY TRANSPORT SHARE

At 30 September 2012, the Company terminated the liquidity contract it had awarded to Oddo Corporate Finance.

Since 1 October 2012, a liquidity contract complying with the AMAFI ethics charter and recognised by the Autorité des Marchés Financiers has been implemented between the Company and Exane BNP Paribas to stimulate trading.

The resources allocated to the previous liquidity account have been fully allocated to this new liquidity contract, namely:

- 10,000 Faiveley Transport shares;
- €492,865.

During the year 2012/2013, Oddo Corporate Finance and Exane BNP Paribas purchased 126,087 shares and sold 123,763 shares on behalf of the Company.

The average price of the shares bought during the year was €45.10 and €44.86 for shares sold. At 31 March 2013, the Company held 12,392 shares through the market stimulation contract (being 0.08% of its share capital) for a market value of €635,311.17, *i.e.* a price per share of €51.27.

1.4 CORPORATE AND MANAGEMENT BODIES

1.4.1 CORPORATE GOVERNANCE

1.4.1.1 Composition of the Management Board

The Management Board comprises between three and seven members, selected or not from among the shareholders and appointed by the Supervisory Board, which confers on one of them the position of Chairman. The members of the Management Board must be individuals.

The Management Board is appointed for a period of three years by the Supervisory Board, which may replace members who have died or resigned, in accordance with the law.

No individual may be appointed as a member of the Management Board if they do not meet the conditions of qualification required by Directors of public limited companies, if they have been deemed incompatible, in default or subject to a prohibition forbidding them access to these functions, if they are a Statutory Auditor to the Company, were or are a parent or related under the conditions set by Article L. 225-224 of the Commercial Code, if they are a member of the Supervisory Board, if they already have two other positions on the Management Boards of other companies or if they chair two other public limited companies.

Every member of the Management Board must be under 65 years old. If this age limit is reached in office, the Director in question is considered to have resigned and a new Director will be appointed as provided by this article.

Every member of the Management Board may be linked to the Company through an employment contract that remains in force during the term of office and upon its expiry. Members of the Management Board may be reappointed.

In accordance with the bylaws, the Chairman who is granted the power to represent the Company carries the title “Chairman and Chief Executive Officer”.

There are no family relationships between members of the Management Board.

Members of the Management Board are as follows:

Thierry Barel

Chairman of the Management Board	Born 11 February 1961
Nationality:	French
Number of shares held:	6,391
Date appointed:	1 April 2011 (member of the Management Board since 22 September 2009)
Current term of office expires:	June 2014

Guillaume Bouhours graduated from engineering schools Ecole des Mines de Paris and Ecole Polytechnique.
Guillaume Bouhours was a Director of Sagard, a private equity fund and a previous shareholder of Faiveley Transport. In this role, he participated actively in Sagard's investment decisions and was involved throughout the decision-making process from the analysis of the investment opportunity through to the finalisation of the financial and legal aspects of each transaction and the monitoring of companies held by Sagard.
Guillaume Bouhours previously worked in the European Merger & Acquisition Department of investment bank Morgan Stanley.

1.4.1.2 Composition of the Supervisory Board

Pursuant to the bylaws, the Supervisory Board comprises a minimum of five members and a maximum of ten members.

The Company adopted the form of a public limited company with a Management Board and a Supervisory Board at the General Meeting held on 27 September 2005. The first members, formerly Directors of the Company constituted as a public limited company with a Board of Directors, were appointed for an initial period of three years and were reappointed at the Annual General Meeting held on 17 September 2008 for a period of 6 years, in accordance with the Company's bylaws.

The Combined General Meeting of 14 September 2011 amended Article 19 of the Company's bylaws. The term of office of Board members is three years, but as an exception and to allow the implementation and the maintenance of staggered terms of office for members of the Supervisory Board, the latter may be appointed by the General Meeting for periods of one (1) or two (2) years. Board members may be re-appointed.

The option to stagger the terms of office of members of the Supervisory Board was implemented when terms of office were submitted for approval by the Combined General Meeting of 14 September 2011. The term of office of one third of Board members thus expires every year.

Any shareholder, individual or corporate, may be appointed as a Member, subject to their holding at least one share in the Company (Article 19 of the bylaws).

The Supervisory Board elects, from among its own members, a Chairman and a Vice-Chairman, who are individual shareholders, otherwise their appointment is null and void. The Chairman and Vice-Chairman are responsible for calling Board meetings and leading discussions.

Where a legal entity assumes the function of a member of the Supervisory Board, it is required to designate a permanent representative who is subject to the same conditions and requirements and who has the same civil and personal liability as if they were a member of the Board in their own name.

Members of the Management Board, as well as current or former Statutory Auditors and their parents or relatives under the laws, may not be members of the Supervisory Board.

The education and professional experience of Board members are quite varied, given that they have all held high-level management positions.

With regard to the independence criteria defined by the Supervisory Board, and after a study of the individual position of each member of the Supervisory Board, at 31 March 2013 four of the current ten members may be considered independent: Hélène Auriol-Potier, Nicoletta Giadrossi-Morel, Christian Germa and Maurice Marchand-Tonel.

At 31 March 2013, the Supervisory Board comprised ten members, nine of which are French nationals; Nicoletta Giadrossi-Morel is an Italian national and Christopher Spencer has dual French and British nationality. The average age of the members at 31 March 2013 was 58.

The members appointed by the General Meeting are as follows:

Philippe Alfroid

Chairman of the Supervisory Board	Born 29 August 1945
Nationality:	French
Number of shares held:	200
Date appointed:	22 September 2009 (Member of the Board since 27 September 2005)

Member of the Supervisory Board	Born 4 November 1962
Nationalities:	French-British
Number of shares held:	650
Date appointed:	22 September 2009
Current term of office expires:	September 2014
Other current appointment:	
Chairman of:	Maison d'Uzès SAS
Director of:	Adminium SAS
Terms of office which expired during the last five financial years:	
Chairman of the Supervisory Board of:	Cougar Management
Vice-Chairman of the Supervisory Board of:	Cougar Investissements SAS
Chairman of:	Cougar International
Director of:	SGD Olympia Faiveley Transport
Profile:	
Christopher Spencer holds both French and German degrees in higher management studies (ESC Reims and Fachhochschule Reutlingen) and is a Chartered Accountant. With an experience of over 20 years in private equity in Europe, the last 6 years of which were spent with Sagard funds, which he helped establish in the French market, since the start of 2010 Christopher Spencer has focused on his activities in private investment and as a business angel.	

Xavier de Lavallade, Legal Counsel for the Group, serves as Secretary of the Board.

Members of the Supervisory Board can be contacted through the Company's head office: Immeuble Le Delage – Hall Parc – Bâtiment 6A – 3 rue du 19 mars 1962, 92230 Gennevilliers, France.

1.4.2 CORPORATE OFFICERS' REMUNERATION

1.4.2.1 Remuneration and directors' fees

During 2012/2013, the total remuneration, direct and indirect, of all kind received by members of corporate bodies of the Company amounted to €1,451,668.

Pursuant to Article L. 225-102-1 of the Commercial Code, we disclose the remuneration and benefits in kind of every nature received by every corporate officer during the year from companies controlled pursuant to Article L. 233-16 of the Commercial Code:

Name	Remuneration			Directors' fees paid by Group companies	Benefits in kind
	Fixed	Variable	Deferred		
Philippe Alfroid Chairman of the Supervisory Board	-	-	-	46,500	-
François Faiveley Vice-Chairman of the Supervisory Board	-	-	-	30,500	-
Didier Alix Member of the Supervisory Board	-	-	-	21,000	-
Hélène Auriol-Potier Member of the Supervisory Board	-	-	-	19,000	-
Serge Choumaker(1) Member of the Supervisory Board, representing employee shareholders	117,232	19,848	-	-	-
Christian Germa Member of the Supervisory Board	-	-	-	37,000	-
Nicoletta Giadrossi-Morel Member of the Supervisory Board	-	-	-	19,000	-
Robert Joyeux Member of the Supervisory Board	-	-	-	19,000	-
Maurice Marchand-Tonel Member of the Supervisory Board	-	-	-	25,500	-
Christopher Spencer Member of the Supervisory Board	-	-	-	31,500	-
Thierry Barel(1) Chairman of the Management Board	430,822	174,140	-	-	Company car
Erwan Faiveley(2) Member of the Management Board	107,081	-	-	-	Housing allowance
Guillaume Bouhours(1) Member of the Management Board	218,959	134,586	-	-	Company car

(1) On 15 January 2013, the Management Board allocated free shares to a number of Group employees and executives, including 2,200 to Thierry Barel, 1,440 shares to Guillaume Bouhours and 720 shares to Serge Choumaker.
(2) Erwan Faiveley is an employee of François Faiveley Participations (FFP).

You will also find appended to this report a detailed description of total remuneration received by Directors of the Company, in accordance with AMF recommendations.

You should also decide on the total amount of Directors' fees paid to the Supervisory Board for the year ended 31 March 2013, which we propose be set at €325,000.

1.4.2.2 Summary of 2012/2013 transactions in Faiveley Transport shares by senior executives and individuals referred to in Article L. 621-18-2 of the Monetary and Financial Code

Director/Senior Executive	Financial instruments	Nature of transaction	Number of transactions	Value

Net earnings per share, in € – Discontinued operations:			
Earnings per share		-	-
Diluted earnings per share		-	-

(1) During the financial year, the management costs of operations were reclassified from sales and marketing costs to administrative costs. To ensure comparability of these costs, the presentation of the financial statements at 31 March 2012 was restated accordingly (€12.1 million).
(2) Excluding treasury shares.

The calculation of net earnings per share takes account of the deduction of all treasury shares held by Faiveley Transport, being a total of 382,050 shares at 31 March 2013 and 427,528 at 31 March 2012.

The attached notes are an integral part of the consolidated financial statements.

2.3 STATEMENT OF COMPREHENSIVE INCOME

At 31 March 2013, Faiveley Transport held 382,050 of its own shares, being 2.61% of share capital

2.6 NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

A. ACCOUNTING INFORMATION

Faiveley Transport is a French public limited company (société anonyme) with a Management Board and a Supervisory Board. At 31 March 2013, its registered office was located at:

Immeuble le Delage, Hall Parc, Bâtiment 6A
3 rue du 19 mars 1962
92230 – GENNEVILLIERS

The consolidated financial statements are prepared by the Management Board and submitted for approval to the shareholders at the General Meeting.

The financial statements for 2012/2013 were approved by the Management Board at its meeting on 31 May 2013. They were presented to and reviewed by the Supervisory Board at its meeting on 31 May 2013.

They will be submitted for the approval of the Shareholders' General Meeting on 12 September 2013.

The financial statements have been prepared on the basis that the Faiveley Transport Group operates as a going concern.

The Group's functional and presentation currency is the Euro. Figures are expressed in thousands of Euros unless indicated otherwise.

B. HIGHLIGHTS

1. Significant events

- To partly refinance the acquisition of US company Graham-White Manufacturing Co., completed on 3 February 2012, and diversify its financing sources, on 12 April 2012 the Group finalised its first private placement bond issue in the US with two institutional investors, for a total of US$75 million. This bond issue was made up of two tranches: one for US$30 million, with a 10-year final maturity and redeemable between 2017 and 2022, and a US$45 million bullet loan with a 10-year maturity. The average fixed interest is 4.91% per year.
- Faiveley Transport won its legal action against Wabtec in the United States. On 6 February 2013, the New York Court of Appeals upheld the jury's verdict against Wabtec, awarding the companies Faiveley Transport USA, Faiveley Transport Nordic, Faiveley Transport Amiens and Ellcon National US$15 million plus US$0.8 million in interest. This decision particularly punishes the trade secret misappropriation, acts of unfair competition and unjust enrichment relating to the manufacture of brake cylinders and actuators that make up brake systems.

  In accounting terms, the Wabtec accrued income was recorded in the balance sheet under "Other current assets" in the amount of €12.3 million (US$15.8 million). In the income statement, only the portion corresponding to damages for the period between 2007 and the end of March 2013 was recognised, *i.e.* €8.6 million (before expenses). The balance of €3.7 million, corresponding to damages for future periods, was recognised as a liability in the balance sheet under "Current liabilities". The total positive impact on the 2012/2013 operating profit was €6.2 million, after taking into account legal costs.

  This positive impact is composed of €1.7 million corresponding to the refund of costs incurred in the past and recognised under "other income", and €4.5 million corresponding to net damages recognised under gross profit.

2. Plans to allocate share purchase/ subscription options and free shares

During the financial year, a new free share allocation plan was established for the benefit of employees.

FREE SHARE ALLOCATION PLAN OF 14 SEPTEMBER 2012:

The Combined General Meeting of 14 September 2012 delegated the Management Board powers for the allocation of ordinary shares of the Company free of charge, either new or already issued, within the limit of 1% of the share capital of the Company on the day of the said General Meeting.

During the year, this authorization gave rise to:

- the allocation of free performance-based shares by the Management Board on 24 October 2012;
- the implementation of a free share allocation plan as part of an employee shareholding plan by the Management Board at 3 December 2012.

Share purchase/subscription option and free share allocation plans granted in previous years and currently still in force are detailed in Note E.11.1.

C. CONSOLIDATION PRINCIPLES AND METHODS

1. Basis of preparation

In application of regulation 1606/2002 of the European Union (EU), the consolidated financial statements of the Faiveley Transport Group are prepared in accordance with IFRS (International Financial Reporting Standards), as adopted by the European Union.

1.1 CHANGES IN ACCOUNTING POLICIES DUE TO NEW STANDARDS AND INTERPRETATIONS OF MANDATORY APPLICATION FOR INTERIM PERIODS AND FINANCIAL YEARS STARTING ON OR AFTER 1 APRIL 2012

The Group's financial statements were not affected by new standards or interpretations, revised or amended, of mandatory application on or after 1 April 2012 in the European Union.

1.2 NEW STANDARDS AND INTERPRETATIONS OF MANDATORY APPLICATION

- Transfer of financial assets (IFRS 7)

1.3 NEW STANDARDS AND INTERPRETATIONS WHOSE APPLICATION IS NOT YET MANDATORY

Amendments to IAS 1 – Presentation of items of other comprehensive income

The Group did not opt for the early application of the amendment to IAS 1 – "Presentation of items of other comprehensive income".

This amendment requires that items of other comprehensive income that will be recycled in the income statement be distinguished from those that will not.

The Group considers that the application of this amendment will have no material impact on the presentation of the published statement of comprehensive income.

Amendment to IAS 19 – Employee benefits

The Group did not opt for the early application of the amendment to IAS 19 "Employee benefits". The Group is currently analysing the impacts and practical consequences of the application of these standards and interpretations.

The application of the amended IAS 19 "Employee benefits" will be mandatory for financial years beginning on or after 1 January 2013, which is the financial year beginning on 1 April 2013 for the Group. This amendment introduces several modifications to the recognition of post-employment benefits, including:

- the recognition of all post-employment benefits granted to Group employees in the consolidated balance sheet. The corridor option and the option to amortise in the income statement the cost of past services over the average period of acquisition of entitlements by employees will be cancelled;
- the calculation of expected return on retirement plan assets will now be made using the same discount rate as that used for calculating the obligation under defined benefit schemes;
- the recognition of the impacts of changes to schemes in the income statement;
- the recognition of the impacts of remeasurement in items of other comprehensive income: actuarial gains and losses on the actuarial liability, outperformance (underperformance) of plan assets, *i.e.*: the difference between returns on plan assets and their yield as measured based on the discount rate of the actuarial liability, and changes in the effect of the limit placed on the asset.

The new provisions introduced by IAS 19 revised will be applied retrospectively by the Group.

The main impacts on the Group's consolidated financial statements at 1 April 2012 and 31 March 2013 were estimated as follows:

- increases in pension commitments of €4.2 million and €6.8 million, respectively, at 1 April 2012 and 31 March 2013;
- decreases in consolidated equity, excluding tax effect, of €4.2 million and €6.8 million, respectively, at 1 April 2012 and 31 March 2013.

Consolidation standards (IFRS 10, Consolidated financial statements; IFRS 11, Joint arrangements; IFRS 12, Disclosure of interests in other entities; IAS 28 revised, Investments in associates and joint ventures)

The Group did not opt for the early application of the consolidation standards (IFRS 10, IFRS 11, IFRS 12 and IAS 28 revised), adopted by the European Union and whose application will be mandatory for the Group as of 1 April 2014.

The Group is currently analysing the impacts expected from the application of these new standards, specifically IFRS 10 – Consolidated financial statements and IFRS 11 – Joint arrangements:

IFRS 10 – CONSOLIDATED FINANCIAL STATEMENTS

This standard defines control as being exercised when the investor is exposed, or has rights, to variable returns and has the ability to affect these returns through its power over the investee. The impact of the application of this new standard on the consolidated financial statements is not expected to be material.

IFRS 11 – JOINT ARRANGEMENTS

This new standard essentially provides for two distinct accounting treatments:

- Partnerships considered to be joint operations shall be recognised based on the share of assets, liabilities, revenue and expenses controlled by the Group. A joint operation may or may not be effected through a separate entity;
- Partnerships considered to be joint ventures shall be recognised according to the equity method, to the extent that they only entitle to ownership of a portion of the entity's net assets.

The Group is currently analysing its joint arrangements in light of IFRS 11, in order to determine whether they should be classified as joint operations or joint ventures.

IFRS 13 – Fair value measurement

The Group did not opt for the early application of IFRS 13 – Fair value measurement, the application of which is mandatory for the Group as of 1 April 2013.

IFRS 13 applies to standards that require or permit fair value measurements or disclosures. This standard introduces a single framework for the measurement of fair value and requires disclosures on measurements. It introduces a single definition of fair value based on the notion of exit price and uses a fair value hierarchy based on valuation derived from market prices rather that a specific valuation of the entity.

The impact of the application of this new standard on the consolidated financial statements is not expected to be material.

Amendments to IAS 32 and IFRS 7 – Offsetting financial assets and financial liabilities

The Group did not opt for the early application of these amendments adopted by the European Union and whose application will be mandatory for the Group as of 1 April 2014. These amendments clarify the application of offsetting rules and related disclosures.

1.4 NEW STANDARDS AND INTERPRETATIONS NOT YET ADOPTED BY THE EUROPEAN UNION AND WHOSE APPLICATION IS NOT YET MANDATORY

- Financial instruments:
  - classification and measurement of financial assets (IFRS 9),
  - date of mandatory application and transitional methods (amendments to IFRS 9 and IFRS 7).
- Transition guidance (amendments to IFRS 10, IFRS 11 and IFRS 12).
- Investment entities (amendments to IFRS 10, IFRS 12 and IAS 27).

The impact of the application of these provisions on the consolidated financial statements is currently being analysed by the Group.

2. Consolidation scope and methods

Companies over which the Group directly or indirectly exercises exclusive control are consolidated using the full consolidation method. In accordance with IAS 27, exclusive control is deemed to be present when more than one half of the Company's voting rights are held or when control is exercised through any other means.

Companies over which the Faiveley Transport Group exercises joint control are consolidated using the proportional consolidation method.

Companies over which the Faiveley Transport Group exercises significant influence over financial and operational policies are accounted for using the equity method. Significant influence is presumed when the Group holds more than 20% of the voting rights of a company.

Acquisitions or disposals arising during the financial year are reflected in the consolidated financial statements from the date on which effective control is transferred, unless the impact is not material to the income statement in the case of acquisitions carried out at the end of the financial year.

Intra-Group balances and transactions are eliminated for all consolidated companies.

Faiveley Transport Group companies that are consolidated are listed in Note G.1. Note G.2 lists companies that are not consolidated due to their insignificant impact on the Faiveley Transport Group's financial statements.

3. Use of estimates

In order to be able to prepare consolidated financial statements that comply with IFRS, Financial Management must make certain estimates and use assumptions that it considers realistic and reasonable. These estimates and assumptions affect the book value of the assets, liabilities, equity and results, and any contingent assets and liabilities, as presented at the balance sheet date. Financial Management regularly reviews its estimates on the basis of the information available to it. When events and circumstances are not in line with expectations, actual results may differ from such estimates.

The main accounting methods whose application necessitates the use of estimates relate to the following items:

3.1 RECOGNITION OF THE MARGIN ON LONG-TERM BUILDING AND SERVICE CONTRACTS AND RELATED PROVISIONS (SEE § C.6.1)

Revenue from long-term building and service contracts is recognised in proportion to the stage of completion of the contracts (see § C.6 below). Project reviews are organised on a regular basis so that the stage of completion and finalisation of the contract can be monitored. If the project review identifies a negative gross margin, a provision is immediately raised in respect of the loss relating to the work not yet carried out.

The total estimated income and expenses in respect of the contract reflect the best estimate of the future benefits and obligations under the contract. The assumptions used to determine the current and future obligations take into account technological, commercial and contractual constraints measured on a contract-by-contract basis.

Obligations under building contracts may result in penalties for delays in a contract's implementation schedule or an unexpected cost increase due to amendments to the project, a supplier's or subcontractor's failure to comply with its obligations or delays caused by unforeseen events or circumstances. Similarly, warranty obligations are affected by product failure rates, equipment wear and tear and the cost of actions needed to return to normal service.

Although the Group measures risks on a contract-by-contract basis, the actual costs resulting from the obligations associated with a contract may prove to be greater than the amount initially estimated. It may therefore be necessary to re-estimate the costs to completion when a contract is still in progress or to re-estimate provisions when a contract is completed.

3.2 MEASUREMENT OR DEFERRED TAX ASSETS (SEE § C.16)

The determination of the book values of deferred tax assets and liabilities and the amount of deferred tax assets to be recognised requires Financial Management to exercise its judgement as to the level of future taxable profits to be taken into consideration.

3.3 MEASUREMENT OF ASSETS AND LIABILITIES IN RESPECT OF RETIREMENT AND OTHER BENEFITS (SEE § C.15.1)

The measurement by the Group of the assets and liabilities relating to defined benefit schemes requires the use of statistical data and other parameters used to predict future trends. Such parameters include discount rate, expected return on plan assets, salary increase rate, staff turnover rate and mortality rate. When circumstances where actuarial assumptions prove to be significantly different from actual data subsequently observed, this could result in a substantial amendment to the charge for retirement and similar benefits, actuarial gains and losses and assets and liabilities stated in the balance sheet relating to these commitments.

3.4 MEASUREMENT OF PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS (SEE § C.9)

Goodwill, including intangible assets with an indefinite useful life, is tested for impairment each year on 31 March or more frequently if there are indications of impairment. The discounted future cash flow model used to determine the fair value of the Cash Generating Units utilises a certain number of parameters including estimated future cash flows, discount rates and other variables, and consequently requires the exercise of judgment to a significant degree.

The assumptions used to carry out impairment tests are the same for property, plant and equipment and intangible assets. Any future deterioration in market conditions or the achievement of poor operating performances could result in the Group being unable to recover the current book value of such assets.

3.5 MEASUREMENT OF FINANCIAL INVESTMENTS

Details of the method used to measure financial investments are provided in § C.10.3.

3.6 INVENTORIES AND WORK-IN-PROGRESS (SEE § C.12)

Inventories and work-in-progress are measured at the lower of cost and net estimated realisable value. Writedowns are calculated on the basis of an analysis of foreseeable trends in demand, technology and market conditions, the aim of which is to identify inventories and work-in-progress that are obsolete or surplus to requirements. If market conditions worsen to a greater degree than was forecast, additional writedowns of inventories and work-in-progress may prove necessary.

3.7 STOCK-OPTIONS AND FREE SHARES

Share subscription and/or purchase options as well as free shares granted to certain senior executives and employees of the Group are recognised in accordance with IFRS 2.

Options are measured at the allocation date. The fair value of options is a function of the expected life, exercise price, current price of underlying shares, expected volatility and share price.

The fair value of free shares is estimated on the allocation date, specifically based on their expected life, current price of the underlying shares, expected volatility and share price and takes into account the terms and conditions attached to the share allocation.

This value is recognised as personnel cost between the date of grant and the end of the vesting period and offset under equity.

3.8 GENERAL PROVISIONS

Details of the method used to measure other provisions for liabilities and charges are provided in § C.15.2.

4. Translation method

The consolidated financial statements are presented in Euro, the Group's reporting currency.

4.1 FOREIGN CURRENCY-DENOMINATED TRANSACTIONS

Transactions not denominated in the functional currency are translated at the exchange rate on the date when the transaction was first recorded.

At the balance sheet date:

- foreign currency-denominated monetary items must be converted at the closing rate;
- foreign currency-denominated non-monetary items valued at historical cost must be converted at the foreign exchange rate on the transaction date; and
- foreign currency-denominated non-monetary items valued at fair value must be converted using the foreign exchange rate on the date fair value was determined.

4.2 FOREIGN CURRENCY-DENOMINATED SUBSIDIARY FINANCIAL STATEMENTS

Subsidiary financial statements are prepared in the currency that is most representative of their economic environment. This currency is deemed to be their functional currency pursuant to IAS 21.

Subsidiary financial statements were translated into Euros using the following exchange rates:

- closing rate for all balance sheet items, with the exception of the components of equity which continue to be translated at historical exchange rates (translation rates used on the date the subsidiary was acquired by the Group);
- average rate for the period for income statement and cash flow statement items.

Translation differences arising in respect of the profit or loss and shareholders' equity are recognised directly in shareholders' equity under the heading "Translation differences" in the case of the Group's share, with the portion attributable to third parties being recorded in minority interests.

On the disposal of a foreign subsidiary, the translation differences relating to such disposal and recognised in shareholders' equity after 1 April 2004 are accounted for in the income statement.

↗ TRANSLATION EXCHANGE RATES USED IN THE CONSOLIDATION

	Closing rate		Average rate	
	31 March 2013	31 March 2012	31 March 2013	31 March 2012
Thai Baht	€0.026722	€0.024285	€0.025239	€0.023728

5. Balance sheet date

All companies are consolidated on the basis of financial statements drawn up at 31 March 2013.

6. Income statement presentation

6.1 SALES REVENUE AND COST OF SALES RECOGNITION

In accordance with IAS 18.20, sales arising from contracts of less than one year in duration, which primarily relate to the sale of spare parts ("Services"), are recorded upon transfer of risks and rewards, which is generally at the time of delivery to the customer. The same applies to short-term service provisions, carried out from time to time.

For services provided over a longer period, sales are recognised based on the percentage of completion of services.

Sales arising from contracts of more than one year in duration are recognised using the percentage of completion method in accordance with IAS 11. Percentage of completion is measured in the large majority of cases on the basis of relating actual sales billed and delivered to the total contract sales value or more rarely, by relating the actual costs incurred (work carried out) to the total costs estimated for the contract (method used by Faiveley Transport Ibérica for the Barcelona metro platform door project).

The total estimated cost of completion includes direct costs (such as raw materials, labour and engineering) relating to the contracts. This includes costs already committed and future costs, including warranty costs and costs specific to the probable risks. Provision charges for losses to completion and other provisions on contracts are recorded to cost of sales in the income statement if, during the review of the contracts, it seems probable that the costs to which they relate will arise.

All changes in the conditions of contract fulfilment and all changes to margins at completion are recorded as cost of sales in the income statement in the period in which they are identified.

Warranty provisions are valued based on contract terms and an assessment of risks based on sector knowledge.

6.2 PROFIT FROM RECURRING OPERATIONS

This is the profit before restructuring costs, gains and losses on disposals of intangible assets and property, plant and equipment and exceptional accounting adjustments.

6.3 FINANCE INCOME AND COSTS

Finance income and costs include:

- interest income and expense on the consolidated net debt, which consists of borrowings, other financial liabilities (including liabilities in respect of finance leases) and cash and cash equivalents;
- dividends received from unconsolidated equity investments;
- the effect of discounting financial provisions;
- changes in financial instruments;
- foreign exchange gains and losses on financial transactions.

6.4 INCOME TAX

The Group calculates its income tax in accordance with tax laws applicable in the country where profits are taxable.

The current tax liability is calculated using the tax laws that have been enacted or substantively enacted by the balance sheet date in the countries where the Group's subsidiaries and associates operate and generate taxable profits. Management periodically assesses tax positions taken in light of applicable tax regulations, where the latter are subject to interpretation, and determines, if applicable, the amounts it expects to pay to tax authorities.

Temporary differences between the book value of assets and liabilities and their tax base, tax losses carried forward and unused tax credits are identified in each taxable entity (or tax group, if applicable). The corresponding deferred tax is calculated using the tax rates that have been enacted or substantively enacted for the financial year during which assets will be realised or liabilities settled (see § C.16).

Pursuant to the CNC communication of 14 January 2010 relating to the accounting treatment of the component based on value added (CVAE) of the CET tax (*Contribution Economique Territoriale*) introduced in France by the 2010 Finance Act of 31 December 2009, following an analysis carried out by the Group and in light of its specific features, it was decided to treat the value-added based CVAE as income tax, in order to remain consistent with the classification of similar taxes in Germany and Italy (*Gewerbesteuer* and IRAP, respectively).

6.5 PROFIT OR LOSS FROM OPERATIONS HELD FOR DISPOSAL AND DISCONTINUED OPERATIONS

The net of tax profit or loss from discontinued operations as defined by IFRS 5 is presented under a separate heading in the income statement. It includes the net profit or loss of such activities during the year and up to their date of disposal, as well as the net gain or loss on the disposal itself.

6.6 EARNINGS PER SHARE

Basic earnings per share is calculated based on the profit attributable to holders of ordinary shares of the parent company, divided by the weighted average number of ordinary shares outstanding during the financial period. Since the shares of the consolidating entity held by itself are deducted from shareholders' equity, these shares are excluded from the weighted average number of outstanding shares.

Diluted earnings per share is calculated based on the weighted average number of shares outstanding during the financial period adjusted for the number of shares that would be generated by the exercise of share subscription options as per the conditions of IAS 33.45 and subsequent.

7. Intangible assets

7.1 GOODWILL

On each acquisition, the Group identifies and assesses the fair value of all assets and liabilities acquired particularly intangible assets and property, plant and equipment, brands, inventories, work-in-progress and all provisions for liabilities and charges.

The unallocated difference between the cost of securities in companies acquired and consolidated and the fair value of assets and liabilities is recorded as goodwill. Where this difference is negative, it is taken directly to the income statement. When this difference is positive, it is recognised in the balance sheet.

In case of the partial acquisition of a company, goodwill will either be recognised based on the percentage of ownership of this new entity or fully consolidated, *i.e.* taking account of the share attributable to minority interests.

Acquisitions of minority interests in subsidiaries that are already fully consolidated

Prior to the application of revised IAS 27, the Group had elected to recognise additional goodwill, which corresponds to the difference between the acquisition cost of securities and the additional share in consolidated equity that these securities represented.

Acquisitions of minority interests are now recognised as a deduction from the Group's share of shareholders' equity.

Accounting treatment of put options on minority interests

Similar to the accounting treatment used for acquisitions of minority interests, the Group elected to use the option to recognise additional goodwill as part of the accounting treatment of put options on minority interests that existed prior to 1 April 2010. Put options granted after revised IFRS 3 and IAS 27 became applicable are recognised as a deduction from equity (see below § 10.6).

7.2 INTANGIBLE ASSETS ACQUIRED SEPARATELY OR PURSUANT TO A BUSINESS COMBINATION

Intangible assets acquired separately are recorded in the balance sheet at their historical cost.

Intangible assets (primarily brands) resulting from the valuation of assets of acquired companies are recorded in the balance sheet at their fair value, determined generally on the basis of appraisals by external experts when significant in value.

Intangible assets, other than those with indefinite useful lives, are amortised on a straight-line basis over their estimated useful lives, which are as follows:

- Software: straight line basis 1 to 10 years;
- Patents: straight line basis 5 to 15 years;
- Development costs: straight line basis 3 years.

7.3 INTERNALLY-GENERATED INTANGIBLE ASSETS

Research costs are expensed immediately when incurred.

Development costs on new projects are capitalised if all of the following criteria are strictly met:

- the project is clearly identifiable and its related costs are separately identified and reliably measured;
- the technical feasibility of the project has been demonstrated and the Group has the intent and the financial capability to complete the project and to use or to sell the products derived from this project;
- it is probable that the project will yield future economic benefits for the Group.

These costs related to the purchase of raw materials and labour. Capitalised project development costs are amortised on a straight-line basis over 3 years.

8. Property, plant and equipment

Property, plant and equipment are measured at their acquisition cost or at their fair value when new subsidiaries are acquired. Depreciation is calculated separately for every asset component that has a distinct useful life. The useful lives of the assets concerned are generally deemed to be as follows:

- Buildings 15 to 25 years;
- Fixtures and fittings 10 years;
- Industrial machinery and equipment 5 to 20 years;
- Tools 3 to 5 years;
- Vehicles 3 to 4 years;
- Office equipment and furniture 3 to 10 years.

LEASE CONTRACTS

Assets acquired under finance leases are recorded as assets when the lease agreement transfers substantially all the risks and rewards inherent to ownership of an asset to the Group. At each balance sheet date, a finance lease recognised as an asset gives rise to a depreciation charge (consistent with the depreciation policy applicable to other depreciable assets of the same nature). Lease agreements for which the risks and rewards of ownership are not transferred to the Group are treated as operating leases, with corresponding lease payments expensed on a straight-line basis over the lease term.

9. Impairment of asset values

Goodwill and intangible assets with indefinite useful lives are tested for impairment each year.

Intangible assets and property, plant and equipment with finite useful lives are tested for impairment as soon as there is any indication that such assets may have become impaired. Where relevant, a provision for impairment is recognised.

Impairment testing involves comparing the recoverable amount of the asset with its net book value. Recoverable amount is the higher of fair value less costs to sell and value in use.

Tests are carried out on the basis of Cash Generating Units (CGUs) to which these assets are allocated. A CGU is a consistent group of assets whose continuous utilisation generates cash inflows that are largely independent of cash inflows generated by other groups of assets.

The value in use of a CGU is determined based on the present value of the estimated future cash flows to arise from these assets, within the framework of economic assumptions and operating conditions anticipated by Group Executive Management. The measurement carried out is based mainly on the Group's three-year plan. Cash flows beyond that timeframe are extrapolated by applying a stable growth rate.

The recoverable amount is the sum of the present value of the cash flows and the present value of the terminal residual value. The discount rate is determined using the sector's weighted average cost of capital.

When this value is less than the book value of the CGU, an impairment loss, first allocated to goodwill, is recognised.

In the event of an indication of a recovery in value, this impairment loss may eventually be reversed to the extent that it does not exceed the net book value of the asset at the same date had it not been subject to a writedown. Impairment losses recorded on goodwill may not be reversed.

10. Financial assets and liabilities

Pursuant to IAS 32 and IAS 39, financial assets and liabilities comprise operating receivables and liabilities, financial loans and liabilities, shareholdings in unconsolidated companies, marketable securities, borrowings and other financial liabilities and derivative financial instruments.

On initial recognition, a financial instrument is valued at fair value, adjusted for issue costs:

- fair value, as defined by the applicable IAS, corresponds as a general rule to transaction value, with exceptions discussed below;
- under the IAS, the term "issue costs" is used to mean all of the ancillary costs directly attributable to the acquisition or implementation of the financial instruments.

In certain specific cases, e.g. loans, borrowings, operating receivables and liabilities which are interest-free or at beneficial rates, fair value does not correspond to the fair value on initial recognition in the balance sheet. In such cases, fair value is calculated by discounting the cash flows associated with the financial instrument, using the market rate increased by a risk premium.

At future balance sheet dates, financial assets and liabilities are recorded at either their amortised cost or fair value depending on the class of assets or liabilities to which they belong.

The accounting treatment of identified financial assets and liabilities is as follows:

10.1 OPERATING RECEIVABLES

At each balance sheet date, the Group assesses whether there is an objective indication of impairment of a receivable. If there are objective indications of impairment in respect of assets recognised at amortised cost, the book value of the asset is reduced *via* the use of an impairment account. The amount of the impairment must be recognised in the income statement.

If the amount of the impairment reduces during a subsequent accounting period, and if such reduction can be objectively linked to an event that occurred after the recognition of the impairment, the impairment loss previously recognised must be reversed to the extent that the book value of the asset does not exceed the amortised cost on the date the impairment loss is reversed. Any subsequent reversal is recognised in the income statement.

In the case of trade receivables, an impairment loss is recognised when there is an objective indication (such as a probability of the debtor suffering bankruptcy or significant financial difficulties) that the Group will be unable to recover the amounts due in accordance with the contractual terms of the invoice. The book value of the trade receivable is reduced *via* the use of a value adjustment account.

Within the framework of the factoring of trade receivables, an analysis of the risks and rewards relating to the transfer of such receivables must be conducted pursuant to IAS 39 (credit risk and interest rate risk primarily):

- if the risks and rewards are substantially transferred, the receivables are removed from the balance sheet against cash;
- if the risks and rewards are substantially retained, the receivables are maintained on the balance sheet with a corresponding liability being recognised, the transaction being accounted for as a borrowing guaranteed by receivables.

10.2 FINANCIAL RECEIVABLES AND LOANS

These financial instruments are also recorded at their amortised cost. They are subject to valuation tests, which are realised when there is an indication that their recoverable value is less than their book value, in accordance with the same principles as those described in Note C.10.1. The impairment loss is recorded in the income statement as are any loss reversals.

10.3 SHAREHOLDING IN UNCONSOLIDATED COMPANIES

These financial instruments are classified as assets held for sale. They are unlisted shares for which the fair value cannot be reliably determined and therefore the book value at which they are recognised is their acquisition cost.

In the event of an objective indication of impairment of the financial asset (notably a significant and sustained drop in its value), the impairment loss is recognised in the income statement and may not be reversed in a subsequent period other than on the sale of the shareholding concerned.

10.4 CASH, MARKETABLE SECURITIES AND CASH EQUIVALENTS

Cash and marketable securities reflected in the balance sheet include cash balances, bank accounts, term deposits maturing in less than three months and securities that can be traded on official exchanges. These short-term instruments comprise money market funds and certificates of deposit. They are considered by the Group as financial assets held for trading and are valued at their fair value, with any movements in fair value recorded to the income statement.

In the case of highly liquid short-term investments (maturity not exceeding three months), it is reasonable to assume that their fair value is equal to their book value (capitalised interest included).Such items are therefore classified as cash equivalents.

10.5 BORROWINGS AND OTHER FINANCIAL LIABILITIES

Borrowings and other financial liabilities are stated at amortised cost.

10.6 PUT OPTIONS HELD BY MINORITY SHAREHOLDERS IN GROUP SUBSIDIARIES

If the put options held by minority shareholders in Group subsidiaries have an impact on the transfer of risks and rewards associated with underlying securities, the put option gives rise to the recognition of a firm and immediate acquisition of the securities, with their payment being deferred.

In accordance with IAS 32, put options are recognised as financial liabilities if they have no impact on the transfer of risks and rewards. The amount reflected in the balance sheet corresponds to the present value of the exercise price of put options, measured according to the discounted future cash flow method. This liability is offset under equity.

Subsequent fair value movements are recognised:

- in equity, for the estimated change in value of the exercise price;
- in net financial income (cost) for the reversal of debt discounting.

Specific case of put options granted before 1 April 2010, *i.e.* before IFRS 3R and IAS 27R came into force

The difference between the present value of the liability and the book value of reclassified minority interests is recognised as “goodwill in progress” as long as the put option has not been exercised or extinguished.

When the put option is exercised, goodwill in progress is reclassified as goodwill.

Subsequent fair value movements are recognised as goodwill in progress and the impact of the reversal of debt discounting is taken to the income statement.

11. Derivative financial instruments

The Group uses derivative financial instruments to manage its exposure to movements in interest rates and in the exchange rates of foreign currencies. As part of its hedging policy, the Group uses interest rate swaps and contracts for forward purchases and sales of currencies. The Group may also use caps, floors and options.

11.1 EXCHANGE RISK

The Group operates in foreign countries and is therefore exposed to exchange risk as a result of its exposure to a number of currencies. The management of exchange risk is centralised by the parent company’s Treasury Department and comprises two parts:

- exchange risk management relating to tenders in foreign currencies (uncertain risk);
- exchange risk management relating to commercial contracts (certain risk)

The Group’s policy is to hedge all expected future transactions in each major currency.

11.2 INTEREST RATE RISK

The Group manages its interest rate cash flow risk through the use of variable rate against fixed rate swaps or caps and tunnels. From an economic point of view, the effect of these interest rate swaps or caps is to convert variable rate borrowings into fixed rate borrowings. The Group may also use structured instruments that do not qualify for hedge accounting.

A detailed description of the exchange and interest rate risks is provided in Note E.14 to the financial statements: “Financial instruments and financial risk management”.

11.3 DERIVATIVE FINANCIAL INSTRUMENT ACCOUNTING RULES

The majority of derivative instruments used by the Group qualify for accounting purposes as hedges if the derivative is eligible for hedge accounting and if the hedging is documented according to the principles of IAS 39. In practice, the derivative financial instruments not qualified as hedging by the Faiveley Transport Group are the following:

- foreign exchange options to cover tenders;
- structured interest rate swaps.

The derivative hedging instruments are recorded in the balance sheet at their fair value. The recognition of movements in the fair value of derivative instruments depends on the following three classifications:

- fair value hedges: the movements in the fair value of the derivative are taken to the income statement and offset, to the extent of the effective part, the movements in fair value of the underlying asset, liability or firm commitment, also recorded in the income statement. Forward exchange transactions and exchange swaps that cover certain commercial contracts and financial assets and liabilities denominated in foreign currencies are considered as fair value hedges;
- hedging future flows: the movements in fair value are recorded in equity for the effective part and reclassified in income when the item covered affects the latter. The ineffective part is taken directly to financial income and expense.

  Interest rate derivative instruments, as well as budget cash flow hedges are treated as future cash flow hedges;
- transaction derivatives: the movements in the fair value of the derivative are recorded in finance income and costs.

12. Inventories and work-in-progress

Inventories and work-in-progress include raw materials, work-in-progress and finished products. They are stated at the lower of production cost and estimated net realisable value.

Raw materials are measured using the weighted average cost method.

Work-in-progress and finished products are measured at their production cost. The cost of inventories includes direct raw material costs and, where relevant, direct labour costs as well as overheads incurred in bringing the inventories to their present location and condition.

Writedowns are recorded to take into account the risk of obsolescence.

13. Non-current assets held for disposal and discontinued operations

IFRS requires the separate disclosure in the balance sheet of the total value of assets and liabilities of operations held for disposal and discontinued without any offset. IFRS also requires the separate disclosure in the income statement of the total after tax profit realised from discontinued operations.

Non-current assets held for disposal may no longer be depreciated or amortised. They are valued at the lower of their book value and fair market value net of disposal costs.

14. Treasury shares

Faiveley Transport parent company shares held by the subsidiaries or the parent company are deducted from consolidated equity, with any gains or losses on their disposal being directly allocated to equity.

15. Provisions for liabilities and charges

15.1 PROVISIONS FOR RETIREMENT BENEFITS AND OTHER PERSONNEL COMMITMENTS

In accordance with the laws and practices of each country, Faiveley Transport Group participates in retirement benefit plans, social security plans, medical plans and employment termination indemnity schemes, with benefits based on several factors including seniority, wages and payments made into mandatory general plans.

These plans may be defined-benefit or defined-contribution plans.

Post-employment benefits – defined benefits

Following retirement, Group employees receive benefits (pension or allowance) funded by a number of Group companies. These defined benefit plans primarily concern the United Kingdom, Germany, France and Italy.

In the United Kingdom and Germany, the majority of these plans involve supplementary pension plans. In the United Kingdom, commitments are pre-financed by plan assets.

In France, employees are granted by law a retirement benefit for an amount that varies according to the applicable collective agreement, seniority of employment and final salary. This benefit is paid by the employer when the employee retires. The 2010 pension reform, which in particular plans to raise the retirement age from 60 to 62 years by 2017, was taken into account and treated as an actuarial gain or loss.

In Italy, the law provides for the payment by companies of the "Trattamento di Fine Rapporto" (Severance pay) or TFR for the benefit of employees. The TFR is funded by a 7.4% contribution paid by the employer and is accumulated so as to provide the employee with a lump sum when leaving the Company. The impact of the TFR reforms has been integrated since 31 March 2008. The provision established in the Company's financial statements relates to rights acquired prior to 1 January 2007. For rights acquired subsequently, the employer's commitment is limited to the payment of contributions to external funds.

Commitments for defined benefit plans are calculated based on the projected unit credit method. Actuarial differences (resulting from changes in assumptions or experience variances) are recognised according to the corridor method. That portion of actuarial gains or losses exceeding 10% of the higher of the value of future benefits and the value of plan assets is amortised over the average remaining employment life of participants in the plan.

Post-employment benefits – defined contributions

Contributions into defined contribution plans are expensed when made.

Other long-term benefits

Other long-term benefits primarily concern Germany (seniority bonuses and early retirement schemes) and France (seniority awards).

Actuarial differences for this type of plan are expensed when they arise.

The net expense for retirement commitments and similar benefits is broken down between cost of sales and fixed costs, according to the distribution of the Company workforce.

15.2 OTHER PROVISIONS FOR LIABILITIES AND CHARGES

In accordance with IAS 37, the Faiveley Transport Group recognises a provision when an obligation to a third party arises that will result in a probable loss or liability that can be reasonably measured. The Group reports a contingent liability as an off-balance sheet commitment when there is only a possibility of a resulting loss or liability or when it cannot be reasonably measured.

These provisions are determined based on the best knowledge available concerning risks incurred and their probability of realisation and are allocated to specific risks. They cover, in particular:

- probable after sales service expenditure arising from mechanical warranties;
- probable expenditure for industrial risks covered by contractual guarantees. The measurement of the provision amount is based on such factors as the products' technical complexities, their innovative nature, geographical proximity, etc.;
- litigation risks;
- losses on completion for the part exceeding the amounts due by the customers;
- restructuring costs when the restructuring has been officially announced and is subject of a detailed plan or whose execution has already begun.

These provisions are valued at their present value when their impact is significant and their measurement reasonably reliable.

Provisions for guarantees are calculated according to the percentage related to the type of product manufactured and experience gained of its reliability over time. The percentages vary from 1% to 6% according to the products and are applied to the sales achieved by project.

16. Deferred tax

In accordance with IAS 12, deferred tax is calculated using the balance sheet liability method (use of tax rates adopted or virtually adopted at the balance sheet date) for all temporary differences between the accounting and tax treatments of assets and liabilities of each Group entity noted at the balance sheet date.

Deferred tax assets arising from tax losses carried forward are recognised when it is probable that the Group will realise sufficient taxable profits in the next financial year to offset against the tax loss incurred.

Deferred tax is recorded in the income statement, unless it relates to items directly posted to other items of comprehensive income, in which case it is also recognised under other items of comprehensive income.

17. Segment reporting

In light of criteria defined by IFRS 8 and given the Group's internal organisation (steering of activities by project, with projects generally comprising several products and involving the participation of several Group subsidiaries) and the structure of the market, the Group opted for a presentation similar to IAS 14, pursuant to IFRS 8. In addition, it was deemed appropriate to retain an analysis by geographic region.

As a result, the application of IFRS 8 had no impact on the information presented at 31 March 2013 by the Group.

Segment reporting is presented in Note E.17.

D. CHANGES IN CONSOLIDATION SCOPE

1. Newly-created companies

Nil.

2. Acquisitions

2.1 DETAILS OF NEW ACQUISITIONS

Nil.

2.2 SUMMARY OF ACQUISITIONS DURING THE LAST THREE YEARS

Companies acquired	Main business	Acquisition date	% control	Acquisition cost
2011/2012				
Graham-White Manufacturing Co. and its subsidiaries	Design and manufacture of compressed air drying technology and brake components	3 February 2012	100%	US$118,477 thousand
2010/2011				
Faiveley Transport Schweiz AG (formerly Urs Dolder AG)	Manufacture of electrical heating devices	24 February 2011	80%	€2,926 thousand

3. Disposals and companies no longer consolidated

Nil.

4. Movements in goodwill during the allocation period

The value of assets contributed by Graham-White Manufacturing Co., following the acquisition of the company by the Group in February 2012, was restated and offset against goodwill.

This restatement resulted in an increase of US$0.6 million (€0.5 million) in the opening goodwill balance.

E. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS AND ACCOMPANYING TABLES (€ THOUSANDS)

1. Goodwill

Goodwill mainly arises from the acquisition of subsidiaries and the purchase of minority interests in Faiveley SA by the holding company Faiveley Transport in 2008; these two companies have since merged into the current Faiveley Transport parent company.

This goodwill was measured in accordance with the partial goodwill method (see Note C.7.1).

Faiveley Group Management monitors its business performance by entity or group of entities, which generally correspond to a major area of specialisation (see table below). Goodwill has been allocated to the companies or groups acquired, except for goodwill arising from the purchase of minority interests which is monitored as a whole at Group level.

The following tables provide details of operating and closing goodwill balances for the reported periods, their change during the period and their allocation to the various companies or groups of companies corresponding to the cash generating units or groups of cash generating units used by Faiveley Transport for in-house monitoring:

The following table provides details of unallocated goodwill as at 31 March 2013:

	Gross	Accumulated impairment	Net 31 March 2013	Net 31 March 2012
Faiveley Transport minority interests	265,778	-	265,778	265,778

TOTAL	**562,028**	**(362)**	**74,175**	**-**	**-**	**13,140**	**648,981**

(1) These movements are due to the translation difference on goodwill recognised in US dollars: Graham-White Manufacturing Company (US$97,615 thousand) and Amsted Rail-Faiveley LLC/Ellcon National Inc. (US$45,057 thousand).
(2) Adjustment to the goodwill of Nowe GmbH following the discounting of the put option on shares held by minority interests.
(3) Reclassification of the Faiveley Transport Gennevilliers business goodwill.

At least once a year, at year-end, the Group carries out an impairment test on groups of cash generating units to which goodwill has been allocated. This test involves comparing their book value and their recoverable value. Should the recoverable value fall below the book value, impairment is recognised for the difference. No impairment was recognised in the current period nor in the previous period.

The recoverable value of all groups of cash generating units to which goodwill has been allocated was determined based on their estimated value in use.

The value in use is measured taking account of future cash flow forecasts approved by Management and covering a period of 3 years. This period includes the budget prepared for the year that follows the year for which financial statements have been prepared and the following two years. The Group benefits from very high visibility regarding future business activity: its order book at 31 March 2013 represents the equivalent of 19 months of sales (29 months in original equipment and 6 months in Services).

In determining the value in use, cash flows are determined based on standard WCRs, not taking account of potential restructuring and capital expenditure that may improve asset performance.

Future cash flow forecasts estimated beyond the 3-year period are extrapolated using a growth rate of:

- 2.5% for the two years that follow the last year of the plan,
- 1.5% for the following years and to infinity.

This rate is deemed prudent given the growth rates expected from the markets in which the Group operates.

These flows are discounted using the Weighted Average Cost of Capital as discount rate. This rate differs depending on the geographic location of the groups of CGUs:

	France	United States	All countries
Discount rate before tax	13.4%	13%	14.7%

The discount rate is determined based on the following market data:

Market data	France	United States	All countries
Risk-free rate on 10-year French government bonds	2.1%	1.8%	3.2%
Beta of sector	1.29	1.29	1.29
Market risk premium	7.2%	7.2%	7.2%

In addition to market data, Company parameters taken into account in the calculation of the discount rate include:

- estimated cost of debt: 1.4% for the 2012/2013 financial year (3-year swap rate, *i.e.* over the average maturity of Faiveley's debt and including an average spread of 80 bps);
- equity/debt ratio at the balance sheet date.

Given the Group's business model, the key assumptions that make it possible to determine the recoverable value are the growth rate and the discount rate. The Group considers that no reasonably likely change in key assumptions could lead the recoverable value to equal the book value. Sensitivity tests have been carried out on the two most significant goodwill items:

- For the Faiveley Transport CGU minority shareholders, the recoverable value is estimated at € 1,151 million, with a net book value of € 705 million.

  An increase or a decrease of 1% in the 1.5% growth rate to infinity would have a positive impact of 4.7% and negative impact of 4% on recoverable value Therefore, the recoverable amount would be € 1,211 million and € 1,101 million.

  An increase and a decrease of 1% in the 14.7% discount rate would have a negative impact of 7.2% and a positive impact of 8.4% on recoverable value. Therefore, the recoverable amount would be € 1,078 million and € 1,236 million.

- For the Sab Wabco Group of CGUs , the recoverable value is estimated at € 579 million, for a net book value of € 204 million.

  An increase and a decrease of 1% in the 1.5% growth rate to infinity would have a positive impact of 4.7% and a negative impact of 4.1% on recoverable value. Therefore, the recoverable amount would be € 608 million and € 554 million.

  An increase and a decrease of 1% in the 14.7% discount rate would have a negative impact of 7.4% and a positive impact of 8.3% on recoverable value. Therefore the recoverable value would be € 542 million and € 622 million.

2. Other intangible assets

	Gross	Accumulated amortisation	Net 31 March 2013	Net 31 March 2012
Research costs	23,124	12,704	10,420	9,498
Patents, trademarks and licences	25,287	20,352	4,935	3,189
Business goodwill	20	5	15	2,561
Other intangible assets	28,252	669	27,583	24,809
TOTAL	**76,683**	**33,730**	**42,953**	**40,057**

At 31 March 2013, intangible assets were broken down as follows:

- research costs: only include development costs incurred as part of research programmes and that comply with the IFRS capitalisation criteria. These costs are amortised over a maximum of 3 years;
- patents, trademarks and licences: this heading primarily includes computer software amortised over a maximum of 10 years and patents acquired as part of the acquisition of Carbone Lorraine's sintered brake business (Balance Sheet to € 1 million net);
- other intangible assets: primarily includes intangible assets identified and measured (in particular, sales agency agreements) as part of the creation of the Amsted Rail-Faiveley LLC joint venture, for an amount of €9 million (US$11.5 million), the value of the customer portfolio contributed by the acquisition of Graham-White Manufacturing Co., for €2.6 million (US$3.4 million) and costs already incurred of €15.3 million corresponding to the rollout of the Moving Forward project, a significant IT system integration programme, launched in 2007, whose objective is to optimise our organisations, industrial processes, equipment and the sharing of technical data within the Faiveley Transport Group.

** Translation differences for the period.*

During the 2012/2013 financial year, old inventories and inventories that had become totally obsolete were scrapped. Provisions of 70.6% of the value of these inventories had previously been raised. The impact on the income statement for the year ended 31 March 2013 was a loss of €2.2 million.

7. Work-in-progress on projects

At 31 March 2013, net work-in-progress on projects was valued at €98.5 million, compared to €91 million in the previous year. This primarily includes engineering costs on long-term contracts. At each balance sheet date, the Group assesses its recoverable value. In the event of a loss-making contract, writedown is recognised as a reduction of contracts in progress.

Gross work-in-progress on projects was €115 million at 31 March 2013, compared to €98 million at 31 March 2012.

Provisions for losses on completion, presented as a reduction of work-in-progress on projects, totalled €16.8 million at 31 March 2013 as against €6.9 million at 31 March 2012.

8. Current receivables

8.1 TRADE RECEIVABLES

	Gross	Provisions	Net 31 March 2013	Net 31 March 2012
Trade receivables	281,963	4,982	276,981	272,603
Sales of receivables	(92,788)	-	(92,788)	(93,201)
TOTAL	**189,175**	**4,982**	**184,193**	**179,402**

Movements in provisions for doubtful trade receivables

Year ended:	Opening balance	Change in Group structure	Charges to provisions	Reversals provisions used	Reversals provisions not used	Other movements	Closing balance
31 MARCH 2013	**6,193**	**16**	**2,045**	**(444)**	**(2,915)**	**87**	**4,982**
31 March 2012	4,881	200	3,232	(1,211)	(1,024)	115	6,193

A provision for doubtful trade receivables is raised when there is an objective indication of the Group's inability to recover all or part of the amounts due under the terms initially laid down in respect of the transaction. Significant financial difficulties encountered by the debtor, the probability that the debtor will become bankrupt or undergo a financial restructuring or payment default are indications of the impairment of a receivable.

Trade receivables at year end

	Total balance sheet	Receivables not yet due	Total due	Receivables due			
				Less than 60 days	Between 60 and 120 days	Between 120 and 240 days	More than 240 days
Gross value	189,175	158,944	30,231	18,617	4,595	1,827	5,192
Provisions	(4,982)	(1,407)	(3,575)	-	(165)	(1,087)	(2,323)
NET VALUE	**184,193**	**157,537**	**26,656**	**18,617**	**4,430**	**740**	**2,869**

Receivables remaining unpaid beyond the contractual due date represent, in most cases, amounts confirmed by customers but in respect of which payment is subject to the retentions identified when work was inspected.

8.2 OTHER CURRENT ASSETS

	Gross	Provisions	Net 31 March 2013	Net 31 March 2012
Supplier credit notes	775	-	775	1,431
Social security and tax receivables	14,149	-	14,149	10,650
Prepaid expenses	5,002	-	5,002	4,478
Accrued income	454	-	454	515
Other receivables	14,614	117	14,497	1,441
TOTAL	**34,994**	**117**	**34,877**	**18,515**

At 31 March 2013, "Other receivables" included accrued income of €12.3 million (US$15.8 million) relating to the Wabtec compensation.

9. Current financial assets

	31 March 2013	31 March 2012
Guaranteed deposits and securities*	3,801	4,021
Other financial receivables	272	304
Current accounts	29	-
Fair value of derivatives – Assets	5,246	5,003
TOTAL	**9,348**	**9,328**

* *Under our factoring programs, in order to guarantee the repayment of amounts for which the Group may become liable, a non-interest bearing escrow account was created representing 10% of transferred receivables outstanding. This rate may potentially be adjusted in the event of an increase in disallowed receivables (credit notes, disputes, non-payment or discounts).*
The outstanding guarantees at 31 March 2013 was €3,727 thousand and €3,834 thousand at 31 March 2012.

10. Closing cash and cash equivalents (gross amounts)

	31 March 2013	31 March 2012
Short-term investments	22,040	41,085
Cash	152,922	169,166
Bank overdrafts	(7,840)	(2,405)
Invoices factored and not guaranteed	(1,209)	(1,023)
TOTAL	**165,913**	**206,823**

The Group does not hold a share portfolio but deposits excess cash balances. At 31 March 2013, it had certificates of deposits of €8.2 million and fixed-term deposits of €13.8 million. These deposits meet the criteria specified by IAS 7, which enables them to be classified as cash equivalents.

For local regulatory reasons, the cash and cash equivalents held by the Brazilian subsidiary (€4.4 million at the end of March 2013), may not be pooled with the Group's other cash resources, or be paid out as dividends until losses carried forward are not settled. As an exception, these cash balances are invested locally in certificates of deposits with a maturity exceeding 3 months. However, they may be drawn down at any time and do not bear any capital risk.

11. Equity

11.1 SHARE CAPITAL

At 31 March 2013, the Company's share capital totalled €14,614,152 divided into 14,614,152 shares of €1 each, fully paid up. Shares registered in the name of the same shareholder for at least two years have double voting rights.

As regards its capital management, the Faiveley Transport Group's main objective is to ensure the retention of a good credit risk rating and sound capital ratios in order to facilitate its activity and maximise value for its shareholders.

The Group manages its capital by ensuring that it maintains three financial ratios within the limits defined by its credit agreements (see Note E.13).

The Group manages its capital structure and makes adjustments depending on changes in economic conditions. With a view to maintaining or amending its capital structure, the Group may adjust the payment of dividends to its shareholders, redeem part of its capital or issue new shares. The management objectives, policies and procedures remained unchanged in 2013 and 2012.

Composition of the share capital

	Nominal value	31 March 2012	New shares issued	Double voting rights granted	31 March 2013
Ordinary	1	6,661,370	-	(68,750)	6,592,620
Redeemed	-	-	-	-	-

Treasury shares	2.61	-	2.93	-
Registered securities*	5.99	7.44	6.26	8.08
General public	38.78	25.47	38.19	25.22

** Excluding treasury shares and Faiveley Family.*

Treasury shares

At 31 March 2013, Faiveley Transport held 382,050 treasury shares, including 369,658 in nominative form and 12,392 through its liquidity contract.

Given the purchase cost of the Faiveley Transport shares acquired to service stock option, share subscription or free share allocation plans, the exercise prices granted and the price of the Faiveley Transport share at 31 March 2013, applied to unallocated options, the unrealised capital loss on treasury shares was €4.3 million.

11.2 TRANSLATION DIFFERENCES

Translation differences comprise mainly the gains and losses resulting from the translation of the equity of subsidiaries whose functional currency is other than the euro.

Breakdown of translation differences by currency

11.5 FREE PERFORMANCE-BASED SHARES

a) Share purchase option plans

In 2005, Faiveley Transport implemented a share purchase option plan for the benefit of key Faiveley Transport Group Management (excluding the managers who invested in Faiveley Management SAS). This plan was approved by the Extraordinary General Meeting of 27 September 2005 for a period of thirty-eight months.

In order to meet its future obligation to transfer these shares to the plan beneficiaries, Faiveley Transport began a share buyback programme at the end of 2005. Should the share purchase options be exercised, they would give rise to the purchase of existing Faiveley Transport ordinary shares.

As purchase options are exercisable from the second anniversary of their allocation by the Chairman of the Management Board, subject to the beneficiary remaining employed by the Faiveley Transport Group on the exercise date and his/her acceptance of options terms and conditions, 259,044 options have been exercised to date.

Given the departure of certain beneficiaries and options exercised since the plans were implemented by the Management Board, at 31 March 2013 56,996 options remained exercisable by 10 beneficiaries.

Initial fair value of the plan *(€ millions)*	2.8
Charge for the year *(€ millions)*	0.7

c) Free performance-based share allocation plan

PLAN AUTHORISED BY THE GENERAL MEETING OF 13 SEPTEMBER 2010

Faiveley Transport's Combined General Meeting of 13 September 2010 authorised the Management Board to allocate free performance-based shares, either existing or to be issued, within the limit of 1% of the share capital. The free shares are subject to a retention period of a minimum of two years after their vesting date.

The performance criteria have been set for the 2010/2011 and 2011/2012 financial years.

The criteria used to reflect wealth creation for the shareholders were:

- growth in operating profit: growth of 4% per year in profit from recurring operations, before non-recurring items; and
- cash flow generation (debt reduction): cumulative cash flow from operating activities for 2010/2011 and 2011/2012 to represent 85% of the operating profit target.

The Management Board of the Company endorsed the partial achievement of performance criteria:

- profit from recurring operations for the year to 31 March 2012 was €94.7 million, as against a target of €128.6 million;
- cumulative cash flow from operating activities for the financial years 2010/2011 and 2011/2012 totalled €221.1 million, as against a target of €214 million.

PLAN AUTHORISED BY THE GENERAL MEETING OF 14 SEPTEMBER 2012

The Combined General Meeting of 14 September 2012 delegated the Management Board powers for the allocation free performance shares of the Company, either new or already issued, within the limit of 1% of the share capital. These shares must be retained for a minimum period of 2 years.

The performance criteria have been set for the 2012/2013 and 2013/2014 financial years.

The criteria used to reflect wealth creation for the shareholders were:

- growth in operating profit: average growth of 4% per year in profit from recurring operations and
- cash flow generation (debt reduction): cumulative cash flow from operating activities for 2012/2013 and 2013/2014 to represent 85% of the operating profit target.

In the event performance criteria are fully achieved or exceeded, each beneficiary will receive 100% of the number of shares allocated to them.

In the event performance criteria are partly achieved, each beneficiary will receive a percentage of the number of shares allocated to them:

- criteria of operating profit growth:
  - 0% if growth is nil or negative,
  - *pro-rata* for average growth of between 0% and 4% per year.
- criteria of cash flow generation:
  - 0% if generation is nil or negative,
  - *pro-rata* for cash flow from operating activities of between 0% and 100% of the target.

d) Free share allocation plan

FREE SHARE ALLOCATION PLAN AUTHORISED BY THE GENERAL MEETING OF 14 SEPTEMBER 2011

The Combined General Meeting of 14 September 2011 delegated the Management Board powers for the allocation free of charge of ordinary shares of the Company, either new or already issued, within the limit of 1% of the share capital on 14 September 2011.

At its meeting held on 4 January 2012, the Management Board decided to implement this delegation and to allocate free shares. This decision was made as part of an employee shareholding plan aimed at a broader population of executives. The programme provides that an employee holding shares in the Company in a personal capacity will be granted two free shares for every share held, not exceeding a limit set for each level of management.

FREE SHARE ALLOCATION PLAN AUTHORISED BY THE GENERAL MEETING OF 14 SEPTEMBER 2012

The Combined General Meeting of 14 September 2012 delegated the Management Board powers for the allocation free of charge of ordinary shares of the Company, either new or already issued, within the limit of 1% of the share capital on 14 September 2012.

At its meeting held on 3 December 2012, the Management Board decided to implement this delegation and to allocate free shares. This decision was made as part of an employee shareholding plan aimed at a broader population of executives. The programme provides that an employee holding shares in the Company in a personal capacity will be granted two free shares for every share held, not exceeding a limit set for each level of management.

The actual return on investments was €5.9 million in the year to 31 March 2013 (compared to €2.6 million for the year to 31 March 2012).

Contributions in respect of defined benefit schemes in the United Kingdom and India were estimated to total €1.8 million for 2013.

The expected return on investments is estimated at €2 million in 2013. A one-point increase in the assumed percentage rate of return would generate €0.5 million in additional income.

Actuarial assumptions

The actuarial assumptions used to measure commitments take into account the demographic and financial conditions specific to each country or Group company.

Discount rates are determined by reference to the yields on AAA bonds with similar durations to those of the commitments as at the measurement date.

The assumptions used for those countries with the most significant commitments are shown in the following table:

	31 March 2013			31 March 2012		
	France	Germany	United Kingdom	France	Germany	United Kingdom
Discount rate	2.85%	2.85%	4.25%	3.85%	3.85%	4.80%
Inflation rate	2.00%	2.00%	3.30%	2.00%	2.00%	3.15%
Average salary increase rate	2.50%	1.57%	3.65%	3.00%	1.60%	4.65%
Expected return on investments	NA	NA	4.58%	NA	NA	4.54%

- The sensitivity of commitments at 31 March 2013 and the cost of services rendered for the next year to a 25 basis point change in the discount rate are summarised as follows:

(€ millions)	0.25% increase in discount rate	0.25% decrease in discount rate
Effect on the value of commitments	(2.899)	3.068
Effect on the cost of services rendered	(0.032)	0.033

- The sensitivity of commitments at 31 March 2013 and the cost of services rendered for the next year to a 25 basis point change in the salary increase rate are summarised as follows:

(€ millions)	0.25% increase in discount rate	0.25% decrease in discount rate
Effect on the value of commitments	0.325	(0.312)
Effect on the cost of services rendered	0.032	(0.031)

The expected long-term rate of return on plan assets in the United Kingdom, Belgium and India was determined by taking into account the structure of the investment portfolio.

Currently the investment portfolio contains no Group securities.

The structure of the investment portfolio is as follows:

	31 March 2013	31 March 2012
Shares	49.6%	47.8%
Bonds	48.2%	49.4%
Other assets	2.2%	2.8%
TOTAL	**100.0%**	**100.0%**

- The expected return for each category of assets is as follows:

	31 March 2013	31 March 2012
Shares	6.0%	5.7%
Bonds	3.2%	3.5%
Other assets	1.7%	4.3%
TOTAL	**4.6%**	**4.6%**

12.3 CURRENT PROVISIONS

Change 2012/2013

	As at 1 April 2012	Change in Group structure	Charges to provisions	Reversals: provisions used	Reversals: provisions not used	Other movements	As at 31 March 2013
Provisions for guarantees, after sales service and penalties	70,946	(12)	44,439	(28,475)	(12,552)	918	75,264
Provisions for losses on completion	1,407	-	-	-	-	955	2,362
TOTAL CONTRACT PROVISIONS	**72,353**	**(12)**	**44,439**	**(28,475)**	**(12,552)**	**1,873**	**77,626**
Provisions for restructuring	1,628	-	122	(976)	-	(102)	672
Provisions for other risks	6,372	-	477	(1,229)	(60)	52	5,612
TOTAL OTHER PROVISIONS	**8,000**	**-**	**599**	**(2,205)**	**(60)**	**(50)**	**6,284**
TOTAL	**80,353**	**(12)**	**45,038**	**(30,680)**	**(12,612)**	**1,823***	**83,910**

* *Including exchange differences of €969 thousand and reclassifications of €854 thousand.*

Current provisions primarily relate to provisions for guarantees and after-sales service granted to our customers and litigations and claims on completed contracts. The methods underlying the recognition of these provisions are specified in Note C.15.2.

Provisions for losses on completion are shown here for the amount not allocated as a reduction of work-in-progress on projects.

The amount of provisions for losses on completion in reduction of work-progress on projects (note E.7) is €16.8 million at 31 March 2013. The total amount of provisions for losses on completion is thus €19.2 million at 31 March 2013.

13. Borrowings and financial debt

Under the credit agreements, the Faiveley Transport Group must comply with the following four financial conditions:

- leverage ratio (Consolidated Net Debt/Consolidated EBITDA) must not exceed 2.5 at 31 March 2013. At this date, the ratio was 1.47;
- gearing ratio (Consolidated Net Debt/Consolidated Equity): must not exceed 1.50 at 31 March 2013. At this date the ratio was 0.31;
- total bank guarantees must not exceed 22% of the order book. At 31 March 2013, they represented 13.5%;
- "Consolidated EBITDA/Cost of Consolidated Net Debt" must not be less than 3.5. At 31 March 2013, the ratio was 11.6.

Non-compliance with one of these covenants may result in the debt becoming immediately repayable.

13.1 BREAKDOWN AND MATURITY OF NON-CURRENT AND CURRENT FINANCIAL DEBT

	2012/2013				
	Current portion	Non-current portion			
	Under 1 year	1 to 5 years	Over 5 years	Total	2011/2012

13.3 BREAKDOWN BY INTEREST RATE OF NON-CURRENT AND CURRENT FINANCIAL DEBT

Before implementing hedge instruments

	At 31 March 2013	At 31 March 2012
Fixed rate financial debt	60,222	8,120
Variable rate financial debt	300,980	425,347
TOTAL FINANCIAL DEBT*	**361,202**	**433,467**

** Excluding fair market value of derivatives – liabilities.*

After implementing hedge instruments

	At 31 March 2013	At 31 March 2012
Fixed rate financial debt	232,898	227,418
Variable rate financial debt	128,304	206,049
TOTAL FINANCIAL DEBT*	**361,202**	**433,467**

** Excluding fair market value of derivatives – liabilities.*

13.4 CALCULATION OF NET FINANCIAL DEBT

	At 31 March 2013	At 31 March 2012
Non-current financial debt	314,842	352,865
Current financial debt	37,311	77,174
Bank overdrafts	7,840	2,405
Invoices factored – not guaranteed	1,209	1,023
TOTAL FINANCIAL DEBT (A)	**361,202**	**433,467**
Receivables from investments	-	-
Loans	1,146	1,302
Guarantees, deposits and securities paid	5,067	5,155
Various other receivables	3,468	3,405
Current accounts	29	-
TOTAL FINANCIAL RECEIVABLES (B)	**9,710**	**9,862**
Cash and cash equivalents (c)	174,958	210,247
NET FINANCIAL DEBT (A-B-C)	**176,534**	**213,358**
Equity	559,860	505,145
Net debt/equity	**31.5%**	**42.2%**
Sales	987,706	900,523
Net debt/sales	**17.9%**	**23.7%**

In economic terms, net debt should be reduced by the value of treasury shares held for sale as part of the share purchase/subscription option and free share allocation plans.

The liquidation value of these shares was €14.9 million at 31 March 2013, given the exercise prices granted for share purchase/subscription options and the year-end share price for shares not allocated to these plans.

For accounting purposes, the value of treasury shares held is deducted from equity under IFRS; this amounted to €19.2 million at 31 March 2013 and €21 million at 31 March 2012.

14. Financial instruments and financial risk management

14.1 FINANCIAL INSTRUMENTS AT 31 MARCH 2013

Main valuation methods used for financial assets and liabilities:

- since most of Faiveley Transport's financial debt bears a variable rate, its fair value (rounded to the nearest credit spread) is equal to nominal values supplemented by interest not yet due;
- due to their short maturity profile, the fair value of trade and other receivables, other current financial assets, current financial debt, cash and cash equivalents and short-term investments is deemed identical to their book value.

Au 31 March 2013	Book value	Breakdown by category					Fair value classification of instruments(1)

(1) Revised IFRS 7 requires that fair value measurements be classified on three levels. The levels of fair value hierarchy reflect the significance of data used for the measurements:

- *level 1: prices (unadjusted) of identical assets or liabilities listed on active markets;*
- *level 2: data other than listed prices covered by Level 1, that can be noted for the asset or liability concerned, either directly (i.e. prices) or indirectly (i.e. data derived from prices);*
- *level 3: data relating to the asset or liability, not based on observable market data (unobservable data).*

(2) This amount corresponds to the financial commitment recognised as part of the recognition of put options held by minority shareholders in Nowe GmbH and Faiveley Transport Schweiz AG (formerly called Urs Dolder AG) at 31 March 2013.

14.2 FINANCIAL INSTRUMENTS AT 31 MARCH 2012

At 31 March 2012	Book value	Breakdown by category: Non financial assets and liabilities	Breakdown by category: Loans, receivables and liabilities	Breakdown by category: At fair value through profit and loss	Breakdown by category: Available for sale financial assets	Fair value	Fair value classification of instruments[(1)]: Level 1	Fair value classification of instruments[(1)]: Level 2	Fair value classification of instruments[(1)]: Level 3

(2) This amount corresponds to the financial commitment recognised as part of the recognition of put options held by minority shareholders in Nowe GmbH and Faiveley Transport Schweiz AG (formerly called Urs Dolder AG) at 31 March 2012.

14.3 FINANCIAL RISK MANAGEMENT

The Faiveley Transport Group's cash policy is based on overall financial risk management principles and provides specific strategies for areas such as exchange risk, interest rate risk, raw materials risk, credit risk and liquidity risk.

The Group also uses derivative instruments, mainly forward purchases and sales of currencies, interest rate swaps or caps and exchange rate contracts or raw material swaps. The aim of these instruments is to manage the exchange, interest rate and raw material risks associated with the Group's activities and financing.

The Group's policy is not to enter into derivative instruments for speculative purposes.

The Supervisory Board of Faiveley Transport examines risk management principles as well as policies covering certain specific fields such as exchange risk, interest rate risk, raw materials risk, credit risk and liquidity risk. These policies are summarised below.

The market values of interest rate and foreign exchange derivative instruments have been measured based on year-end market prices. They have been appraised by an independent expert.

14.4 MARKET RISKS

a) Exchange risks

The Group operates in foreign countries and is therefore exposed to exchange risk as a result of its exposure to a number of currencies.

The major currencies concerned are the US Dollar, the Hong-Kong Dollar, the Czech Koruna, the Swedish Krona, the Pound Sterling and the Chinese Yuan.

The management of exchange risk on commercial contracts is centralised by the parent company's Treasury Department and comprises two parts: the certain and the uncertain risk.

EXCHANGE RISK MANAGEMENT RELATING TO TENDERS IN FOREIGN CURRENCIES (UNCERTAIN RISK)

The Faiveley Transport Group is required to submit tenders denominated in foreign currencies. The Group's hedging policy is not to use hedge

instruments during the offer phase, unless when specifically decided by Management. The aim is to manage the exchange risk through normal commercially available means. If necessary, the Group Treasury Department uses mainly exchange options.

EXCHANGE RISK MANAGEMENT RELATING TO COMMERCIAL CONTRACTS (CERTAIN RISK)

Commercial contracts in foreign currencies (most often successful tenders) are hedged by the Group Treasury Department from contractual commitment. The instruments used primarily include forward purchases and sales. Treasury may also use options.

The Group's policy is to systematically hedge the full value of future transactions expected in every major currency. The minimum trigger threshold for a foreign exchange hedge is €250 thousand.

Various flows are hedged against, at a minimum of 80%, based on the annual budget.

In addition to commercial contracts, all financial positions and management fees deemed significant are systematically hedged against.

GROUP EXPOSURE RESULTING FROM COMMERCIAL CONTRACTS AT 31 MARCH 2013

Amounts in thousands of currency	Trade receivables (a)	Trade payables (a)	Commitments (c)	Net unhedged position (d) = a-b+/-c	Hedging instruments (e)	Net hedged position (f) = d-e

SENSITIVITY ANALYSIS

The following table presents, at 31 March 2013, the sensitivity to a 10% positive or negative change in the Euro against other currencies:

- the effect on pre-tax profit only applies to financial assets and liabilities recognised in the balance sheet, which are denominated in a currency other than the functional currency of their controlling entity and which are not hedged against.
- the effect on equity results from the efficient portion of derivative instruments qualifying as cash flow hedges.

Currency	Movement in € exchange rate	Effect on profit from recurring operations (before tax)	Effect on equity reserves
Chinese Yuan	10%	170	
	(10%)	(209)	
Australian Dollar	10%	(44)	(188)
	(10%)	50	188
Hong-Kong Dollar	10%	240	-
	(10%)	(180)	-
Brazilian Real	10%	(315)	-
	(10%)	385	-
Swedish Krona	10%	242	492
	(10%)	(322)	(492)
Czech Koruna	10%	433	-
	(10%)	(521)	-
Pound Sterling	10%	(208)	-
	(10%)	210	-
Russian Rouble	10%	-	137
	(10%)	-	(148)

The impact of fluctuations in the Euro against other currencies is not material.

b) Interest rate risk

The syndicated debt, excluding the revolving facility, is indexed on US Dollar Euribor and Libor variable rates and may be hedged in accordance with the Group's interest rate risk policy. None of the revolving facilities, whether drawn or undrawn, nor the US private placement-type fixed-rate bond issue are subject to interest rate hedging.

To manage its risk, the Treasury department has implemented a hedging strategy using interest rate swaps, tunnels and caps and options.

The exposure of interest rates on loans in Euros is hedged for between 77% and 83% of the total debt bearing a Euro interest rate, depending on fluctuations for the 2013/2014 period.

The US dollar-denominated syndicated debt is no longer hedged. However, taking account of the US private placement bond issue, only 26% of debt for the 2013/2014 period is exposed to movements in interest rates.

The estimated cost of the Euro-denominated syndicated debt is 1.94% for the 2013/2014 period, hedges and spreads included. The estimated cost of the US-denominated debt, which includes the US Private Placement is estimated at 3.87%. The total cost of the Group's debt for 2013/2014 is therefore estimated at 2.5%.

Considering the amortisation profile of the syndicated facility and interest rate hedges, the net exposure at 31 March 2013 was as follows:

EUR-denominated debt	Financial debt		Hedge instruments		Net exposure	
	Fixed rate	Variable rate	Fixed rate	Variable rate	Fixed rate	Variable rate
Less than 1 year	-	32,440	32,440	-	-	-
1 to 2 years	-	32,440	32,440	-	-	-
2 to 3 years	-	32,440	15,000	-	-	17,440
More than 3 years	-	170,168	15,000	-	-	155,168
TOTAL EUR	**-**	**267,488**	**94,880**	**-**	**-**	**172,608***

** Sensitivity analysis of net exposure (€172.6 million):*
A 100 basis points increase in the reference "Euribor 3 months" interest rate would result in a full-year increase of €1.6 million in the interest expense.

Given the amortisation profile of the syndicated credit, the US private placement and interest rate hedges, the net exposure of the US dollar-denominated debt at 31 March 2013 was as follows:

USD-denominated debt	Financial debt		Hedge instruments		Net exposure	
	Fixed rate	Variable rate	Fixed rate	Variable rate	Fixed rate	Variable rate
Less than 1 year	-	3,580	-	-	-	3,580
1 to 2 years	-	3,580	-	-	-	3,580
2 to 3 years	-	3,580	-	-	-	3,580
More than 3 years	75,000	21,375	-	-	75,000	21,375
TOTAL USD	**75,000**	**32,115**	**-**	**-**	**75,000**	**32,115***

** Sensitivity analysis of net exposure (USD 32.1 million):*
A 100 basis points increase in the reference "Libor USD 3 months" interest rate would result in a full-year increase of USD 0.32 million in the interest expense.

Cap	20,000	(56)	-	-	-	-
TOTAL	**192,500**	**(3,363)**	**225**	**(2)**	**176**	**(2)**

SENSITIVITY ANALYSIS

The Group has implemented a diversified interest rate risk management policy aimed at limiting the impact of potential interest rate increases on its cash flow. As at 31 March 2013, the servicing of projected debt, net of hedges put in place, would limit the impact of a 1% increase in interest rates on debt and hedges to €0.8 million.

The positive impact on equity is €1.4 million with a 0.5% interest rate increase.

c) Risk on raw materials

The Faiveley Transport Group is exposed to increases in the costs of raw materials such as steel, aluminium and copper, and to increases in transportation costs.

The Group has already anticipated these effects, both in terms of its purchasing policy and in the preparation of its tenders. As regards contracts relating to projects, price indexation mechanisms enable the Group to pass on a large part of the increases in raw material costs.

However, the Faiveley Transport Group's sintered brake pads activity is exposed to fluctuations in the price of copper. Contracts have been entered into to hedge 70% of the 2013/2014 financial year exposure through euro-denominated raw material swaps.

SENSITIVITY ANALYSIS

A 1% increase in the price of copper would have a negative impact of €11 thousand on EBITDA .

d) Derivative instruments

THE FAIR VALUE OF DERIVATIVE INSTRUMENTS FOR HEDGING EXCHANGE, INTEREST RATE AND RAW MATERIALS RISKS REFLECTED IN THE BALANCE SHEET WAS AS FOLLOWS:

HORIZON FOR RELEASE OF AMOUNTS RECORDED IN EQUITY AT 31 MARCH 2013

The amount recorded in equity, in respect of exchange rate derivatives €(35 thousand), will be recycled to the income statement in the year ending 31 March 2014.

The amount recorded in equity, in respect of interest rate derivatives €(3,261 thousand), will be released to the income statement between 31 March 2013 and 31 March 2017 according to the maturity of the flows hedged.

The amount taken to equity in relation to raw materials €(11 thousand), will be transferred to the income statement for the year to 31 March 2014.

In addition, the Faiveley Transport Group makes use of factoring arrangements in France, Germany, Spain, Italy, the UK and China. Factoring enables the Group to sell, without recourse, part of its receivables to various factoring companies and banks. This selling without recourse has enabled the Group to improve trade receivables recovery and to transfer the risk of default or bankruptcy on the part of customers or other debtors to the factors.

At 31 March 2013, receivables sold without recourse totalled €92.8 million and the amount of receivables sold and not guaranteed was €1.2 million.

As regards the risk associated with financial assets, the Group's maximum exposure is equal to their book value.

14.5 CREDIT RISK

Owing to its commercial activities, the Faiveley Transport Group is exposed to credit risk, in particular the risk of default on the part of its customers.

The Group only enters into commercial relationships with third parties whose financial position is known to be healthy. The Group's policy is to verify the financial health of those customers wishing to obtain credit.

In the case of derivative instruments and transactions that generate cash when they are unwound, the counterparties are limited to financial institutions that finance the Group.

14.6 LIQUIDITY RISK

Prudent liquidity risk management requires the Group to retain a sufficient level of cash and securities that can be traded in a market, to have adequate financial resources due to the implementation of appropriate credit facilities and to be in a position to unwind positions in the market. Due to the dynamism of the Group's activities, the Treasury Department aims to maintain financial flexibility by retaining open but unused credit lines.

To refinance the acquisition of US company Graham-White Manufacturing Co., and diversify its financing sources, during the first half of the year,

the Group finalised its first private placement bond issue in the US with two institutional investors, for a total of US$75 million.

Moreover, an additional one-year €25 million credit facility has been negotiated, with its extension being deemed highly probable.

At 31 March 2013, the Group complied with all financial conditions required by all credit agreements.

The Group estimates that the cash flows generated by its operating activities, cash and funds available *via* existing credit lines will be sufficient to cover the expenditure and investment necessary for its operations, to service its debt and to pay dividends. Conversely, the Group may have to borrow to finance potential acquisitions.

a) Available cash and cash equivalents

	31 March 2013	31 March 2012
Available credit lines (a)	145,244	56,754
Parent company cash (b)	(4,746)	27,100
Subsidiaries cash and cash equivalents (c)	178,500	182,129
AVAILABLE CASH AND CASH EQUIVALENTS (1) = (a+b+c)	**318,998**	**265,983**
Borrowings due in less than one year (d)	37,311	77,174
Available credit lines maturing in less than one year and bank overdrafts (e)	106,928	110,196
NET CASH AND CASH EQUIVALENTS AVAILABLE OVER THE NEXT YEAR (1-d-e)	**174,759**	**78,613**

Cash and cash equivalents include unused factoring cash of €45.7 million (net of non-guaranteed receivables factored).

The increase in available cash and cash equivalents was due to the refinancing of the acquisition of Graham-White Manufacturing Co., *via* the US$75 million private placement, the setting up of the new €25 million short-term facility and the cash flow generated by the Group.

Financial debt of less than one year is disclosed in paragraph 13.1 (excluding bank overdraft, fair value of derivatives and invoices factored and not guaranteed).

Available credit lines represent credit lines granted by the banks and available immediately to the subsidiaries or the parent company. At 31 March 2013, €7.8 million was used in respect of a bank overdraft.

b) Maturity dates of financial liabilities at 31 March 2013

At 31 March 2013	Book value	Under 1 year	1 to 5 years	Over 5 years	Non-financial liabilities

TOTAL	**(14,148)**	**11**	**1,294**	**(52)**	**926**	**(3,216)**	**(15,185)**

15. Current liabilities

	31 March 2013	31 March 2012
Trade payables	175,794	162,987
Tax and social security liabilities	60,112	61,271
Accrued credit notes	966	843
Deferred income	4,484	594
Accrued expenses	10,267	12,531
Due to suppliers of non-current assets	647	384
Dividends payable	1,286	55
Other operating liabilities	4,315	6,779
TOTAL	**257,871**	**245,444**

At 31 March 2013, "Trade payables" included €17.4 million of credit work-in-progress (compared to €17.7 million at 31 March 2012) and "Deferred income" includes the Wabtec damages paid in compensation for the future period, for €3.7 million.

16. Factoring

In order to optimise the cost of the Group's bank financing, Faiveley Transport Tours, Faiveley Transport Amiens, Faiveley Transport Gennevilliers, Faiveley Transport NSF, Faiveley Transport Italia, Faiveley Transport Ibérica, Faiveley Transport Leipzig, Faiveley Transport Witten and Faiveley Transport Birkenhead and SFRT sell their trade receivables to a factor.

Factoring resulted in a €92,788 thousand reduction in trade receivables at 31 March 2013. In addition, available and uncalled cash with the factoring companies amounted to €46,875 thousand and is included in cash and cash equivalents.

However, the portion of receivables sold and not guaranteed was recorded as financial debt under "Current borrowings and financial liabilities" for an amount of €1,209 thousand. The risk incurred by the Group in respect of receivables sold and not guaranteed relates to the non-collection of these receivables.

17. Segment reporting

At 31 March 2008, Faiveley SA only held shares in Faiveley Transport and had no relationship with the operating subsidiaries.

Following the transactions completed on 23 December 2008, Faiveley SA decided to proceed with the dissolution of Faiveley Transport without liquidation. At 31 March 2009, the net assets of Faiveley Transport were transferred to Faiveley SA (subsequently renamed Faiveley Transport) by a simple merger transaction by means of a complete transfer of its assets and liabilities, therefore eliminating all intermediate companies between the Group's parent company and operating entities.

Due to this, as of 31 March 2010 segment reporting only concerns the railway sector.

Acquisition of property, plant and equipment and intangible assets (excluding goodwill)	9,478	4,053	1,454	2,384	17,369
Amortisation and depreciation of property, plant and equipment and intangible assets (excluding goodwill)	5,856	5,080	1,402	2,609	14,947

17.3 PRINCIPAL CUSTOMERS

During the 2012/2013 financial year, the Group achieved 27.8% of its sales with the three largest global manufacturers (Alstom, Bombardier and Siemens) and 50% with its top ten customers (including Stadler, SNCF, Indian Railways, CNR, Trenitalia and Ansaldo).

18. Sales

	31 March 2013	31 March 2012
Sales of products associated with contracts	961,646	86, 885
Sales of services	26,060	36,638
TOTAL*	**987,706**	**900,523**

** Of which sales of "Services" related products of €403 million to 31 March 2013 and €315 million to 31 March 2012.*

19. Cost of sales

	31 March 2013	31 March 2012
Direct labour	(80,320)	(76,730)
Raw materials	(408,625)	(377,946)
Fixed costs	(75,940)	(59,053)
Procurement costs	(48,858)	(44,430)
Engineering costs	(60,157)	(59,067)
Other direct costs	(42,491)	(40,482)
Change in projects in progress	17,583	19,870
Net change in project provisions (charge/reversal)	(31,830)	(24,290)
Net change in provisions for losses on completion	(9,469)	(4,594)
TOTAL COST OF SALES	**(739,371)**	**(666,722)**

At 31 March 2013, the cost of sales was reduced by €4.5 million due to the recognition of damages awarded following the Wabtec trial.

20. Other income and expenses from recurring operations

	31 March 2013	31 March 2012
Royalties	1,101	1,456
Doubtful debts	1,015	-
Writebacks of provisions for other liabilities	487	891
Insurance compensation	3	47
Other operating income	2,867	293
TOTAL OTHER INCOME	**5,473**	**2,687**
Royalties	-	(162)
Doubtful debts	-	(2,475)
Charges to provisions for other liabilities	(905)	(3,335)
Inventory writedowns	(2,912)	(4,194)
Employee profit sharing	(2,157)	(1,162)
Other expenses	(1,851)	(743)
TOTAL OTHER EXPENSES	**(7,825)**	**(12,071)**
NET OTHER INCOME AND EXPENSES FROM RECURRING OPERATIONS	**(2,352)**	**(9,384)**

At 31 March 2013, "Other income" was favourably affected by a net income of €1.7 million related to Wabtec composed of the €4.1 million damages received (income corresponding to the reimbursement of expenses incurred in previous financial years) and additional fees of €2.4 million related to the same matter, for which a provision was recognised during the financial year.

21. Restructuring costs and gains and losses on disposal of property, plant and equipment and intangible assets

RESTRUCTURING COSTS

Restructuring costs for the period totalled €1 million, compared to €1.2 million at 31 March 2012. During the financial year 2012/2013, these restructuring costs primarily related to the reorganisation of Faiveley Transport Metro Technology Shanghai.

DISPOSAL OF PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

	31 March 2013	31 March 2012
Sales price of assets sold	49	189
Net book value of assets sold	(213)	(393)
TOTAL	**(164)**	**(204)**

22. Net finance income/(cost)

	31 March 2013	31 March 2012
Gross cost of financial debt	(12,016)	(12,968)
Income from cash and cash equivalents	1,433	2,268
NET COST OF FINANCIAL DEBT	**(10,583)**	**(10,700)**
Financial instrument income	3,276	4,414
Income linked to exchange differences	10,021	9,552
Proceeds from sale of marketable securities	-	-
Reversal of financial provisions	-	153
Income from vendor loan	223	96
Dividends received	21	11
Other	141	103
OTHER FINANCE INCOME	**13,682**	**14,330**
Financial instrument charges	(4,416)	(3,180)
Charges linked to exchange differences	(8,975)	(12,778)
Interest charges on retirement commitments	(1,160)	(1,046)
Net book value of financial assets sold	-	(3)
Charges on bank guarantees	(1,276)	(725)
Reversal of discounting the value of put options held by minority shareholders	(166)	(665)
Other	(733)	(419)
OTHER FINANCE COSTS	**(16,726)**	**(18,815)**
NET FINANCE COST	**(13,628)**	**(15,185)**

The net finance cost for the year was primarily due to:

- the net cost of financial debt for the year, *i.e.* €10.6 million compared to €10.7 million in the previous year. The significant decline in market rates, combined with improved hedging offset the additional interest expense related to the Graham-White acquisition debt;
- a €1.4 million loss on financial instruments;
- a €1.1 million favourable impact of realised and unrealised exchange differences;
- other financial income and expense items, comprising bank guarantees, interest on pension commitments, the effect of the reversal of discounting the value of put options held by minority shareholders and other financial income and expenses, resulting in a negative net impact of €2.8 million.

23. Income tax

23.1 ANALYSIS BY TYPE

	31 March 2013	31 March 2012
Current tax – continuing operations	29,516	29,761
Deferred tax – continuing operations	4,355	(2,849)
TOTAL INCOME TAX – CONTINUING OPERATIONS	**33,871**	**26,912**
Tax on discontinued operations	-	-
TOTAL TAX	**33,871**	**26,912**

The income tax charge was €33.9 million, compared to €26.9 million for the year to 31 March 2012. This increase was due to the growth in profit before tax, which rose from €78 million for the year to 31 March 2012 to €97.5 million for the year to 31 March 2013. As a percentage, the effective tax rate was 34.7%, compared to 34.5% the previous year. This increase is analysed as follows:

- the weak results recorded by the Chinese subsidiaries, in particular by the two platform door subsidiaries, FTMT Shanghai and Faiveley Transport Far East, which benefit from a reduced tax rate;
- for the French subsidiaries: the tax law no longer allows a 100% deduction in financial charges but now rather an 85% deduction, a new 3% tax on dividends has been introduced and the relative significance of the CVAE charge, which has been reclassified to income tax since the 2010/2011 financial year with similar amounts in both years (approximately €2 million).

The income tax rate paid was 30.3%, compared with 38.1% for the year to 31 March 2012.

23.2 EFFECTIVE TAX RATE

	31 March 2013	31 March 2012
Pre-tax profit from continuing operations	**97,482**	**78,087**
Pre-tax profit from operations sold	-	-
Statutory tax rate of the parent company	34.43%	34.43%
THEORETICAL TAX CREDIT/(CHARGE)	(33,563)	(26,885)
Impact of:		
• permanent differences between profits for accounting purposes and taxable profits	(1,093)	(1)
• differences between the tax rates applicable to the parent company and to the subsidiaries	2,815	1,298
• impact of other taxes (CVAE in France and IRAP in Italy)	(3,546)	(3,272)
• the liability method (changes in tax rates)	(273)	(197)
• tax saving achieved through offset of tax losses carried forward	-	-
• recognition of future savings on tax losses and prior temporary differences (FT Brazil and FT USA)	-	5,428
• change in deferred tax assets in respect of tax losses carried forward not recognised for the financial year	134	(1,614)
• change in deferred tax assets not recognised	353	(1,242)
• tax credits	-	113
• tax adjustments in respect of earlier periods	(530)	(548)
• other differences	1,832	8
TAX CHARGE	**(33,871)**	**(26,912)**
Effective tax rate	**34.7%**	**34.5%**

23.3 BREAKDOWN OF TAX LOSSES CARRIED FORWARD (TAX BASES) BY EXPIRY DATE

	2012/2013	2011/2012
Losses expiring within 4 years	11,235	7,109
Losses expiring in 5 years and over	9,353	7,245
Losses that may be carried forward indefinitely	22,811	26,916
TOTAL	**43,399**	**41,270**
Tax losses not recognised as deferred tax assets	*22,409*	*24,767*
Tax losses recognised as deferred tax assets	*20,990*	*16,503*
Limits on the use of tax losses recognised as deferred tax assets:		
Losses expiring within 4 years	*4,660*	*5,743*
Losses expiring in 5 years and over	*7,441*	*438*
Losses that may be carried forward indefinitely	*8,889*	*10,322*

24. Share of profit/(loss) from operations sold or held for sale

Nil.

25. Payroll costs and workforce

	2012/2013	2011/2012
Salaries	198,738	179,161
Social security charges	55,474	51,127
Retirement and other post-employment benefits	8,580	5,886
Charges associated with share-based payments	-	-
TOTAL PAYROLL COSTS	262,792	236,174
Managers	932	953
Supervisors and employees	2,367	2,414
Operatives	2,184	2,102
TOTAL WORKFORCE	**5,483**	**5,469**

26. Post-balance sheet events

On 17 May 2013 Faiveley Transport acquired 100% of Schwab Verkehrstechnik AG, a leading designer and manufacturer of couplers and buffers for freight and rail transit markets, which reported sales of CHF 23 million in 2012. This company is based in Schaffhausen (Switzerland) and has 42 employees.

27. Transactions with related companies

The aim of this note is to present the material transactions entered into between the Group and its related parties as defined by IAS 24.

The parties related to the Faiveley Transport Group are the consolidated companies (including those companies that are proportionally consolidated and those consolidated using the equity method), the entities and individuals that control Faiveley Transport and the Group's senior management.

Transactions entered into between the Faiveley Transport Group and its related parties are at arm's length terms.

27.1 TRANSACTIONS WITH RELATED COMPANIES

A list of consolidated companies is provided in Note G.

Transactions carried out and balances outstanding with fully consolidated companies at the balance sheet date are fully eliminated on consolidation.

Only the following are included in the notes below:

- data relating to such intra-Group transactions, when they involve companies over which the Group exercises joint control (proportionally consolidated) and those over which the Group has significant influence (accounted for using the equity method) concerning the portion not eliminated on consolidation;
- material transactions with other Group companies.

a) Transactions with consolidated companies

WITH JOINT VENTURES

Joint ventures are proportionally consolidated companies:

- Qingdao Faiveley Sri Rail Brake Co. Ltd.: 50/50 joint venture formed in 2006 to enable the Group to penetrate the Chinese brake market.
- Datong Faiveley Couplers System Co. Ltd.: 50/50 joint venture formed in 2007 with Datong Yida Foundry Co. Ltd., with the aim of manufacturing and selling couplers.
- ShiJiaZhuang JiaXiang Precision Machinery Co. Ltd.: on 20 December 2007, the Group acquired 50% of the shares of this Chinese company which specialises in the development and production of compressors for the railway market.

TRANSACTIONS WITH JOINT VENTURES NOT ELIMINATED ON CONSOLIDATION

The consolidated financial statements include transactions carried out by the Group with its joint ventures as part of its normal business activities.

These transactions are normally carried out at arm's length terms.

b) With the companies that control Faiveley Transport

WITH FRANCOIS FAIVELEY PARTICIPATIONS

Contract of assistance:

The Supervisory Board of 6 June 2012 authorised the signing of an amendment to the technical, commercial and administrative assistance agreement of 26 June 2004. This amendment includes an indexing clause that permits an annual review of compensation for services provided by Francois Faiveley Participations to Faiveley Transport.

Under the terms of the contract of assistance and the rebilling of rent and services provided, Faiveley Transport recognised the following amounts as expenses and income for the financial year:

(€)	Faiveley Transport expenses	Faiveley Transport income
Contract of assistance, provision of services	373,094	1,020
Rebilling of rent and utility expenses	-	2,150

Fraction of financial investments, receivables, debts, expenses and income pertaining to these related companies:

(€ thousands)	2012/2013	2011/2012
Trade receivables	1	1
Borrowings and various financial liabilities	-	(1,938)
Trade payables	-	-
Rebilling of rents	3	4
Provision of services	(373)	(365)
Financial income	-	-
Financial costs	(5)	(30)

27.2 SENIOR MANAGEMENT AND NON-EXECUTIVE OFFICERS' REMUNERATION

Senior management and non-executive officers comprise mainly the members of the Management Board, the Supervisory Board and the Executive Committee.

The Remuneration Committee determines the remuneration to be allocated to executive officers; it is responsible for assessing and determining the variable portion of the remuneration of the members of the Management Board, which is based on performance targets and the financial statements audited by the Statutory Auditors.

The following table provides details, in aggregate and for each category, of the components of senior management's remuneration:

(€)	2012/2013	2011/2012
Short-term benefits(1)	5,606,976	6,228,772
Termination benefits(2)	400,000	-
Post-employment benefits(3)	21,429	29,781
Share-based compensation(4)	-	-
Other long-term benefits	397	(291)
Directors' fees	249,000	138,400
TOTAL	**6,277,802**	**6,396,662**

(1) This category comprises fixed and variable remuneration (including employers' costs), profit sharing and incentive payments, supplementary contributions and benefits in kind paid during the year.
(2) At 31 March 2013, termination benefits concerned J.C. Roncin, who resigned from his position as Quality Director in August 2012.
(3) Change in retirement provisions.
(4) Expense recognised in the income statement.

27.3 AGREEMENTS ENTERED INTO WITH SENIOR MANAGEMENT

With Thierry Barel

Following the appointment of Thierry Barel as Chairman of the Management Board and Chief Executive Officer on 1 April 2011, the terms and conditions governing the termination of his duties have been defined. Thierry Barel will thus be entitled to compensation based on performance criteria, not exceeding eighteen months of total gross remuneration, in the event of his dismissal by the Supervisory Board.

With Robert Joyeux

MEMORANDUM OF UNDERSTANDING WITH MANAGERS

As part of the transactions relating to the reorganisation of its capital structure, Faiveley Transport concluded a memorandum of understanding and an amendment to this MOU on 16 October 2008 and 17 November 2008, respectively, with the managers and their spouses who were partners in Faiveley Management SAS.

Within the framework of the MOU of 16 October 2008, Robert Joyeux received 140,610 Faiveley Transport shares in exchange for the 164,430 Faiveley Management shares that he transferred to Faiveley Transport. Robert Joyeux also committed to retain all his Faiveley Transport shares for a period of two years starting on 23 December 2008 and two thirds of his shares for a period of three years starting on 23 December 2008. This last clause was not applicable during the financial year. Furthermore, for a period of six years starting on 23 December 2008, any disposal of a block of more than 10,000 Faiveley Transport shares is subject to a Faiveley Transport pre-emption right.

AMENDMENT TO THE CONSULTING AND SUPPORT CONTRACT OF 22 APRIL 2011

On 27 March 2012, an amendment to extend the consulting assignment provided by Robert Joyeux to the General Management of the Company

was submitted for approval to the Supervisory Board. The Supervisory Board authorised the Chairman of the Management Board to sign this amendment This expired at the end of the 2012/2013 financial year.

With Didier Alix

On 22 July 2011, an amendment to the credit agreement of 22 December 2008, concluded with a pool of nine banks, was presented to and authorised by the Supervisory Board.

One of the banks involved in the signing of this amendment is Société Générale. Didier Alix, member of the Company's Supervisory Board, acts as an advisor to the Chairman of this bank.

28. Dividends paid and proposed

On 13 September 2012, a dividend of €0.85 per share was paid in respect of 14,190,432 shares, *i.e.* a total dividend of €12,061,867.20 for the 2011/2012 financial year.

The difference between the number of shares in respect of which dividends were paid and the total shares making up the share capital, *i.e.* 423,720 shares, corresponds to the treasury shares held by Faiveley Transport at the time of the distribution of the dividend.

	Number of shares	Treasury shares	Number of shares to which dividends have been paid	Dividends paid
Ordinary shares	6,538,272	423,720	6,114,552	5,197,369
Shares with double voting rights	8,075,880	-	8,075,880	6,864,498
	14,614,152	**423,720**	**14,190,432**	**12,061,867***

* *Including €5,368,104 to Financière Faiveley and €985,395 to François Faiveley Participation (FFP).*

In respect of the 2012/2013 financial year, the General Meeting will be asked to approve the payment to shareholders of a dividend of €13,883,444.40, being €0.95 per share. This distribution will be taken from the account "Retained Earnings". It will be payable with effect from 19 September 2013. This dividend was not recognised as a liability at 31 March 2013.

F. OFF-BALANCE SHEET COMMITMENTS (€ THOUSANDS)

1. Leases

OPERATING LEASES

The operating leases entered into by the Faiveley Transport Group relate mainly to buildings and furniture.

The income and expenses recognised in respect of operating leases over the last two financial years break down as follows:

	2012/2013	2011/2012
Operating lease expenses	(11,482)	(10,575)
Sub-letting income	538	484
TOTAL	**(10,944)**	**(10,091)**

The future minimum payments to be made in respect of operating leases which are non-cancellable and had not expired as at 31 March 2012 are as follows:

	Under 1 year	1 to 5 year	Over 5 years
Total future rents	9,207	26,910	17,344

2. Other commitments given

	2012/2013	2011/2012
Deposits, securities and bank guarantees given to customers	217,778	226,377
Guarantees and securities given by the parent company to customers	409,970	403,046
Borrowings guaranteed by pledges:		
• Mortgages of buildings	175	7,685

The off-balance sheet commitments above entitled "Deposits, securities and bank guarantees" is related to guarantees or securities provided to the banks essentially in favour of customers with whom commercial contracts have been signed. These guarantees are generally issued for defined periods and for defined amounts. These are principally guarantees for the repayment of deposits and guarantees for the satisfactory completion of contracts. Bank counter-guarantees may be issued for the benefit of banks supplying credit lines, and guarantees may also be issued for the benefit of certain subsidiaries of the Group.

The off-balance sheet commitments above entitled “Guarantees and securities given by the parent company” are guarantees agreed by the parent company Faiveley Transport in favour of customers who have signed commercial contracts with subsidiaries of the Group. As for bank guarantees, these are issued for defined periods and for defined amounts and essentially relate to guarantees for the repayment of deposits and guarantees for the satisfactory completion of contracts.

3. Commitments received

- Other guarantees from suppliers: €2,752 thousand.

G. CONSOLIDATION SCOPE AND METHODS

I. FINANCIAL COMMUNICATION

A German version of these consolidated financial statements has been filed with the local administration.

3. STATUTORY AUDITORS' REPORT

on the consolidated financial statements
(For the year ended 31 March 2013)

This is a free translation into English of the statutory auditors' report on the consolidated financial statements issued in French and is provided solely for the convenience of English speaking users. The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. This information presented below is the audit opinion on the consolidated financial statements and includes an explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the consolidated financial statements taken as a whole and not to provide separate assurance on individual account balances, transactions or disclosures.

This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

To the Shareholders,
Faiveley Transport SA
Le Delage Building
3 rue du 19 mars 1962
92230 Gennevilliers

In compliance with the assignment entrusted to us by the Annual General Meeting, we hereby report to you, for the year ended 31 March 2013, on:

- the audit of the accompanying consolidated financial statements of Faiveley Transport SA;
- the justification of our assessments;
- the specific verification required by law.

These consolidated financial statements have been approved by the Management Board. Our role is to express an opinion on these consolidated financial statements based on our audit.

I. OPINION ON THE CONSOLIDATED FINANCIAL STATEMENTS

We conducted our audit in accordance with professional standards applicable in France; those standards require that we plan and perform the audit to obtain reasonable assurance regarding whether the consolidated financial statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence regarding the amounts and disclosures in the consolidated financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made, as well as the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

In our opinion, the consolidated financial statements give a true and fair view of the assets and liabilities and of the financial position of the Group as at 31 March 2013 and of the results of its operations for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

II. JUSTIFICATION OF OUR ASSESSMENTS

In accordance with the requirements of Article L. 823-9 of the French Commercial Code (Code de Commerce) relating to the justification of our assessments, we bring to your attention the following matters:

- At the year-end, the Group performs impairment testing on goodwill and intangible assets with indefinite lives and assesses whether there is an indication of impairment of non-current assets, in accordance with the terms and conditions described in Notes C.7.1, C.9 and E.1 of the appendix to the consolidated financial statements. We have reviewed the methods for implementing this impairment testing, the cash flow forecasts and assumptions used by the management, as well as estimates resulting from the latter. We have also verified that Notes C.7.1, C.9 and E.1 provide appropriate disclosure.
- The Group recognises income generated on contracts using the percentage of completion method in accordance with the terms and conditions described in Note C.6.1 of the appendix to the consolidated financial statements. These results are determined based on costs and revenue associated with the contracts, as estimated by executive management. Based on the information provided to us, our work consisted in assessing the financial information and the assumptions on which these estimates have been based, in reviewing the calculations performed by the Group, in comparing estimates of revenue on completion from previous periods with actual results, and in examining the procedures used by executive management to approve these estimates.
- The Group records provisions to cover miscellaneous liabilities and charges as described in Note C.15.2 of the appendix to the consolidated financial statements. Based on the information available, our work consisted in examining the procedures used by executive management to evaluate and identify the risk, to appreciate, by sampling, the financial information and the assumptions on which theses estimates have been based, and to verify that the appendix to the consolidated financial statements disclose appropriate information. On this basis, we assessed the reasonableness of estimates made.

These assessments were made as part of our audit of the consolidated financial statements taken as a whole, and therefore contributed to the opinion we have formed, which is expressed in the first part of this report.

III. SPECIFIC VERIFICATION

As required by law, we also verified in accordance with professional standards applicable in France the information presented in the Group's management report. We have no matters to report as to its fair presentation and its consistency with the consolidated financial statements.

Neuilly-sur-Seine and Dijon, 12 July 2013

4.4 NOTES TO THE PARENT COMPANY FINANCIAL STATEMENTS

Notes to the parent company financial statements at 31 March 2013. Total assets on this date amounted to €1,479,157 thousand, and the income statement reflected a net profit of €26,762 thousand. The financial period was of 12 months and covered the period from 1 April 2012 to 31 March 2013.

A. SIGNIFICANT EVENTS

Bond issue

To partly refinance the acquisition of US company Graham-White Manufacturing Co., completed on 3 February 2012, and diversify its financing sources, on 12 April 2012 the Group finalised its first private placement bond issue in the US with two institutional investors, for a total of US$75 million. This bond issue was made up of two tranches: one for US$30 million, with a 10-year final maturity and redeemable between 2017 and 2022, and a US$45 million bullet loan with a 10-year maturity. The average fixed interest is 4.91% per year.

Wabtec legal action

Faiveley Transport won its legal action against Wabtec in the United States. On 6 February 2013, the New York Court of Appeals upheld the jury's verdict against Wabtec, awarding the companies Faiveley Transport USA, Faiveley Transport Nordic, Faiveley Transport Amiens and Ellcon National US$15 million plus US$0.8 million in interest. This decision particularly punishes the trade secret misappropriation, acts of unfair competition and unjust enrichment relating to the manufacture of brake cylinders and actuators that make up brake systems.

In accounting terms, the Wabtec accrued income was recorded in the balance sheet under "Other receivables" in the amount of €12.3 million (US$15.8 million) with the €8.2 million portion to be retroceded to the subsidiaries recorded as other loans and borrowings. In the income statement, only the amount corresponding to fees incurred by Faiveley Transport since litigation began was recognised as a reduction of fixed costs for €4.1 million. This was offset by additional fees of €2.3 million recognised as fixed costs during the financial year.

Free share allocation plans

The Combined General Meeting of 14 September 2012 delegated authority to the Management Board to proceed with the allocation of free ordinary shares in the Company, either in existing shares or shares to be issued, within the limit of 1% of the share capital on the date of the General Meeting.

During the financial year, this authorization gave rise to:

- the allocation of free performance-based shares by the Management Board of 24 October 2012 (10,000 shares);
- the implementation of a free share allocation plan as part of an employee shareholding plan by the Management Board of 3 December 2012 (72,386 shares).

The terms and conditions of allocation of the two new plans are set out in paragraph C. Notes to the balance sheet and the income statement under 5.1 Share capital.

B. ACCOUNTING RULES AND METHODS

1. Application of accounting rules and methods

The financial statements at 31 March 2013 have been prepared in accordance with accounting rules applicable in France:

- the Law of 30 April 1983 and its application decree of 29 November 1983;
- the French General Accounting Plan 1999 as described by regulation 1999-03 of the Comité de la Réglementation Comptable and subsequent amendments.

The financial statements and the analyses for the year ended 31 March 2013 have been prepared and presented in accordance with accounting rules and in compliance with the principles of:

- prudence;
- independence of financial years;
- going concern;
- consistency of methods.

The historical cost method was used to determine accounting values.

2. Change of methods during the year

No changes of methods have been introduced by the Company during the year.

3. Measurement methods

The measurement methods described below have been used for the various items included in financial statements.

The financial statements have been prepared taking account of the following provisions applicable to financial years beginning on or after 1 January 2005:

- CRC regulation n°2002-10 on asset amortisation and impairment;
- CRC regulation n°2004-06 on the definition, recognition and measurement of assets.

3.1 NON-CURRENT ASSETS

Non-current assets are recognised at their acquisition cost or at their transfer value in the case of those related to the restructuring operations of previous financial years. In order to recognise an unfavourable technical variance, the latter must be assessed at each year-end. In case there is an indication of impairment, a writedown charge must be recognised in the financial statements.

3.2 AMORTISATION AND DEPRECIATION OF NON-CURRENT ASSETS

Depreciation and amortisation of non-current assets are measured on a straight-line basis.

The principal periods of amortisation and depreciation are as follows:

- Intangible assets

– Software:	1 to 10 years
– Patents:	9 to 15 years

- Property, plant and equipment

– Buildings:	15 to 20 years
– Misc. equipment and fittings:	10 years
– Machinery and industrial equipment:	3 to 8 years
– Vehicles:	4 years
– Office equipment:	3 to 10 years
– IT equipment:	3 to 5 years
– Furniture:	5 to 10 years

3.3 EQUITY INVESTMENTS

Equity investments are measured at their purchase and/or contribution value. At the end of the financial year, a provision for impairment is established when the realisable value is lower than its acquisition value. The realisable value is the value in use for the Group, measured on the basis of future discounted cash flows.

3.4 RECEIVABLES FROM EQUITY INVESTMENTS

Receivables from equity investments correspond to loans provided to Group companies, as well as current accounts receivable from subsidiaries (excluding current tax receivables resulting from the Group's tax consolidation). A provision is established whenever there is a risk of non-recovery.

3.5 ACCOUNTS RECEIVABLE AND PAYABLE

Accounts receivable and payable are recorded at nominal value. Provisions have been made for bad and doubtful debts according to the likelihood of non-recovery, as estimated at the end of the financial year. Old accounts for which non-recovery has become a certainty are written off as an expense and the corresponding provisions reversed through the income statement.

3.6 MARKETABLE SECURITIES

Marketable securities are recognised at their fair value on the basis of their quoted price or at their liquidation value at the year-end. Marketable securities are subject to impairment when their liquidation value at the financial year-end is lower than their acquisition value.

Treasury shares are included in this caption in accordance with CRC Regulation 2008-15 on treasury shares.

The value of treasury shares unallocated to the various share purchase and subscription plans and free share allocation plans is written down based on the average share price noted over the last month of the financial year.

3.7 SHARE CAPITAL

All capital increases are registered at the nominal value of the shares issued. Should the issue price be greater than the nominal value, the difference is recorded in the share premium reserve.

3.8 PROVISIONS FOR LIABILITIES AND CHARGES

Provisions represent liabilities whose due date or amount has not been precisely determined. At 31 March 2013, the provisions amounted to €2,396 thousand and included:

- provisions for stock option and free share allocation plans of €1,596 thousand;
- provisions for litigations of €554 thousand;
- unrealised exchange losses of €237 thousand (discounted based on foreign-denominated liabilities and trade receivables and valued at the closing rate);
- seniority awards of €9 thousand.

3.9 SHARE PURCHASE OPTION PLAN OF 27 SEPTEMBER 2005

When beneficiaries of the share purchase option plan exercise their rights, a capital loss will be recognised in Faiveley Transport's financial statements. This loss has been estimated at €599 thousand at 31 March 2009 and spread over 7 years (the duration of the plan). At 31 March 2013, this provision was revised to €2 thousand based on options exercised and outstanding. During the 2012/2013 financial year, 20,039 options were exercised by their beneficiaries. On this occasion, an exceptional expense of €46 thousand and a €49 thousand provision reversal were recognised.

3.10 SHARE SUBSCRIPTION OPTION PLAN OF 22 SEPTEMBER 2009

When shares are subscribed to, a capital loss will be recognised in Faiveley Transport's financial statements in the case the purchase price of the shares allocated to this plan exceeds the subscription price. This loss has been estimated at €433 thousand at 31 March 2013, weighted by an exercise probability of 90% and spread *pro rata* according to the number of days which have passed, out of the 8 years of duration of the plan. At 31 March 2013, a provision of €37 thousand was recognised under personnel costs, thus increasing this provision to a total of €171 thousand.

3.11 FREE PERFORMANCE-BASED SHARE ALLOCATION PLAN AUTHORISED BY THE GENERAL MEETING OF 13 SEPTEMBER 2010

Shares have been allocated and the €1,665 thousand purchase value of the shares earmarked for this plan was recognised as a capital loss under personnel costs in the financial statements of Faiveley Transport. The €1,257 thousand provision established under personnel costs at 31 March 2012 for the estimated capital loss was reversed. The net impact for the year 2012/2013 was €408 thousand.

3.12 FREE SHARE ALLOCATION PLAN AUTHORISED BY THE GENERAL MEETING OF 14 SEPTEMBER 2011

When shares are allocated, a capital loss will be recognised in Faiveley Transport's financial statements for the purchase price of the shares allocated to this plan. This loss has been estimated at €4,597 thousand at 31 March 2013, weighted by a vesting probability of 55% and spread *pro rata* according to the number of days which have passed out of the 2- or 4-year vesting periods of the plan. At 31 March 2013, a €1,029 thousand provision was established under personnel costs, thus increasing this provision to a total of €1,103 thousand.

3.13 FREE SHARE ALLOCATION PLAN AUTHORISED BY THE GENERAL MEETING OF 14 SEPTEMBER 2012

- Allocation of free performance-based shares by the Management Board of 24 October 2012

  When shares are allocated, a capital loss will be recognised in Faiveley Transport's financial statements for the purchase price of the shares allocated to this plan. This loss has been estimated at €602 thousand at 31 March 2013, weighted by a vesting probability of 55% and spread *pro rata* according to the number of days which have passed out of the 2-year vesting periods of the plan. At 31 March 2013, a €72 thousand provision was established under personnel costs.

- Implementation of a free share allocation plan as part of an employee shareholding plan by the Management Board of 3 December 2012.

When shares are allocated, a capital loss will be recognised in Faiveley Transport's financial statements for the purchase price of the shares allocated to this plan. This loss has been estimated at €4,395 thousand at 31 March 2013, weighted by a vesting probability of 55% and spread pro rata according to the number of days which have passed out of the 2-year vesting periods of the plan. At 31 March 2013, a €248 thousand provision was established under personnel costs.

3.14 LOANS AND BORROWINGS

Loans and borrowings are valued at their nominal value and comprise:

- the €56.9 million bond-type issue (US private placement);
- a loan of €292.6 million provided by the bank pool to finance the reorganisation of Faiveley Transport's shareholding structure in 2008;
- accrued interest on financial debt of €1.4 million;
- bank overdrafts of €12.2 million and cash pooling (managed by the Group Treasury Department) of €312.3 million;
- a loan of €10.2 million from its subsidiary Faiveley Transport Malmö;
- current accounts with Group companies of €563.4 million;
- the balance on the special reserve for employee profit-sharing of €0.06 million.

3.15 FINANCIAL INSTRUMENTS

Exchange risk

Due to the nature of its operations, Faiveley Transport is exposed to exchange risks arising from its holding company activities (including exchange hedging for the benefit of subsidiaries), from its loan agreements and on inter-company balances.

In 2012/2013, the major currencies concerned are the US Dollar, the Pound Sterling, the Czech Koruna, the Swedish Krona and the Chinese Yuan. The risks are hedged through forward purchases or sales of currencies and tunnel options.

These external hedge transactions aim to protect the Group against unfavourable fluctuations in foreign currencies that could affect the profit on a contract and are subject to an internal counterpart agreement with subsidiaries.

Information on financial derivatives currently in place to hedge against exchange risk on forward purchases or sales are detailed in the notes to the consolidated financial statements (see Note E.14 – Financial instruments and financial risk management).

Interest rate risk

The syndicated debt, excluding the revolving facility, is indexed on variable USD Euribor and Libor interest rates and can be hedged in accordance with the Group's interest rate risk policy. All revolving facilities, drawn or undrawn, bear a variable rate and are not subject to interest hedges. The same applies to the US private placement bond issue, which bears a fixed rate.

To manage its risk, the Treasury Department has implemented a hedging strategy using interest rate swaps, tunnels, caps and options.

The exposure of interest rates on Euro-denominated syndicated debt is hedged for between 77% and 83% of the total debt bearing a Euro interest rate, depending on fluctuations for the 2013/2014 period.

The syndicated debt denominated in US dollars is no longer being hedged. However, taking into account the "US private placement" bond issue, the hedged ratio, *i.e.*: amount of fixed-rate debt over total USD-denominated debt, is 74% for the period 2013/2014.

The estimated cost of syndicated debt in 2013/2014 is 1.94%, including hedges and spreads for the debt in Euros, and 3.87% for the debt in US dollars, which includes the US Private Placement. The Group's total cost of debt for 2013/2014 is therefore estimated at 2.5%.

Foreign exchange transactions

Income and expenses in foreign currencies are recorded at the exchange rate on the transaction date.

Foreign currency-denominated borrowings, receivables and cash are recorded in the balance sheet at the exchange rate on the balance sheet date. Any exchange difference arising from the revaluation of these items at these exchange rates is taken to "translation differences".

The unrealised exchange loss resulting from the determination of an overall foreign exchange position on assets and liabilities held on the balance sheet date is subject to a provision for foreign exchange risk.

3.16 INCOME STATEMENT

Faiveley Transport continues its activities of providing services to the Group as the holding company. Sales of €56.7 million achieved in 2012/2013 represented an increase of €4 million compared to €52.7 million reported in the previous year.

Costs incurred by Faiveley Transport for services provided to subsidiaries were rebilled. The operating profit was €4 million, compared to a loss of €1.6 million in 2011/2012. This improvement is mainly due to the net income of €1.7 million relating to the Wabtec compensation received (whilst for the previous financial year €0.6 million in fees had been recognised) by the rebilling of the final charge of €1.3 million to the subsidiaries due to the allocation of free shares which ended in December 2012, as well as better control of certain expense items.

The net finance income was €27.3 million, compared to a net expense of €10 million in the previous year. In 2012/2013, dividends of €37.5 million were collected, compared to €1.3 million in 2011/2012, due to the implementation of a more active policy relating to the transfer of the dividends of subsidiaries from the 2012/2013 financial year onwards.

Excluding dividends, the net finance income increased by €1.2 million. This was primarily due to the €2.1 million decrease in interest expense, foreign exchange gains of €0.6 million, a €0.8 million positive movement in financial provision reversals and charges, offset by the waiver of a €2.6 million financial liability in relation to its subsidiary o.o.o Faiveley Transport.

The €4.5 million income tax charge recognised in the year to 31 March 2013 reflects the tax consolidation charge of €0.6 million recorded during the period, increased by the €3.9 million corporate tax charge generated by the German subsidiaries, Faiveley Transport Holding GmbH & Co. KG and Faiveley Transport Leipzig GmbH & Co. KG.

C. NOTES TO BALANCE SHEET AND INCOME STATEMENT

Figures are expressed in thousands of Euros unless indicated otherwise.

Treasury shares

At 31 March 2013, the Company held 382,050 treasury shares, including 12,392 through its liquidity contract. These shares accounted for 2.61% of the share capital. Out of these 382,050 shares, 338,690 were earmarked for the various stock option and free share plans.

Employee shareholding

FCPE Faiveley Actions holds 15,360 shares (0.1%) in the Company.

Share purchase option plan of 27 September 2005

On request from Faiveley Transport, Faiveley SA (now called Faiveley Transport) implemented a share purchase option plan for the benefit of key Faiveley Transport Group Management (excluding the managers who invested in Faiveley Management).

This share purchase option plan, for a maximum of 325,000 Faiveley SA shares, was approved by the General Meeting of 27 September 2005. Granted for a period of thirty-eight months.

The options to purchase shares, if exercised, will give rise to the purchase of existing ordinary shares in Faiveley Transport.

↗ MAIN FEATURES OF THE CURRENT SHARE PURCHASE OPTION PLAN

Date of allocation	Number of shares allocated	Subscription price(1)	Options cancelled	Options exercised	Number of options outstanding	Of which to Executive Committee members(2)
24 November 2005	221,760	26.79	47,040	174,720	-	-

TOTAL	**372,040**		**56,000**	**259,044**	**56,996**	**22,600**

(1) The exercise price is equal to the average price of the twenty trading days prior to the date of the Management Board deciding on the allocation, less a discount of 5%.
(2) Including members of the Management Board.

Following the departure of certain option holders since the Management Board implemented the plan and options exercised until that date, options exercisable at 31 March 2013 related to 56,996 shares and 10 beneficiaries.

The options can be exercised from the second anniversary of their grant date by the Chairman of the Management Board, subject to the presence of the beneficiaries within the Faiveley Transport Group on the day of exercise and their acceptance of the option regulations. To date, 259,044 options have been exercised.

Share subscription plan of 22 September 2009

The Combined General Meeting of 22 September 2009 delegated the Management Board powers in relation to:

- granting share subscription and/or purchase options;
- issuing shares or marketable securities giving right to the allocation of new or already issued shares of the Company, with, in the case of the allocation of new shares, the cancellation of the pre-emption right.

At its meeting of 23 November 2009, the Management Board decided to allocate, from that date and up to 23 November 2017, options giving right to subscribe for new shares of the Company, to be issued as part of a capital increase, for a total amount not exceeding €144,000, corresponding to 144,000 new shares of a par value of €1 each. The new shares will be issued at a price of €54.91 each.

MAIN FEATURES OF THE CURRENT SHARE SUBSCRIPTION OPTION PLAN:

Date of allocation	Number of shares allocated	Subscription price	Options cancelled	Options exercised	Number of options outstanding	Of which to Executive Committee members*
23 November 2009	144,000	54.91	21,000	-	123,000	95,000
TOTAL	**144,000**	-	**21,000**	**-**	**123,000**	**95,000**

** Including members of the Management Board.*

Free performance-based share allocation plan authorised by the General Meeting of 13 September 2010

Faiveley Transport's Combined General Meeting of 13 September 2010 delegated the Management Board powers for the allocation of free performance-based shares, either existing or to be issued, within the limit of 1% of the share capital at 13 September 2010.

At its meetings of 3 December 2010 and 24 February 2011, the Management Board allocated a total of 69,700 existing shares to 43 beneficiaries

At its meetings of 3 December 2012 and 24 February 2013, the Management Board validated the partial achievement of performance criteria, at the rate of 50%, as well as the final list of beneficiaries. The free shares vested must be retained for a minimum period of two years from their vesting date.

MAIN FEATURES OF THE CURRENT FREE PERFORMANCE-BASED SHARE ALLOCATION PLAN

Allocation date	Vesting date	Number of free shares granted	Free shares cancelled	Free shares vested based on achievement of performance criteria	Of which to Executive Committee members*
3 December 2010	3 December 2012	64,500	11,200	26,650	15,000
24 February 2011	24 February 2013	5,200	3,200	1,000	-

** Including members of the Management Board.*

Free share allocation plan authorised by the General Meeting of 14 September 2011

The Combined General Meeting of 14 September 2011 delegated to the Management Board its powers in relation to:

- setting the conditions and where appropriate, setting the allocation criteria for ordinary shares;
- within the legal conditions and limits, setting the dates on which the allocations will proceed;
- determining the identity of beneficiaries, the number of ordinary shares allocated to each of them and the means of allocation of ordinary shares.

This authorisation is valid for thirty-eight months (38) and may not exceed 1% of the share capital on 14 September 2011.

At its meeting of 5 March 2012, the Management Board used this authorisation and granted a total of 79,224 free shares to 151 beneficiaries.

MAIN FEATURES OF THE CURRENT FREE SHARE ALLOCATION PLAN

Allocation date	Number of free shares granted	Free shares cancelled	Free shares in issue	Of which to Executive Committee members*
5 March 2012	79,224	2,916	76,308	15,200

** Including members of the Management Board.*

Free share allocation plan authorised by the General Meeting of 14 September 2012

The Combined General Meeting of 14 September 2012 delegated authority to the Management Board to proceed with the allocation of free ordinary shares in the Company, either in existing shares or shares to be issued, within the limit of 1% of the share capital at 14 September 2012.

ALLOCATION OF FREE PERFORMANCE-BASED SHARES BY THE MANAGEMENT BOARD OF 24 OCTOBER 2012

At its meeting of 24 October 2012, the Management Board allocated 10,000 free shares in issue to one beneficiary. The allocation of these performance-based shares will be final at the end of a two year vesting period, subject to the beneficiary remaining employed by the Group and the partial or full achievement of performance conditions. This period will be followed by a minimum retention period of 2 years.

↗ MAIN FEATURES OF THE CURRENT FREE SHARE ALLOCATION PLAN

Allocation date	Number of free shares granted	Free shares cancelled	Free shares vested based on achievement of performance criteria	Of which to Executive Committee members
24 October 2012	10,000	-	10,000	10,000

IMPLEMENTATION OF A FREE SHARE ALLOCATION PLAN AS PART OF AN EMPLOYEE SHAREHOLDING PLAN BY THE MANAGEMENT BOARD OF 3 DECEMBER 2012

At its meeting held on 3 December 2012, the Management Board decided to implement this delegation and to allocate free shares. This decision was made as part of an employee shareholding plan aimed at a broader population of executives. The programme provides that an employee holding shares in the Company in a personal capacity will be granted two free shares for every share held, not exceeding a limit set for each level of management.

At its meeting held on 15 January 2013, the Management Board established the final list of beneficiaries and the number of free shares to be granted. A total of 72,386 shares are thus to be granted to 179 beneficiaries. The allocation of the shares will be final at the end of a two-year vesting period, or four years for non-French residents, beginning on 15 January 2013.

↗ MAIN FEATURES OF THE CURRENT FREE SHARE ALLOCATION PLAN

Allocation date	Number of free shares granted	Free shares cancelled	Free shares in issue	Of which to Executive Committee members*
15 January 2013	72,386	-	72,386	11,440

** Including members of the Management Board.*

5.2 SHARE PREMIUM

The share premium represents the difference between the nominal value of securities and the amount, net of costs, received in cash or kind at the time of the issue.

6. Regulated provisions and provisions for liabilities and charges

	1 April 2012	Charges	Used reversals	Unused reversals	31 March 2013
Accelerated depreciation	-	-	-	-	-
REGULATED PROVISIONS	**-**	**-**	**-**	**-**	**-**
Provisions for liabilities	99	237	(69)	-	267
Provisions for taxes	-	-	-	-	-
Provisions for litigation	262	322	(35)	(25)	524
Provisions for option plans*	1,516	1,386	(1,306)	-	1,596
Provisions for employee compensation	7	2	-	-	9
PROVISIONS FOR LIABILITIES AND CHARGES	**1,884**	**1,947**	**(1,410)**	**(25)**	**2,396**

** The €1,596 thousand provision for option plans includes €2 thousand relating to the option plan of 27 September 2005, €171 thousand for the subscription option plan of 22 September 2009, €1,103 thousand for the free share allocation plan of 14 September 2011, €72 thousand for the free performance-based share allocation plan of 24 October 2012 and €248 thousand for the share allocation plan of 3 December 2012.*

7. Loans and borrowings

	Less than 1 year	More than 1 year	31 March 2013	31 March 2012
Bond-type borrowings	1,351	56,927	58,278	-
Loans and borrowings from credit institutions	359,831	257,333	617,164	707,551
Employee profit-sharing	-	65	65	65
Other financial liabilities*	10,156	-	10,156	20,312
Current trade payables	563,459	-	563,459	510,347
TOTAL	**934,797**	**314,325**	**1,249,122**	**1,238,275**

** Other borrowings, at 31 March 2013, correspond to the loan of €10.2 million contracted with its subsidiary Faiveley Transport Malmö.*

During the financial year, loans and borrowings from credit institutions decreased by €90.4 million. This decrease resulted from the annual syndicated facility instalment of €34.1 million, the remainder comprising lower drawdowns on other credit facilities and bank overdrafts.

For all its sources of financing, the Faiveley Transport Group must comply with the following four financial conditions:

- leverage ratio (Consolidated Net Debt/Consolidated EBITDA): must not exceed 2.5. At 31 March 2013, the ratio was 1.47;
- gearing ratio (Consolidated Net Debt/Consolidated Equity): must not exceed 1.50. At 31 March 2013, the ratio was 0.31;
- total bank guarantees must not exceed 22% of the order book. At 31 March 2013, this was 13.5%;
- "Consolidated EBITDA/Cost of Consolidated Net Financial Debt" must not be less than 3.5. At 31 March 2013, the ratio was 11.6.

Other financial liabilities decreased by €10.2 million. This decline was due to the repayment of the Euro-denominated loan granted by the Faiveley Transport Malmö subsidiary.

Current trade payable balances increased by €53.1 million at 31 March 2013.

8. Other liabilities

	Less than 1 year	More than 1 year	31 March 2013	31 March 2012
Trade payables	17,526	-	17,526	14,987
Tax and social security liabilities*	11,077	-	11,077	7,321

Exceptional income	(46)	-	(46)
Effect of tax consolidation	-	(4,534)	(4,534)
ACCOUNTING PROFIT/(LOSS)	**31,296**	**(4,534)**	**26,762**

17.2 TAX CONSOLIDATION

Faiveley Transport heads a tax consolidation that comprises Faiveley Transport Tours, Faiveley Transport Amiens, Faiveley Transport Gennevilliers and Faiveley Transport NSF.

Tax savings achieved as part of this tax consolidation are recognised and retained by the parent company. For the year ended 31 March 2013, the tax consolidation generated a tax saving of €0.6 million, which was added to the €3.9 million tax charge of the German subsidiaries (corporate tax).

Without the tax consolidation, the taxable profit of Faiveley Transport alone would have been €0.1 million.

At 31 March 2013, tax losses carried forward were €1.2 million. Since these losses originated prior to the merger between Faiveley SA and Faiveley Transport, they may only be offset against Faiveley Transport's future profits.

17.3 EXCEPTIONAL TAX ASSESSMENTS

Nil.

17.4 DEFERRED AND UNREALISED TAX POSITION

Description	Amount
Taxes payable on:	
Regulated provisions:	-

WITH RELATED PARTIES

Apart from the transactions carried out with related parties and not referred to by the law, no significant transactions were concluded at arm's length.

Agreements with related parties are set out in a note to the consolidated financial statements (Note E.27 – Transactions with related parties).

7. Off-balance sheet commitments

7.1 COMMITMENTS GIVEN

	2012/2013	2011/2012
Deposits, securities and guarantees given to financial institutions	25,252	38,622
Retirement benefits*	615	500
Parent company guarantees	409,970	403,046

* *Retirement assumptions:*
- *the discount rates are determined by reference to the yields on AAA bonds for the equivalent periods to the commitments at the date of valuation;*
- *the assumptions adopted to calculate the retirement commitments are disclosed in the table below:*

	2012/2013	2011/2012
Discount rate	*2.85%*	*3.85%*
Inflation rate	*2%*	*2%*
Average rate of salary increase	*2.5%*	*3%*
Yield expected on investments	*N/A*	*N/A*

7.2 LONG TERM LEASE COMMITMENTS

Types of leases	Facilities	IT hardware	Motor rental	Total
Lease payments for the financial year	663	414	146	1,223
TOTAL	**663**	**414**	**146**	**1,223**
Lease payments due:				
• 1 year or less	580	554	100	1,234
• 1 to 5 years	2,393	514	75	2,982
• more than 5 years	2,020	-	-	2,020
TOTAL	**4,993**	**1,068**	**175**	**6,236**

7.3 HEDGING COMMITMENTS

Interest rate risk

The syndicated debt, excluding the revolving facility, is indexed on US Dollar Euribor and Libor variable rates and may be hedged in accordance with the Group's interest rate risk policy. None of the revolving facilities, whether drawn or undrawn, nor the US private placement-type fixed-rate bond issue are subject to interest rate hedging.

To manage its risk, the Treasury Department has implemented a hedging strategy using interest rate swaps, tunnels, caps and options.

The exposure of interest rates on loans in Euros is hedged for between 77% and 83% of the total debt bearing a Euro interest rate, depending on interest rate fluctuations for the 2013/2014 period.

The syndicated debt denominated in US dollars is no longer being hedged. However, taking into account the "US private placement" bond issue, the hedged ratio, *i.e.*: amount of fixed-rate debt over total USD-denominated debt, is 74% for the period 2013/2014.

The estimated cost of syndicated debt in 2013/2014 is 1.94%, including hedges and spreads for the debt in Euros, and 3.87% for the debt in US dollars, which includes the US private placement. The Group's total cost of debt for 2013/2014 is therefore estimated at 2.5%.

INSTRUMENTS RECOGNISED UNDER EQUITY

	EUR borrowings		USD borrowings

Caps	20,000	(56)	-	-	-	-
TOTAL	**192,500**	**(3,363)**	**225**	**(2)**	**176**	**(2)**

Exchange risks

The Group operates in foreign countries and is therefore exposed to exchange risk as a result of various foreign currency exposures.

The principal currencies concerned are the US Dollar, the Hong Kong Dollar, the Czech Koruna and the Swedish Krona, the Pound Sterling and the Chinese Yuan.

The management of the exchange risk of commercial contracts is centralised by the Group Treasury Department and comprises two parts: the certain and the uncertain risk.

EXCHANGE RISK MANAGEMENT RELATING TO TENDERS IN FOREIGN CURRENCIES (UNCERTAIN RISK):

The Faiveley Transport Group is required to submit tenders denominated in foreign currencies. The Group's hedging policy is not to use hedge instruments during the offer phase, unless when specifically decided by Management. The aim is to manage the exchange risk through normal commercially available means. If necessary, the Group Treasury Department uses mainly exchange options.

EXCHANGE RISK MANAGEMENT RELATING TO COMMERCIAL CONTRACTS (CERTAIN RISK)

Commercial contracts in foreign currencies (most often successful tenders) are hedged by the Group Treasury Department from contractual commitment. Instruments used mainly include forward purchases and sales and exchange swaps. Group Treasury may also use options.

The Group's policy is to systematically hedge the full value of future transactions expected in every major currency. The minimum trigger threshold for a foreign exchange hedge is €250 thousand.

Various cash flows are hedged against for a minimum of 80% of the annual budget.

In addition to commercial contracts, all financial positions and management fees deemed significant are hedged against.

Nil.

7.5 INDIVIDUAL TRAINING RIGHTS (ITR)

The employees of Faiveley Transport are entitled to request additional training. A total of 66 hours of training in respect of the ITR was requested by employees during the financial year. At 31 March 2013, a total of 3,879 unused training hours had been accumulated.

7.6 SHARE PURCHASE OPTION PLAN OF 27 SEPTEMBER 2005

On request from Faiveley Transport, Faiveley SA implemented a share purchase option plan for the benefit of key Faiveley Transport Group Management (excluding the managers who invested in Faiveley Management SAS).

This share purchase option plan, for a maximum of 325,000 Faiveley Transport shares, was approved by the General Meeting on 27 September 2005 and was implemented by the Management Board. The table in Note C.5.1 “Share capital”, details the share allocations. At 31 March 2013, 56,996 shares were outstanding.

The options are exercisable as of the second anniversary date of their allocation by the Chairman of the Management Board, provided the beneficiary is still employed by the Faiveley Transport Group on the day of exercise and has accepted the options terms and conditions. The shares are not transferable until the fourth anniversary of the allocation of purchase options. It should be noted that 259,044 share purchase options have been exercised at 31 March 2013.

7.7 SHARE SUBSCRIPTION PLAN OF 22 SEPTEMBER 2009

The Combined General Meeting of 22 September 2009 delegated to the Management Board powers in relation to:

- granting share subscription and/or purchase options;
- issuing shares or marketable securities giving right to the allocation of new or already issued shares of the Company, with, in the case of the allocation of new shares, the waiver of the pre-emption right.

At its meeting of 23 November 2009, the Management Board decided to grant, on this date and up to 23 November 2017, options giving right to subscribe to new shares in the Company, to be issued through a share capital increase not exceeding an overall nominal amount of €144,000, corresponding to 144,000 new shares at a par value of €1 each. The new shares will be issued at a price of €54.91. The number of options was reduced to 123,000 at 31 March 2013.

7.8 FREE PERFORMANCE-BASED SHARE ALLOCATION PLAN AUTHORISED BY THE GENERAL MEETING OF 13 SEPTEMBER 2010

The Combined General Meeting of 13 September 2010 delegated the Management Board powers to allocate free shares of the Company, either new or already issued. The General Meeting established a minimum vesting period of two years following which the allocation of ordinary shares to beneficiaries will be final, subject to the potential terms and conditions set out by the Management Board, and a retention period of a minimum of two years from the date of final allocation of the shares.

In its meetings held on 3 December 2010 and 24 February 2011, the Management Board decided to allocate a total of 69,700 shares to 43 beneficiaries.

The Management Board has assigned permanently at its meetings of 3 December 2012 and 24 February 2013 respectively 26,650 and 1,000 shares to beneficiaries after taking into account the partial achievement of performance criteria.

7.9 FREE SHARE ALLOCATION PLAN AUTHORISED BY THE GENERAL MEETING OF 14 SEPTEMBER2011

The Combined General Meeting of 14 September 2011 delegated the Management Board powers to allocate free shares of the Company, either new or already issued. The General Meeting established a minimum vesting period of two years following which the allocation of ordinary shares to beneficiaries will be final, subject to the potential terms and conditions set out by the Management Board, and a retention period of a minimum of two years from the date of final allocation of the shares. However, the General Meeting authorised the Management Board, to the extent that the minimum vesting period for some or all of the allocations would be a minimum of four years, not to impose a retention period for the shares in question.

In its meeting held on 5 March 2012, the Management Board decided to implement this authorisation and allocate a total of 79,224 shares to 151 beneficiaries. At 31 March 2013, 2,916 free shares were cancelled. A balance of 76,308 shares was allocated.

7.10 FREE SHARE ALLOCATION PLAN AUTHORISED BY THE GENERAL MEETING OF 14 SEPTEMBER 2012

At 31 March 2013, the balance of the free performance-based share plan was 10,000 shares, with that of the free allocation plan as part of an employee shareholding plan standing at 72,386 shares.

8. Statutory Auditors' fees

Statutory Auditors' fees are included in Note H of the 2012/2013 consolidated financial statements.

5. STATUTORY AUDITORS' **REPORT**

on the parent company financial statements
For the year ended 31 March 2013

This is a free translation into English of the statutory auditors' report issued in French and is provided solely for the convenience of English speaking users. The statutory auditors' report includes information specifically required by French law in such reports, whether modified or not. This information is presented below in the opinion on the financial statements and includes an explanatory paragraph discussing the auditors' assessments of certain significant accounting and auditing matters. These assessments were considered for the purpose of issuing an audit opinion on the financial statements taken as a whole and not to provide separate assurance on individual account captions or on information taken outside of the financial statements.

This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

To the Shareholders,

In compliance with the assignment entrusted to us by the Annual General Meeting, we hereby report to you, for the year ended 31 March 2013, on:

- the audit of the accompanying financial statements of FAIVELEY TRANSPORT;
- the justification of our assessments;
- the specific verifications and information required by law.

These financial statements have been approved by the Management Board. Our role is to express an opinion on these financial statements based on our audit.

I. OPINION ON THE FINANCIAL STATEMENTS

We conducted our audit in accordance with professional standards applicable in France; those standards require that we plan and perform the audit to obtain reasonable assurance regarding whether the financial statements are free of material misstatement. An audit involves performing procedures, using sampling techniques or other methods of selection, to obtain audit evidence regarding the amounts and disclosures in the financial statements. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made as well as the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

In our opinion, the financial statements provide a true and fair view of the assets and liabilities and of the financial position of the Company as at 31 March 2013 and the results of its operation for the year then ended in accordance with French accounting principles.

II. JUSTIFICATION OF OUR ASSESSMENTS

In accordance with the requirements of Article L. 823-9 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the following matters:

The Notes B.3.1 and B.3.3 to the financial statements present accounting rules and methods used by your Company in order to value and depreciate the technical loss as well as equity securities. We have assessed the relevance of these methods. We also assessed approaches and assumptions used by the Company, as described in the financial statements, in order to estimate book values on the basis of the latest available information. We conducted tests of implementation to assess the application of these methods.

These assessments were made as part of our audit of the financial statements taken as a whole, and therefore contributed to the opinion we formed, which is expressed in the first part of this report.

III. SPECIFIC VERIFICATIONS AND INFORMATION

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by French law.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report of the Management Board and in the documents addressed to shareholders with respect to the financial position and the financial statements.

Concerning the information given in accordance with the requirements of Article L. 225-102-1 of the French Commercial Code relating to remunerations and benefits received by the directors and any other commitments made in their favour, we have verified its consistency with the financial statements, or with the underlying information used to prepare these financial statements and, where applicable, with the information obtained by your Company from companies controlling your company or controlled by it. Based on this work, we attest to the accuracy and fair presentation of this information.

In accordance with the French law, we have verified that the required information concerning the identity of shareholders and holders of the voting rights has been properly disclosed in the management report.

6. STATUTORY AUDITORS' SPECIAL REPORT

on related-party agreements and commitments
Annual General Meeting to approve the financial statements for the year ended 31 March 2013

This is a free translation into English of the Statutory Auditors' special report on related-party agreements and commitments issued in French and is provided solely for the convenience of English speaking readers. This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.

To the Shareholders,

In our capacity as Statutory Auditors of your Company, we hereby report to you on related-party agreements and commitments.

It is our responsibility to report to shareholders, based on the information provided to us, on the main terms and conditions of the agreements and commitments that have been disclosed to us or that we may have identified as part of our engagement, without commenting on their relevance or substance or identifying any undisclosed agreements or commitments. Under the provisions of Article R.225-58 of the French Commercial Code, it is the responsibility of shareholders to determine whether the agreements and commitments are appropriate and should be approved.

Where applicable, it is also our responsibility to provide shareholders with the information required by Article R.225-58 of the French Commercial Code in relation to the implementation during the year of agreements and commitments already approved by the Annual General Meeting.

We performed the procedures that we deemed necessary in accordance with the professional guidelines of the French National Institute of Statutory Auditors (Compagnie nationale des commissaires aux comptes) applicable to such engagements. These procedures consisted in verifying that the information given to us is consistent with the underlying documents.

I. AGREEMENTS AND COMMITMENTS SUBMITTED FOR THE APPROVAL OF THE ANNUAL GENERAL MEETING

Agreements and commitments authorised during the year

In accordance with Article L. 225-86 of the French Commercial Code, we were informed of the following agreements and commitments authorised by the Supervisory Board.

WITH FRANCOIS FAIVELEY PARTICIPATIONS SAS

(Erwan FAIVELEY, member of the Management Board, holds the position of Chairman of the Management Board of FFP, which is shareholder of FAIVELEY TRANSPORT)

(Supervisory Board Meeting of 6 June 2012)

Your Company concluded an amendment number 3 to the agreement for technical, commercial and administrative support agreed between the Company FFP and FAIVELEY TRANSPORT of 26 June 2004.

By this amendment number 3, the Company FFP and FAIVELEY TRANSPORT have decided to update fee conditions of services provided which fixed amount of €365,000 exclusive of tax was already set by an amendment number 2 of 30 June 2008.

The annual fee is now revised upwards every year according to the movement of the SYNTEC index. The first revision was on 1 June 2012. The annual increase cannot exceed 5% of the previous annual fee.

In application of this amendment number 3, the annual fee remuneration for the services provided was set at € 373,094 exclusive of tax for the year ended 31 March 2013.

II. AGREEMENTS AND COMMITMENTS ALREADY APPROVED BY THE ANNUAL GENERAL MEETING

Agreements and commitments approved in previous years which remained in force during the year

In accordance with Article R.225-57 of the French Commercial Code, we were informed that the following agreements and commitments, approved by your Annual General Meeting in previous years, remained in force during the year ended 31 March 2013.

WITH ROBERT JOYEUX

Memorandum of understanding with the managers and amendment n°1 – Sale and transfer of FAIVELEY MANAGEMENT shares to FAIVELEY SA (which became FAIVELEY TRANSPORT on 22 September 2009)

As part of its capital restructuring operations, FAIVELEY TRANSPORT signed a memorandum of understanding on 16 October 2008 and an amendment to this memorandum of understanding on 17 November 2008 with the managers and their spouses who are shareholders of FAIVELEY MANAGEMENT SAS.

Within the framework of the memorandum of understanding of 16 October 2008, Robert JOYEUX received 140,610 FAIVELEY TRANSPORT shares in exchange for 164,430 FAIVELEY MANAGEMENT shares provided to FAIVELEY TRANSPORT. For a period of six years with effect from 23 December 2008, any disposal of any block of 10,000 shares in FAIVELEY TRANSPORT is subject to a pre-emption right of FAIVELEY TRANSPORT.

Consulting and assistance agreement of 22 April 2011 and amendment number 1 of 28 March 2012

In application of the amendment number 1 of 28 March 2012 added to the consulting and assistance agreement agreed between the Company RJX Consulting, whose Manager is Robert JOYEUX, and FAIVELEY TRANSPORT, your Company paid €194,000 exclusive of tax for consulting and assistance fees and €12,000 exclusive of tax for reimbursement of expenses.

WITH THIERRY BAREL

Thierry BAREL, Chairman of the Management Board, may be entitled to compensation based on performance criteria, not exceeding eighteen months of total gross remuneration, in the event of his dismissal by the Supervisory Board.

The performance criterion for the measurement of this compensation is the rate of achievement of annual goals set by the Supervisory Board. These annual goals are used for the calculation of the annual variable remuneration. The measurement of this performance criterion is the average of the performance accomplished by Thierry BAREL during the three years for which results have been published and preceding his dismissal by the Supervisory Board.

WITH FRANCOIS FAIVELEY PARTICIPATION SAS

In application of the technical, commercial and administrative assistance agreement concluded between FFP and FAIVELEY TRANSPORT on 26 June 2004, the Company FAIVELEY TRANSPORT invoiced €3,170 exclusive of tax for rents and services provided to the Company FFP for the year ended 31 March 2013.

Neuilly-sur-Seine and Dijon, 12 July 2013

7. DRAFT RESOLUTIONS

to be submitted to the Combined General Meeting of 12 September 2013 called to approve the financial statements for the year ended 31 March 2013

I. RESOLUTIONS IN ORDINARY SESSION

FIRST RESOLUTION

Approval of the parent company financial statements for the year ended 31 March 2013

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, having considered the management report of the Management Board and the observations of the Supervisory Board on the operations of the Company for the financial year ended 31 March 2013 and on the financial statements of that year, and having considered the Statutory Auditors' report on the execution of their assignment for this financial year, approves the parent company financial statements for the year ended 31 March 2013, as presented, showing a profit of €26,762,496.06, and the transactions recorded in these financial statements and summarised in these reports.

Pursuant to Article 223 (iv) of the General Tax Code, the General Meeting approves the non-tax-deductible expenses covered by Article 39-4 of the said Code totalling €16,431, as well as the corresponding tax which amounts to €5,918.

SECOND RESOLUTION

Allocation of profit for the year ended 31 March 2013

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, on the proposal of the Management Board, agrees to allocate the profit for the year ended 31 March 2013 as follows:

- Profit for the financial year €26,762,496.06
- Added to:
  - Retained earnings from previous years €44,715,256.31
- Distributable profit: €71,477,752.37
  - Transfer to legal reserve: €0
  - Cash dividend of €0.95 per share: (€13,883,444.40)

The balance of €57,594,307.97 will be transferred in full to "retained earnings".

Taking account of this allocation, the Company shareholders' equity will be €178,624,285.99.

The dividend will be payable from 19 September 2013.

Pursuant to Article 158 of the General Tax Code, only individual shareholders will be entitled under the dividends distributed to a rebate of 40% on the amount received.

Pursuant to the provisions of Article 243(ii) of the General Tax Code, the General Meeting notes that the following dividends were paid in respect of the last three financial years:

Year	Dividend
2009/2010	€1.20
2010/2011	€1.20
2011/2012	€0.85

Where, upon payment of these dividends, the Company holds any treasury shares, the distributable profit corresponding to the unpaid dividend due to the holding of the said shares will be allocated to "retained earnings".

THIRD RESOLUTION

Approval of the consolidated financial statements for the year ended 31 March 2013

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, having considered the management report of the Management Board and the observations of the Supervisory Board on the operations of the Group for the financial year ended 31 March 2013 and on the consolidated financial statements of that year, and having considered the report on the consolidated financial statements of the Statutory Auditors in the execution of their assignment during this financial year, approves the consolidated financial statements for the year ended 31 March 2013, as presented, as well as the transactions recorded in these financial statements and summarised in these reports.

FOURTH RESOLUTION

Setting of Directors' fees

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, sets the amount of fees allocated to the Supervisory Board for the financial year ended 31 March 2013 at €325,000.

FIFTH RESOLUTION

Approval of the transactions and agreements referred to under Articles L. 225-86 and subsequent of the Commercial Code

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, having considered the Statutory Auditors' special report on the agreements referred to under Articles L. 225-86 and subsequent of the Commercial Code, notes and approves the terms of this report and the agreements mentioned therein.

SIXTH RESOLUTION

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, decides to renew the term of office of Christian Germa as member of the Supervisory Board for a period of three years, which will expire at the end of the General Meeting called to approve the financial statements for the year ending 31 March 2016.

SEVENTH RESOLUTION

Renewal of the term of office of a member of the Supervisory Board

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, decides to renew the term of office of Maurice Marchand-Tonel as member of the Supervisory Board for a period of three years, which will expire at the end of the General Meeting called to approve the financial statements for the year ending 31 March 2016.

EIGHTH RESOLUTION

Renewal of the term of office of a member of the Supervisory Board representing employee shareholders

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, having considered the report of the Management Board, decides to renew the term of office of Serge Choumaker as member of the Supervisory Board representing employee shareholders for a period of three years, which will expire at the end of the Annual General Meeting called to approve the financial statements for the year ending 31 March 2016.

NINTH RESOLUTION

Vacant position on the Supervisory Board

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, decides not to fill the vacant position on the Supervisory Board arising from Robert Joyeux's term of office expiring at the end of this General Meeting.

TENTH RESOLUTION

Authorisation given to the Management Board to trade in Company shares

The General Meeting, acting under the quorum and majority conditions required for Ordinary General Meetings, having considered the report of the Management Board, authorises the Management Board, with the option to sub-delegate to its Chairman and/or one of its members, with the approval of the Chairman and within legal limits, in accordance with Articles L. 225-209 and subsequent of the Commercial Code, to purchase or sell shares in the Company.

The General Meeting decides that transactions may be carried out to:

- ensure the liquidity and to stimulate the market of Faiveley Transport shares by an investment services provider *via* a liquidity contract that complies with an ethics charter recognised by the Autorité des Marchés Financiers;
- grant them to employees and senior executives of the Group according to the terms and conditions provided for by law (stock options, employee profit-sharing, allocation of free shares);
- cancel them by means of a reduction in capital within the limits set by law;
- retain them within the limit of 5% of the capital and use them in exchange or payment, in particular as part of acquisitions initiated by the Company, by means of public offering or other;
- implement any other market practice permitted by the Autorité des Marchés Financiers and more generally any transaction in compliance with applicable regulations.

Company shares may be purchased provided the total number of shares held by the Company following such purchases does not exceed 10% of the shares comprising the capital of the Company, this percentage being applied to capital adjusted according to the transactions that may affect it subsequent to the current General Meeting.

Purchase, disposal, exchange or transfer transactions may be carried out by any means, on the market or by private contract, including by acquisition or disposal of blocks, or by recourse to derivative financial instruments, under the conditions provided for by market authorities and in compliance with regulations. The maximum share capital acquired, disposed of, exchanged or transferred by means of a block of securities may relate to the entire buyback programme.

The maximum purchase price is set at €70 per share.

The General Meeting delegates to the Management Board the power to adjust the aforementioned purchase price in order to take account of the incidence of possible financial transactions on the share value. In particular, in the event of an increase in capital by capitalisation of reserves and the allocation of free shares, the price detailed above will be adjusted by a multiplying factor equal to the ratio of the number of securities comprising the share capital before and after the transaction.

The maximum amount to be allocated to the buyback programme is €51 million.

This authorisation remains valid for eighteen months with effect from this day.

The General Meeting vests all necessary powers in the Management Board, with the option to delegate in order to decide on and implement the buyback programme, and in particular to place any orders on the stock market, conclude any agreements, perform any formalities and make any declarations with the Autorité des Marchés Financiers and any other body, and in general, do whatever is necessary to complete the transactions carried out under this authorisation.

This resolution replaces and cancels the authorisation granted by the ninth resolution and approved by the Combined General Meeting of 14 September 2012.

II. RESOLUTIONS IN EXTRAORDINARY SESSION

ELEVENTH RESOLUTION

Delegation of authority to the Management Board to proceed with the allocation of free shares, either existing or to be issued

The General Meeting, acting under the quorum and majority conditions required for Extraordinary General Meetings, having considered the report of the Management Board and the special report of the Statutory Auditors, authorises the Management Board, pursuant to Articles L. 225-197-1 and subsequent of the Commercial Code, to proceed, on one or more occasions, with the free allocation of ordinary shares in the Company, either existing or to be issued, for the benefit of corporate officers as defined by law and of certain employees of the Company and companies related to it.

The General Meeting sets the vesting period at the end of which the allocation of ordinary shares to the beneficiaries will become final, subject to any conditions determined by the Management Board, at a minimum of two years, and sets the mandatory period during which the shares must be held by the beneficiaries at a minimum of two years with effect from the vesting date of the shares.

However, the General Meeting authorises the Management Board not to impose any retention period for the shares concerned, where the vesting period for all or part of one or several allocations is a minimum of four years.

The General Meeting decides that allocations by the Management Board may not exceed the common limit set for all shares granted free of charge under this resolution and/or those resulting from the exercise of options granted under the authorisation resulting from the twelfth resolution to this Meeting, and sets this limit at 1% of the share capital on the date of this General Meeting.

The General Meeting acknowledges that shares allocated free of charge may be either existing shares or shares to be issued, and authorises the Management Board, in the event of free allocation of shares to be issued, to increase the capital at the end of the vesting period, by capitalisation of reserves, profits or issue premiums for the benefit of the beneficiaries of the said shares, with this decision including express waiver by shareholders of their pre-emption right in favour of beneficiaries of free shares on the portion of reserves, profit or premiums thus capitalised, it being noted that the increase in capital will be carried out by the sole fact of the final allocation of shares to the beneficiaries.

The General Meeting grants all necessary powers to the Management Board, which shall be assisted by the Remuneration Committee, within the limits set above, to:

- set the conditions and where applicable, the allocation criteria for ordinary shares;
- set, within the legal conditions and limits, the dates on which the allocations will be effected;
- determine the identity of beneficiaries, the number of ordinary shares allocated to each of them and the terms and method of allocation of ordinary shares.

The General Meeting sets the period of validity of this authorisation at thirty eight months from this date. This authorisation cancels any amounts unused by the Management Board by virtue of the previous authorisation granted by the General Meeting of 14 September 2012.

The Management Board will inform the Ordinary General Meeting every year of transactions carried out under this authorisation in a special report, in accordance with Article L. 225-197-4 of the Commercial Code.

TWELFTH RESOLUTION

Delegation of authority to the Management Board to grant share subscription and/or purchase options

The General Meeting, acting under the quorum and majority conditions required for Extraordinary General Meetings, having considered the report of the Management Board and the special report of the Statutory Auditors, authorises the Management Board, pursuant to Articles L. 225-177 and subsequent of the Commercial Code, to issue, for the benefit of corporate officers as defined by law and of certain employees of the Company and companies related to it, under the conditions specified by Articles L. 225-185 and subsequent and L. 225-186-1 of the Commercial Code, options giving the right to subscribe for new shares in the Company or to purchase existing shares previously bought back by the Company in accordance with the law.

This authorisation, which may be used on one of more occasions, is granted for a period of thirty-eight months with effect from this General Meeting and cancels any amounts unused by the Management Board by virtue of the previous authorisation granted by the General Meeting of 13 September 2010.

However, the allocation of options to corporate officers will only be made on the proposal of the Remuneration Committee and will require approval of the Supervisory Board.

The General Meeting decides that the allocation of options will be within a limit common to all shares arising from the exercise of options that will be granted under this resolution and/or those that will be allocated free of charge under the authorisation arising from the eleventh resolution to this General Meeting, and sets this limit at 1% of the share capital on the day of this General Meeting.

The General Meeting decides that:

- in the event that subscription options are awarded, the subscription price of shares by the beneficiaries will be set by the Management Board the day the options are granted, within the legal limits;
- in the event that purchase options are awarded, the purchase price of shares by the beneficiaries will be set by the Management Board the day the options are granted, within the legal limits.

The General Meeting decides that the Management Board will set the period(s) of exercise of options thus granted, subject to legal prohibition, it being noted that the options may not be valid for a period in excess of 8 years from their date of allocation. The Management Board may also prohibit the immediate sale of subscribed or acquired shares, without however the timeframe imposed for the retention of securities exceeding three years from the exercise of the option.

The General Meeting delegates all necessary powers to the Management Board to implement this resolution and establish the regulations of the option plan within the legal and regulatory limits, and notably to:

- approve the list or categories of the beneficiaries;
- set the period(s) of exercise of the options.

However, the list and categories of beneficiaries whose identity will be determined by the Management Board, the conditions of grant, the release and exercise must meet the characteristics set by the Remuneration Committee and be approved by the Supervisory Board, according to what it considers most appropriate to ensure the motivation and loyalty of the beneficiaries of these options.

The General Meeting notes that this authorisation carries, for the benefit of beneficiaries of options, the express waiver by shareholders of their pre-emption right to subscribe to shares that will be issued as the options are exercised.

Capital increases arising from the exercise of options to subscribe for shares will be considered final by mere declaration of the exercise of the option together with the related payment in cash or by being offset against the Company's liabilities.

Pursuant to Article L. 225-184 of the Commercial Code, the Management Board, in a special report, will inform the shareholders every year, at the time of the Ordinary General Meeting, of the transactions carried out under this authorisation.

THIRTEENTH RESOLUTION

Delegation of authority granted to the Management Board to increase the share capital without waiver of pre-emption right through a private placement for the benefit of qualified investors or a restricted circle of investors

The General Meeting, acting under the quorum and majority conditions required for Extraordinary General Meetings, having considered the report of the Management Board and pursuant of the provisions of the Commercial Code, and in particular Articles L. 225-129, L. 225-129-2, L. 225-135 and L. 225-136,

- delegates to the Management Board, with the option to sub-delegate, subject to the conditions set by law and by the bylaws, the authority to decide on one or more increases in the share capital of the Company, in the proportion and at the times it decides, by the issue, in one or more offerings as defined by II of Article L. 411-2 of the Monetary and Financial Code, of ordinary shares, as well as all marketable securities, either issued for valuable consideration or free of charge, giving access by all means, immediately and/or in future, to new or existing ordinary shares in the Company, it being specified that the subscription to these shares and marketable securities may be made in cash, by offsetting against current liabilities to be settled in cash, against due and payable debts, or by capitalisation of reserves, profits or premiums;
- decides that the maximum nominal increase in share capital likely to be carried out immediately or in the future under this authorisation is set at 10% of the share capital at the date of this General Meeting with the stipulation that in any event, the issue of securities executed in this context must remain within the limits specified by the law; if applicable, the nominal amount of any shares potentially issued in addition to this limit, in the case of new financial transactions to maintain the rights of holders of securities giving access to capital, will be added to the said limit;
- decides that this delegation is given for a period of twenty six months from the date of this General Meeting;
- decides to cancel the pre-emption right of shareholders to subscribe for securities issued under this resolution;
- notes that, where appropriate, this delegation implies, for the benefit of holders of marketable securities issued giving access to the capital of the Company, waiver by shareholders of their pre-emption right to subscribe to shares to which these marketable securities give the right, immediately or in the future;

- decides that the issue price of shares will be calculated in accordance with legal and regulatory provisions applicable on the date of issue (to date, the weighted average of the last three stock market trading days preceding the date of the setting of the subscription price for the capital increase, less a maximum discount of 5% thereafter, if applicable, correction of this average in the event of a difference between the dates of transfer of ownership);
- gives all necessary powers to the Management Board, with option to sub-delegate in accordance with the law and bylaws, to implement this authorisation and in particular to set the conditions of issue, the nature and features of the marketable securities giving access to capital, the methods of allocating the capital securities to which these marketable securities give the right, as well as the dates on which the rights of allocation may be exercised, at its sole discretion to allocate the costs of increase in capital to the related premiums and transfer from this amount the sums necessary to increase the legal reserve, make any adjustments to take account of the impact of transactions on the capital of the Company, conclude any agreements, in particular to ensure the successful completion of the issues envisaged, note the completion of any increases in capital, change the bylaws accordingly, perform the necessary formalities and in general do whatever is necessary;
- notes that, in the event that the Management Board uses the delegation of authority granted to it by this resolution, the Management Board will request the prior approval of the Supervisory Board and report to the next Ordinary General Meeting, pursuant to the law and regulations, on the use made of the authorisations granted by this resolution;
- decides that this delegation replaces the authorisation granted by the Combined General Meeting of 14 September 2011.

FOURTEENTH RESOLUTION

Delegation of authority granted to the Management Board to increase the share capital for the benefit of employees of the Group

The General Meeting, acting under the quorum and majority conditions required for Extraordinary General Meetings, having considered the report of the Management Board and the special report of the Statutory Auditors and pursuant to Articles L. 225-129-2, L. 225-138, L. 225-138-1 of the Commercial Code and L. 3332-1 and subsequent of the Labour Code, and this in order to fulfil the provisions of Article L. 225-129-6, Paragraphs 1 & 2 of the Commercial Code,

- delegates to the Management Board, with the option to sub-delegate under the conditions foreseen by law and the bylaws, the authority to decide on one or more increases in the Company's share capital, in the proportion and at the times it deems appropriate, by issuing shares or marketable securities giving access to the capital of the Company and reserved for employees enrolled in a company savings plan of the Company or a related company, up to a maximum nominal amount of 1% of the share capital on the day of this Meeting;
- decides that this authorisation is granted for a period of twenty six months from the date of this General Meeting;
- decides to waive the pre-emption right of shareholders to subscribe for securities issued under this resolution;
- grants full powers to the Management Board, with the option to sub-delegate under the conditions set by law and the bylaws, to implement this delegation and in particular to set the price and terms of issue, the nature and characteristics of marketable securities giving access to capital, the method of the allocation of shares to which these marketable securities give the right as well as the dates on which the allocation rights may be exercised, at its sole discretion charge the costs of capital increases against the amount of related premiums and to deduct from this amount the sums necessary to fund the legal reserve, to carry out any adjustments to take account of the impact of transactions on the capital of the Company, to conclude any agreements in particular to achieve the successful completion of the proposed issues, to record any capital increases, to amend the bylaws accordingly, to perform the necessary formalities and generally do whatever is necessary.

III. RESOLUTION IN BOTH SESSIONS

FIFTEENTH RESOLUTION

Powers for formalities

The Annual General Meeting confers full powers to the bearer of copies or excerpts of the minutes recording its decisions to carry out all the legal formalities of publication.

SOCIAL AND ENVIRONMENTAL RESPONSIBILITY

CHAIRMAN'S FOREWORD

As an industrial group, Faiveley Transport has a particular duty to be aware of issues affecting social and environmental responsibility.

Moreover, this year, emphasis has been placed on corporate and business ethics with an ethics charter improving awareness across the entire workforce. Likewise, the creation of an Internal Control Department led to an audit of Group procedures, which are now contained in an internal control manual, published at the beginning of 2013. All the Group's site managers and Finance Directors will receive training in 2013 on the rules and procedures included in this internal control manual. They will then be responsible for improving processes and practices at each site in line with this common internal control framework. Lastly, in addition to this improvement in internal control, a collection of best practices has been compiled within the Faiveley Management System in order to improve internal processes as a whole across all the Group's businesses (production, purchasing, logistics, engineering, etc.).

Through its industrial activities, the Group inevitably finds itself at the centre of current issues related to sustainable development: importation of materials covered by the REACH regulation, transport related CO_2 emissions, waste generation, etc. The Group, which is made up of subsidiaries based around the world, subject to different laws and regulations, has determined on a single course of action to be adopted across the entire Group, and which has been incorporated into the Faiveley Management System. The rollout of this excellence strategy is underway within the Group's industrial entities.

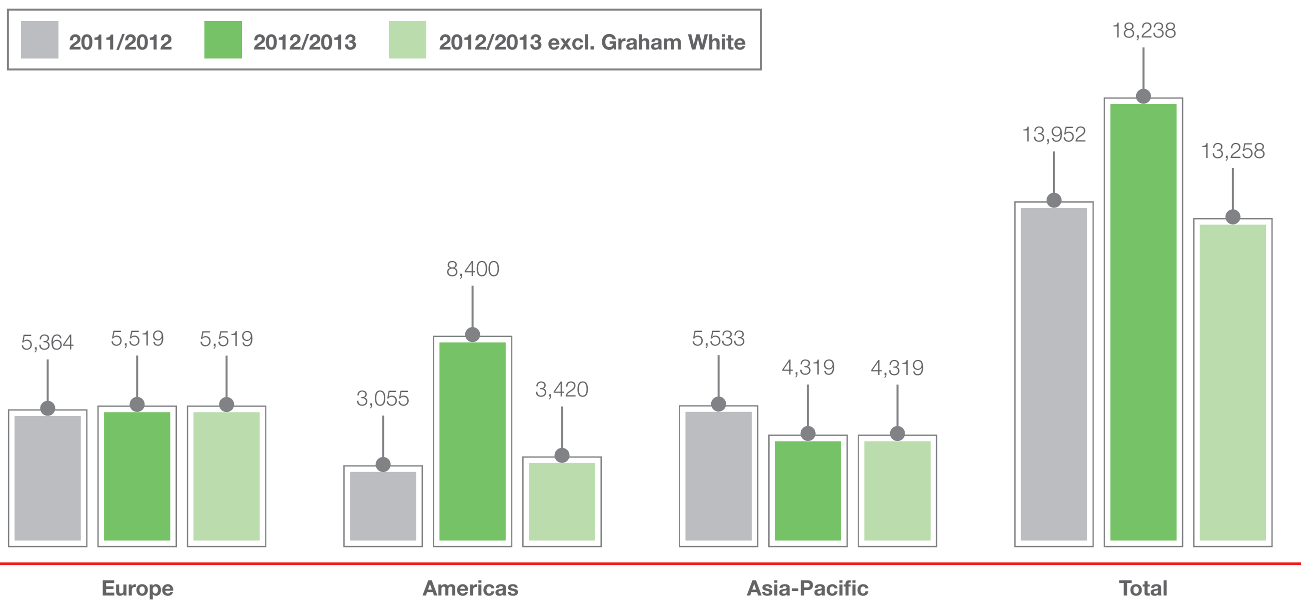
Within this framework, the Group has drawn up a set of improvement commitments, which can be broken down into six distinct areas:

- increasing carbon footprint assessments within the Group's industrial entities;
- innovating for the planet;
- avoiding pollution and waste generation;
- promoting training;
- striving for diversity;
- ensuring the integration of young people.

The key indicators for the 2012/2013 financial year are as follows:

- CO_2 emissions;
- work-related accidents;
- ISO 14001 certified sites;
- paper recycling.

CO_2 EMISSIONS FROM THE GROUP'S ELECTRICITY CONSUMPTION[1]



(1) Data obtained from the International Energy Agency's 2010 framework, quantifying CO_2 emissions based on the source of electricity output per country.

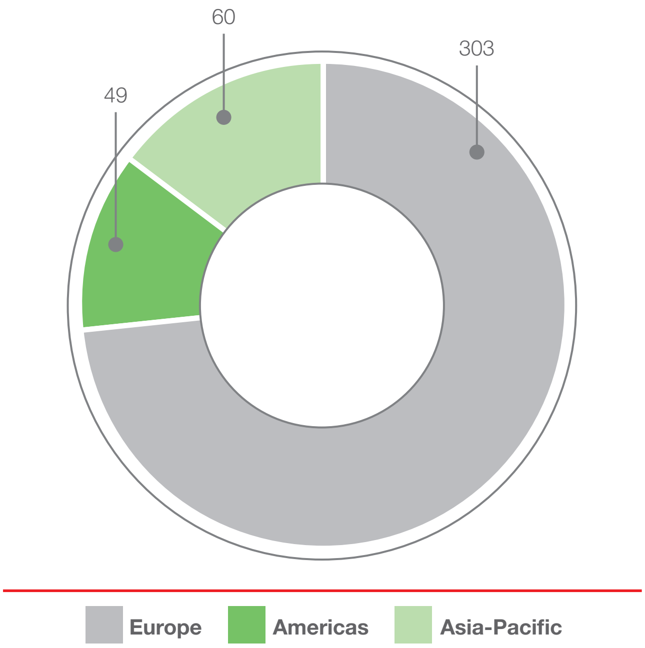
PAPER RECYCLING (IN TONNES)



INTRODUCTION
FAIVELEY TRANSPORT'S CONTEXT

The transport of people and goods generates an impact, not only locally on air and water quality, but also globally through greenhouse gas emissions. The transport sector is now responsible for more than a quarter of total emissions and is one of the few industries to see its worldwide emissions steadily increasing.

Suffocating towns, congestion, carbon footprint, global warming – for several years now, the theme of sustainable development cannot be ignored and is a major political and economic argument in most countries.

In terms of mobility, roads have reached their limits whether in terms of maximum speed, which is limited in almost every country, or average speed, because of congestion problems.

The use of rail transport – trains, metros or tramways – is a way of moving over to sustainable mobility.

In fact, as far as emissions and energy consumption are concerned, rail is the most sustainable mode of collective transport globally. It generates less than 1% of the world's greenhouse gas emissions (GHG). According to a recent ADEME study, greenhouse gas emissions from rail transport are estimated to be between 10 and 20 times lower than car or air transport, per passenger and per kilometre travelled.

The facts are as follows: The IPCC (Intergovernmental Panel on Climate Change), created in 1988 by the UN, considers that in order to maximise its chances of limiting global warming to 2°C, the human race must halve its greenhouse gas emissions by 2050. In Europe, in accordance with the Lisbon treaty which supports sustainable economic development, reducing CO_2 emissions by 20% before 2020 is a major objective:

- 20% improvement in energy efficiency;
- 20% reduction in greenhouse gas emissions compared with 1990;
- 20% of the European energy mix to be renewable forms.

Rail transport contributes to the achievement of these goals.

The development of the rail market supports the growing needs created by a growing population, excessive urban concentration, road congestion and environmental concerns.

The depletion of fossils fuels, rising fuel prices, global warming and global environmental awareness all promote the rail industry. With the lowest level of greenhouse gas emissions per kilometre covered, rail transport is amongst the most environmentally friendly modes of transport. Users are led to make environmental impact a key factor in their choice of transport.

Between now and 2015, there will be more than 500 mega-cities worldwide each with more than a million inhabitants. In Europe, almost 200 cities have limited town centre access to polluting vehicles. The "Low Emission Zone", applied in particular in London, Berlin and Lund (Sweden) is coming to France under the name "Zapa" (priority air quality zone). European regulations in fact require member states to respect "PM10" fine particle exposure limits.

Furthermore, rail has a far smaller foothold in geographic terms than the road sector but its transport capacity is much higher. These factors are now of paramount importance in urban planning.

For example, making metro trains automated means savings of 10 to 15% in electricity consumption thanks to optimal speed management as well as savings on the wear and tear of replacement parts. The installation of platform doors supplied by Faiveley Transport, fundamental to making metros automated, contributes to these savings, but also addresses the problem of heating and air conditioning-related waste in stations.

That said, in addition to climate change, the rail industry, like every other industry, faces significant challenges, including the scarcity of resources, the increase in the cost of fossil fuels and raw materials and stricter regulations relating to emissions, noise and land use.

The entire industry is rallying its employees, its customers and its suppliers in a drive to recycle and dispose of products at the end of their useful life. As an example, for SNCF equipment, the objective is to recycle 85% of train components, to value 90% of them and to use the recycled materials in their manufacture. As a supplier to most rail vehicle manufacturers worldwide, Faiveley Transport is making its contribution.

A growing number of customers are requesting energy audits but are also making demands in terms of sustainable development (low mass, brake energy regeneration, reduced noise, high recyclability rate, use of hydro-soluble paints. Faiveley Transport products help to satisfy these requirements.

Train and rail operators have largely developed a comprehensive roadmap to achieve a zero carbon impact by 2050. European operators, such as the SNCF in particular, aim to reduce CO_2 emissions by 40% for passengers and by 33% for the transport of goods (in t/km) by 2020.

Sustainable development criteria are increasingly taken into account when selecting partners (and especially in the case of the leading manufacturers Alstom, Bombardier and Siemens).

All this is leading towards a change in social attitudes, which can only benefit the rail industry and in which Faiveley Transport Group is naturally and necessarily involved.

The Group is increasingly sensitive to the social aspects of sustainable development, for example those relating to access for the disabled or the elderly. Due to its high technological standards in these areas, Faiveley Transport can be involved in all new programmes.

Faiveley Transport seeks to limit the environmental impact of its own activities and has set itself five targets within this area:

- to reduce its energy consumption;
- to reduce its greenhouse gas emissions;
- to reduce its water usage;
- to effectively sort and recycle its waste;
- to increase the number of industrial sites with ISO 14001 certification.

Corporate and environmental performance rests on the commitment and skills of the workforce. The Group encourages their initiatives, raises awareness amongst them and oversees their training.

It is important to Faiveley Transport that its teams feel confident in order to create empathy with customer, supplier or anyone else they are dealing with. A human resources approach based on the promotion of diversity and a meaningful dialogue between teams and their superiors is in place in order to continually improve working conditions in line with the expectations of each employee. Equally, this requires building upon the Company's expertise and ensuring that all employees behave in an ethical manner. This also requires improvement in the quality of working life, reduction in heavy manual labour and an increase in wellbeing within the Company.

The focus of Faiveley Transport's activity is at the heart of environmental concerns aimed in particular at fighting global warming and the reduction of greenhouse gas emissions.

By turning eco-mobility into the central plank of sustainable development, most western countries are creating a real opportunity for growth and job creation in the rail industry.

Therefore, for Faiveley Transport, world leader in equipment for railway rolling stock, it represents an extraordinary development opportunity.

The aim of this report is therefore to reconcile Faiveley Transport's strategy with sustainable development objectives, and to detail what has already been implemented within the Group, but also to highlight tomorrow's methods that will enable it to better satisfy these new demands.

8. ENVIRONMENTAL INFORMATION

8.1 ENERGY SAVINGS, WATER MANAGEMENT AND BIODIVERSITY: KEY INDICATORS

8.1.1 DATA

For a number of years, the Group has been collecting data on the energy consumption of all its sites. This information enables the Group to be in keeping with greenhouse gas emission reduction objectives, established at an international level, in particular within the framework of the European Union's commitments.

GAS CONSUMPTION AT THE MAIN INDUSTRIAL SITES DURING THE FINANCIAL YEAR ENDED 31 MARCH 2013 (IN KWH)

Geographic region	2012/2013	2012/2013*	2011/2012
Asia-Pacific	132,340	132,340	145,492
Europe	17,627,394	17,627,394	19,838,395
Americas	6,194,577	10,800	8,200
TOTAL	**23,954,311**	**17,770,534**	**19,992,087**

* *Not including Graham-White Manufacturing Co.'s consumption.*

Gas consumption over the financial year fell 11% on a like for like basis.

For the Americas region, the increase in consumption is exclusively due to the integration of Graham-White Manufacturing Co., which was acquired in February 2012. Anti-leak systems for gas were installed on the industrial sites using primarily this energy source.

ELECTRICITY CONSUMPTION AT THE MAIN INDUSTRIAL SITES DURING THE FINANCIAL YEAR ENDED 31 MARCH 2013 (IN KWH)

Geographic region	2012/2013	2012/2013*	2011/2012
Asia-Pacific	4,658,649	4,658,649	6,509,749
Europe	20,380,031	20,380,031	21,357,858
Americas	16,351,640	6,812,000	6,111,820
TOTAL	**41,390,320**	**31,850,680**	**33,979,427**

* *Not including Graham-White Manufacturing Co.'s consumption.*

The general trend noted within the major production sites is a decrease in electricity consumption, despite a cold end to the winter in Europe. For the Americas region, the increase in consumption is a result of the change in reporting scope following the acquisition of Graham-White Manufacturing Co. A significant drop in consumption was reported in China. The sites are constantly improving their lighting and electric heating systems. This year, the emphasis was put on better management of the settings of air conditioning devices, with high and low temperatures capped to save on this source of energy. Faiveley Transport Tours has invested in LED light bulbs at a cost of €7.5 thousand.

WATER CONSUMPTION AT THE MAIN INDUSTRIAL SITES DURING THE FINANCIAL YEAR ENDED 31 MARCH 2013 (M³)

Geographic region	2012/2013	2012/2013*	2011/2012
Asia-Pacific	42,189	42,189	56,975
Europe	23,674	23,674	34,013
Americas	162,406	11,532	5,627
TOTAL	**228,269**	**77,395**	**96,615**

** Not including Graham-White Manufacturing Co.'s consumption.*

There has been an overall downward trend in water consumption on a like for like basis, due to the implementation of specific measures by certain sites, particularly in France and China. The increase in water consumption in the Americas region is due to the water consumption of Graham-White Manufacturing Co. being taken into account.

Leak detection devices and leak-proof safety systems have been widely implemented at the sites.

IMPACT OF THE ACTIVITY ON THE ENVIRONMENT

The Group's production activities, by their nature, generate little waste in the environment. Nevertheless, the optimisation of environmental protection is one of the priorities for the Group whether in France or in its foreign subsidiaries. To that end, the Group takes initiatives to integrate environmental concerns into the management of its operations and facilities, in order to:

- comply with the legal and regulatory requirements that apply to all sites;
- find solutions that limit the impact of operations on the environment, prevent pollution and ensure continuous improvement in economic competitiveness;
- reduce non-renewable energy consumption and improve the quality of waste gases as well as improving waste sorting;
- contribute to the business and social aspects of sustainable development.

It must be noted that the Group's activities have very little impact on biodiversity and the likely causes of an attack on it are easily managed (retention ponds, elevated tanks, correct storage of solvents and paint). The Group took full note of the Environment Public Liability Directive 2004/35/CE, adopted on 21 April 2004, on environmental responsibility in respect of the prevention and restoration of environmental damage. By this text, which was transferred into French law, a Group operation that damages fauna or flora is required to reverse the damage done or to bear the associated costs. Faced with this new regulation, the Group increased its attention to the protection of the environment and implemented the various options to cover this new area of liability with its insurers.

8.1.2 METHOD

To be fully effective, the procedures aimed at ensuring the correct application of environmental, health and safety regulatory provisions are decentralised and controlled by each of the main industrial sites. Environmental, health and safety costs are budgeted at site or unit level and recognised in the consolidated income statement.

The year 2012/2012 saw the continuing implementation of procedures and methods aimed at providing better management of legal provisions, objectives and rules in terms of environmental management.

The sites continued to take steps with a view to achieving ISO 14001 certification. This process is essential to meet customers' expectations and improve the public authorities and shareholders' trust in the Group. At 31 March 2013, 16 entities, including the Group's main industrial sites, have been awarded ISO 14001 certification in relation to their environmental management. The Group has around twenty large-scale industrial sites. Nowe, Faiveley Transport Birkenhead and Faiveley Transport Tamworth were all awarded certification during the financial year.

In addition, in July 2011 the Group relocated its head office to a building in Gennevilliers, which has already been certified for HQE (High Environmental Quality). Faiveley Transport has a representative on the Green Committee that manages environmental aspects within the building.

The Group seeks to bring all French and foreign sites together in a regular and genuine gathering of environmental information. This collective commitment led to the setting up of a general supervision programme at the sites.

Each of the Group's main industrial sites has established a set of objectives to reduce energy, water and raw material consumption, curb local impacts (noise pollution, etc.) and promote waste recycling. The Company's process is decentralised: each unit is responsible for its environmental self-assessment, for defining an action plan and associated objectives and for reporting its own environmental data.

Every site concerned has implemented regulatory monitoring, carried out an environmental analysis of its activities and identified actions to ensure compliance with standard and environmental regulations, such as the management of waste and chemicals.

As part of this monitoring, possible irregularities and potential sources of nuisance or unnecessary energy consumption are specifically targeted for observation: an example of this is the battle against noise and the particular measures taken to remedy this issue in all the Group's industrial sites.

This year Faiveley Transport Tours carried out its first carbon footprint assessment in accordance with current French legislation. This assessment is mandatory in France for all corporate bodies under private law employing more than 500 people. It must be published and updated every three years.

In 2011, the base year selected, this Group subsidiary, which specialises in on-board door equipment and mechanisms, passenger information, and energy sensors and convertors (€140 million sales for around 650 employees on three sites) generated 2,443 tonnes of CO_2 equivalent in greenhouse gas emissions. The main emission items are the high consumption of natural gas, which is dependent on outdoor temperature and air humidity conditions, electricity consumption and mobile consumption (vehicles). Refrigerant leaks also constitute a considerable source of greenhouse gases. Action has been taken on the air conditioning systems to limit refrigerant leaks.

This assessment is available in full on the Group's website.

As regards recycling, some of the Group's companies, particularly in Europe and the United States, make use of relevant indicators to monitor the recycling of the main raw materials used in their industrial operations.

Raw materials	Aluminium	Steel	Ferrous metals
Volume recycled *(in tonnes)* in 2012/2013	270	738	1,454

The Company does not disclose specific data regarding the consumption of raw materials within the Group. In fact, the Group's industrial operations are mainly based on the purchase of components, equipment and finely honed parts, and not on the purchase of unprocessed raw materials. In this context, data relating to the Group's consumption of raw materials would be neither relevant nor appropriate to Faiveley Transport's industrial operations.

8.2 PRACTICAL MEASURES IMPLEMENTED TO LIMIT ENVIRONMENTAL DAMAGE

Through its products and its engineering teams, Faiveley Transport is utterly committed to this sustainable development strategy and is making it a priority. The potential for making the rail sector more environmentally friendly by reducing energy consumption is still considerable and is the subject of significant research within the Group, which is distinguishing itself by its innovations in the field.

The Company's sustainable development strategy is based on the following principles:

- to contribute, through its technical excellence, to bringing to market products that make the train even more attractive to passengers;
- to analyse the environmental effects of the life cycle of the products manufactured;
- to use recyclable materials and identify the components requiring special end of life handling;
- to eliminate materials that are hazardous to health or the environment;
- to improve energy efficiency and reduce emissions into the atmosphere, consumption of resources and waste;
- to ensure suppliers apply the Group's economic, social and environmental principles.

Numerous measures have already been implemented within the Group across all its main industrial sites. Here is a summary that also gives an idea of the areas in development:

Environment

- Receipt of or application for ISO 14001 certification within the Group;
- On-going regulatory compliance project (particularly relating to REACH with the creation of a database). Adoption of a Group strategy;
- Appointment of a QHSE (Quality, Health, Safety and Environment) engineer or coordinator at the industrial sites, responsible for verifying compliance with environmental regulations;
- Replacement of certain substances (for example, replacement of solvent-based paints with hydro-soluble paints);
- Preparation for the entry into force of RoHS standards for industrial products;
- Integration of environmental criteria into the management system.

Energy efficiency

- Action plan to reduce water, energy and paper consumption;
- European action plan to reduce waste generation and ensure its processing;
- Better management of resources, including human. Strategy included in the Faiveley Management System;
- Report on the energy efficiency of the European sites, carbon assessment;
- Project on insulation and reducing noise pollution;
- Working groups on water conservation;
- Campaign to identify and stop gas and air leaks from compressors which result in machine over-consumption.

Waste, packaging, transport

- Use of reusable packaging, for transportation between the Company and suppliers or customers; reduction in the amount of packaging used;
- Reduction in the volume of waste, specifically in relation to the wooden delivery crates;
- Project to optimise transport with deliveries for a single customer grouped together on a set day;
- Project on packaging and ability to recycle;
- Logistical resources close to production sites;
- Local sourcing of spare parts for the Services activity.

Eco-design

- Development of rules for the use of materials in product design and development;
- Door panels painted without solvent-based paint;
- Retrofitting of former air conditioning systems using less harmful and more energy efficient products;
- Design and marketing of nickel free brakes;
- Design of leak detection systems on air conditioning systems;
- Air quality sensor technologies on air conditioning systems;
- Modular and lightweight design of braking systems;
- Development and commercialisation of electronic systems for measuring the power consumption of locomotives, in order to assist eco-driving;
- Installation of platform doors that completely isolate the platform, so reducing the cost of air conditioning stations;
- Project on door design to make them more lightweight, work in general to streamline products and improve the energy efficiency of the end-product;
- Project aimed at discontinuing the use of chrome 6, lead, cadmium and mercury;
- Introduction of eco-design training for engineers.

In addition to the exercise of the above controls, various new measures were introduced during the last year:

- installation of heat exchangers and heat recovery systems;
- insulation of facilities;
- waste containers;
- reduction of packaging waste (wood, plastic, cardboard) and all associated processing costs;
- water recovery systems;
- paper recycling;
- particle filters to reduce air emissions;
- smoke extraction systems;
- retention basins and waste water disposal systems;
- centralised suction system with filters for sanding and painting booths;
- compliance of fire-fighting water retention ponds with standards;
- outsourcing of alodine bath treatment (to avoid cyanide releases);
- safety device to protect against natural occurrences.

A significant reduction in environmental impact was also noted following the investment in cleaning machines that resulted in reduced water and solvent consumption and waste, at the sites dedicated to the Services activity and also due to substantial investment at the Saint-Pierre-des-Corps site to double the production capacity in water-soluble paint and to comply with regulations on the discharge of Volatile Organic Compounds (VOCs). The new processes and systems can thus avoid any discharge of polluting compounds into the atmosphere.

Faiveley Transport Amiens has invested in an automated greasing system for its devices and machines. The advantages of this system are an almost 15% reduction of soiled packaging waste and the prevention of musculoskeletal (MSDs) disorders for operators, who no longer have to apply grease with a brush.

The Faiveley Transport Tours sites, situated between the Loire and the Cher rivers, will also be subjected to a vulnerability assessment to define measures to reduce exposure to flooding. The aim is to identify strategic areas of the Company, to establish a potential disaster scenario, to define the weaknesses and rank them in order of significance. The aim is to implement an emergency procedure which will protect the Company's vital interests and at the same time help prevent potential harm to the environment, such as pollution from solvents, oils, paint, acid, etc. This entity has also completely updated its solvent management plan methodology to ensure it conforms to regulations on fugitive emissions.

It should be noted that the Group's German sites launched a tree planting campaign close to their plants. More than 40 trees were planted in this regard on the Nowe site in 2012.

Lastly, the Group is committed to raising awareness among its suppliers by assessing their environment credentials.

8.3 THE LATEST TECHNICAL INNOVATIONS THAT PROTECT THE ENVIRONMENT

The concept of sustainable development involves a long-term vision, rather than simply taking into account short term goals. This approach must also enable economic benefits to be made. The first objective is to finalise compliance with applicable standards, and in particular the REACH regulation. It is also essential to anticipate future developments by analysing current trends. The R&D Departments are particularly proactive in order to satisfy the demands of tomorrow. It is in this way that Faiveley Transport will maintain its competitive advantage as an industrial group at the cutting edge of technology.

Faiveley Transport Group is therefore committed to the design and development of products that contribute to sustainable development. Here are some concrete examples:

- At the core of its electro-mechanical systems development activity, the Group has created an energy meter christened "DEMETRA", an innovative system that has been patented. It provides an integrated and optimised solution to the demands of opening the market to competition. It will be possible to issue an individual electricity invoice for each train. This system will also enable the development of an aid for economic driving, which will optimise energy usage.
- Amongst converter products, the development of KATIUM is an illustration of the Group's policy to promote sustainable development. This patented design allows the manufacture of auxiliary converters of significantly reduced weight and volume. Thanks to these gains, substantial energy savings may be made.
- The Group's air conditioning system ("HVAC") product line is also committed to respecting the environment, particularly through its "Green HVAC" programme, which aims to limit the energy consumption of its products and, as a result, actively fight global warming. An analysis of the life cycle of trains has shown that, from production through to the recycling of end of life materials, the train's air conditioning alone was currently responsible for 30% of the potential global warming caused by the train; it is the actual equipment itself which represents the largest energy consumption within the train, excluding traction equipment, and as a result, the biggest energy saving potential.

  A full range of Green HVAC equipment is offered to Faiveley Transport customers: primarily a hot air pump which offers a 44% reduction in energy consumption over one year, an optimisation system to recover external air adjustable according to the number of passengers on the train (trains equipped with a passenger counter), a system to monitor refrigeration, and an alternative refrigeration mode such as CO_2.

  In 2012/2013, the success of the "Green HVAC" project was confirmed and sales of more environmentally friendly products continue to grow, together with the following projects, which are amongst the most important to the Group: Porteur Polyvalent and Métro Montréal for Alstom Transport, DOSTO FV for Bombardier, and ICX and VELARO D for Siemens.

  In conclusion, the importance of Green HVAC equipment is clear and understood by the Group's customers. With this innovative project, Faiveley Transport has shown that is it looking to the future and is promoting a sustainable development approach.
- Over the last four years, Faiveley Transport Amiens has been committed to a research project entitled "Light Brake C3" (Compact Caliper Concept). This project was developed within the framework of the I-Trans global competitive cluster bringing together leaders in the fields of industry, research and training in the rail sector and ground transport systems based in the Nord-Pas de Calais and Picardie regions.

  The "Light Brake C3" project enabled the development of a rail braking system enabling the streamlining of rolling stock. Thus a more flexible and more environmentally friendly system has been introduced meaning the rolling stock can handle a higher load capacity and travel at higher speeds.

  As well as an improvement in energy consumption, the streamlining of the braking system that was at the heart of the "Light Brake C3" project also facilitates maintenance and recycling when the parts reach the end of their useful life.
- The equipment proposed by Faiveley Transport Gennevilliers as part of its sintered brake activity (brake shoes and pads) use completely recyclable raw materials and components. In addition, the techniques employed allow the axle weight to be reduced, and in consequence, energy consumption and maintenance costs too.
- The BURAN type compressors constitute a new generation of oil free compressors that have now been now approved and adapted to the various market sectors. This technology has become the standard reference point in all Faiveley Transport's offers both for new rolling stock and for the retrofitting of old equipment, in both Europe and North America. This new generation has a substantial impact in terms of recycling, handling and maintenance and therefore helps to protect the environment.

8.4 CORPORATE AND SOCIAL IMPROVEMENTS

This year the Group has focused on numerous social and corporate initiatives. Here are the principal initiatives:

Management of human resources, safety and working conditions

- Providing information to employees on site *via* emails and leaflets, raising awareness on waste sorting and paper consumption, with a monthly reminder;
- Monthly briefing led by the Site Director on the monitoring of environmental indicators and safety;
- Consideration given to employee suggestions *via* operational or quality improvement programmes (QRQC, TOP5);
- Implementation of an initiative to integrate safety into the quality and environment management system: leader-coordinator presence on most industrial sites to manage health, safety and environmental issues on a daily basis;
- Investment in appropriate gripping tools;
- Ethics and IT charters.

Supplier commitment

- Service providers and suppliers to be equally committed to optimising transport and packaging;
- Working with the Design Offices to integrate these criteria into the plans;
- Addition of an "ISO 14000 certification and social responsibility" criterion in the "Quality and Quality System Certification" used in the selection of suppliers;
- Adherence to the principles of sustainable development proposed by manufacturers.

Sponsorship and Partnership

- University collaboration on eco-design: writing in Sweden of a thesis on the search for an ecologically viable design and development process; and the development of pneumatic and dynamic algorithms-based software to calculate the longitudinal forces between rail vehicles, with the Tor Vergata University of Rome.

The Group's ethics charter was rolled out individually across all the sites. This document helps promote ethical conduct in day-to-day working relationships particularly with regard to the management of employment practices, in respect of any form of harassment and of safety. The charter also sets out clear and detailed guidance on managing any potential conflicts of interest and illegal or inappropriate payments.

Suggestions from Faiveley Transport employees contribute to the future wellbeing of passengers. The commitment, expertise and enthusiasm of employees are the keys to success. To maintain a dynamic and creative workforce, it is paramount that employees remain individuals highly qualified in their field, that they are committed to the Company, in addition to providing them with safe and healthy working conditions. To maintain its competitive advantage, the Group must attract, develop and retain the best talents, in Asia, in Europe and in the Americas.

The Group has continued in its efforts to improve its health and safety performance at all the sites. Each site has expanded the use of key indicators to improve safety awareness and reinforce the safety culture.

A pragmatic approach to product design in respect of safety, aimed at identifying, managing, reducing and eliminating work related health risks right from the initial stages of product development, was implemented across the Group's main sites.

All the Group's sites duly share and respect the principles and provisions of core International Labour Organisation conventions, and in particular:

- freedom of association and the right of collective bargaining;
- elimination of discrimination in respect of employment and occupation;
- banning of forced or compulsory labour;
- banning of child labour.

9. WORKFORCE INFORMATION

9.1 HUMAN RESOURCES INDICATORS

9.1.1 ANALYSIS AND CHANGE IN WORKFORCE

At the end of March 2013, the Faiveley Transport Group had 5,483 employees across 25 countries worldwide. The change in the workforce at the end of the last two years was as follows:

GEOGRAPHIC ANALYSIS

	31 March 2013	31 March 2012
France	1,262	1,260
Europe (excl. France)	2,032	1,937
Americas	745	784
Asia/Pacific	1,444	1,488
TOTAL	**5,483**	**5,469**

ANALYSIS OF WORKFORCE BY TYPE OF EMPLOYMENT CONTRACT

	31 March 2013		31 March 2012	
	Permanent	Fixed term	Permanent	Fixed term
France	1,235	27	1,217	43
Europe (excl. France)	1,825	207	1,808	129
Americas	745	-	749	35
Asia-Pacific	1,368	76	1,385	103
TOTAL	**5,173**	**310**	**5,159**	**310**

FEMALE EMPLOYEES AT 31 MARCH 2013

	France	Europe (excl. France)	Americas	Asia-Pacific	Total
Female executives	1	-	-	-	1
Female managers	78	23	8	26	135
Female employees	117	268	65	164	614
Female operatives	54	59	66	28	207
TOTAL	**250**	**350**	**139**	**218**	**957**
as % of total workforce	*20%*	*18%*	*19%*	*15%*	*18%*

The distribution of women across the workforce is uniform within the Faiveley Transport Group. The percentage of women in the Group has remained stable compared to the previous financial year.

ANALYSIS OF WORKFORCE BY ROLE

Role	31 March 2013	31 March 2012
Production	2,113	2,532
Purchasing, logistics and storage	971	798
Sales and marketing	359	470
Design office	767	749
Project management	180	275
Finance	212	193
Human resources and communications	79	77
IT	78	68
Administration	77	185
Research and development	113	123
After-sales/Field services	488	-
General services	46	-
TOTAL	**5,483**	**5,469**

Each job description was redefined over the course of the financial year and was forwarded to the all the Site HR managers. This is why there are significant differences compared to the previous financial year. In particular, several positions related to general services and after-sales service activities were created.

ANALYSIS OF WORKFORCE BY AGE AT 31 MARCH 2013

Age	France	Europe (excl. France)	Americas	Asia-Pacific	Total	%
<24	37	66	34	112	249	5%
25-30	160	251	71	463	945	17%
31-35	155	294	82	330	861	16%
36-40	187	310	91	205	793	14%
41-45	244	294	99	124	761	14%
46-50	199	280	105	98	682	12%
51-55	154	247	101	65	567	10%
56-60	112	186	99	38	435	8%
>60	14	104	63	9	190	4%
TOTAL	**1,262**	**2,032**	**745**	**1,444**	**5,483**	**100%**

In order to provide a better picture of the workforce distribution by age, the number of age ranges has been increased and it can therefore be seen that the breakdown in workforce by age is uniform. 61% of Faiveley Transport Group's workforce is aged between 25 and 45 years.

ANALYSIS OF WORKFORCE BY LENGTH OF SERVICE AT 31 MARCH 2013

	France	Europe (excl. France)	Americas	Asia-Pacific	Total	%
< 2 years	178	401	194	353	1,126	20%
2-5 years	186	424	152	605	1,367	25%
5-10 years	220	360	174	290	1,044	19%
10-15 years	132	299	62	40	533	10%
15-20 years	164	126	59	97	446	8%
20-25 years	181	111	43	13	348	6%
25-30 years	90	97	22	44	253	5%
>30 years	111	214	39	2	366	7%
TOTAL	**1,262**	**2,032**	**745**	**1,444**	**5,483**	**100%**

In order to provide a better picture of the workforce distribution by length of service, the number of ranges denoting length of service has been increased. 45% of the workforce has worked for the Group for less than five years, and more than 26% has worked for the Group for more than 15 years.

ABSENTEEISM RATE AT 31 MARCH 2013

Regions	31 March 2013	31 March 2012
France	2.0%	2.2%
Europe (excl. France)	3.1%	3.1%
Americas	0.9%	0.7%
Asia-Pacific	1.1%	1.1%
TOTAL	**1.9%**	**1.8%**

In most countries, absenteeism at the sites is below the national average for comparable industries. Overall, the Group's rate is 1.9% (number of hours of absence/theoretical number of working hours).

TURNOVER RATE AT 31 MARCH 2013

Region	Turnover
France	9%
Europe (excl. France)	15%
Americas	13%
Asia-Pacific	15%
GROUP TOTAL	**13%**

Calculation of the turnover rate has been redefined as being the average of the number of employees that left and the number of employees recruited divided by the number of employees present at the beginning of financial year.

The Group's turnover rate during the 2012/2013 financial year is 13%.

NUMBER OF NEW HIRES PER GEOGRAPHIC REGION AND CATEGORY OF STAFF DURING THE YEAR

Region	Managers	Employees	Operatives	Total
France	62	38	45	145
Europe (excl. France)	14	136	135	285
Americas	4	28	66	98
Asia-Pacific	31	148	40	219
TOTAL	**111**	**350**	**286**	**747**

NUMBER OF DEPARTURES BY GEOGRAPHIC REGION AND REASON FOR DEPARTURE DURING THE YEAR

Region	Resignation	Redundancy	Retirement	Total
France	34	24	27	85
Europe (excl. France)	71	173	38	282
Americas	77	20	12	109
Asia-Pacific	169	8	53	230
TOTAL	**351**	**225**	**130**	**706**

9.1.2 DEVELOPMENT OF EMPLOYEE EXPERTISE

This process is based on the dynamics of mobility and exchange of experiences. The more skills are transferred and good practices exchanged among the various entities in the world, the greater the level of the Group's expertise.

Bolstered by this conviction, Faiveley Transport encourages the development of technical and project teams, working as closely as possible with their customers. Technical knowledge acquired by the Faiveley Transport staff, based at the four corners of the world, enables them to support their customers better and respond to their needs.

It is with this in mind that several resident engineer positions have been created, based close to the facilities of the Group's main customers.

The Group seeks to retain its human capital, that of its engineers as well as all employees, to provide a better response to the overriding requirements of reliability, safety and extended life of its equipment.

It is for this reason that the Group encourages internal mobility, both on a professional and geographic basis. This can provide a solution to the need to adapt employment levels as well as to integrate the aspirations of the employees.

Internal mobility also provides employees with career opportunities that encourage their professional development by the acquisition of new skills and qualifications.

In order to promote this internal mobility, a section has been created on the Group's intranet portal where everyone can preview the positions open at all sites around the world. It is only thereafter that job offers are advertised externally.

Similarly, since 2009, in conjunction with all local Human Resources executives, the Group has been committed to improving the tools and practices implemented and ensuring that a common Group standard is used.

For instance, a common policy was implemented for holding annual performance review interviews; a common performance review form for all entities was prepared in consultation with local Human Resources officers.

At the same time, training was provided on how to conduct these interviews in order to support managers in this process.

This thought process continued *via* the creation of a Group-wide induction booklet. This document is intended to provide every new hire with a comprehensive overview of the Faiveley Transport Group, as well as all practical local information necessary to their integration. This is also a means of strengthening the sense of belonging to Faiveley Transport.

In 2012, a Group ethics charter was introduced and distributed to all the subsidiaries. The purpose of this charter is to detail the ethical commitments and responsibilities in respect of the Company's business and activities. It details the values to which all Faiveley Group executives and employees must adhere and which they are committed to uphold.

The general tenets of the ethics charter are as follows:

- respecting laws and regulations: apart from the laws specific to each country, this obligation also includes respecting domestic and international competition rules;
- environmental compatibility: The Group is committed to assuring the quality and features of its manufacturing techniques and processes;
- models and rules of conduct: the behaviour and relationships of all persons working for the Group must be guided by transparency, impartiality and mutual respect.

During the financial year, a new Human Resources Information System (HRIS) module relating to annual performance reviews was approved. It is currently in the project phase, with a pilot scheme rollout planned from April 2013. This module will make it possible to automate annual interview programmes throughout the Group and in the longer term to automate skills forecast management (GPEC).

In this constantly changing economic environment for Group companies, maintaining and developing employees' expertise is an essential feature of the continuing improvement in the Group's overall performance.

Professional training constitutes in this respect a major area of the Human Resources policy. The HRIS tool will automatically collect information relating to the training needs expressed during reviews.

During the year, the training programmes concerned all positions. In addition to increasing awareness of safety measures and quality standards, the largest part of the training budget continued to be dedicated to updating technical skills.

There is also a strong need for Group employees to improve their proficiency in English.

The training policy is entirely adapted to the local level in line with the issues encountered at each site. The Group aims to ensure the uniformity of training across the sites.

The objectives of the training indicators are to monitor the training budget of each entity, the percentage of trained employees and managers and the nature of training organised.

PERCENTAGE OF GROSS PAYROLL DEDICATED TO TRAINING*

Region	2012/2013	2011/2012
France	0.86%	2.16%
Europe (excl. France)	0.96%	1.48%
Americas	1.37%	1.51%
Asia-Pacific	1.31%	1.35%
GROUP TOTAL	**0.94%**	**1.63%**

** Only teaching costs are included.*

NUMBER OF TRAINING HOURS BY CATEGORY OF PERSONNEL, PER YEAR

	Executives	Employees	Operatives	Total
France	192	95	153	440
Europe (excl. France)	105	724	529	1,358
Americas	12	79	319	410
Asia/Pacific	138	494	298	930
TOTAL	**447**	**1,392**	**1,299**	**3,138**

57% of Faiveley Transport Group employees received training during the 2012/2013 financial year.

9.1.3 ORGANISATION OF THE WORKING WEEK

In France, the reduction and structure of the working week effective within Group companies are subject to the applicable laws and collective agreements. The steps taken to reduce working hours means overtime levels are low.

In the rest of the world, the structure of the working week and the management of overtime are governed by the law in each country.

9.1.4 REMUNERATION POLICY

Efforts undertaken to control payroll costs were continued, while retaining the principle of individualised remuneration, based on results and performance.

Generally speaking, the financial resources available for wage and salary increases within the Group are negotiated annually with personnel representatives for all staff.

The remuneration policy for staff is as follows:

- individual increase depending on the results and performance of each employee;
- a variable annual bonus, which is given to executives and managers depending on Group and individual objectives, in all Group companies.

Management's objective is to maintain an increase in salaries throughout Group companies.

Recognition of employee benefits

Employee benefits, mainly comprising pension commitments, are recorded in the consolidated financial statements in accordance with IFRS. These amounted to €30.6 million at 31 March 2013, compared to €32.8 million at 31 March 2012.

Profit-sharing schemes

Faiveley Transport has set up a Group savings scheme, which is common to all French sites.

Since June 2011, all French subsidiaries adhere to a new employee savings plan, which includes a Group savings plan (PEG) and a Group joint retirement savings schemes (PERCO). A Group Committee meets once a year in France to monitor employee savings plans.

Profit-sharing agreements

All French subsidiaries have implemented profit-sharing and bonus agreements.

Welfare benefit plans

In France, the Group has established standardised guarantees for all the personnel of the Group's companies, regardless of the category of staff they belong to.

Employee shareholding policy

Faiveley Transport has set up a long-term motivation plan for employees. The objective is to enable certain employees to become shareholders in the Company and drive performance improvement. Faiveley Transport's employee shareholding policy is implemented through various plans which are detailed below.

SHARE OPTION PLAN AUTHORISED BY THE GENERAL MEETING OF 27 SEPTEMBER 2005

Faiveley Transport has implemented a share option plan approved by the General Meeting of 27 September 2005. The Company's Management Board allocated shares under this plan in ten instances between 2005 and 2008 for the benefit of 62 beneficiaries.

Options can be exercised from the second anniversary of their date of allocation by the Management Board, subject to the beneficiary being employed by the Faiveley Transport Group on the day they are exercised and their acceptance of the option regulations. It should be noted that 259,044 options have been exercised to date. At 31 March 2013, 56,996 shares awarded to 10 beneficiaries remained to be exercised.

SHARE SUBSCRIPTION PLAN AUTHORISED BY THE GENERAL MEETING OF 22 SEPTEMBER 2009

A share subscription plan was approved by the Annual General Meeting of 22 September 2009. The Management Board allocated 144,000 options giving the right to subscribe for new shares in the Company to be issued through a share capital increase, at a price of €54.91 for each new share. At 31 March 2013, 123,000 shares remained to be exercised.

PLAN FOR THE ALLOCATION OF FREE PERFORMANCE-BASED SHARES AUTHORISED BY THE GENERAL MEETING OF 13 SEPTEMBER 2010

The Combined General Meeting of 13 September 2010 authorised the Management Board to proceed with the allocation of free ordinary shares of the Company. The Management Board allocated 69,700 free shares to 43 beneficiaries. After a period of two years, the beneficiaries were allocated 27,650 free shares, in line with the partial achievement of performance criteria established by the Remuneration Committee. Beneficiaries are required to comply with a mandatory retention period of two years from the date of final vesting.

FREE SHARE ALLOCATION PLAN AUTHORISED BY THE COMBINED GENERAL MEETINGS OF 14 SEPTEMBER 2011 AND 14 SEPTEMBER 2012

The Combined General Meeting of 14 September 2011 and 14 September 2012 authorised the Management Board to allocate free ordinary shares of the Company within the limit of 1% of the share capital.

The Management Board decided to implement an employee shareholding plan aimed at a broader population of executives, including a free share allocation plan (Executive Shareholding Programme). The plan, designed to increase the loyalty and motivation of key Group executives, brings the personal interest of employees in line with Group performance and requires a personal effort from each beneficiary that is commensurate to their rank within the organisation.

Therefore, each beneficiary has the option to invest in Company shares to be granted two free shares for each share already held under the Executive Shareholding Programme. Final vesting of the shares will take place at the end of a period of two or four years following the allocation date, with a stipulation that the beneficiaries must retain these shares for a further period of two years after the vesting date.

At its meeting held on 5 March 2012, the Management Board allocated 79,224 shares to 151 beneficiaries. At its meeting held on 15 January 2013, the Management Board allocated 72,386 shares to 179 beneficiaries.

FREE PERFORMANCE-BASED SHARE ALLOCATION PLAN AUTHORISED BY THE COMBINED GENERAL MEETING OF 14 SEPTEMBER 2012

At its meeting held on 24 October 2012, the Management Board used the authorisation granted by the Combined General Meeting of 14 September 2012 and granted 10,000 free shares subject to performance conditions to one beneficiary.

The main features of share option purchase plans, share subscription and free share allocation plans are detailed in the consolidated financial statements (Note E.11 – Equity).

9.2 WORK-RELATED ACCIDENTS, HEALTH AND SAFETY CONDITIONS AND ARDUOUS NATURE OF WORK

The prevention of health and safety risks is a priority for the Faiveley Transport Group.

The various risks encountered in its business and the steps taken to deal with them are described in Chapter "1.1.5.4. Industrial and environmental risks – § Health and safety risks" of the Management Report.

The Health and Safety Committees established in France meet quarterly. During these meetings, critical situations are discussed and priorities defined. The cost of any required action is also reviewed and the results of such steps are analysed.

Not only does the Group hold these meetings in accordance with applicable local legislation, it also ensures that staff have an updated brochure containing information on health and safety measures within the Company and on acceptable staff behaviour. Fire drills are conducted on a regular basis.

In addition to the steps implemented by the Health and Safety Committees, progress groups are continuing to work within the various companies of the Group, focusing on risk prevention and implementing the safety training policy.

All subsidiaries in France have carried out an analysis to determine the percentage of employees exposed to arduous working conditions, in order to put into place the necessary actions to reduce exposure to this risk.

Faiveley Transport considers that the improvement of working conditions contributes to the Group's sustainability and development. The prevention of occupational risks is based on both ethical and legal obligations. It is strategic to ensure the attractiveness of metalwork as an occupation and the necessary extension of the working life of employees.

The occurrence of work-related accidents is monitored, analysed and communicated on a monthly basis, through a number of indicators. Encouraging results in terms of employee safety were recorded as a result of total commitment by the Group's senior management.

	France	Europe (excl. France)	Americas	Asia-Pacific	Total 2012/2013	Total 2011/2012
Number of accidents with work stoppage	20	36	2	11	69	62
Number of accidents with stoppage >10 days	11	14	1	6	32	-
Number of days of stoppage due to work accidents	970	848	8	461	2,287	1,706
Number of accidents with no stoppage	9	84	13	19	125	148

9.3 ANTI-DISCRIMINATORY POLICY

9.3.1 GENDER EQUALITY AT WORK

Faiveley Transport is committed to promoting a level playing field of equality between men and women in their career development access to training, salaries and in their position within the business.

All subsidiaries in France have implemented an action plan aimed at ensuring gender equality in the workplace, either through collective agreements or as a result of a unilateral decision.

9.3.2 EMPLOYMENT AND INTEGRATION OF DISABLED WORKERS

All Group companies, whose local laws provide for the employment of a certain percentage of disabled employees, make it one of their priorities.

Some of these subsidiaries employ a higher number of disabled workers than required by law.

The Human Resources Department recognises that this is a very important issue and has decided since 2010 to ask its staff to think about how to best approach this topic within the Company.

			Legal obligation to employ disabled workers			
Sites	Annual legal obligation = BU* equivalent	Obligation met	Disabled people employed	BU* equivalent	Use of sheltered workshops	BU* equivalent
Faiveley Transport	4	0.83	No	-	Yes	0.83
Faiveley Transport NSF	7	2.12	Yes	2	Yes	0.12
Faiveley Transport Amiens	20	23.16	Yes	12.58	Yes	10
Faiveley Transport Tours	44	29.82	Yes	18.62	Yes	11.2
Faiveley Transport Gennevilliers	5	7	Yes	7	No	-

* *Beneficiary Units.*

9.3.3 AGREEMENT REGARDING OLDER WORKERS.

All the Group's subsidiaries in France have signed agreements in favour of employing older workers. These agreements will require adapting in 2013 to comply with the new "generational contract" measure.

9.4 LABOUR RELATIONS

9.4.1 COLLECTIVE AGREEMENTS

The French companies of the Faiveley Transport Group are all subject to the national collective agreement in the metal industry.

9.4.2 PERSONNEL REPRESENTATIVES

Most subsidiaries of the Group have personnel representatives.

The Group has a European Works Council that meets twice a year, as well as a Group Committee in France that meets once a year.

The Group convenes the meetings at a different site each time. The objective is to enable the representatives of these Committees to make the most of these events and visit other industrial sites and thus discover other practices and cultures.

9.4.3 INTERNAL COMMUNICATION – OBJECTIVE: STRENGTHENING A COMMON CULTURE

Respect for cultures and standardisation of processes

Given the growing internationalisation of the Group, the position adopted was to respect the diversity of each country and to allow local customers the possibility of retaining a local contact.

Every site therefore retained its identity, while respecting common values, which are: quest for performance and results, stimulation of creativity and sharing of experiences.

The exchange of best practices between sites and the standardisation of processes is fundamental to a pragmatic approach that enables all employees to have a clear understanding of their action plan and expected results.

To achieve this, Faiveley Transport also uses the development of the industrial excellence system based on the "Lean manufacturing" method. This method consists of seeking industrial performance, by permanent and continuous improvement and the elimination of waste. It is based on two principal concepts: just-in-time and autonomation. The just-in-time tools are the production with continuous and driven flows, the rapid change of tools and the integration of logistics. The autonomation tools include tools to automatically stop production, the methods of elimination of causes of errors and the analysis of problems.

The QRQC and TOP5 programmes encourage staff members to exchange ideas and develop action plans for improvement. The objective of this type of initiative is to offer solutions to the operational problems identified.

The QRQC method (Quick Response Quality Control) enables rapid solutions to be put in place for quality issues. The involvement of the personnel in the resolution of quality issues facilitates relations between Departments and accelerates the resolution of issues.

In the principal sites, the working day now starts with a 15-minute meeting on site. This is an opportunity to discuss problems encountered at their workstation and to propose ideas for improvement that may be rewarded on certain sites. This daily meeting enables them also to have a complete view of their results as well as the objectives to be achieved during the day.

Resources allocated

Faiveley Transport continues to roll out its various internal communication tools to improve dialogue, promote communication amongst employees and to distribute Group information.

Within the Group, information circulates both from the bottom-up and the top-down within the organisation, *via* various communication tools, including:

- an intranet portal accessible to all Group subsidiaries;
- an internal Group newsletter (printed in four languages, including Chinese);
- an intranet network for each entity;
- a monthly information letter within certain companies;
- organisation of exchange meetings at operating company-level;
- organisation of annual business seminars (HR seminar, Finance seminar, Engineering seminar, etc.);
- organisation of annual meetings between the various Group managers;
- regular one-to-one meetings organised between employees and their immediate supervisor.

10. CORPORATE RESPONSIBILITY

10.1 LOCAL, ECONOMIC AND SOCIAL IMPACT

Most of Faiveley Transport's production sites have been established for many years in the same region and are well accepted by the local population. The Group aims to recruit its teams locally and is often recognised as a major employer in the areas in which it operates.

The Faiveley Transport Group companies are also involved with local industrial and economic development where they are members of professional associations and take part in research studies with local schools and universities and sometimes partnerships with local training organisations.

The Faiveley Transport Group is also actively involved with local communities throughout the world, supporting several initiatives. The Group supports a Senegalese association which has already built a library and is currently building a school. The Group has also supported a Cambodian project for the past 10 years, which has resulted in the opening of a school especially for deaf-mute and blind children and students. The Group supports its daily activities. Another initiative in India finances the studies of students suffering from great poverty. When they complete their Engineering studies, these young people can take up a position with one of the Group's local factories.

Faiveley Transport has also taken part in initiatives to support minority groups, such as those with disabilities or the sick, in several countries. Through its career management policy, Faiveley Transport promotes dialogue between communities and respecting diversity is of great importance to the Group.

10.2 INTEGRATION OF ENVIRONMENTAL ISSUES INTO SUPPLIER RELATIONS

The Faiveley Transport Group aims to establish long-term relationships with its suppliers. For the Group, it is not a matter of seeking suppliers but rather partners in order to establish a relationship which brings about mutual, long-term benefits.

It is the Group's responsibility to see that all rules and best practices concerning the protection of people and the environment are implemented. Key factors in the choice of suppliers are respect for socially responsible work standards to exclude all forms of discrimination and prohibit the recruitment of minors, as well as to prevent any favouritism.

The following policies have been implemented in the past two years:

- The "10 Commitments" Charter for better relationships between Faiveley Transport and its suppliers:

  On 28 June 2010, Faiveley Transport signed the French Charter proposed by the French government to improve relationships between large and small to medium-sized companies.

  The companies which signed the Charter confirmed that they are committed to implementing best practices and fulfilling their responsibilities in an environment of mutual trust with suppliers, based on full knowledge and respect for the rights and obligations of each party.

  The "10 Commitments" Charter for responsible purchasing addresses the following:

1. Ensuring financial equity in relation to suppliers.
2. Promoting collaboration between major customers and strategic suppliers.
3. Reducing the risk of mutual dependence between customers and suppliers.
4. Involving major customers in the management of their industry.
5. Assessing the full cost of the purchase.
6. Incorporating environmental issues.
7. Ensuring local responsibility for its company.
8. Purchasing: one function and one process.
9. A Purchasing function responsible for overall management of supplier relationships.
10. Set a consistent buyers' remuneration policy.

- Commitment and training of purchasing teams:

  Likewise, all members of the Faiveley Transport purchasing team have signed the "Purchasing Charter" which defines and reminds the team of the basic values and the behaviour which all Group employees must adopt.

- Contractual agreements with suppliers:

  The new "Faiveley Transport – supplier agreement" comprises clear rules which provide for immediate termination of the supplier relationship where ethical and moral regulations are not complied with.

- Assessment of suppliers:

  Audits of Faiveley Transport suppliers contain a full chapter on environmental best practices, as well as on health and safety at work.

  The Group's suppliers must not engage in practices which could put their employers, their customers, the Company or the environment in danger. As such, no supplier may be classed as a Faiveley Transport Group supplier unless a supplier audit has been completed.

  Thus, external sub-contracting for the 2012/2013 financial year for the whole Group totalled €43 million compared to €37 million last year.

CONCLUSION*

The debate surrounding carbon footprints and greenhouse gas reduction is currently working in the rail sector's favour. More than ever, rail is the best way of linking all cities, not only on a European scale, but on other continents too. Railway rolling stock is the answer to pollution and congestion problems in cities. It is therefore an enormous challenge that is opening up for Faiveley Transport, but there are also new opportunities.

To work with these new trends, the Group must be ever more innovative. It is no longer a question of thinking about quality and price, but about adding new components – sustainable development, energy efficiency and making its products recyclable. As well as being a necessity, this diversification of its offering is an opportunity to add value to its activities.

In their operation, the sites are careful in their use of resources so as to maintain or even reduce their costs. A sustainable development approach is entirely consistent with reducing operating costs through better management of resources. Investing in energy efficiency in buildings, rethinking logistics, investing in human resources by giving them the means to undertake and follow through actions can only benefit the Company and civil society.

Being a leading employer in the regions in which it is located, contributing to economic development at a local level, ensuring the quality of working life for its employees, supporting equal treatment in professional careers, shaping tools to encourage good behaviour, and creating and designing reliable and safe equipment are as much day-to-day measures as they are objectives for Faiveley Transport.

** The decree establishing the mechanisms for control by an independent third party of social and environmental information was published in the Official Journal on 14 June, 2013, Faiveley Transport has not been able to achieve this control for the financial year ended 31 March 2013. This verification will be implemented for the financial year commencing 1 April, 2013.*

CORPORATE GOVERNANCE

FAIVELEY
TRANSPORT

11. REPORT BY THE CHAIRMAN OF THE **SUPERVISORY BOARD**

On the operation of the Supervisory Board and on internal control within Faiveley Transport

Dear Shareholders,

Pursuant to the provisions of Article L. 225-68 of the Commercial Code, I hereby inform you by the present report:

- of the conditions for the preparation and organisation of the work of your Supervisory Board during the financial year ended 31 March 2013;
- the principles and rules agreed by the Board to determine the remuneration and benefits of all kind granted to senior executives;
- of the internal control and risk management procedures implemented by the Company;
- other information required by Article L. 225-68 of the Commercial Code.

The current report was discussed and approved by the Supervisory Board at its meeting of 31 May 2013.

11.1 PREPARATION AND ORGANISATION OF THE SUPERVISORY BOARD'S WORK

11.1.1 OPERATION OF THE BOARD

The Supervisory Board continuously ensures, by all appropriate means, control over the Company's management by the Management Board. The Supervisory Board is kept up-to-date by the Management Board on a regular basis through quarterly reports on the businesses and operations of the Company and its subsidiaries.

As part of its legal duties throughout the year, the Supervisory Board carries out the verifications and checks that it considers appropriate and may request documentation it considers useful to the completion of its duties. The Management Board presents an operating report to the Supervisory Board at last once per quarter.

The Supervisory Board appoints the members of the Management Board and sets their remuneration. It can also dismiss them in accordance with the bylaws. It appoints the Chairman of the Management Board and can also appoint the Chief Executive(s).

The Supervisory Board checks and monitors the half-year and full-year parent company and consolidated financial statements prepared by the Management Board.

At the Ordinary General Meeting, it presents a report containing its observations on the Management Board's report as well as on the financial statements for the year.

The Supervisory Board approves and monitors the execution of the medium and long-term strategy presented by the Chairman of the Management Board. It monitors the quality of information provided to shareholders as well as the markets, *via* the financial statements or when major transactions are effected.

In addition to the provisions of the bylaws, prior approval by the Supervisory Board is required for all significant transactions in respect of the scope of the Company's business (acquisitions, disposals, internal restructuring) or outside the approved strategy of the business. It is regularly informed of the financial position, the cash position and the commitments of the Company.

The Chairman calls the Supervisory Board as often as required in the interests of the Company and at least once per quarter following the release of the periodic report by the Management Board.

The Supervisory Board's deliberations are not valid unless at least half its members are present and decisions are made by a majority of members. In the event of a tie, the Chairman has the deciding vote.

At any one meeting, Directors may hold no more than one proxy received from a Director who could not attend.

In order to conform to the AFEP-MEDEF Corporate Governance Code for listed companies of December 2008, the Supervisory Board added to the agenda of its meeting on 22 April 2010 a revision to its internal regulations providing and specifying:

- its powers;
- its operating rules;
- the terms and conditions of meetings and the organisation and preparation of the work of the Board;
- the information required by members of the Supervisory Board in carrying out their duties.

Following the recommendation of the AMF of 3 November 2010 on the prevention of insider trading violations by management, at its meeting on 24 February 2011, the Supervisory Board decided to clearly define the trading restriction periods during which management and permanent insiders are prohibited from effecting transactions on the Company's securities. The Supervisory Board also amended its internal regulations and brought the Company's Code of Conduct into compliance at the same meeting. The Supervisory Board's internal regulations are available on the Company's website. A calendar of restriction periods is updated and forwarded to all members of the Supervisory Board, the Management Board and permanent insiders of the Company at the beginning of each financial year.

Moreover, at the meeting held on 24 March 2011, the Supervisory Board reviewed the provisions of the Law of 27 January 2011 concerning the fair representation of women and men on Boards of Directors and Supervisory Boards and decided to comply with the requirements of this regulation. Hélène Auriol-Potier and Nicoletta Giadrossi-Morel were appointed members of the Supervisory Board by the General Meeting of 14 September 2011 and may be deemed independent in accordance with criteria set by the Charter adopted by the Supervisory Board on the matter.

In light of their legal assignments, each member of the Supervisory Board is bound by the basic obligations of loyalty, confidentiality and due diligence.

The Board adopted a Charter for members of the Supervisory Board that defines the criteria adopted to qualify as an Independent Director, as well as the obligations of members of the Supervisory Board. This Charter is also available at the registered office of the Company.

It specifically states that at least two of the members of the Supervisory Board must meet the qualification of Independent Director.

Aside from the required expertise and experience, a member of the Supervisory Board is deemed independent where he/she has no direct or indirect relationship, of whatever nature, with the Company, its group or its management that may compromise the exercise of freedom of judgment and their completely objective participation in the work of the Supervisory Board.

To be considered an Independent Director, a member of the Supervisory Board must satisfy the following criteria:

- they must not be or have been an employee or executive of the Company or an employee or Director of a company that has been consolidated during the past five years;
- must not be a senior executive of a company where the Company, directly or indirectly, holds a position as Director or has an employee appointed as such, or where a senior executive of the Company holds, or has held in the last five years, the position of Director;
- must not be a customer, supplier, commercial partner, merchant banker or financing banker:
  - that is of significance to the Company or its group,
  - or where the Company or its group represent a significant part of the activities;
- must not be directly or indirectly related, nor have been directly or indirectly related during the last five years, to such a customer, supplier, commercial partner, merchant banker or investment banker;
- must not have any close family relationship with a senior executive of the Company;
- must not have been an auditor to the business during the previous five years;
- must not have been a member of the Supervisory Board for more than twelve years;
- must not hold, directly or indirectly, a shareholding equal to or greater than 10% in the share capital or voting rights of the Company or in any one of the companies of its Group, nor be related in any way whatsoever to a shareholder holding more than 10% of the capital or the voting rights of the Company or a company of its Group.

Every year, at the meeting to consider the financial statements of the year just ended, the Supervisory Board examines the position of each of its members on a case by case basis with regard to the criteria of this clause, and brings the conclusions of its examination to the attention of the shareholders in its annual report so that the Independent Directors are identified. Thus, the members of the Supervisory Board deemed to be independent are:

- Hélène Auriol-Potier;
- Christian Germa;
- Nicoletta Giadrossi-Morel;
- Maurice Marchand-Tonel.

Christian Germa was a Director of Faiveley Transport before all the assets and liabilities of this company were transferred to Faiveley SA (subsequently renamed Faiveley Transport). Following discussions within the Supervisory Board, Christian Germa has been deemed an "independent member". The Supervisory Board noted that he exercises his professional activities in a field that is wholly unrelated to the railway industry, that he is neither related nor connected in a private capacity with the principal shareholder, and that he is not a key shareholder of the Company.

Finally, beyond the sole statutory requirements, internal regulations require that each member of the Supervisory Board be a significant shareholder in a personal capacity. It was decided that each member of the Supervisory Board should acquire at least two hundred (200) Company shares. Board members have a period of twelve months after assuming their position to ensure they comply.

The Supervisory Board also conducts an annual assessment of its operation and its work. At the meeting of 29 March 2013, a summary of this assessment, whose findings were generally positive, was discussed and the Board adopted the following proposals:

- the next assessment of the Board to be carried out by an external and independent specialist firm;
- creation of a Governance and Appointments Committee to deal with all aspects of the Group's governance, including in particular appointments to the Supervisory Board, the roles and responsibilities of the various decision-making bodies, and the interaction between shareholders, the Supervisory Board and the Management Board;
- the abolition of the Steering Committee to be replaced by a monthly financial report addressed to all members of the Supervisory Board by the Chief Financial Officer;
- the frequency of Supervisory Board meetings will be reduced but their duration will be extended, it being understood that certain meetings will be held in the absence of Management Board members;
- the Chairman of the Supervisory Board will meet each member annually in order to draw up the list of topics requiring attention.

11.1.2 FREQUENCY OF MEETINGS

During the last financial year, the Supervisory Board met eight times:

- 25 April 2012;
- 6 June 2012;
- 19 July 2012;
- 14 September 2012;
- 24 October 2012;
- 21 November 2012;
- 29 January 2013;
- 29 March 2013.

The following was presented and discussed by the Board at those meetings:

- the key financial elements of the year as well as the press releases published by the Company;
- the minutes of the various Committees;
- the reports and draft resolutions to be presented to the General Meeting;
- external growth opportunities;
- the organisation of Group Operations.

11.1.3 CONVENING OF THE SUPERVISORY BOARD MEMBERS

In accordance with Article 20-III of the bylaws, the advance notice required for formal meetings of the members of the Supervisory Board is four days.

Each member has the option of being represented by another member at Board meetings.

The meetings are chaired by the Chairman of the Supervisory Board, or in his absence, by the Vice-Chairman.

11.1.4 INFORMATION OF SUPERVISORY BOARD MEMBERS

Before a meeting, each member receives Group financial information and a file detailing the items included on the agenda for the meeting.

11.1.5 DIRECTORS' FEES

Details are provided in the management report of the Management Board.

11.1.6 LOCATION OF THE MEETINGS

In general, meetings of the Supervisory Board take place at the registered office, however, occasionally, certain meetings are held in other locations, in particular, within Group subsidiaries so that Supervisory Board members may improve their knowledge of operations and products, as well as of teams working locally.

11.1.7 MINUTES OF THE MEETINGS

Minutes of Supervisory Board meetings are drafted at the end of each meeting and are immediately forwarded to all Board members.

11.1.8 SUMMARY OF 2012/2013 ACTIVITY

During the year ended 31 March 2013, the Board met eight times. The attendance rate of Board members was 87.50%. Seven meetings were chaired by Philippe Alfroid, Chairman of the Supervisory Board, and one by François Faiveley, Vice-Chairman of the Supervisory Board.

During the financial year, all Management Board members attended meetings and presented items on the agenda within their respective areas of expertise to the Supervisory Board.

The Group's Legal Counsel attended all Board meetings and acted as secretary to the meetings.

Pursuant to Article L. 225-238 of the Commercial Code, the Statutory Auditors were invited to the Board meetings at which the interim and year-end financial statements were presented and approved.

11.1.9 RULES GOVERNING DIRECTORS' REMUNERATION AND OTHER BENEFITS

Remuneration of executives, as detailed in the Management Board's report, is determined by the Remuneration Committee and the Supervisory Board. All the information required under Article L. 225-102-1 of the Commercial Code is presented in the Management Board's report.

The setting and granting of Directors' fees is decided at a meeting between the Chairman and the Vice-Chairman of the Supervisory Board, who specifically take account of the following criteria:

- Board meeting attendance;
- work carried out as part of the various Committees;
- time devoted;
- personal expertise and contributions to the Board's deliberations.

The functioning of the Supervisory Board is then assessed by the Chairman and the Vice-Chairman. The frequency of meetings, the members' contribution to work carried out, work methods, governance rules and the composition of the Board are reviewed carefully in order to propose the improvements deemed necessary.

Directors' fees totalling €249,000 were allocated in respect of the financial year ending 31 March 2012.

In its decision dated 28 November 2008, the Supervisory Board adopted the principles of the AFEP-MEDEF Corporate Governance Code. This Code includes:

- the October 2003 Corporate Governance Code for listed companies, updated in April 2010;
- the October 2008 recommendations on Directors' remuneration.

The Supervisory Board has reservations concerning the rule against concurrently holding a term of office and an employment contract: it favours suspending employment contracts of senior executives at the time of their appointments as Chairman and Chief Executive Officer or as Chief Executive Officer, where their length of service in the business is at least ten years at the time of their appointment.

Upon the appointment of Thierry Barel as Chairman of the Management Board, his contract of employment was terminated. Changes made upon the termination of Thierry Barel's contract of employment have been discussed by the Supervisory Board which granted its prior approval in accordance with Articles L. 225-86 and L. 225-90-1 of the Commercial Code. The Supervisory Board has also defined the terms and conditions for the termination of Thierry Barel's duties as Chairman of the Management Board. Thus, should he be dismissed by the Supervisory Board, Mr Barel may avail of compensation based on performance criteria, up to a maximum amount of 18 months of total remuneration.

Only Thierry Barel is remunerated in his capacity as Chairman of the Management Board, the other members of the Management Board may not receive specific remuneration for their role as member of the Management Board. In addition, the members of the Management Board who are also managing directors of Group companies do not receive any specific benefits for their roles.

The Management Board meeting of 29 December 2005 approved the terms of its internal regulations, by which all members are individually bound. The internal regulations specify the powers and duties of the Management Board and the procedures governing meetings and decision-making. A copy of the internal regulations is available at the registered office of the Company.

With regards to third parties and according to the bylaws, only the Chairman of the Management Board may represent the Company, unless decided otherwise by the Supervisory Board. Thierry Barel is the sole Chief Executive Officer and has no specific limits on his powers.

Management Board members were reappointed for a three-year term during a meeting of the Supervisory Board on 9 June 2011. The Management Board is currently made up of three people.

The Supervisory Board is responsible, based on recommendations of the Remuneration Committee, for defining the share purchase and subscription option policy, as well as the policy governing the allocation of free shares to Directors and Executive Officers, in close collaboration with the Group's Human Resources Department. This policy is then implemented by the Management Board, which acts strictly within the bounds of the delegation granted to it by the Shareholders' General Meeting. A report summarising the conditions of use of this delegation is prepared by the Supervisory Board and presented to the Annual General Meeting.

11.2 INTERNAL CONTROL AND RISK MANAGEMENT PROCEDURES

The Company has developed internal control and risk management procedures to ensure rigorous financial management and the control of risks associated with its business activities. The procedures are also aimed at ensuring that reliable information is provided regarding the Company's financial situation and in the financial statements provided to shareholders.

Internal control is an integral part of the Group's corporate governance strategy. In addition to periodic Audit Committee meetings, Faiveley Transport Management and the majority of Supervisory Board meet at a Steering Committee every month in order to thoroughly and consistently monitor the operational and financial performance of the railway business, to supplement the specialised Committees referred to hereafter.

11.2.1 GROUP STANDARDS AND OBJECTIVES FOR INTERNAL CONTROL AND RISK MANAGEMENT PROCEDURES

The internal control standard adopted by the Company is that of the Committee of Sponsoring Organizations of the Treadway Commission (COSO). According to this standard, internal control is a process which aims to provide reasonable assurance that the following objectives are met: the realisation and optimisation of transactions, reliability of financial information and compliance with the law and regulations in force.

The objectives of the internal control procedures within the Faiveley Transport Group cover the five key internal control procedures defined by COSO:

1) **Organisation and principles of control:**

   To establish an organisation with clearly defined responsibilities, adequate resources and expertise, which relies on appropriate IT systems, operating procedures and methods, and appropriate tools and practices;

2) **Risk assessment procedures:**

   To compile and analyse major identifiable risks in light of the Company's objectives (market, industrial and environmental risks) and to ensure that procedures are implemented to manage these risks;

3) **Actual control procedures:**

- To ensure that the information forwarded to the Supervisory Board of Faiveley Transport and to General Meetings is reliable and is a true reflection of the Company's business;
- To ensure that published financial statements and other information disclosed to the market is reliable;
- To ensure that the operations carried out within the Company comply with current legislation and regulations in force and with the objectives laid down by the Management Board;

   To define and communicate standards of control and performance;

4) **Documentation and communication of the rules of control:**

   To ensure adequate internal distribution of relevant and reliable information, enabling each participant to fulfil his/her responsibilities;

5) **Supervision of the internal control system:**

   To ensure, through on-site audits, that the appropriate organisation, procedures and standards of control and performance are in place.

As regards internal control, the Company uses the general principles defined by the AMF.

11.2.2 INTERNAL CONTROL PROCEDURES AND RISK MANAGEMENT

The Group has established a structure, procedures and processes with the purpose of identifying, evaluating and reducing risks, with the resources necessary to manage risks being allocated in line with the strategic and operational objectives of the Group. As with all systems of internal control, it can offer reasonable assurance but cannot provide an absolute guarantee that these risks will be completely eliminated.

11.2.2.1 Organisation and procedures

The Group's control environment is based on:

1) a clear internal **organisation** appropriate to the Group's business model, supported by information systems adapted to this organisation.

   Moreover, in its control functions, the Supervisory Board now follows the principles set down by the new Corporate Governance Code for listed companies, published by AFEP-MEDEF in December 2008 and updated in April 2010;

2) The **"Corporate" manual** contains the Group's operating procedures and guidelines and is accessible on the Group's intranet *via* a dedicated site called "Core procedures". Its main components focus on:

- management organisation, and the roles and responsibilities of their major duties,
- key performance indicators,
- key processes: "management reviews" and "projects reviews",
- sales-related procedures,
- financial procedures,
- quality management,
- health, safety and environmental procedures;,
- human resource procedures.

   More particularly, emphasis should be placed on:

- "Financial and Accounting Policies", a Group standardised benchmark document, covering accounting standards, accounting rules and practices, consolidation, reporting and cash management procedures,
- the "Site Internal Control Manual" forwarded to subsidiaries in February 2013 contains the 164 mandatory checks covering all operating procedures.

3) **Other Group procedures:**

- the "Quality" collection of guidelines detailing certain operating processes common to the entire Group,
- the "Faiveley Management System" (FMS) brings together the performance standards to be implemented by the subsidiaries and audited on a regular basis by employees independent of the subsidiary ("FMS correspondents"),
- the "Insurance" manual, redrafted after all Group policies for civil liability and damages were placed with the same broker,
- all the procedures and rules implemented by the majority of Group subsidiaries as part of ISO certification. These rules relate to the management of production and purchasing.

11.2.2.2 Risk management tools

Since 2006, the Company has been using a reporting and consolidation tool integrated into Hyperion. This provides an improved overview of subsidiary performance and shorter timeframes for the reporting of figures.

In 2007, the Group started to work on the standardisation and the gradual updating of all its technical and IT architecture. Standard IT tools (ERP) have been rolled out in operational units, which will contribute to the structuring of internal controls.

A CRM (Customer Relationship Management) tool to improve the sharing of data when preparing proposals, whilst ensuring their compliance with Group procedures before being forwarded to customers, was in the final phase of development at 31 March 2013.

The Group has set up a number key performance and financial indicators to enable monitoring in a common language within the Group. These indicators are employed as targets for operational managers and are integrated into the management of remunerations. They reflect the strategic overviews decided by the Management Board and are incorporated into the budgeting process and monthly reviews carried out by legal entity with the involvement of the Executive Committee.

11.2.3 INTERNAL CONTROL STAKEHOLDERS

During the year ending 31 March 2013, the various internal control stakeholders operated as follows:

The Supervisory Board

The Supervisory Board meets on a regular basis to assess operational and financial performance, to discuss business matters and the strategic direction of the Group in its various businesses and in different markets, and each year, to approve the annual budget.

The Remuneration Committee

The Remuneration Committee is chaired by the Chairman of the Supervisory Board, Philippe Alfroid. François Faiveley and Christopher Spencer are also members.

It meets at least twice annually and is responsible for making recommendations regarding the remuneration of Management Board members, in particular regarding the remuneration of corporate officers; its task is to evaluate and confirm the allocation of the variable part of the remuneration of the Chairman of the Management Board of Faiveley Transport, based on individual performance objectives and on financial statements audited by the Statutory Auditors.

The Audit and Risk Committee

The Audit and Risk Committee has four members: Christian Germa (Chairman), Maurice Marchand-Tonel, Philippe Alfroid and Christopher Spencer. Serge Choumaker, a member of the Supervisory Board representing employee shareholders, is also involved due to his role as the Group's Director of Accounting & Consolidation.

The operating principles of the Audit and Risk Committee are consistent with the findings of the Audit Committee's final report, published by the AMF in July 2010. Its specific task is to examine the interim and annual financial statements and the internal control procedures of Faiveley Transport Group.

In order to carry out this assignment, the Audit and Risk Committee interviews the Statutory Auditors, the Chief Financial Officer of the Group and the Director of Internal Control and Audit, it examines the scope of the consolidated companies, it consults external experts where necessary and proceeds with an examination of risks and of significant off-balance sheet commitments.

In addition, it examines the Statutory Auditors' fees and the terms and conditions of their reappointment. It reviews the internal audit plan and the key observations from the internal audit. It is also involved in the preparation of the Group's financial communication of the half-year and full-year financial statements and significant transactions (acquisitions, disposals, etc.).

The Audit and Risk Committee meets to approve the interim and year-end financial statements. It issues recommendations and prepares a report for the Supervisory Board of Faiveley Transport.

The Management Board of Faiveley Transport

The Management Board is responsible for the organisation and the implementation of accounting and financial internal controls, as well as the preparation of the financial statements prior to their approval.

The Management Board approves the financial statements and the Supervisory Board carries out the verification and checks what that it deems necessary on the financial statements.

The Executive Committee

It comprises the Chairman of the Management Board, Operations Director, Chief Financial Officer and the heads of the operational and corporate divisions. It meets once a month and covers any topics related to the running of the Company and its operation and non-members of the Committee may be invited to discuss matters within their area of responsibility.

The Finance Department

The accounting and finance function is managed by the Finance Department for the parent company, subsidiaries and each establishment.

This Department is responsible for:

- providing the Management Board, at any time, with the relevant documents and indicators to manage the Company's operations;
- continuously anticipating and contributing to the preparation of action plans, their implementation and their monitoring with the Management Board of the Company;
- ensuring the reliability of the information provided by the Company's accounting and financial information system. The financial statements are prepared in accordance with the IFRS framework applicable to listed companies and with the rules set out by Faiveley Transport relating to the preparation of half-yearly and annual financial statements of the parent company and subsidiaries.

Its role regarding internal control particularly consists of:

- financial controlling: monitoring the budgeting control processes;
- accounting and consolidation: monitoring the quality and reliability of subsidiaries' financial statements and of the consolidated financial statements;
- treasury: reliability of cash generation, delegation of authority, and management of exchange rate and interest rate risk;
- Legal Department: management of contractual and insurance risks;
- Tax Department: management of fiscal risks and reliability of tax related financial information.

Financial controlling is undertaken by a team of controllers at the head office and in each subsidiary. The Finance Department organises periodic reviews of subsidiaries to monitor industrial activities and business projects. Every month it issues a report for the Management Board and operational and cross-divisional Departments.

Internal Control and Audit Committee

A Director of Internal Control and Audit was appointed in October 2012. He reports directly to the Group's Chief Financial Officer and has special access to the Management Board and to the Audit and Risk Committee.

The Group's standard controls were reviewed and included in a "Site Internal Control Manual" which was presented to the Audit and Risk Committee and distributed in February 2013. All subsidiaries will be trained to these standards and shall draw up an implementation programme following a self-assessment. At 31 March 2013, approximately one third of the main subsidiaries had completed this training.

An internal audit programme was defined for the year 2013/2014: it provides for reviews of the implementation of standard controls on the largest sites or those considered to be at risk, and may be updated based on new situations or Executive Committee requests. All the reports drafted during these audits will be forwarded to the members of the Audit Committee and to the Group Chief Executive Officer. A team of around ten "associated auditors" selected from experienced Group personnel was created in order to support the Director of Internal Control and Audit in his assignments.

The Quality Department

A Quality Director reporting to the Operations Director was appointed in November 2012. He oversees the Quality Departments within each industrial subsidiary and works with the senior management of each facility and subsidiary. A structured documentary framework, containing process descriptions as well as quality procedures, is in place. Standard problem solving processes were rolled out and monitoring of the quality system takes the form of quality audits conducted internally or through IRIS.

Subsidiary Departments Heads' Committee

Chaired on a monthly basis by the Managing Director of each industrial subsidiary, this Committee highlights performance indicators and reviews solutions with a view to their possible improvement.

11.2.4 MONITORING OF SUBSIDIARIES

Faiveley Transport has a majority or joint shareholding in each of its subsidiaries. Therefore, it has a strong presence on the Management Board and within the managerial structure of each of its subsidiaries.

Every subsidiary provides a monthly management report to the parent company, which then decides on any appropriate action to be taken based on the information received.

In 2012/2013, the monthly monitoring of the performance of subsidiaries, overseen by the Activity Directors, was introduced. It enables better reporting of information and closer monitoring ahead of Activity and Executive Committee meetings.

11.2.5 THIRD-PARTY RELATIONSHIPS

Supervision is carried out by independent certification agencies. The majority of the companies within the Group have ISO 9001-2000 certification and the Group quality management system is regularly audited by an external agency.

At 31 March 2013, sixteen Group entities, including the Group's main industrial sites were subject to ISO 14001 certification relating to environmental safety management systems.

The auditors are PricewaterhouseCoopers Audit and Expertise Comptable et Audit (ECA). As part of their audit of annual and consolidated financial statements of the Company, the auditors are required to make recommendations regarding internal controls related to accounting and financial information. In accordance with their professional standards, the Statutory Auditors inform the Audit and Risk Committee and the Management Board of their appraisal of the Group's internal control mechanisms. Corrective action is undertaken, on a subsidiary-by-subsidiary basis, on the relevant elements. Since the 2011/2012 financial year, at the request of the Finance Department, the Statutory Auditors have, as part of their internal control brief, been reviewing a cross-group process common to all the Group's subsidiaries. In this regard, the Statutory Auditors reviewed the project review process during the 2011/12 financial year and the inventory management process during the 2012/13 financial year.

11.2.6 SHAREHOLDERS INFORMATION

All information on specific terms and conditions relating to shareholders' participation in General Meetings is included in the Company's bylaws, in particular under Title V, Articles 26 and subsequent.

Please also note that items likely to have an impact in the event of a public offering, pursuant to Article L. 225-100-3 of the Commercial Code, appear in Chapter 6 of the Company's Reference Document.

11.2.7 ACTION PLAN FOR THE FORTHCOMING FINANCIAL YEAR

The Internal Audit and Control Department will complete the training of the subsidiaries on the standard controls contained in the Manual in February 2013. Internal audits will be conducted on a regular basis to ensure the implementation of these controls or to analyse a specific situation at the request of Management.

As part of the annual closing at 31 March 2014, the auditors will conduct further reviews of internal controls in order to ensure that corrective actions taken as a result of their recommendations have been implemented.

The Company project "Faiveley Worldwide Excellence" will be officially launched by the Management Board in May 2013. This project, which in three years aims to improve the Group's performance, particularly in relation to quality, customer delivery and managing margins, also incorporates the introduction of standard internal controls and Group IT tools, thus confirming the commitment of Faiveley Transport's Management to Internal Control.

Chairman of the Supervisory Board

12. STATUTORY **AUDITORS' REPORT**

prepared in accordance with Article L. 225-35 of the French Commercial Code, on the report prepared by the Chairman of the Supervisory Board of Faiveley Transport For the year ended 31 March 2013

This is a free translation into English of the statutory auditors' report issued in the French language and is provided solely for the convenience of English speaking readers. This report should be read in conjunction with, and construed in accordance with, French law and professional auditing standards applicable in France.»

To the Shareholders,

In our capacity as Statutory Auditors of Faiveley Transport and in accordance with Article L. 225-235 of the French Commercial Code (Code de commerce), we hereby report to you on the report prepared by the Chairman of your Company in accordance with Article L. 225-68 of the French Commercial Code for the year ended 31 March 2013.

It is the Chairman's responsibility to prepare, and submit to the Supervisory Board for approval, a report describing the internal control and risk management procedures implemented by the company and providing the other information required by Article L. 225-68 of the French Commercial Code in particular relating to corporate governance.

It is our responsibility:

- to report to you on the information set out in the Chairman's report on internal control and risk management procedures relating to the preparation and processing of financial and accounting information, and
- to attest that the report sets out the other information required by article L. 225-68 of the French Commercial Code, it being specified that it is not our responsibility to assess the fairness of this information.

We conducted our work in accordance with professional standards applicable in France.

I. INFORMATION CONCERNING THE INTERNAL CONTROL AND RISK MANAGEMENT PROCEDURES RELATING TO THE PREPARATION AND PROCESSING OF FINANCIAL AND ACCOUNTING INFORMATION

The professional standards require that we perform procedures to assess the fairness of the information on internal control and risk management procedures relating to the preparation and processing of financial and accounting information set out in the Chairman's report. These procedures mainly consisted of:

- obtaining an understanding of the internal control and risk management procedures relating to the preparation and processing of financial and accounting information on which the information presented in the Chairman's report is based, and of the existing documentation;
- obtaining an understanding of the work performed to support the information given in the report and of the existing documentation;
- determining if any material weaknesses in the internal control procedures relating to the preparation and processing of financial and accounting information that we may have identified in the course of our work are properly described in the Chairman's report.

On the basis of our work, we have no matters to report on the information given on internal control and risk management procedures relating to the preparation and processing of financial and accounting information, set out in the Chairman of the Supervisory Board report, prepared in accordance with Article L. 225-68 of the French Commercial Code.

II. OTHER INFORMATION

We attest that the Chairman of the Supervisory Board's report sets out the other information required by Article L. 225-68 of the French Commercial Code.

Neuilly-sur-Seine and Dijon, le 12 July 2013.

TOTAL	**397,995**	**389,945**

** Erwan Faiveley is an employee of FFP, holding company of the Faiveley family.*

SUMMARY TABLE OF THE REMUNERATION OF EACH MANAGEMENT BOARD MEMBER

	FY 2011/2012		FY 2012/2013	
	Amounts due	Amounts paid	Amounts due	Amounts paid
Thierry Barel,				
Chairman of the Management Board and CEO				
Fixed remuneration (gross before tax)	432,794	432,794	430,822	430,822
Variable remuneration(1) (gross before tax)	174,140	381,300	260,170	174,140
Benefits in kind (company car)	2,695	2,695	2,695	2,695
TOTAL	**609,629**	**816,789**	**693,687**	**607,657**
Erwan Faiveley(2),				
Member of the Management Board				
Fixed remuneration (gross before tax)	96,000	96,000	107,081	107,081
Variable remuneration (gross before tax)	-	-	-	-
Benefits in kind (housing allowance)	36,200	36,200	19,269	19,269
TOTAL	**132,200**	**132,200**	**126,350**	**126,350**
Guillaume Bouhours,				
Member of the Management Board				
Fixed remuneration (gross before tax)	214,173	214,173	218,959	218,959
Variable remuneration(1) (gross before tax)	134,586	160,833	132,924	134,586
Benefits in kind (company car)	2,580	2,580	2,580	2,580
TOTAL	**351,339**	**377,586**	**354,463**	**356,125**

(1) The variable part is measured in relation to both Group (profit from recurring operations and cash flow generation) and individual objectives, which are set out at the beginning of the year. A decision on the final vesting of the variable part of remuneration based on individual objectives (bonus) is reached following individual interviews and, as regards Group objectives, based on the audited financial statements. These recommendations are subsequently debated within the Remuneration Committee. The Chairman of the Remuneration Committee then presents a summary to the Supervisory Board.

(2) Erwan Faiveley is an employee of FFP, holding company of the Faiveley Family.

CODE OF ETHICS

FAIVELEY TRANSPORT

CONTENTS

FOREWORD

THE COMPANY AND THE GROUP

This Code (hereinafter referred to as the “Code of Ethics”) states the commitments and ethical responsibilities in the conduct of business and company activities by the staff members of Faiveley Transport, (hereinafter referred to as the “Company”), as a Company of the Faiveley Group, whether employees, directors or any kind of Company co-workers.
The achievement of the Faiveley Transport objectives is pursued by all the Company staff members with loyalty, seriousness, honesty, skills and transparency, in the absolute compliance with the laws and regulations in force.

RELATIONSHIPS WITH STAKEHOLDERS

The presence of the Faiveley Group in national and international markets, its effectiveness in various contexts and the multiplicity of its partners and counterparties make the relationships of Faiveley Transport. with the Faiveley Group and the stakeholders extremely important, the stakeholders being all public and private parties, individuals, groups, companies, institutions, which have contacts of any kind with Faiveley Transport. and/or have any interest in the activities of the Company. Faiveley Transport conduct of business is strictly compliant with the French laws and with the market rules and principles on which fair competition is based.

KEY PRINCIPLES

Compliance with the pertinent laws, transparency and proper management, trust and cooperation with stakeholder are the ethical principles followed by Faiveley Transport and from which it draws inspiration for its model of conduct, to compete effectively and fairly in the market, to improve customer satisfaction, to give added value to its shareholders, to develop the competence and the professional growth of its human resources. In particular, the belief of acting to the Company’s advantage does not justify the adoption of a conduct contrary to these principles. All those who work for Faiveley Transport, without any distinctions and exceptions, are therefore committed to observe these principles and to have them observed within the scope of their own functions and responsibilities. Hence, the commitment-related need for all parties having business relationships with Faiveley Transport to act towards the Company following rules and policies based on the same values.

CODE OF ETHICS

Faiveley Transport. deemed it appropriate and necessary to adopt and issue a Code of Ethics which states the values to which all its directors, employees and co-workers of any kind shall conform, by accepting responsibilities, structures, roles and rules for whose violation, even if it does not imply any third party liability of the Company, they are personally liable within and outside the Company. Knowledge and observance of the Code of Ethics by all those who work for Faiveley Transport are therefore the main conditions for preserving the transparency and reputation of the Company. Furthermore, the Code is distributed to all those who have any business relationships with Faiveley Transport.
Supervision of the enforcement of the Code of Ethics and of its implementation is the task of the directors and employees of Faiveley Transport who shall report any non-compliance or failure to perform to the Company Management or to the special body called ”Supervision Body on the Code of Ethics”, if established.
The Management Board and the Company Management can promote proposals to integrate or modify the Code of Ethics. It is also the task of the Management Board to modify, integrate and update the Code of Ethics to adjust it as required to meet the relevant laws and the evolving civil awareness. As regards, in particular, the offences provided for in the L.D. 231/01 and amendments thereof, a Supervision Body has been established to verify the operation and the effectiveness of the Organisation and Management Model adopted by Faiveley Transport for the prevention of the aforesaid offences.

GENERAL PRINCIPLES

COMPLIANCE WITH LAWS AND REGULATIONS

Faiveley Transport operates in full observance of the laws and regulations in force in the Countries where it carries out its activity, in accordance with the principles established in the Code of Ethics and the procedures provided for in internal memoranda. The moral uprightness is a firm duty of all those who work for Faiveley Transport and characterizes the conduct of its organization.
The directors and employees of Faiveley Transport as well as those who work for the Company, at any title, are therefore required to be familiar with and observe the laws and regulations in force in the Countries where the Company is present. This obligation also includes the attention towards and the respect of the rules which regulate the competition both in the domestic and international markets.
Relationships between the Authorities and the people working for Faiveley Transport shall be characterized by their extreme fairness, transparency and collaboration, in the full observance of all applicable laws and regulations, and respectful of their institutional roles.

ENVIRONMENTAL COMPATIBILITY

The goods and services supplied by Faiveley Transport are produced and provided in compliance with the state of the art in its own activity sector and with the rules, laws and regulations in force as for quality, work, protection of workers' safety and health, as well as for the protection of the environment.
Faiveley Transport is committed to guarantee the adequate quality and characteristics of its manufacturing means and processes, which shall comply with the technical innovations and be aimed in particular at improving the quality and characteristics of the supplied goods and/or services.

MODELS AND RULES OF CONDUCT

All the working activities of those who work for Faiveley Transport shall be performed with professional care, honesty and managerial fairness, in the best interests of the Company.
The conduct and the relationships of all those who work, at any level, for Faiveley Transport, inside or outside the Company, shall be inspired by transparency, fairness and mutual respect. In such a context, the Managers shall be the first to represent, through their conduct, an example to everyone in Faiveley Transport, by complying, in the performance of their duties, with the principles of the Code of Ethics and with the Company's procedures and rules; they must also circulate them among the employees and encourage them to submit inquiries about them or proposals for updating them where necessary.
Furthermore, Faiveley Transport requests Directors to do their best to propose and execute the projects, the investments and the industrial, commercial and managerial actions deemed useful for preserving and increasing the economic, technological and professional assets of the Company.
Faiveley Transport further guarantees the availability of supporting information to enable the Company's roles and bodies, the auditing bodies and the internal control bodies, as well as surveillance authorities, to carry out the widest and most effective control activity.

DISSEMINATION AND OBSERVANCE OF THE CODE OF ETHICS

Faiveley Transport promotes the knowledge and observance of the Code of Ethics, of internal memoranda and of their updated versions among all directors, employees, co-workers of any kind, commercial and financial partners, consultants, customers and suppliers, requiring them to respect it and providing, in case of non compliance, for adequate disciplinary actions or contractual penalties. The aforesaid subjects shall therefore become familiar with the contents of the Code of Ethics, by asking questions and receiving explanations from company compliance officers as to their interpretation, to observe the Code and to help implement the same, by reporting any omissions or breaches (or even attempted breaches) that they have learnt about.

Faiveley Transport also promotes and encourages the collaboration of the employees in enforcing the observation, knowledge and implementation of the Code of Ethics and the internal memoranda, each employee within the scope of his/her competence and duties.

HUMAN RESOURCES AND EMPLOYMENT POLICY

PRINCIPAL CONDITIONS

Human resources are a fundamental component for the existence of the Company and a crucial factor for its successful competition on the market. Honesty, fairness, competence, professionalism, integrity, technical skills and commitment of the personnel are therefore the principal conditions for the attainment of the Company objectives and are the requisites Faiveley Transport requires of its directors, employees and co-workers of any kind.

SELECTION POLICIES

In order to contribute to achieving the development objectives of the Company and to assure that the said objectives have been pursued by everybody in accordance with the ethical principles and values which inspire Faiveley Transport, the company policy aims at selecting each employee, consultant, collaborator of any type on the basis of the aforesaid values and characteristics. During selection, which is conducted without any discrimination with regard to the applicant's private life and opinions, Faiveley Transport shall see that hired human resources correspond to the positions effectively needed in the Company, avoiding favouritism and any kind of facilitation.

PROFESSIONAL DEVELOPMENT

In the development of the employer-employee relationship, Faiveley Transport is committed to providing and maintaining the conditions required for enabling further improvement of the skills and knowledge of each employee in accordance with the said values, by following a policy based on recognition of merits and equal opportunities, and by drawing up specific programmes aimed at follow-up training and acquisition of increased skills. For this reason, employees are required to cultivate and improve their skills and acquire new abilities and knowledge, while directors and members of the management team shall do their utmost to enhance and improve the professionalism of their collaborators by creating the conditions for developing their skills and potential.

HUMAN RESOURCES AND CODE OF ETHICS

Information and knowledge about the Code of Ethics are disseminated first of all through the circulation of special documentation to all those who interact with the Company which, in such a case, requires of them, upon delivery of the material on the Code of Ethics, to sign a statement that they have taken due note of the documentation received. All Company employees shall at any time have the right to seek guidance and explanation from their supervisors on the contents of the Code of Ethics. On the occasion of the creation of a new relationship regarding employment, consultancy or collaboration, Faiveley Transport shall promptly deliver the information required for providing adequate knowledge of the Code of Ethics.

WORKPLACE AND PRIVACY PROTECTION POLICY

Faiveley Transport is committed to providing workplaces guaranteeing to all those who interact with the Company conditions respectful of their personal dignity and such that the characteristics of the individuals can not lead to any form of discrimination. In this connection, in compliance with all applicable laws, Faiveley Transport is committed to protecting personal information on the private life and opinions of its employees and in general of all those who interact with the Company.
In particular, the respect for the dignity of each worker shall also be ensured through the protection of privacy in the correspondence and interpersonal relationships between employees.

REPRESENTING THE COMPANY

The reputation of Faiveley Transport depends on the conduct of each employee.

Each of us shall:

- act by taking into account the interests of Faiveley Transport.
- reflect the values of Faiveley Transport in our professional conduct.
- not talk or write in the name of Faiveley Transport without previous authorization.
- not talk or write on subjects out of our competence.
- pay attention not to create confusion between our personal opinions or interests and the Company's interests (e.g. do not use the headed paper or the e-mail address of Faiveley Transport for personal matters or when expressing personal opinions).

FINANCIAL AND PROFESSIONAL DOCUMENTS

We all shall make sure that the data reported in our financial documents or in other types of documents are correct. This is one of the key of success of all enterprises. It is essential for a fair, effective and lawful management of our activity. In particular, it is of the utmost importance to provide our shareholders with transparent, correct and reliable information.

Each of us shall:

- contribute to the correctness of the information reported in the financial and professional documents,
- keep these documents in a safe place and follow the archiving instructions,
- cooperate with the internal and external auditors,
- reject cash transactions. If there are no other options, these transactions shall be expressly authorized and correctly recorded and proven by documents,
- pay attention not to sell, transfer or hand over goods belonging to Faiveley Transport without the necessary authorizations and the associated documentation.

USE OF THE COMPANY'S GOODS

The Company's goods allow the employees to achieve the economic objectives of Faiveley Transport. The incorrect use or the waste of these resources, including the working time, damage the operational and financial performances of Faiveley Transport.

Each of us shall:

- generally avoid the personal use of the Company's resources. The personal use of the communication means such as e-mail, telephone, Internet and so forth can be tolerated provided that it is limited, does not involve unreasonable costs and does not damage our professional activity,
- preserve and protect the Company resources, do not lose, damage, waste, lend, transfer or hand them over without authorization.
- do not inappropriately use of information system, e-mail and Internet.

CONFIDENTIALITY

The unauthorized diffusion of confidential information can damage Faiveley Transport. You are responsible for assuring the confidentiality of the data you have. Information not intended for public release shall be kept strictly confidential. Those who can access confidential information on our commercial partners are obliged to protect it against its diffusion.

Each of us shall:

- restrict the diffusion of the confidential information only to those who have the legitimate need to know it in the interest of the Company,
- preserve in a safe place all confidential data on customers and suppliers, both on paper and on electronic support,
- do not diffuse confidential information to persons outside FAIVELEY Transport (including the members of the employees' families),
- do not discuss or work on confidential information in public places where the conversations could be overheard and the data security jeopardized,
- do not reveal confidential information relative to a previous employer,
- return all confidential information (including any copies) in case of severance from Faiveley Transport.

GIFTS AND INVITATIONS

The exchange of gifts or invitations can contribute to the mutual comprehension and improve the business relationships, but can also create conflicts between personal interests and professional commitments.

Should you receive gifts or invitations, the “golden rule” to be followed is the total transparency.

Should you offer gifts or invitations, the “golden rule” is to keep yourself within reasonable limits and to figure out how this gift could be perceived publicly.

Each of us shall:

- reject gifts or invitations by suppliers, unless they are unequivocally of symbolic value,
- reject to receive or offer money,
- pay attention that the gifts and invitations we offer are appropriate and compliant with the ethical values of Faiveley Transport,
- make sure that, when establishing a new business relationship, the parties are informed on the policy of Faiveley Transport regarding gifts and invitations. The same way, we shall enquire about the policy of our new partner thereon. This way, any misunderstanding should be avoided,
- immediately inform our hierarchy about any received gift or invitation.

CORRUPTION AND "FACILITATING PAYMENTS"

Corruption is unacceptable and incompatible with the "FAIVELEY Code of Ethics". It is not good for the community within which we work and is a cost for the Company. Bribes are a type of corruption and are illegal in most Countries, particularly when officials are involved. In some Countries also the "facilitating payments" are forbidden, i.e. the payments executed to accelerate certain administrative formalities such as permission demands or customs clearance. Most of them, in fact, are a form of corruption.

Each of us shall:

- never execute, propose or promise cash payments or services (including gifts and invitations) to officials, Government officials or persons capable to influence them,

- immediately inform the Area Manager or the Division Director if these payment could not be avoided and exhaustively prove by documents the payment request,

- the payment of commissions is accepted if it is documented as for any restitution of goods and services in the company and is auditable.

CONFLICT OF INTERESTS

We shall absolutely avoid any situation in which our personal interests could clash with those of Faiveley Transport.

The simple probability of conflict of interests occurrence could damage the reputation of Faiveley Transport and that of its employees.

As regards the potential conflict of interests, the “golden rule” is to openly declare it in order to allow an in depth analysis of the situation, which needs a complete knowledge of the facts. What at first sight could seem to be a difficulty could not be so for the Company.

Each of us shall:

- inform our hierarchy in case of potential conflict of interests which conveys or can convey the impression that it influences our judgement and actions (e.g. if a relative of ours works for a supplier),

- not occupy a workplace, a function or not have a financial interest within organizations of competitors, customers, suppliers or business partners of Faiveley Transport, if your functions at Faiveley Transport allow you to have influence on these relationships.

RESPONSIBILITY TOWARDS THE ENVIRONMENT

Faiveley Transport respects the environment and makes any efforts to minimize his ecological impact. We have the objective to openly communicate our implementations.

Many activities, which are necessary to the production of our products, can have a direct impact on the environment. Each of us is responsible for reducing this impact as much as possible.

Each of us shall:

- contribute to the environmental initiatives of Faiveley Transport,
- support the use of recyclable materials and the development of biodegradable packaging,
- reflect on what respect our conduct, in any activity area, has an impact on the environment, in order to minimize it whenever it is possible. We can, for example, reduce the number of unnecessary travels, save energy and water and avoid producing wastes. When these cannot be avoided, we shall do our best to recycle or dispose them in a responsible way,
- take the necessary measures to avoid any infringement to the environmental directives of Faiveley Transport and comply with the regulations in force,
- immediately notify any unusual discharges or emissions in the water or in the air to the direct hierarchic leader or to the person in charge of hygiene and safety.

ABUSE OF PRIVILEGED INFORMATION

Faiveley Transport does not intend to restrict the freedom of its employees to carry out the personal investments they deem right; nevertheless, the rules concerning the “abuse of privileged information” shall always be kept in mind.

Each of us shall:

- be conscious that the use of privileged information in personal investments could be punishable by the law regarding the abuses of privileged information,

- not purchase or sell shares of Faiveley Transport or other companies of which privileged information could be available at the time of the operation.

- avoid disclosing privileged information to anybody outside the Company, including our family members.

- avoid revealing this privileged information to anybody inside the Company, if not legitimately necessary.

- protect the privileged information in order to avoid its accidental disclosure.

PRODUCT SAFETY AND QUALITY

The safety and quality of our products have always been of the utmost importance.

The high performance, quality and safety of our products prove our commitment and respect towards the Customers, allowing us to win their confidence, to promote our good brand name and to guarantee the leadership of Faiveley Transport in his sector.

We are also committed to the marketing of products which have proven their effectiveness and reliability and which are guaranteed by having passed severe tests.

Each co-worker of Faiveley Transport throughout the world shall pursue the research for the total quality of our products, from its design to the distribution and also after its entry into service.

Those who are involved in developing, marketing, manufacturing and selling our products shall:

- comply with all laws and regulations regarding the development of our products,
- encourage the free and open dialogue on any subjects related to the innocuousness of our products, so that no aspect is disregarded,
- make sure that the strictest quality control rules are adopted throughout each step of the manufacturing process,
- make sure that all Customers' complaints are correctly notified to the pertaining services and duly processed,
- quickly react to any problem concerning the safety and reliability of our products and the quality controls.

SELECTION AND IMPARTIAL TREATMENT OF SUPPLIERS

The relationships of Faiveley Transport with its suppliers go beyond the simple purchasing of goods and services. They are essential for the long-term success of our Company. We control our selection criteria and the commitment of our suppliers to carry out their activity in a responsible way.

We are proud of the reputation of our Company, which frankly discusses with its suppliers in a fully cooperative way. Our relationships are based on impartiality, equity and fairness principles and we respect the independence and identity of our suppliers.

Each of us, who has relationships with a supplier, shall:

- encourage the selection of the suppliers on the basis of open and competitive enquiries; make sure that all offers are compared and taken into consideration impartially and without any favouritism,
- prove the transparency of the inquiry procedures and, for the not selected suppliers, notify them of the selection results with tact and honesty,
- make sure that the Purchase and Payment General Conditions of our Company, which are consistent with our expectations in terms of ethics, are well understood and observed by all our suppliers in any Country they operate,
- help our suppliers to meet the expectations of Faiveley Transport – interrupt a relationship with any supplier which repeatedly does not satisfy our expectations,
- pay our suppliers at the agreed times and conditions (as far as they have fulfilled their commitments),
- make sure that the economic dependence of our suppliers on Faiveley Transport is not excessive,
- not ask unreasonable concessions from the suppliers to obtain or to seek a contract with Faiveley Transport. In particular, avoid the mutual selling agreements (i.e. when a contract or the purchase of goods or services is subject to the purchase by the supplier of our goods or services),
- protect the information of our suppliers the same way as we protect our information and in particular respect their copyrights and intellectual property.

COMPETITION

We respect all actors in our professional sector, including our competitors. We treat them as we wish they treat us. Our duty to set our example in this sector is strengthened by our leadership in the market of railway systems.

It is our interest to work in a sector where the business practice enjoys a good reputation. This facilitates our task and strengthens the confidence of our Customers. The sharing with our competitors of information concerning rates, costs or marketing strategies could, be it right or wrong, give the impression that prices, territory divisions or other types of competition manipulation or distortion are negotiated.

Each of us shall:

- avoid any contact with our competitors on confidential matters,
- avoid encouraging our Customers or suppliers to cancel contracts they have with our competitors,
- avoid any intrigues aimed at depriving a competitor of a purchasing source,
- not sign exclusivity contracts (i.e. contract imposing a company to sell or purchase only to/from Faiveley Transport) before having consulted our law consultants on any risk of abuse of dominant position,
- not allow any "fidelity discounts" before having consulted our law consultants on any risk of abuse of dominant position,
- not denigrate our competitors (including false declarations on their products or services),
- immediately inform our hierarchy, if we have fortuitously received or used confidential or exclusive information on our competitors and of which the person involved or a third party is the legitimate owner,
- collect information on the competition only by legal means and, in this case, clearly identify ourselves as employees of Faiveley Transport,
- never authorize new employees, recruited by Faiveley Transport, to reveal confidential information on the competitors for which they could have worked in the past.

SUPERVISION BODY

COMPETENCES AND CHARACTERISTICS

The application of the Organisation and Management Model adopted by the Company is checked by the Supervision Body, which has autonomous powers of initiative and control.
The Supervision Body operates with fairness, authority, continuity, professionalism, autonomy and to these purposes it is free to access information sources of Faiveley Transport; it has the faculty to examine documents and data; it suggests any updating of the Code of Ethics, on the basis of employees communications; it can check, also periodically, the functioning and application of the Model; it has adequate human resources and materials who allow it to operate quickly and efficiently.
The Supervision body operates with high discretion and with the complete support of the top management of Faiveley Transport., with which it cooperates in the absolute independence.

NOTIFICATIONS TO THE SUPERVISION BODY

To guarantee the effectiveness of the Organisation Model through specific memoranda of Faiveley Transport – in the respect of privacy and individual rights – information channels are created through which those who are aware of any illicit conducts inside the Company can notify them freely, directly and confidentially to the Supervision Body. This Body has also the task to carefully check the transmitted notifications, in order to submit the related matters to the competent company function to take disciplinary measures or to operate contract cancellations.

VIOLATIONS OF THE CODE OF ETHICS – DISCIPLINARY SYSTEM

NOTIFICATIONS OF VIOLATIONS

With reference to the notification of an occurred, attempted or requested violation of the rules of the Code of Ethics, the Company shall guarantee that nobody within his/her working area can be subject to any retaliations, illicit conditioning, hardships and discriminations of any sort, to have notified the Supervision Body of the Code of Ethics of the violation of the latter. Further to any notification, the Company will carry out appropriate inspections and disciplinary measures.

GUIDELINES OF THE DISCIPLINARY SYSTEM

The violation of the principles specified in the Code of Ethics and in the procedures provided for in the internal memoranda jeopardizes the trust relationships between Faiveley Transport and its directors, employees, consultants, co-workers of any sort, customers, suppliers, business and financial partners.
These violations will then be pursued by the Company incisively and immediately through adequate and proportioned disciplinary measures, independently from any penal relevance of this conduct and from the institution of penal proceedings in case of offence.
To protect its image and safeguard its resources, the Company will not have any relationship with subjects which do not intend operate in compliance with the regulations in force and/or which refuse to comply with the values and principles of the Code of Ethics.

PRELIMINARY NOTE

This annual report contains historical information and forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to our business, financial condition and results of operations. The words "estimate," "project," "intend," "expect" and similar expressions are intended to identify forward-looking statements. These forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those contemplated in such forward-looking statements. Further, we operate in an industry sector where securities values may be volatile and may be influenced by economic and other factors beyond our control. In the context of the forward-looking information provided in this annual report and in other reports, please refer to the discussions of risk factors detailed in, as well as the other information contained in, our other filings with the Securities and Exchange Commission.

Electric Fuel® is a registered trademark and Arotech™ and SWIPES™ are trademarks of Arotech Corporation, formerly known as Electric Fuel Corporation. All company and product names mentioned may be trademarks or registered trademarks of their respective holders. Unless otherwise indicated, "we," "us," "our" and similar terms refer to Arotech and its subsidiaries.

PART I

ITEM 1. BUSINESS

General

We are a defense and security products and services company, engaged in two business areas: interactive simulation for military, law enforcement and commercial markets; and batteries and charging systems for the military. We operate primarily through our various subsidiaries, which we have organized into two divisions. Our divisions and subsidiaries (both 100% owned by us) are as follows:

× ¨ ¨ We develop, manufacture and market advanced high-tech multimedia and interactive digital solutions for use-of-force training and driving training of military, law enforcement, security and other personnel through our ***Training and Simulation Division***:

- … We provide simulators, systems engineering and software products to the United States military, government and private industry through our subsidiary FAAC Incorporated, located in Ann Arbor, Michigan ("FAAC"); and
- … Through FAAC, we provide specialized "use of force" training for police, security personnel and the military under the trade name IES Interactive Training ("IES").

× ¨ ¨ We manufacture and sell lithium and Zinc-Air batteries for defense and security products, including our Soldier Wearable Integrated Power Equipment System (SWIPES)™ power hubs, and other military applications through our ***Battery and Power Systems Division***:

- … We develop and sell rechargeable and primary lithium batteries and smart chargers to the military and to private defense industry in the Middle East, Europe and Asia under our Epsilor nameplate ("Epsilor"), through our subsidiary Epsilor-Electric Fuel, Ltd. ("Epsilor-EFL"), at Epsilor-EFL's facilities located in Dimona, Israel (in Israel's Negev desert area);
- … We develop, manufacture and market primary Zinc-Air batteries, rechargeable batteries and battery chargers for the military, focusing on applications that demand high energy and light weight, as well as our Soldier Wearable Integrated Power Equipment System (SWIPES)™ power hub product, through our subsidiary Electric Fuel Battery Corporation, located in Auburn, Alabama ("EFB"); and
- … We produce water-activated lifejacket lights for commercial aviation and marine applications under our Electric Fuel nameplate ("EFL"), at Epsilor-EFL's facilities located in Beit Shemesh, Israel (between Jerusalem and Tel-Aviv).

Background

We were incorporated in Delaware in 1990 under the name "Electric Fuel Corporation," and we changed our name to "Arotech Corporation" on September 17, 2003. Unless the context requires otherwise, all references to us refer collectively to Arotech Corporation and Arotech's wholly-owned Israeli subsidiary Epsilor-EFL; and Arotech's wholly-owned United States subsidiaries, EFB and FAAC. Additionally, we operate under the trade names of IES Interactive Training ("IES"), Realtime Technologies ("RTI") and Electric Fuel Limited ("EFL). Unless otherwise indicated, all reported figures include only these operations and exclude the discontinued Armor segment.

Between 2002 and December 2011, we were also engaged in utilizing advanced engineering concepts to manufacture military and paramilitary armored vehicles, and employing sophisticated lightweight materials to produce aviation armor, through our Armor Division. In December 2011, our Board of Directors approved management's plan to sell our Armor Division in order to focus on the more profitable and growth-oriented aspects of our business. We completed the sale of our Armor Division in June 2012.

Table of Contents

For financial information concerning the business segments in which we operate, see Note 16.b. of the Notes to the Consolidated Financial Statements. For financial information about geographic areas in which we engage in business, see Note 16.c. of the Notes to the Consolidated Financial Statements.

Facilities

Our principal executive offices are located at 1229 Oak Valley Drive, Ann Arbor, Michigan 48108, and our toll-free telephone number at our executive offices is (800) 281-0356. Our corporate website is www.arotech.com. Our periodic reports, as well as recent filings relating to transactions in our securities by our executive officers and directors, that have been filed with the Securities and Exchange Commission in EDGAR format are made available through hyperlinks located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html, as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. Reference to our websites does not constitute incorporation of any of the information thereon or linked thereto into this annual report.

The offices and facilities of Epsilor-EFL are located in Israel (in Beit Shemesh and Dimona, both of which are within Israel's pre-1967 borders). Most of the members of our senior management work extensively out of Epsilor-EFL's facilities in Beit Shemesh; our financial operations are conducted primarily from our principal executive offices in Ann Arbor. FAAC's home offices and facilities are located in Ann Arbor, Michigan, Royal Oak, Michigan and Orlando, Florida. The facilities of EFB are located in Auburn, Alabama.

Training and Simulation Division

We develop, manufacture and market advanced high-tech multimedia and interactive digital solutions for use-of-force training and driver training of military, law enforcement, security and other personnel through our Training and Simulation Division, the larger of our two divisions. During 2013 and 2012, revenues from our Training and Simulation Division were approximately $63.4 million and $59.3 million, respectively.

The Training and Simulation Division concentrates on three different product areas:

× ¨ ¨ Our *Vehicle Simulation* group provides high fidelity vehicle simulators for use in operator training and is marketed under our FAAC and Realtime Technologies nameplates;

× ¨ ¨ Our *Military Operations* group provides weapon simulations used to train military pilots in the effective use of air launched weapons and is also marketed under our FAAC nameplate; and

× ¨ ¨ Our *Use of Force* group provides training products focused on the proper employment of hand carried weapons and is marketed under our IES Interactive Training nameplate.

Vehicle Simulation

We provide simulators, systems engineering and software products focused on training vehicle operators for cars and trucks. We provide these products to the United States military, government, municipalities, and private industry through our FAAC nameplate. Our fully interactive driver-training systems feature state-of-the-art vehicle simulator technology enabling training in situation awareness, risk analysis and decision making, emergency reaction and avoidance procedures, and proper equipment operation techniques. Our simulators have successfully trained hundreds of thousands of drivers.

Our Vehicle Simulation group focuses on the development and delivery of complete driving simulations for a wide range of vehicle types – such as trucks, automobiles, subway trains, buses, fire trucks, police cars, ambulances, airport ground vehicles, and military vehicles not including the U.S. Army's Virtual Clearance Training Suite (VCTS) program. In 2013, our Vehicle Simulations group accounted for approximately 9.5% of our Training and Simulation Division's revenues.

We believe that we have held a dominant market share in U.S. military wheeled vehicle operator driver training simulators since 1999 and that we are currently one of three significant participants in the U.S. municipal wheeled vehicle simulators market.

Table of Contents

In January 2008, we added Realtime Technologies Incorporated to our Vehicle Simulation group. RTI specializes in multi-body vehicle dynamics modeling and graphical simulation solutions. RTI offers simulation software applications, consulting services, and custom software and hardware development services primarily for use by the automobile industry and universities engaged in the study of vehicle performance or operator/vehicle interactions. We merged RTI into FAAC in January 2010.

Military Operations

In the area of Military Operations, we believe we are a premier developer of validated, high fidelity analytical models and simulations of tactical air and land warfare systems for all branches of the Department of Defense and its related industrial contractors. Our simulations are found in systems ranging from instrumented air combat and maneuver training ranges (such as Top Gun), full task training devices such as the F-18 Weapon Tactics Trainer, and in the on-board computer of many fighter jet aircraft. We supply on-board software to support weapon launch decisions for the F-15, F-16, F-18, F-22 and Joint Strike Fighter (JSF) fighter aircraft. Additionally, FAAC is a prime contractor in respect of the VCTS program. In 2013, our Military Operations group (including VCTS) accounted for 75.4% of our Training and Simulation Division's revenues. Our VCTS project accounted for 40.7% of our Training and Simulation Division's revenues.

Use-of-Force

We are a leading provider of interactive, multimedia, fully digital training simulators for law enforcement, security, military and similar applications. With a large customer base spread over twenty countries around the world, we are a leader in the supply of simulation training products to law enforcement, governmental, and commercial clients. We conduct our interactive training activities and market our interactive training products, such as the MILO (Multiple Interactive Learning/training Objectives) System, the A2Z Classroom Trainer (a state-of-the-art Computer Based Training (CBT) system that allows students to interact with realistic interactive scenarios projected life-size in the classroom), and the Range FDU (firearm diagnostics unit), using our IES Interactive Training nameplate. In 2013, our Use of Force group accounted for 11.0% of our Training and Simulation Division's revenues.

Warranty

We typically offer a one to two year warranty for most of its products. Additionally, we sell extended warranties to our existing customers. In 2013, warranty revenue accounted for 4.1% of our Training and Simulation Division's revenues.

Marketing and Customers

We market our Simulation Division products to all branches of the U.S. military, federal and local government, municipal transportation departments, and public safety groups. Municipalities throughout the U.S. are using our vehicle simulators and use-of-force products, and our penetration in Asia, Europe and the Americas continues through the use of commissioned sales agents and regional distributors.

We have long-term relationships, many of over ten years' duration, with the U.S. Air Force, U.S. Navy, U.S. Army, U.S. Marine Corps, Department of Homeland Security, and most major Department of Defense training and simulation prime contractors and related subcontractors. The quality of our customer relationships is illustrated by the multiple program contract awards we have earned from many of our customers.

Competition

Our technical excellence, superior product reliability, and high customer satisfaction have enabled us to develop market leadership and attractive competitive positions in each of our product areas.

Table of Contents

VEHICLE SIMULATORS

Several potential competitors in this segment are large, diversified defense and aerospace conglomerates who do not focus on our specific niches. As such, we are able to provide service on certain large military contracts through strategic agreements with these organizations or can compete directly with these organizations based on our strength in developing higher quality software solutions. In municipal market applications, we compete against smaller, less sophisticated software companies. Many of our competitors have financial, technical, marketing, sales, manufacturing, distribution and other resources significantly greater than ours.

MILITARY OPERATIONS

Currently no significant competitors participate in the markets we serve around our weapon simulation niche. Our over 35-year history in this space provides a library of resources that would require a competitor to invest heavily in to offer a comparable product. The companies that could logically compete with us if they chose would be the companies that now subcontract this work to us: Boeing, Raytheon and Cubic.

USE OF FORCE

We compete against a number of established companies that provide similar products and services, many of which have financial, technical, marketing, sales, manufacturing, distribution and other resources significantly greater than ours. There are also companies whose products do not compete directly, but are sometimes closely related. Firearms Training Systems, Inc., Advanced Interactive Systems, Inc., and LaserShot Inc. are our main competitors in this space.

Battery and Power Systems Division

We manufacture and sell Lithium and Zinc-Air batteries for defense and security products and other military applications through our Battery and Power Systems Division. During 2013 and 2012, revenues from our Battery and Power Systems Division were approximately $25.1 million and $20.8 million, respectively.

Lithium Batteries and Charging Systems for the Military

INTRODUCTION

We sell lithium batteries and charging systems, including the SWIPES™ power hubs we produce for the Army's Soldier Warrior program, to the military through our subsidiaries Epsilor-EFL and EFB.

We specialize in the design and manufacture of primary and rechargeable batteries, related electronic circuits and associated chargers for military applications. We have experience in working with government agencies, the military and large corporations. Our technical team has significant expertise in the fields of electrochemistry, electronics, software and battery design, production, packaging and testing.

Our Soldier Wearable Integrated Power Equipment System, or SWIPES™, power hub utilizes the MOLLE vest and integrates force protection electronics and communications equipment with an advanced battery. The system utilizes a modular power distribution system that is powered by BA-8180/U, BA-8140/U Zinc-air batteries or the LI-145, BB2590 rechargeable batteries for direct power of equipment, allowing for extended mission times without the burden of power source swaps or charging due to their high energy density, and reducing battery weight soldiers carry by up to 30%. The batteries continuously charge the secondary batteries inside various devices, such as two way radios, GPS units and shot detection systems. The SWIPES™ product allows for individual tailoring by the warfighter and is designed to accept new applications as they become available. The SWIPES™ power hub was recognized by the U.S Army Research, Development and Engineering Command as one of the U.S. Army's ten greatest inventions of 2010.

Table of Contents

Competition

The main competitors for our lithium-ion battery products are Bren-tronics Inc. in the United States, which controls much of the U.S. rechargeable market, ABSL Power Solutions Limited (a wholly owned subsidiary of CIP Industries Incorporated LLP) in the United Kingdom, which has the majority of the English military market, and Ultralife Batteries, Inc. in the United States. On the primary end of the market there are a host of players who include the cell manufacturers themselves, including Saft S.A. and Ultralife Batteries, Inc.

It should be noted that a number of OEMs, such as Motorola, have internal engineering groups that can develop competitive products in-house. Additionally, many of our competitors have financial, technical, marketing, sales, manufacturing, distribution and other resources significantly greater than ours.

Marketing

We market to our existing customers through direct sales. To generate new customers and applications, we rely on our working relationship with a selection of OEMs, with the intent of having these OEMs design our products into their equipment, thereby creating a market with a high entry barrier. Another avenue for market entry is via strategic relationships with major cell manufacturers. We are now starting direct marketing efforts to emerging markets where we believe the number of local mature competitors is limited.

Manufacturing

Our battery production lines for military batteries and chargers have been ISO-9001 certified since 1994. We believe that Epsilor-EFL's 23,000 square foot facility in Dimona, Israel has the necessary capabilities and operations to support our production cycle.

Zinc-Air Batteries and Chargers for the Military

Introduction

We base our strategy in the field of Zinc-Air military batteries on the development and commercialization of our Zinc-Air battery technology, as applied in the batteries we produce for the U.S. Army's Communications and Electronics Command (CECOM), through our subsidiary EFB. We will continue to seek new applications for our technology in defense projects, wherever synergistic technology and business benefits may exist. We intend to continue to develop our battery products for defense agencies, and plan to sell our products either directly to such agencies or through prime contractors. We will also look to extend our reach to military markets outside the United States.

Our batteries have been used in both Afghanistan (Operation Enduring Freedom) and in Iraq (Operation Iraqi Freedom). Our BA-8180/U Zinc-Air battery was recognized by the U.S Army Research, Development and Engineering Command as one of the U.S. Army's ten greatest inventions of 2003.

Our Zinc-Air batteries, rechargeable batteries and battery chargers for the military are manufactured through EFB. EFB's facilities have been granted ISO 9001 "Top Quality Standard" certification.

Markets/Applications

As an external alternative to the popular lithium based BA-5590/U, the BA-8180/U can be used in many applications operated by the BA-5590/U. The BA-8180/U can be used for a variety of military applications.

Customers

The principal customers for our Zinc-Air batteries during 2013 were the U.S. Army's Communications-Electronics Command (CECOM) and the Defense Logistics Agency (DLA). In addition, we continue to further penetrate Special Forces and other specific U.S. military units with direct sales.

Table of Contents

Competition

The BA-8180/U is the only Zinc-Air battery to hold a U.S. Army battery designation and an NSN. It does, however, compete with other primary (disposable) batteries, and primarily lithium based batteries. In some cases it will also compete with rechargeable batteries.

Zinc-Air batteries are inherently safer than primary lithium battery packs in storage, transportation, use, and disposal, and are more cost-effective. They are lightweight, with up to twice the energy density of primary lithium battery packs. Zinc-Air batteries for the military are also under development by Rayovac Corporation. Rayovac's military Zinc-Air batteries utilize cylindrical cells, rather than the prismatic cells that we developed. While cylindrical cells may provide higher specific power than our prismatic cells, we believe they will generally have lower energy densities and be more difficult to manufacture.

The most popular competing primary battery in use by the US Armed Forces is the BA-5590/U, which uses lithium-sulfur dioxide ($LiSO_2$) cells. The largest suppliers of $LiSO_2$ batteries to the US military are believed to be Saft America Inc. and Eagle Picher Technologies LLC. The battery compartment of most military communications equipment, as well as other military equipment, is designed for the XX90 family of batteries, of which the BA-5590/U battery is the most commonly deployed. Another primary battery in this family is the BA-5390/U, which uses lithium-manganese dioxide ($LiMnO_2$) cells. Suppliers of $LiMnO_2$ batteries include Ultralife Batteries Inc., Saft and Eagle Picher.

Rechargeable batteries in the XX90 family include lithium-ion (BB-2590/U) and nickel-metal hydride (BB-390/U) batteries which may be used in training missions in order to save the higher costs associated with primary batteries. These rechargeable batteries have also become more prevalent in combat use as their energy densities improve, their availability expands and their State-of-Charge Indicator (SOCI) technologies become more reliable.

Our BA-8180/U does not fit inside the XX90 battery compartment of any military equipment, and therefore is connected externally using an interface adapter that we also sell to the Army. Our battery offers greatly extended mission time, along with lower total mission cost, and these significant advantages often greatly outweigh the slight inconvenience of fielding an external battery.

Manufacturing

EFB maintains a battery and electronics development and manufacturing facility in Auburn, Alabama, housed in a 30,000-square-foot light industrial space leased from the City of Auburn. We also have production capabilities for some battery components at Epsilor-EFL's facility in Beit Shemesh, Israel. Both of these facilities have received ISO 9001 "Top Quality Standard" certification.

Lifejacket Lights

Products

We have a product line consisting of seven lifejacket light models, five for use with marine life jackets and two for use with aviation life vests, all of which work in both freshwater and seawater. Each of our lifejacket lights is certified for use by relevant governmental agencies under various U.S. and international regulations. We manufacture, assemble and package all our lifejacket lights through Epsilor-EFL in our factory in Beit Shemesh, Israel.

Marketing

We market our marine safety products through our own network of distributors in Europe, the United States, Asia and Oceania. We market our lights to the commercial aviation industry through an independent company that receives a commission on sales.

Competition

The largest manufacturer of aviation and marine safety products, including TSO and SOLAS-approved lifejacket lights, is ACR Electronics Inc. of Hollywood, Florida. Other significant competitors in the marine market include Daniamant Aps of Denmark and England, and SIC of Italy.

Table of Contents

Backlog

We generally sell our products under standard purchase orders. Orders constituting our backlog are subject to changes in delivery schedules and are typically cancelable by our customers until a specified time prior to the scheduled delivery date. Accordingly, our backlog is not necessarily an accurate indication of future sales. As of December 31, 2013 and 2012, our backlog for the following year was approximately $58.0 million and $87.7 million, respectively, divided between our divisions as follows:

Division	2013	2012
Training and Simulation Division	$ 45,892,000	$ 72,404,000
Battery and Power Systems Division	12,067,000	15,293,000
TOTAL:	$ 57,959,000	$ 87,697,000

Major Customers

During 2013 and 2012, including both of our divisions, various branches of the United States military accounted for approximately 55% and 54% of our revenues. See "Item 1A. Risk Factors – Risks Related to Government Contracts," below.

Patents and Trade Secrets

We rely on certain proprietary technology and seek to protect our interests through a combination of patents, trademarks, copyrights, know-how, trade secrets and security measures, including confidentiality agreements. Our policy generally is to secure protection for significant innovations to the fullest extent practicable. Further, we seek to expand and improve the technological base and individual features of our products through ongoing research and development programs.

We rely on the laws of unfair competition and trade secrets to protect our proprietary rights. We attempt to protect our trade secrets and other proprietary information through confidentiality and non-disclosure agreements with customers, suppliers, employees and consultants, and through other security measures. However, we may be unable to detect the unauthorized use of, or take appropriate steps to enforce our intellectual property rights. Effective trade secret protection may not be available in every country in which we offer or intend to offer our products and services to the same extent as in the United States. Failure to adequately protect our intellectual property could harm or even destroy our brands and impair our ability to compete effectively. Further, enforcing our intellectual property rights could result in the expenditure of significant financial and managerial resources and may not prove successful. Although we intend to protect our rights vigorously, there can be no assurance that these measures will be successful.

Research and Development

During the years ended December 31, 2013 and 2012, our research and product development expenses were approximately $3.0 million and $2.0 million, respectively.

Employees

As of December 31, 2013, we had approximately 373 full-time employees worldwide. Our success will depend in large part on our ability to attract and retain skilled and experienced employees.

With respect to those of our employees who are Israeli residents, Israeli law generally requires severance pay upon the retirement or death of an employee or termination of employment without due cause; additionally, some of our senior employees have special severance arrangements, certain of which are described under "Item 11. Executive Compensation – Employment Contracts," below. We currently partially fund our ongoing severance obligations by making monthly payments to approved severance funds or insurance policies.

Table of Contents

ITEM 1A. RISK FACTORS

The following factors, among others, could cause actual results to differ materially from those contained in forward-looking statements made in this Report and presented elsewhere by management from time to time.

Business-Related Risks

We have had a history of losses and may incur future losses.

We were incorporated in 1990 and began our operations in 1991. We have funded our operations principally from funds raised in public and private offerings of our common stock and equity and debt securities convertible or exercisable into shares of our common stock; research contracts and supply contracts; funds received under research and development grants from the Government of Israel; and sales of products that we and our subsidiaries manufacture. We have incurred significant net losses since our inception. Additionally, as of December 31, 2013, we had an accumulated deficit (including discontinued operations) of approximately $183.1 million. In an effort to reduce operating expenses and maximize available resources, we have consolidated certain of our subsidiaries, shifted personnel and reassigned responsibilities. We have also taken a variety of other measures to limit spending and will continue to assess our internal processes to seek additional cost-structure improvements. Although we believe that such steps will help to reduce our operating expenses and maximize our available resources, there can be no assurance that we will ever be able to achieve or maintain profitability consistently or that our business will continue to exist.

We need significant amounts of capital to operate and grow our business and to pay our debt.

We require substantial funds to operate our business, including marketing our products and developing and marketing new products. To the extent that we are unable to fully fund our operations, including repaying our outstanding debt, through profitable sales of our products and services, we will need to seek additional funding, including through the issuance of equity or debt securities. In addition, based on our internal forecasts, the assumptions described under “Liquidity and Capital Resources” below, and subject to the other risk factors described herein, we believe that our present cash position and anticipated cash flows from operations and lines of credit should be sufficient to satisfy our current estimated cash requirements for 2014. However, in the event our internal forecasts and other assumptions regarding our liquidity prove to be incorrect, we may need to seek additional funding. There can be no assurance that we will obtain any such additional financing in a timely manner, on acceptable terms, or at all. If additional funds are raised by issuing equity securities or convertible debt securities, stockholders may incur further dilution. If we incur additional indebtedness, we may be subject to affirmative and negative covenants that may restrict our ability to operate or finance our business. If additional funding is not secured, we will have to modify, reduce, defer or eliminate parts of our present and anticipated future commitments and/or programs.

Table of Contents

Our existing indebtedness may adversely affect our ability to obtain additional funds and may increase our vulnerability to economic or business downturns.

Our bank and other indebtedness (short and long term) totaled approximately $1.9 million as of December 31, 2013 (not including trade payables, other account payables, capital leases, and accrued severance pay), of which none was bank working capital lines of credit. In addition, we may incur additional indebtedness in the future. Accordingly, we are subject to the risks associated with significant indebtedness, including:

- we must dedicate a portion of our cash flows from operations to pay principal and interest and, as a result, we may have less funds available for operations and other purposes;

- it may be more difficult and expensive to obtain additional funds through financings, if available at all;

- we are more vulnerable to economic downturns and fluctuations in interest rates, less able to withstand competitive pressures and less flexible in reacting to changes in our industry and general economic conditions; and

- if we default under any of our existing debt instruments, including paying the outstanding principal when due, and if our creditors demand payment of a portion or all of our indebtedness, we may not have sufficient funds to make such payments.

The occurrence of any of these events could materially adversely affect our results of operations and financial condition and adversely affect our stock price.

Failure to comply with the terms of our indebtedness could result in a default that could have material adverse consequences for us.

A failure to comply with the obligations contained in the agreements governing our indebtedness could result in an event of default under such agreements which could result in an acceleration of debt under other instruments evidencing indebtedness that contain cross-acceleration or cross-default provisions. If our indebtedness were to be accelerated, there can be no assurance that our future cash flow or assets would be sufficient to repay in full such indebtedness. In February 2013, our primary bank increased our credit line by 50%, from $10.0 million to $15.0 million, and the expiration of the credit line was extended to May 31, 2015. The new credit agreement also contains certain covenants for 2013 through 2015, which are measured on a rolling twelve-month basis, limiting the Maximum Increase in Net Advance to Affiliates to less than 90% of EBITDA and meeting a Fixed Charge Coverage Ratio of not less than 1.1 to 1.0.

We may consider acquisitions in the future to grow our business, and such activity could subject us to various risks.

We may consider acquiring companies that will complement our existing operations or provide us with an entry into markets we do not currently serve. Growth through acquisitions involves substantial risks, including the risk of improper valuation of the acquired business and the risk of inadequate integration. There can be no assurance that suitable acquisition candidates will be available, that we will be able to acquire or manage profitably such additional companies or that future acquisitions will produce returns that justify our investments in such companies. In addition, we may compete for acquisition and expansion opportunities with companies that have significantly greater resources than we do. Furthermore, acquisitions could disrupt our ongoing business, distract the attention of our senior officers, increase our expenses, make it difficult to maintain our operational standards, controls and procedures and subject us to contingent and latent risks that are different, in nature and magnitude, than the risks we currently face.

We may finance future acquisitions with cash from operations or additional debt or equity financings. There can be no assurance that we will be able to generate internal cash or obtain financing from external sources or that, if available, such financing will be on terms acceptable to us. The issuance of additional common stock to finance acquisitions may result in substantial dilution to our stockholders. Any debt financing may significantly increase our leverage and may involve restrictive covenants which limit our operations.

Table of Contents

If we are successful in acquiring additional businesses, we may experience a period of rapid growth that could place significant additional demands on, and require us to expand, our management, resources and management information systems. Our failure to manage any such rapid growth effectively could have a material adverse effect on our financial condition, results of operations and cash flows.

We may not generate sufficient cash flow to service all of our debt obligations.

Our ability to make payments on our indebtedness and to fund our operations depends on our ability to generate cash in the future. Our future operating performance is subject to market conditions and business factors that are beyond our control. Consequently, we cannot assure you that we will generate sufficient cash flow to pay the principal and interest on our debt. If our cash flows and capital resources are insufficient to allow us to make scheduled payments on our debt, we may have to reduce or delay capital expenditures, sell assets, seek additional capital or restructure or refinance our debt. We cannot assure you that the terms of our debt will allow for these alternative measures or that such measures would satisfy our scheduled debt service obligations. In addition, in the event that we are required to dispose of material assets or restructure or refinance our debt to meet our debt obligations, we cannot assure you as to the terms of any such transaction or how quickly such transaction could be completed. Our ability to refinance our indebtedness or obtain additional financing will depend on, among other things:

- our financial condition at the time;
- restrictions in the agreements governing our other indebtedness; and
- other factors, including the condition of the financial markets and our industry.

Our earnings may decline if we write off additional goodwill and other intangible assets.

As of December 31, 2013, we had recorded goodwill of $31.0 million and any future impairment of goodwill or other intangible assets may have a significant impact on earnings. Goodwill is not amortized, but is tested for impairment at the reporting unit level. Goodwill is required to be tested for impairment annually and between annual tests if events or circumstances indicate that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. There are numerous risks that may cause the fair value of a reporting unit to fall below its carrying amount, which could lead to the measurement and recognition of goodwill impairment. These risks include, but are not limited to, adverse changes in legal factors or the business climate, an adverse action or assessment by a regulator, a more-likely-than-not expectation that all or a significant portion of a reporting unit may be disposed of, a sustained decline in our market capitalization, significant negative variances between actual and expected financial results, and lowered expectations of future financial results.

Some of the components of our products pose potential safety risks which could create potential liability exposure for us.

Some of the components of our products contain elements that are known to pose potential safety risks. In addition to these risks, there can be no assurance that accidents in our facilities will not occur. Any accident, whether occasioned by the use of all or any part of our products or technology or by our manufacturing operations, could adversely affect commercial acceptance of our products and could result in significant production delays or claims for damages resulting from injuries. Any of these occurrences would materially adversely affect our operations and financial condition. In the event that our products fail to perform as specified, users of these products may assert claims for substantial amounts. These claims could have a materially adverse effect on our financial condition and results of operations. There is no assurance that the amount of the general product liability insurance that we maintain will be sufficient to cover potential claims or that the present amount of insurance can be maintained at the present level of cost, or at all.

Table of Contents

We are subject to the Dodd-Frank Wall Street Reform and Consumer Protection Act disclosure requirements regarding the use of "conflict minerals"

Beginning in 2014, the Dodd-Frank Wall Street Reform and Consumer Protection Act imposes new disclosure requirements regarding the use of "conflict minerals" mined from the Democratic Republic of Congo and adjoining countries in products, whether or not these products are manufactured by third parties. The definition of "conflict minerals" includes tin, tantalum, tungsten and gold, and their derivatives, some of which we use in the activities of our Battery Division. These new requirements could affect the pricing, sourcing and availability of minerals used in the manufacture of our products. There will be additional costs associated with complying with the disclosure requirements, such as costs related to determining the source of any conflict minerals used in our products. Our supply chain is complex and we may be unable to verify the origins for all metals used in our products. We may also encounter challenges with our customers and stockholders if we are unable to certify that our products are conflict free.

Our fields of business are highly competitive.

The competition to develop defense and security products and to obtain funding for the development of these products is, and is expected to remain, intense.

Our defense and security products compete with other manufacturers of specialized training systems.

Various battery technologies are being considered for use in defense and safety products by other manufacturers and developers, including the following: lead-acid, nickel-cadmium, nickel-iron, nickel-zinc, nickel-metal hydride, sodium-sulfur, sodium-nickel chloride, zinc-bromine, lithium-ion, lithium-polymer, lithium-iron sulfide, primary lithium, rechargeable alkaline and Zinc-Air.

Many of our competitors have financial, technical, marketing, sales, manufacturing, distribution and other resources significantly greater than ours. If we are unable to compete successfully in each of our operating areas, our business and results of operations could be materially adversely affected.

Our business is dependent on proprietary rights that may be difficult to protect and could affect our ability to compete effectively.

Our ability to compete effectively will depend on our ability to maintain the proprietary nature of our technology and manufacturing processes through a combination of patent and trade secret protection, non-disclosure agreements and licensing arrangements.

Litigation, or participation in administrative proceedings, may be necessary to protect our proprietary rights. This type of litigation can be costly and time consuming and could divert company resources and management attention to defend our rights, and this could harm us even if we were to be successful in the litigation. In the absence of patent protection, and despite our reliance upon our proprietary confidential information, our competitors may be able to use innovations similar to those used by us to design and manufacture products directly competitive with our products. In addition, no assurance can be given that others will not obtain patents that we will need to license or design around. To the extent any of our products are covered by third-party patents, we could need to acquire a license under such patents to develop and market our products.

Despite our efforts to safeguard and maintain our proprietary rights, we may not be successful in doing so. In addition, competition is intense, and there can be no assurance that our competitors will not independently develop or patent technologies that are substantially equivalent or superior to our technology. In the event of patent litigation, we cannot assure you that a court would determine that we were the first creator of inventions covered by our issued patents or pending patent applications or that we were the first to file patent applications for those inventions. If existing or future third-party patents containing broad claims were upheld by the courts or if we were found to infringe third-party patents, we may not be able to obtain the required licenses from the holders of such patents on acceptable terms, if at all. Failure to obtain these licenses could cause delays in the introduction of our products or necessitate costly attempts to design around such patents, or could foreclose the development, manufacture or sale of our products. We could also incur substantial costs in defending ourselves in patent infringement suits brought by others and in prosecuting patent infringement suits against infringers.

Table of Contents

We also rely on trade secrets and proprietary know-how that we seek to protect, in part, through non-disclosure and confidentiality agreements with our customers, employees, consultants, and entities with which we maintain strategic relationships. We cannot assure you that these agreements will not be breached, that we would have adequate remedies for any breach or that our trade secrets will not otherwise become known or be independently developed by competitors.

We are dependent on key personnel and our business would suffer if we fail to retain them.

We are highly dependent on the president of our FAAC subsidiary and the general managers of our Epsilor-EFL subsidiary and the loss of the services of either or both of these persons could adversely affect us. We are especially dependent on the services of our Chairman and Chief Executive Officer, Robert S. Ehrlich, and our President, Steven Esses. The loss of either Mr. Ehrlich or Mr. Esses could have a material adverse effect on us. We are party to employment agreements with Mr. Ehrlich and Mr. Esses, both of which agreements expire at the end of 2015. Pursuant to these agreements, effective September 30, 2014, Mr. Esses will become our Chief Executive Officer, and Mr. Ehrlich will remain as our Chairman. We do not have key-man life insurance on either Mr. Ehrlich or Mr. Esses.

We face risks related to general domestic and global economic conditions.

In general, our operating results can be significantly affected by negative economic conditions, high labor, material and commodity costs and unforeseen changes in demand for our products and services. These risks are heightened as economic conditions globally have deteriorated significantly and may remain at recessionary levels for the foreseeable future. The current recessionary conditions could have a potentially significant negative impact on demand for our products and services, which may have a direct negative impact on our sales and profitability, as well as our ability to generate sufficient internal cash flows or access credit at reasonable rates to meet future operating expenses, service debt and fund capital expenditures.

There are risks involved with the international nature of our business.

A significant portion of our sales are made to customers located outside the U.S., primarily in Europe and Asia. In 2013 and 2012, 16.5% and 20.4%, respectively, of our revenues, were derived from sales to customers located outside the U.S. We expect that our international customers will continue to account for a substantial portion of our revenues in the near future. Sales to international customers may be subject to political and economic risks, including political instability, currency controls, exchange rate fluctuations, foreign taxes, longer payment cycles and changes in import/export regulations and tariff rates. In addition, various forms of protectionist trade legislation have been and in the future may be proposed in the U.S. and certain other countries. Any resulting changes in current tariff structures or other trade and monetary policies could adversely affect our sales to international customers. See also "Israel-Related Risks," below.

Risks Related to Government Contracts

A significant portion of our business is dependent on government contracts and reduction or reallocation of defense or law enforcement spending could reduce our revenues.

Many of our Training and Simulation Division's customers to date have been in the public sector of the U.S., including the federal, state and local governments, and in the public sectors of a number of other countries. Additionally, the majority of EFB's sales to date of battery products for the military and defense sectors have been in the public sector in the United States. A significant decrease in the overall level or allocation of defense or law enforcement spending in the U.S. or other countries could reduce our revenues and have a material adverse effect on our future results of operations and financial condition.

Table of Contents

Sales to public sector customers are subject to a multiplicity of detailed regulatory requirements and public policies as well as to changes in training and purchasing priorities. Contracts with public sector customers may be conditioned upon the continuing availability of public funds, which in turn depends upon lengthy and complex budgetary procedures, and may be subject to certain pricing constraints. Moreover, U.S. government contracts and those of many international government customers may generally be terminated for a variety of factors when it is in the best interests of the government and contractors may be suspended or debarred for misconduct at the discretion of the government. There can be no assurance that these factors or others unique to government contracts or the loss or suspension of necessary regulatory licenses will not reduce our revenues and have a material adverse effect on our future results of operations and financial condition.

A decline in the U.S. Government defense budget, changes in budgetary priorities or timing of contract awards may adversely affect our future revenues and limit our growth prospects.

Revenues under contracts with the U.S. Department of Defense (“DoD”), either as a prime contractor or subcontractor to other contractors, represent a substantial portion of our total revenues. Our operating results could be adversely affected by spending caps or changes in the budgetary priorities of the U.S. Government or the DoD, as well as delays in program starts or the award of contracts or task orders under contracts.

An impasse in federal budget decision-making could lead to substantial delays or reductions in federal spending. For example, as a result of inability of the U.S. Government to reach agreement on budget reduction measures required by the Budget Control Act of 2011, sequestration triggered substantial automatic spending reductions beginning in January 2013, divided between defense and domestic spending over a nine-year period. As a result, U.S. Government funding for certain of our customers may be reduced, delayed or eliminated, which could significantly impact these customers’ demand for our products and services and if so would have a material adverse effect on our business, results of operations and cash flows. While the future impact of sequestration is uncertain, these automatic across-the-board budget cuts in sequestration could have significant negative consequences to our business and industry.

In years when Congress does not complete its budget process before the end of its fiscal year (September 30), government operations are funded through a continuing resolution (CR) that temporarily funds federal agencies. Recent CRs have generally provided funding at the levels provided in the previous fiscal year and have not authorized new spending initiatives. When the federal government operates under a CR, delays can occur in the procurement of products and services. Historically, such delays have not had a material effect on our business; however, should funding of the federal government by CR be prolonged or extended through the entire government 2014 fiscal year, and sequestration is not alleviated, it could continue to have significant consequences to our business and our industry.

Additionally, our business could be seriously affected if the demand for and priority of funding for combat operations in Afghanistan decreases which may reduce the demand for our services on contracts supporting some operations and maintenance activities in the Department of Defense or if we experience an increase in set-asides for small businesses, which could result in our inability to compete directly for prime contracts.

Our U.S. government contracts may be terminated at any time and may contain other unfavorable provisions.

The U.S. government typically can terminate or modify any of its contracts with us either for its convenience or if we default by failing to perform under the terms of the applicable contract. A termination arising out of our default could expose us to liability and have a material adverse effect on our ability to re-compete for future contracts and orders. Our U.S. government contracts contain provisions that allow the U.S. government to unilaterally suspend us from receiving new contracts pending resolution of alleged violations of procurement laws or regulations, reduce the value of existing contracts, issue modifications to a contract and control and potentially prohibit the export of our products, services and associated materials.

Table of Contents

Government agencies routinely audit government contracts. These agencies review a contractor's performance on its contract, pricing practices, cost structure and compliance with applicable laws, regulations and standards. If we are audited, we will not be reimbursed for any costs found to be improperly allocated to a specific contract, while we would be required to refund any improper costs for which we had already been reimbursed. Therefore, an audit could result in a substantial adjustment to our revenues. If a government audit uncovers improper or illegal activities, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeitures of profits, suspension of payments, fines and suspension or debarment from doing business with United States government agencies. We could suffer serious reputational harm if allegations of impropriety were made against us. A governmental determination of impropriety or illegality, or an allegation of impropriety, could have a material adverse effect on our business, financial condition or results of operations.

We may be liable for penalties under a variety of procurement rules and regulations, and changes in government regulations could adversely impact our revenues, operating expenses and profitability.

Our defense and commercial businesses must comply with and are affected by various government regulations that impact our operating costs, profit margins and our internal organization and operation of our businesses. Among the most significant regulations are the following:

- the U.S. Federal Acquisition Regulations, which regulate the formation, administration and performance of government contracts;
- the U.S. Truth in Negotiations Act, which requires certification and disclosure of all cost and pricing data in connection with contract negotiations; and
- the U.S. Cost Accounting Standards, which impose accounting requirements that govern our right to reimbursement under certain cost-based government contracts.

These regulations affect how we and our customers do business and, in some instances, impose added costs on our businesses. Any changes in applicable laws could adversely affect the financial performance of the business affected by the changed regulations. With respect to U.S. government contracts, any failure to comply with applicable laws could result in contract termination, price or fee reductions or suspension or debarment from contracting with the U.S. government.

We may not be able to receive or retain the necessary licenses or authorizations required for us to export or re-export our products, technical data or services, or to transfer technology from foreign sources (including our own subsidiaries) and to work collaboratively with them. Denials of such licenses and authorizations could have a material adverse effect on our business and results of operations.

U.S. regulations concerning export controls require us to screen potential customers, destinations, and technology to ensure that sensitive equipment, technology and services are not exported in violation of U.S. policy or diverted to improper uses or users.

In order for us to export certain products, technical data or services, we are required to obtain licenses from the U.S. government, often on a transaction-by-transaction basis. These licenses are generally required for the export of the military versions of our products and technical data and for defense services. We cannot be sure of our ability to obtain the U.S. government licenses or other approvals required to export our products, technical data and services for sales to foreign governments, foreign commercial customers or foreign destinations.

In addition, in order for us to obtain certain technical know-how from foreign vendors and to collaborate on improvements on such technology with foreign vendors, including at times our own foreign subsidiaries, we may need to obtain U.S. government approval for such collaboration through manufacturing license or technical assistance agreements approved by U.S. government export control agencies.

The U.S. government has the right, without notice, to revoke or suspend export licenses and authorizations for reasons of foreign policy, issues over which we have no control.

Table of Contents

Failure to receive required licenses or authorizations would hinder our ability to export our products, data and services and to use some advanced technology from foreign sources. This could have a material adverse effect on our business, results of operations and financial condition.

Our failure to comply with export control rules could have a material adverse effect on our business.

Our failure to comply with these rules could expose us to significant criminal or civil enforcement action by the U.S. government, and a conviction could result in denial of export privileges, as well as contractual suspension or debarment under U.S. government contracts, either of which could have a material adverse effect on our business, results of operations and financial condition.

Our operating margins may decline under our fixed-price contracts if we fail to estimate accurately the time and resources necessary to satisfy our obligations.

Some of our contracts are fixed-price contracts under which we bear the risk of any cost overruns. Our profits are adversely affected if our costs under these contracts exceed the assumptions that we used in bidding for the contract. Often, we are required to fix the price for a contract before we finalize the project specifications, which increases the risk that we will misprice these contracts. The complexity of many of our engagements makes accurately estimating our time and resources more difficult. In the event we fail to estimate our time and resources accurately, our expenses will increase and our profitability, if any, under such contracts will decrease.

If we are unable to retain our contracts with the U.S. government and subcontracts under U.S. government prime contracts in the competitive rebidding process, our revenues may suffer.

Upon expiration of a U.S. government contract or subcontract under a U.S. government prime contract, if the government customer requires further services of the type provided in the contract, there is frequently a competitive rebidding process. We cannot guarantee that we, or if we are a subcontractor that the prime contractor, will win any particular bid, or that we will be able to replace business lost upon expiration or completion of a contract. Further, all U.S. government contracts are subject to protest by competitors. The termination or nonrenewal of several of our significant contracts could result in considerable revenue shortfalls.

The loss of, or a significant reduction in, U.S. military business would have a material adverse effect on us.

U.S. military contracts account for a significant portion of our business. The U.S. military funds these contracts in annual increments. These contracts require subsequent authorization and appropriation that may not occur or that may be greater than or less than the total amount of the contract. Changes in the U.S. military’s budget, spending allocations and the timing of such spending could adversely affect our ability to receive future contracts. None of our contracts with the U.S. military has a minimum purchase commitment, and the U.S. military generally has the right to cancel its contracts unilaterally without prior notice. The loss of, or a significant reduction in, U.S. military business could have a material adverse effect on our business, financial condition, results of operations and liquidity.

Table of Contents

Market-Related Risks

The price of our common stock is volatile.

The market price of our common stock has been volatile in the past and may change rapidly in the future. The following factors, among others, may cause significant volatility in our stock price:

… announcements by us, our competitors or our customers;

… the introduction of new or enhanced products and services by us or our competitors;

… changes in the perceived ability to commercialize our technology compared to that of our competitors;

… rumors relating to our competitors or us;

… actual or anticipated fluctuations in our operating results;

… the issuance of our securities, including warrants, in connection with financings and acquisitions; and

… general market or economic conditions.

If our shares were to be delisted, our stock price might decline further and we might be unable to raise additional capital.

One of the continued listing standards for our stock on the Nasdaq Stock Market (both the Nasdaq Global Market, on which our stock is currently listed, and the Nasdaq Capital Market) is the maintenance of a $1.00 bid price. Our stock price has periodically traded below $1.00 in the past. If our bid price were to decrease and remain below $1.00 for 30 consecutive business days, Nasdaq could notify us of our failure to meet the continued listing standards, after which we would have 180 calendar days to correct such failure or be delisted from the Nasdaq Global Market. Although we would have the opportunity to appeal any potential delisting, there can be no assurances that this appeal would be resolved favorably. As a result, there can be no assurance that our common stock will remain listed on the Nasdaq Global Market. If our common stock were to be delisted from the Nasdaq Global Market, we might apply to be listed on the Nasdaq Capital Market if we then met the initial listing standards of the Nasdaq Capital Market (other than the $1.00 minimum bid standard). If we were to move to the Nasdaq Capital Market, current Nasdaq regulations would give us the opportunity to obtain an additional 180-day grace period if we meet certain net income, stockholders' equity or market capitalization criteria; if at the end of that period we had not yet achieved compliance with the minimum bid price rule, we would be subject to delisting from the Nasdaq Capital Market. Although we would have the opportunity to appeal any potential delisting, there can be no assurances that this appeal would be resolved favorably. In addition, we may be unable to satisfy the other continued listing requirements. As a result, there can be no assurance that our common stock will remain listed on the Nasdaq Stock Market.

While our stock would continue to trade on the over-the-counter bulletin board following any delisting from the Nasdaq, any such delisting of our common stock could have an adverse effect on the market price of, and the efficiency of the trading market for, our common stock. Trading volume of over-the-counter bulletin board stocks has been historically lower and more volatile than stocks traded on an exchange or the Nasdaq Stock Market. As a result, holders of our securities could find it more difficult to sell their securities. Also, if in the future we were to determine that we need to seek additional equity capital, it could have an adverse effect on our ability to raise capital in the public equity markets.

Table of Contents

In addition, if we fail to maintain Nasdaq listing for our securities, and no other exclusion from the definition of a "penny stock" under the Securities Exchange Act of 1934, as amended, is available, then any broker engaging in a transaction in our securities would be required to provide any customer with a risk disclosure document, disclosure of market quotations, if any, disclosure of the compensation of the broker-dealer and its salesperson in the transaction and monthly account statements showing the market values of our securities held in the customer's account. The bid and offer quotation and compensation information must be provided prior to effecting the transaction and must be contained on the customer's confirmation. If brokers become subject to the "penny stock" rules when engaging in transactions in our securities, they would become less willing to engage in transactions, thereby making it more difficult for our stockholders to dispose of their shares.

***We do not anticipate paying cash dividends*.**

We currently intend to retain any future earnings for funding growth and, as a result, do not expect to pay any cash dividends in the foreseeable future. Additionally, our ability to declare dividends should we decide to do so is restricted by the terms of our debt agreements.

Our certificate of incorporation and bylaws and Delaware law contain provisions that could discourage a takeover.

Provisions of our amended and restated certificate of incorporation may have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from attempting to acquire, control of us. These provisions could limit the price that certain investors might be willing to pay in the future for shares of our common stock. These provisions:

… divide our board of directors into three classes serving staggered three-year terms;

… only permit removal of directors by stockholders "for cause," and require the affirmative vote of at least 85% of the outstanding common stock to so remove; and

… allow us to issue preferred stock without any vote or further action by the stockholders.

The classification system of electing directors and the removal provision may tend to discourage a third-party from making a tender offer or otherwise attempting to obtain control of us and may maintain the incumbency of our board of directors, as the classification of the board of directors increases the difficulty of replacing a majority of the directors. These provisions may have the effect of deferring hostile takeovers, delaying changes in our control or management, or may make it more difficult for stockholders to take certain corporate actions. The amendment of any of these provisions would require approval by holders of at least 85% of the outstanding common stock.

Israel-Related Risks

A significant portion of our operations takes place in Israel, and we could be adversely affected by the economic, political and military conditions in that region.

The offices and facilities of Epsilor-EFL are located in Israel (in Beit Shemesh and Dimona, both of which are within Israel's pre-1967 borders). Most of our senior management is located in Beit Shemesh. Although we expect that most of our sales will continue to be made to customers outside Israel, we are nonetheless directly affected by economic, political and military conditions in that country. Accordingly, any major hostilities involving Israel or the interruption or curtailment of trade between Israel and its present trading partners could have a material adverse effect on our operations. Since the establishment of the State of Israel in 1948, a number of armed conflicts have taken place between Israel and its Arab neighbors and a state of hostility, varying in degree and intensity, has led to security and economic problems for Israel.

Table of Contents

Historically, Arab states have boycotted any direct trade with Israel and to varying degrees have imposed a secondary boycott on any company carrying on trade with or doing business in Israel. Although in October 1994, the states comprising the Gulf Cooperation Council (Saudi Arabia, the United Arab Emirates, Kuwait, Dubai, Bahrain and Oman) announced that they would no longer adhere to the secondary boycott against Israel, and Israel has entered into certain agreements with Egypt, Jordan, the Palestine Liberation Organization and the Palestinian Authority, Israel has not entered into any peace arrangement with Syria or Lebanon. Moreover, since September 2000, there has been a significant deterioration in Israel's relationship with the Palestinian Authority. Efforts to resolve the problem have failed to result in an agreeable solution.

In July and August of 2006, Israel was involved in a full-scale armed conflict with Hezbollah, a Lebanese Islamist Shiite militia group and political party, in southern Lebanon, which involved missile strikes against civilian targets in northern Israel that resulted in economic losses. On August 14, 2006, a ceasefire was declared relating to that armed conflict, although it is uncertain whether or not the ceasefire will continue to hold.

Israel withdrew unilaterally from the Gaza Strip and certain areas in northern Samaria in 2005. Thereafter Hamas, an Islamist terrorist group responsible for many attacks, including missile strikes against Israeli civilian targets, won the majority of the seats in the Parliament of the Palestinian Authority in January 2006 and took control of the entire Gaza Strip, by force, in June 2007. Since then, Hamas and other Palestinian movements have launched thousands of missiles from the Gaza strip into civilian targets in southern Israel. In late 2008, a sharp increase in rocket fire from Gaza on Israel's western Negev region, extending as far as 25 miles into Israeli territory and disrupting most day-to-day civilian activity in the proximity of the border with the Gaza Strip, prompted the Israeli government to launch military operations against Hamas that lasted approximately three weeks. Israel declared a unilateral ceasefire in January 2009, which substantially diminished the frequency of, but did not eliminate, Hamas rocket attacks against Israeli cities. In November 2012, following an increase in rocket attacks and hostile activity originating from the Gaza Strip, the Israeli government launched an air attack on Hamas. Rockets were fired into Israel extending as far as Tel Aviv and Jerusalem. After seven days, a ceasefire was agreed to by Israel and Hamas. Since then, rocket attacks have been significantly reduced, but not totally stopped. There can be no assurance that this period of relative calm will continue, especially in light of continuing rhetoric between Iran and Israel.

Our Israeli production facilities in the cities of Beit Shemesh and Dimona, are located approximately 27 miles and 38 miles, respectively, from the nearest point of the border with the Gaza Strip. There can be no assurance that Hamas will not begin to use on a more frequent basis longer-range missiles capable of reaching our facilities, which could result in a significant disruption of the Israel-based portion of our business. Additionally, recent political events, including political uprisings, social unrest and regime change, in various countries in the Middle East and North Africa have weakened the stability of those countries, which could result in extremists coming to power, including in countries with which Israel has signed peace treaties that may not be respected by extremists. In addition, Iran has threatened to attack Israel and Israel is reported to be considering a pre-emptive attack on Iran, which is widely believed to be developing nuclear weapons. Iran is also believed to have a strong influence among extremist groups in the region, such as Hamas in Gaza and Hezbollah in Lebanon. These situations may potentially escalate in the future to more violent events which may affect Israel and us. Any major hostilities involving Israel, including as a result of the military conflicts between the Fatah and Hamas in Gaza Strip, Judea and Samaria, or the interruption or curtailment of trade between Israel and its present trading partners could have a material adverse effect on our business, operating results and financial condition.

In addition to the foregoing, since the end of 2010, numerous acts of protest and civil unrest have taken place in several countries in the Middle East and North Africa, many of which involved significant violence. The civil unrest in Egypt, which borders Israel, resulted in significant changes to the country's government. In Syria, also bordering Israel, large and violent protests against the government are taking place. The ultimate effect of these developments on the political and security situation in the Middle East and on Israel's position within the region is not clear at this time.

Service of process and enforcement of civil liabilities on us and our officers may be difficult to obtain.

We are organized under the laws of the State of Delaware and will be subject to service of process in the United States. However, approximately 26.9% of our assets are located outside the United States. In addition, two of our directors and some of our executive officers are residents of Israel and a portion of the assets of such directors and executive officers are located outside the United States.

Table of Contents

There is doubt as to the enforceability of civil liabilities under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, in original actions instituted in Israel. As a result, it may not be possible for investors to enforce or effect service of process upon these directors and executive officers or to judgments of U.S. courts predicated upon the civil liability provisions of U.S. laws against our assets, as well as the assets of these directors and executive officers. In addition, awards of punitive damages in actions brought in the U.S. or elsewhere may be unenforceable in Israel.

Exchange rate fluctuations between the U.S. dollar and the Israeli NIS may negatively affect our earnings.

Although a substantial majority of our revenues and a substantial portion of our expenses are denominated in U.S. dollars, a portion of our costs, including personnel and facilities-related expenses, is incurred in New Israeli Shekels (NIS). Inflation in Israel will have the effect of increasing the dollar cost of our operations in Israel, unless it is offset on a timely basis by a devaluation of the NIS relative to the dollar. In 2013, the inflation-adjusted NIS appreciated against the dollar.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our primary executive offices are located in FAAC's offices, consisting of approximately 17,300 square feet of office and warehouse space in Ann Arbor, Michigan, pursuant to a lease expiring in July 2018. FAAC has also leased 17,200 square feet of office and warehouse space adjacent to our main offices pursuant to a lease beginning in June 2006 and expiring in July 2018. Additionally, pursuant to a lease expiring in October 2014, FAAC is leasing approximately 10,000 square feet of office and lab space in Orlando, Florida.

FAAC also leases approximately 5,500 square feet in Royal Oak, Michigan pursuant to a lease terminating in November 2018.

In August 2011 FAAC purchased 40,000 square feet of office and warehouse space in Ann Arbor, Michigan, approximately three miles from its current location, where it began to consolidate certain of its operations beginning in 2011. Subsequently, in December 2012, FAAC subleased 7,000 square feet of surplus space of the purchased building to a non-profit organization as office space for a term of 10 years with an option to terminate the sublease with a one year prior notice in May 2018.

EFB operates out of our leased Auburn, Alabama facilities, constituting approximately 30,000 square feet, which is leased from the City of Auburn through January, 2015.

Table of Contents

Our management and administrative facilities and research, development and production facilities for the manufacture and assembly of our Survivor Locator Lights, constituting approximately 21,000 square feet, are located in Beit Shemesh, Israel, located between Jerusalem and Tel-Aviv (within Israel's pre-1967 borders). The lease for these facilities in Israel expires on December 31, 2017. Most of the members of our senior management, including our Chief Executive Officer and our President, work extensively out of our Beit Shemesh facility. Our Chief Financial Officer works out of our Ann Arbor, Michigan facility.

Our Epsilor-EFL subsidiary rents approximately 23,000 square feet of factory, office and warehouse space in Dimona, Israel, in Israel's Negev desert (within Israel's pre-1967 borders), on a month-to-month basis.

In March 2007, we purchased 16,700 square feet of space for the now discontinued Armor Division in Auburn, Alabama for approximately $1.1 million pursuant to a seller-financed secured purchase money mortgage. Half of the mortgage is payable over ten years in equal monthly installments based on a 20-year amortization of the full principal amount, and the remaining half is payable at the end of ten years in a balloon payment. The building is currently leased to a third party and has been listed for sale with a local real estate agent. Additionally, the carrying value of this property was written down to zero as part of the 2011 Armor Division impairment.

We believe that our existing and currently planned facilities are adequate to meet our current and foreseeable future needs.

ITEM 3. LEGAL PROCEEDINGS

As of the date of this filing, there were no material pending legal proceedings against us, and there were no material legal proceedings active against us during 2013.

ITEM 4. MINE SAFETY DISCLOSURES

None.

Table of Contents

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is traded on the Nasdaq Global Market. Our Nasdaq ticker symbol is "ARTX." The following table sets forth, for the periods indicated, the range of high and low sales prices of our common stock on the Nasdaq Global Market System:

Year Ended December 31, 2013	High	Low
Fourth Quarter	$ 3.91	$ 1.63
Third Quarter	$ 2.71	$ 1.32
Second Quarter	$ 1.93	$ 1.00
First Quarter	$ 1.31	$ 0.91

Year Ended December 31, 2012	High	Low
Fourth Quarter	$ 1.18	$ 0.90
Third Quarter	$ 1.00	$ 0.71
Second Quarter	$ 1.30	$ 0.85
First Quarter	$ 1.39	$ 1.11

As of February 28, 2014, we had approximately 157 holders of record of our common stock.

Share Repurchase Program

In February of 2009, we authorized the repurchase in the open market or in privately negotiated transactions of up to $1.0 million of our common stock. Pursuant to this plan, through December 31, 2013 we have repurchased 638,611 shares of our common stock for $869,931 ($857,018 net of commissions), all of which was purchased after April 1, 2009. We did not repurchase any shares during 2013 or 2012. The program now expires in August 2014.

The repurchase program is subject to management's discretion.

Dividends

We have never paid any cash dividends on our common stock. The Board of Directors presently intends to retain all earnings for use in our business. Any future determination as to payment of dividends will depend upon our financial condition and results of operations and such other factors as the Board of Directors deems relevant. Additionally, our ability to declare dividends should we decide to do so is restricted by the terms of our debt agreements.

Annual Stockholders Meeting

We held our 2013 Annual Meeting of Stockholders on November 12, 2013. Our 2014 Annual Meeting of Stockholders will be held on Monday, August 11, 2014 commencing at 10:00 a.m., eastern daylight time.

In light of the foregoing and in accordance with Rules 14a-5(f) and 14a-8(e)(2) under the Securities Exchange Act of 1934, as amended, we will consider stockholder proposals submitted in connection with our 2014 Annual Meeting to have been submitted in a timely fashion if such proposals are received by us at our principal offices no later than March 31, 2014. If a proposal is received after March 31, 2014, the proxies designated by the Board of Directors of the Company will have discretionary authority to vote on the proposal under circumstances consistent with the proxy rules of the Securities and Exchange Commission.

We expect to mail our Notice of Annual Meeting and Notice of Internet Availability of Proxy Materials, containing links to our Annual Report to Stockholders for the year ended December 31, 2013 and our Proxy Statement for the 2014 Annual Meeting, on or about July 1, 2014.

ITEM 6. SELECTED FINANCIAL DATA

Not applicable.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve inherent risks and uncertainties. When used in this discussion, the words "believes," "anticipated," "expects," "estimates" and similar expressions are intended to identify such forward-looking statements. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those projected. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly release the result of any revisions to these forward-looking statements that may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors including, but not limited to, those set forth elsewhere in this report. Please see "Risk Factors," above, and in our other filings with the Securities and Exchange Commission.

The following discussion and analysis should be read in conjunction with the Consolidated Financial Statements contained in Item 8 of this report, and the notes thereto. We have rounded amounts reported here to the nearest thousand, unless such amounts are more than $1.0 million, in which event we have rounded such amounts to the nearest hundred thousand.

General

We are a defense and security products and services company, engaged in two business areas: interactive simulation for military, law enforcement and commercial markets; and batteries and charging systems for the military. We operate in two business units:

× ¨ ¨ We develop, manufacture and market advanced high-tech multimedia and interactive digital solutions for use-of-force training and driving training of military, law enforcement, security and other personnel (our ***Training and Simulation Division***); and

× ¨ ¨ We manufacture and sell lithium and Zinc-Air batteries for defense and security products, including our Soldier Wearable Integrated Power Equipment System (SWIPES)™ power hubs, and other military applications (our ***Battery and Power Systems Division***).

Between 2002 and December 2011, we were also engaged in utilizing advanced engineering concepts to manufacture military and paramilitary armored vehicles, and employing sophisticated lightweight materials to produce aviation armor, through our Armor Division. In December 2011, our Board of Directors approved management's plan to sell our Armor Division in order to focus on the more profitable and growth-oriented aspects of our business. We completed the sale of our Armor Division in June 2012.

The discontinuation of the Armor Division for accounting purposes resulted in a one-time, pre-tax charge during the fourth quarter of 2011 of approximately $3.9 million, reflecting an impairment of goodwill and intangibles ($1.8 million), an impairment of other long-lived assets ($1.5 million), a write-off of a joint venture investment ($269,000), and costs associated with change of control provisions and other non-statutory severance expenses ($302,000). Almost all these charges are non-cash impacting items. In 2012, an additional pre-tax adjustment of approximately $829,000 was recorded to reflect a loss upon the sale.

Table of Contents

Critical Accounting Policies

The preparation of financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, allowance for bad debts, stock compensation, taxes, inventory, contingencies and deferred warranty revenue, impairment of intangible assets and goodwill. We base our estimates and judgments on historical experience and on various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Under different assumptions or conditions, actual results may differ from these estimates.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Revenue Recognition

Significant management judgments and estimates must be made and used in connection with the recognition of revenue in any accounting period. Material differences in the amount of revenue in any given period may result if these judgments or estimates prove to be incorrect or if management's estimates change on the basis of development of the business or market conditions. Management judgments and estimates have been applied consistently and have been reliable historically.

A portion of our revenue is derived from license agreements that entail the customization of FAAC's simulators to the customer's specific requirements. Revenues from initial license fees for such arrangements are recognized in accordance with FASB ASC 605-35 based on the percentage of completion method over the period from signing of the license through to customer acceptance, as such simulators require significant modification or customization that takes time to complete. The percentage of completion is measured by monitoring progress using records of actual time incurred to date in the project compared with the total estimated project requirement, which corresponds to the costs related to earned revenues. Estimates of total project requirements are based on prior experience of customization, delivery and acceptance of the same or similar technology and are reviewed and updated regularly by management.

We believe that the use of the percentage of completion method is appropriate as we have the ability to make reasonably dependable estimates of the extent of progress towards completion, contract revenues and contract costs. In addition, contracts executed include provisions that clearly specify the enforceable rights regarding services to be provided and received by the parties to the contracts, the consideration to be exchanged and the manner and terms of settlement. In all cases we expect to perform our contractual obligations and our licensees are expected to satisfy their obligations under the contract. The complexity of the estimation process and the issues related to the assumptions, risks and uncertainties inherent with the application of the percentage of completion method of accounting affect the amounts of revenue and related expenses reported in our consolidated financial statements. A number of internal and external factors can affect our estimates, including labor rates, utilization and specification and testing requirement changes.

We account for our other revenues from IES simulators in accordance with the provisions of FASB ASC 985-605. We exercise judgment and use estimates in connection with the determination of the amount of software license and services revenues to be recognized in each accounting period.

Stock Based Compensation

We account for stock options and awards issued to employees in accordance with the fair value recognition provisions of FASB ASC 505-50. Under FASB ASC 505-50, stock-based awards to employees are required to be recognized as compensation expense, based on the calculated fair value on the date of grant. We determine the fair value of options using the Black Scholes option pricing model. This model requires subjective assumptions, including future stock price volatility and expected term, which affect the calculated values.

Table of Contents

Allowance for Doubtful Accounts

We make judgments as to our ability to collect outstanding receivables and provide allowances for the portion of receivables when collection becomes doubtful. Provisions are made based upon a specific review of all significant outstanding receivables. In determining the provision, we analyze our historical collection experience and current economic trends. We reassess these allowances each accounting period. Historically, our actual losses and credits have been consistent with these provisions. If actual payment experience with our customers is different than our estimates, adjustments to these allowances may be necessary resulting in additional charges to our statement of operations.

Accounting for Income Taxes

Significant judgment is required in determining our worldwide income tax expense provision. In the ordinary course of a global business, there are many transactions and calculations where the ultimate tax outcome is uncertain. Some of these uncertainties arise as a consequence of cost reimbursement arrangements among related entities, the process of identifying items of revenue and expense that qualify for preferential tax treatment and segregation of foreign and domestic income and expense to avoid double taxation. Although we believe that our estimates are reasonable, the final tax outcome of these matters may be different than that which is reflected in our historical income tax provisions and accruals.

We have provided a valuation allowance on our net deferred tax assets, which includes federal and foreign net operating loss carryforwards, because of the uncertainty regarding their realization. Our accounting for deferred taxes under FASB ASC 740-10, involves the evaluation of a number of factors concerning the realizability of our deferred tax assets. In concluding that a valuation allowance was required, we primarily considered such factors as our history of operating losses and expected future losses in certain jurisdictions and the nature of our deferred tax assets. We provide valuation allowances in respect of deferred tax assets resulting principally from the carryforward of tax losses. Management currently believes that it is more likely than not that our deferred tax assets in the U.S. and Israel will not be realized in the foreseeable future. We do not provide for U.S. federal income taxes on the undistributed earnings of our foreign subsidiaries because such earnings are re-invested and, in the opinion of management, will continue to be re-invested indefinitely.

We have indefinitely-lived intangible assets consisting of trademarks and goodwill. Pursuant to FASB ASC 350-10, these indefinitely-lived intangible assets are not amortized for financial reporting purposes. However, these assets are tax deductible, and therefore amortized over 15 years for tax purposes. As such, deferred income tax expense and a deferred tax liability arise as a result of the tax-deductibility of these indefinitely-lived intangible assets. The resulting deferred tax liability, which is expected to continue to increase over time, will have an indefinite life, resulting in what is referred to as a “naked tax credit.” This deferred tax liability could remain on our balance sheet indefinitely for continuing operations unless there is an impairment of the related assets (for financial reporting purposes), or the business to which those assets relate were to be disposed of.

Due to the fact that the aforementioned deferred tax liability could have an indefinite life, it should not be netted against our deferred tax assets (which primarily relate to net operating loss carryforwards) when determining the required valuation allowance. Doing so would result in the understatement of the valuation allowance and related deferred income tax expense.

We have adopted the provisions of the FASB ASC 740-10. FASB ASC 740-10 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken in a tax return. We must determine whether it is “more-likely-than-not” that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets the more-likely-than-not recognition threshold, the position is measured to determine the amount of benefit to recognize in the financial statements. Uncertain tax positions require determinations and estimated liabilities to be made based on provisions of the tax law which may be subject to change or varying interpretation. If our determinations and estimates prove to be inaccurate, the resulting adjustments could be material to our future financial statements.

Table of Contents

In addition, we operate within multiple taxing jurisdictions and may be subject to audits in these jurisdictions. These audits can involve complex issues that may require an extended period of time for resolution. In management's opinion, adequate provisions for income taxes have been made.

Inventories

Our policy for valuation of inventory and commitments to purchase inventory, including the determination of obsolete or excess inventory, requires us to perform a detailed assessment of inventory at each balance sheet date, which includes a review of, among other factors, an estimate of future demand for products within specific time horizons, valuation of existing inventory, as well as product lifecycle and product development plans. The estimates of future demand that we use in the valuation of inventory are the basis for our revenue forecast, which is also used for our short-term manufacturing plans. Inventory reserves are also provided to cover risks arising from slow-moving items. We write down our inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based on assumptions about future demand and market conditions. We may be required to record additional inventory write-down if actual market conditions are less favorable than those projected by our management. For fiscal 2013, no significant changes were made to the underlying assumptions related to estimates of inventory valuation or the methodology applied.

Goodwill

As of December 31, 2013, we had recorded goodwill of $31.0 million. We allocate goodwill acquired in a business combination to the appropriate reporting unit as of the acquisition date. Currently our reporting units are also our reportable segments and the associated goodwill was determined when the specific businesses in the reportable segments were purchased. Under FASB ASC 350-10, goodwill and intangible assets deemed to have indefinite lives are no longer amortized but are subject to annual impairment tests, and tests between annual tests in certain circumstances, based on estimated fair value in accordance with FASB ASC 350-10, and written down when impaired.

In September 2011, the FASB issued ASU No. 2011-08, "Intangibles – Goodwill and Other (Topic 350): Testing Goodwill for Impairment." ASU 2011-08 amends the guidance in Accounting Standards Codification ASC 350-10. Under the revised guidance, when testing goodwill for impairment we have the option of performing a qualitative assessment before calculating the fair value of a reporting unit. If the Company determines, on the basis of qualitative factors, that it is more likely than not that the fair value of the reporting unit is greater than the carrying amount, the two-step impairment test would not be required. If we cannot determine on the basis of qualitative factors that goodwill is not impaired, goodwill is then tested for impairment by using a discounted cash flow analysis. This type of analysis requires us to make assumptions and estimates regarding industry economic factors and the profitability of future business strategies. Significant estimates used in the methodologies include estimates of future cash flows, future short-term and long-term growth rates, weighted average cost of capital and estimates of market multiples for the reportable units. It is our policy to conduct impairment testing based on our current business strategy in light of present industry and economic conditions, as well as future expectations. In assessing the recoverability of our goodwill, we may be required to make assumptions regarding estimated future cash flows and other factors to determine the fair value of the respective assets. This process is subjective and requires judgment at many points throughout the analysis. If our estimates or their related assumptions change in subsequent periods or if actual cash flows are below our estimates, we may be required to record impairment charges for these assets not previously recorded.

We completed our annual goodwill impairment review using the financial results as of the quarter ended June 30, 2013 and again as of the quarter ended December 31, 2013 using our forecasted plan developed in the fourth quarter. We originally used a June 30 date because this allowed us to use internal resources that are available before we start our annual audit process but our management determined that an impairment review as of December 31, 2013 would be more appropriate as it better aligns the timing of our budget process with this test.

As noted above, under revised FASB guidance (ASU No. 2011-08, "Intangibles – Goodwill and Other (Topic 350): Testing Goodwill for Impairment"), under certain circumstances we have the option of performing a qualitative assessment when testing goodwill for impairment. We determined that this qualitative assessment would be appropriate in the case of our Training and Simulation Division, but that with respect to our Battery and Power Systems Division, we determined that we were required to perform a quantitative analysis.

Table of Contents

With respect to our Training and Simulation Division, in both the December 31, 2013 review and the June 30, 2013 review, we determined, using qualitative factors, that no goodwill was impaired.

With respect to our Battery and Power Systems Division, in both the December 31, 2013 review and the June 30, 2013 review, we undertook the first step of the quantitative analysis, in which we computed a fair value of that reporting unit. The valuation for Battery and Power Systems Division at the quarter ended June 30, 2013 exceeded the unit's carrying value. The valuation completed for the quarter ended December 31, 2013 also exceeded the reporting unit's carrying value by over 19%; we will continue to monitor the actual results of the reporting unit versus the forecast used for the impairment review and reevaluate the goodwill as required. Because we determined with respect to our Battery and Power Systems Division that the fair value was greater than the carrying value of the unit at the measurement date, the second step of the quantitative impairment assessment was not required, and no goodwill was impaired.

We also consider our current market capitalization compared to the sum of the estimated fair values of its reporting units in conjunction with each impairment assessment. As part of this consideration, management recognizes that our market capitalization may not be an accurate representation of the sum of the reporting unit fair values for the following reasons:

- The long term horizon of the valuation process versus a short term valuation using current market conditions;
- The valuation by individual business segments versus the market share value based on our company as a whole including unallocable corporate costs;
- The fact that our stock is thinly traded and widely dispersed with minimal institutional ownership, and thus not followed by major market analysts, leading management to conclude that the market in our securities was not acting as an informationally efficient reflection of all known information regarding us; and
- Control premiums reflected in the reporting unit fair values but not in our stock price.

As of the December 31, 2013 valuation date, our market capitalization was approximately $70.4 million, which did not, in management's view, suggest that the fair value estimates used in its impairment assessment required any adjustment.

Other Intangible Assets

Other intangible assets are amortized to the Statement of Operations over the period during which benefits are expected to accrue, currently estimated at one to ten years.

The determination of the value of such intangible assets requires us to make assumptions regarding future business conditions and operating results in order to estimate future cash flows and other factors to determine the fair value of the respective assets. If these estimates or the related assumptions change in the future, we could be required to record additional impairment charges.

Contingencies

We are from time to time involved in legal proceedings and other claims. We are required to assess the likelihood of any adverse judgments or outcomes to these matters, as well as potential ranges of probable losses. We have not made any material changes in the accounting methodology used to establish our self-insured liabilities during the past three fiscal years.

A determination of the amount of reserves required, if any, for any contingencies are made after careful analysis of each individual issue. The required reserves may change due to future developments in each matter or changes in approach, such as a change in the settlement strategy in dealing with any contingencies, which may result in higher net loss.

Table of Contents

If actual results are not consistent with our assumptions and judgments, we may be exposed to gains or losses that could be material.

Warranty Reserves

Upon shipment of products to our customers, we defer revenue for the estimated cost to repair or replace products along with the appropriate margin for goods that may be returned under warranty. Our warranty period is typically twelve months from the date of shipment to the end user customer. For existing products, the deferred revenue is estimated based on actual historical experience. For new products, the warranty deferred revenue is based on historical experience of similar products until such time as sufficient historical data has been collected on the new product. Factors that may impact our warranty costs in the future include our reliance on our contract manufacturer to provide quality products and the fact that our products are complex and may contain undetected defects, errors or failures in either the hardware or the software.

Functional Currency

We consider the United States dollar to be the currency of the primary economic environment in which we and EFL operate and, therefore, both we and EFL have adopted and are using the United States dollar as our functional currency. Transactions and balances originally denominated in U.S. dollars are presented at the original amounts. Gains and losses arising from non-dollar transactions and balances are included in net income.

The majority of financial transactions of Epsilor is in New Israeli Shekels ("NIS") and a substantial portion of Epsilor's costs is incurred in NIS. Management believes that the NIS is the functional currency of Epsilor. Accordingly, the financial statements of Epsilor have been translated into U.S. dollars. All balance sheet accounts have been translated using the exchange rates in effect at the balance sheet date. Statement of operations amounts have been translated using the average exchange rate for the period. The resulting translation adjustments are reported as a component of accumulated other comprehensive loss in stockholders' equity.

Executive Summary

Overview of Results of Operations

We incurred an operating loss for the year ended December 31, 2012 but we achieved profitability for the year ended December 31, 2013. While we expect to continue to derive revenues from the sale of products that we manufacture and the services that we provide, there can be no assurance that we will be able to maintain profitability on a consistent basis.

A portion of our operating loss during 2012 arose as a result of one-time expenses, non-cash and impairment charges. These charges were primarily related to our prior transactional activities, financings and stock-based awards to employees. To the extent that we continue certain of these activities during 2014, we would expect to continue to incur such expenses in the future.

ACQUISITIONS

In acquisition of subsidiaries, part of the purchase price is allocated to intangible assets and goodwill. Amortization of intangible assets related to acquisition of subsidiaries is recorded based on the estimated expected life of the assets. Accordingly, for a period of time following an acquisition, we incur a non-cash charge related to amortization of intangible assets in the amount of a fraction (based on the useful life of the intangible assets) of the amount recorded as intangible assets. Such amortization charges continued during 2013. We are required to review intangible assets for impairment whenever events or changes in circumstances indicate that carrying amount of the assets may not be recoverable. If we determine, through the impairment review process, that an intangible asset has been impaired, we must record the impairment charge in our statement of operations.

In the case of goodwill, the assets recorded as goodwill are not amortized; instead, we are required to perform an annual impairment review. If we determine, through the impairment review process, that goodwill has been impaired, we must record the impairment charge in our statement of operations.

Table of Contents

We incurred non-cash charges for amortization of intangible assets in 2013 and 2012 in the amount of $1.1 million and $1.2 million, respectively.

Issuances of Restricted Share and Restricted Stock Units.

During 2013 and 2012, we issued restricted shares and restricted stock units to certain of our employees and to our directors. Each restricted stock unit is equal to one share of Company stock and is redeemable only for stock. These shares were issued as stock bonuses or were the required annual grant to directors, and are restricted for a period of up to three years from the date of issuance. Relevant accounting rules provide that the aggregate amount of the difference between the purchase price of the restricted shares or restricted stock units (in this case, generally zero) and the market price of the shares on the date of grant is taken as a general and administrative expense, amortized over the life of the period of the restriction.

We incurred non-cash charges related to stock-based compensation in 2013 and 2012 in the amount of $437,000 and $448,000, respectively.

Overview of Operating Performance and Backlog

Overall, our pre-tax profit from continuing operations for 2013 was $3.3 million on revenues of $88.6 million, compared to a pre-tax loss of $1.4 million on revenues of $80.1 million during 2012. As of December 31, 2013, our overall backlog for continuing operations totaled $58.0 million.

In our Training and Simulation Division, revenues increased from approximately $59.3 million in 2012 to $63.4 million in 2013. As of December 31, 2013, our backlog for our Training and Simulation Division totaled $45.9 million.

In our Battery and Power Systems Division, revenues increased from approximately $20.8 million in 2012 to approximately $25.1 million in 2013. As of December 31, 2013, our backlog for our Battery and Power Systems Division totaled $12.1 million.

Common Stock Repurchase Program

In February 2009, we authorized the repurchase in the open market or in privately negotiated transactions of up to $1.0 million of our common stock. Pursuant to this plan, through December 31, 2013, we have repurchased 638,611 shares of our common stock for $869,931 ($857,018 net of commissions), all of which was purchased after April 1, 2009. At December 31, 2013, we had remaining authorization for the repurchase of up to $142,982 in shares of our common stock. The repurchase program, which expires on August 12, 2014, is subject to the discretion of our management.

Table of Contents

Results of Operations

SUMMARY

Following is a table summarizing our results of continuing operations for the years ended December 31, 2013 and 2012, after which we present a narrative discussion and analysis:

	Year Ended December 31,	
	2013	2012
Revenues:		
Training and Simulation Division	$ 63,425,319	$ 59,270,768
Battery and Power Systems Division	25,146,109	20,779,666
	$ 88,571,428	$ 80,050,434
Cost of revenues:		
Training and Simulation Division	$ 44,257,129	$ 44,822,270
Battery and Power Systems Division	20,223,011	17,318,768
	$ 64,480,140	$ 62,141,038
Research and development expenses:		
Training and Simulation Division	$ 1,296,956	$ 698,349
Battery and Power Systems Division	1,658,927	1,345,369
	$ 2,955,883	$ 2,043,718
Selling and marketing expenses:		
Training and Simulation Division	$ 4,448,036	$ 4,513,244
Battery and Power Systems Division	1,169,669	974,666
	$ 5,617,705	$ 5,487,910
General and administrative expenses:		
Training and Simulation Division	$ 3,553,058	$ 3,456,873
Battery and Power Systems Division	1,630,641	946,727
Corporate	5,703,260	5,649,165
	$ 10,886,959	$ 10,052,765
Amortization of intangible assets:		
Training and Simulation Division	$ 581,886	$ 676,299
Battery and Power Systems Division	509,240	509,240
	$ 1,091,126	$ 1,185,539
Operating income (loss):		
Training and Simulation Division	$ 9,288,254	$ 5,103,733
Battery and Power Systems Division	(45,379)	(315,104)
Corporate	(5,703,260)	(5,649,165)
	$ 3,539,615	$ (860,536)
Other income:		
Training and Simulation Division	$ 4,761	$ 5,926
Battery and Power Systems Division	253,600	2,327
Corporate	27,896	31
	$ 286,347	$ 8,284
Financial expense (income):		
Training and Simulation Division	$ (44,146)	$ (43,221)
Battery and Power Systems Division	(30,733)	(7,639)
Corporate	(424,393)	(497,126)
	$ (499,272)	$ (547,986)
Income tax expense (benefit):		
Training and Simulation Division	$ 319,225	$ (7,688)
Battery and Power Systems Division	134,995	–
Corporate	598,500	635,844

	$ 1,052,720	$ 628,156
Net income (loss) – continuing operations:		
Training and Simulation Division	$ 8,929,644	$ 5,074,126
Battery and Power Systems Division	42,493	(320,416)
Corporate	(6,698,167)	(6,782,104)
	$ 2,273,970	$ (2,028,394)

Table of Contents

Fiscal Year 2013 compared to Fiscal Year 2012

Revenues. During 2013, we (through our subsidiaries) recognized revenues as follows:

× ¨ ¨ **Training and Simulation Division –** FAAC, IES and RTI recognized revenues from the sale of military operations and vehicle simulators, interactive use-of-force training systems and from the provision of maintenance services in connection with such systems.

× ¨ ¨ **Battery and Power Systems Division** – EFB and Epsilor-EFL recognized revenues from the sale of batteries, chargers, adapters and power hub products to the military and commercial customers, and under certain development contracts with the U.S. Army.

× ¨ ¨ **Battery and Power Systems Division** – Epsilor-EFL also recognized revenues from the sale of water-activated battery (WAB) lifejacket lights.

Revenues for continuing operations for 2013 totaled $88.6 million, compared to $80.1 million in 2012, an increase of $8.5 million, or 10.6%. This increase was primarily attributable to the following factors:

× ¨ ¨ Increased revenues from our Training and Simulation Division ($4.1 million more in 2013 versus 2012), due primarily to the Boom Operator Simulator System (BOSS) contract.

× ¨ ¨ Increased revenues from our Battery and Power Systems Division ($4.4 million more in 2013 versus 2012), due to an increase of $667,000 from the prior year's sales in the U.S. of SWIPES™ along with increased sales in our other battery products.

The table below details the percentage of total recognized revenue by type of arrangement for the years ended December 31, 2013 and 2012:

	Year Ended December 31,	
Type of Revenue	**2013**	**2012**
Sale of products	95.0%	96.0%
Maintenance and support agreements	3.3%	2.8%
Long term research and development contracts	1.7%	1.2%
Total	100.0%	100.0%

Cost of revenues. Cost of revenues totaled $64.5 million during 2013, compared to $62.1 million in 2012, an increase of $2.4 million, or 3.8%, due primarily to increased revenues in our Training and Simulation Division, as well as increased sales in the U.S. of the SWIPES™ system. Cost of revenues as a percentage of revenue remained essentially flat in our Battery and Power Systems Division but increased in our Training and Simulation Division due primarily to the product mix and the VCTS contract.

Research and development expenses. Research and development expenses for 2013 were $3.0 million, compared to $2.0 million during 2012, an increase of $912,000, or 44.6%, due primarily to increased spending in both divisions for continuing research on new products.

Selling and marketing expenses. Selling and marketing expenses for 2013 were $5.6 million, compared to $5.5 million in 2012, an increase of $130,000, or 2.4%, due to a slight decrease of expenses in our Training and Simulation Division offset by a slight increase in our Battery and Power Division.

General and administrative expenses. General and administrative expenses for 2013 were $10.9 million, compared to $10.1 million in 2012, an increase of $834,000, or 8.3%, due primarily to a reduction of $358,000 in corporate consulting, audit and legal expenses offset by an increase of $692,000 in corporate compensation expense and an increase of $350,000 in compensation expense in our Battery and Power Systems Division, the latter due primarily to increased staffing and other expenses to accommodate the significant growth in this division.

Table of Contents

Amortization of intangible assets. Amortization of intangible assets totaled $1.1 million in 2013, compared to $1.2 million in 2012, a decrease of $94,000, or 8.0%, due primarily to decreased charges for fully amortized capitalized software in our Training and Simulation Division.

Financial expenses, net. Financial expense totaled $499,000 in 2013, compared to financial expense of $548,000 in 2012, a decrease of $49,000, or 8.9%, due primarily to exchange rate differences.

Income taxes. With respect to some of our subsidiaries that generated pre-tax income during 2013, we were able to offset federal taxes against our accumulated loss carry forward. We recorded $1.1 million in tax expense in 2013, compared to $628,000 in tax expense in 2012, an increase of $425,000, or 67.6%, mainly due to increased profits in our Training and Simulation Division. This amount includes the required adjustment of taxes due to the deduction of goodwill "naked" credits ("naked" credits occur when deferred tax liabilities that are created by indefinite-lived assets such as goodwill cannot be used as a source of taxable income to support the realization of deferred tax assets). This amount includes the required adjustment of taxes due to the deduction of goodwill "naked" credits for U.S. federal taxes, which totaled $599,000 in non-cash expenses in both 2013 and 2012.

Net income. Due to the factors cited above, we went from a net loss from continuing operations of $2.0 million in 2012 to a net income of $2.3 million in 2013, an improvement of $4.3 million.

Liquidity and Capital Resources

As of December 31, 2013, we had $5.8 million in cash and $498,000 in restricted collateral deposits, as compared to December 31, 2012, when we had $1.6 million in cash and $186,000 in restricted collateral deposits. We have experienced fluctuations in available cash in the previous twelve months due to the funding requirements of our larger contracts. These fluctuations have not had a significant impact on our operations, due in part to the increase in our credit facility that was negotiated with our primary bank in 2013. We also had $10.2 million in available, unused bank lines of credit with our main bank as of December 31, 2013, under a $15.0 million credit facility under our FAAC subsidiary, which is secured by our assets and the assets of our other subsidiaries and guaranteed by us. As of December 31, 2013, we had no short-term bank debt.

We and FAAC maintain a $15.0 million credit facility with FAAC's primary bank, which is secured by Arotech's assets and the assets of our other domestic subsidiaries and guaranteed by Arotech and our other domestic subsidiaries, at a rate of LIBOR plus 375 basis points and an unused line of credit fee of 0.35%. This credit facility expires May 31, 2015. The credit agreement contains certain covenants, including minimum Earnings Before Interest, Taxes, Depreciation and Amortization ("EBITDA"), quarterly Maximum Increase in Net Advance to Affiliates of less than 90% of EBITDA and an annual Fixed Charge Coverage Ratio of not less than 1.1 to 1.0. At the end of 2013 and as of the filing date of this report, we met all required current covenants.

In September and October 2013, we sold an aggregate of 3,942,856 shares of our common stock in a public offering for an aggregate of $6.9 million (before $562,000 of underwriting discounts and commissions and expenses of the offering).

We used available funds in 2013 primarily for investment in fixed assets and repayment of short term debt. We purchased approximately $1.7 million of property and equipment during 2013. Our net property and equipment amounted to $4.9 million as of December 31, 2013.

Net cash provided by (used in) operating activities for 2013 and 2012 was $10.2 million and $(4.4 million), respectively, a net change in usage of $14.6 million. This difference was due primarily to the profit from continuing operations along with changes in working capital. The timing of cash inflows and outflows has impacted us due to the substantial purchases of products to fulfill the contracts in the Simulation and Training Division and Battery and Power Systems Division.

Net cash provided by (used in) investing activities for 2013 and 2012 was $(1.9 million) and $371,000, a net change of $2.3 million. This difference was due primarily to the purchase of capital equipment and changes in restricted collateral deposits.

Table of Contents

Net cash provided by (used in) financing activities for 2013 and 2012 was $(4.4 million) and $3.5 million, respectively, a change of $7.9 million. The change in 2013 of cash used in financing activities was due primarily to receipt of $6.3 million (net) from a public offering that we conducted in 2013, offset by a pay down in long and short term debt of $10.7 million.

As of December 31, 2013, we had no short-term bank debt and $1.9 million in long-term debt outstanding, as compared to December 31, 2012, when we had approximately $9.8 million in short-term bank debt and $1.9 million in long-term debt outstanding for continuing operations, including current maturities.

Subject to all of the reservations regarding “forward-looking statements” set forth above, we believe that our present cash position, anticipated cash flows from operations and availability under our lines of credit should be sufficient to satisfy our current estimated cash requirements through the next twelve months. In this connection, we note that from time to time our working capital needs are partially dependent on our subsidiaries’ lines of credit.

Effective Corporate Tax Rate

We and certain of our subsidiaries incurred net operating losses during the years ended December 31, 2013 and 2012. With respect to some of our U.S. subsidiaries that operated at a net profit during 2013, we were able to offset federal taxes against our net operating loss carryforward. These subsidiaries are, however, subject to state taxes that cannot be offset against our net operating loss carryforward. We also set up a tax liability for the impact of the deductions taken for goodwill.

As of December 31, 2013, we had a U.S. net operating loss carryforward of approximately $39.6 million that is available to offset future taxable income under certain circumstances, expiring primarily from 2020 through 2032, and foreign net operating and capital loss carryforwards of approximately $95.4 million, which are available indefinitely to offset future taxable income under certain circumstances.

Table of Contents

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of December 31, 2013, our management, including the principal executive officer and principal financial officer, evaluated our disclosure controls and procedures related to the recording, processing, summarization, and reporting of information in our periodic reports that we file with the SEC. These disclosure controls and procedures are intended to ensure that material information relating to us, including our subsidiaries, is made known to our management, including these officers, by other of our employees, and that this information is recorded, processed, summarized, evaluated, and reported, as applicable, within the time periods specified in the SEC's rules and forms. Due to the inherent limitations of control systems, not all misstatements may be detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Any system of controls and procedures, no matter how well designed and operated, can at best provide only reasonable assurance that the objectives of the system are met and management necessarily is required to apply its judgment in evaluating the cost benefit relationship of possible controls and procedures. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. Our controls and procedures are intended to provide only reasonable, not absolute, assurance that the above objectives have been met.

Based on their evaluation as of December 31, 2013, our principal executive officer and principal financial officer were able to conclude that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) were effective.

We will continue to review and evaluate the design and effectiveness of our disclosure controls and procedures on an ongoing basis and to improve our controls and procedures over time and correct any deficiencies that we may discover in the future. Our goal is to ensure that our senior management has timely access to all material financial and non-financial information concerning our business. While we believe the present design of our disclosure controls and procedures is effective to achieve our goal, future events affecting our business may cause us to modify our disclosure controls and procedures.

Management's Report on Internal Control Over Financial Reporting

Our management, including our principal executive and financial officers, is responsible for establishing and maintaining adequate internal control over our financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our management has evaluated the effectiveness of our internal controls as of the end of the period covered by this Annual Report on Form 10-K for the year ended December 31, 2013. In making our assessment of internal control over financial reporting, management used the criteria set forth by the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission in the1992 *Internal Control – Integrated Framework*.

Based on management's assessment and these criteria, our management concluded that our internal control over financial reporting was effective as of December 31, 2013.

This annual report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit us to provide only management's report in this annual report.

Changes in Internal Controls Over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during our last fiscal quarter to which this Annual Report on Form 10-K relates that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

Table of Contents

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Executive Officers, Directors and Significant Employees

Executive Officers and Directors

Our executive officers and directors and their ages as of February 28, 2014 were as follows:

Name	Age	Position
Robert S. Ehrlich	76	Chairman of the Board and Chief Executive Officer
Steven Esses	50	President and Director
Dr. Jay M. Eastman	65	Director
Seymour Jones	82	Director
Michael E. Marrus	50	Director
Arthur S. Leibowitz	60	Director
Thomas J. Paup	65	Senior Vice President – Finance and Chief Financial Officer

Our by-laws provide for a board of directors of one or more directors. There are currently seven directors. Under the terms of our certificate of incorporation, the board of directors is composed of three classes of similar size, each elected in a different year, so that only one-third of the board of directors is elected in any single year. Dr. Eastman and Mr. Marrus are designated Class I directors and have been elected for a term expiring in 2015 or until their successors are elected and qualified; Prof. Jones and Mr. Leibowitz are designated Class II directors elected for a term expiring in 2014 or until their successors are elected and qualified; and Messrs. Ehrlich and Esses are designated Class III directors elected for a term that expires in 2016 or until their successors are elected and qualified. A majority of the Board is "independent" under relevant SEC and Nasdaq regulations.

Robert S. Ehrlich has been our Chairman of the Board since January 1993 and our Chief Executive Officer since October 2002. From May 1991 until January 1993, Mr. Ehrlich was our Vice Chairman of the Board, from May 1991 until October 2002 he was our Chief Financial Officer, and from October 2002 until December 2005, Mr. Ehrlich also held the title of President. Mr. Ehrlich was a director of Eldat, Ltd., an Israeli manufacturer of electronic shelf labels, from June 1999 to August 2003. From 1987 to June 2003, Mr. Ehrlich served as a director of PSC Inc. ("PSCX"), a manufacturer and marketer of laser diode bar code scanners, and, between April 1997 and June 2003, Mr. Ehrlich was the chairman of the board of PSCX. Mr. Ehrlich received a B.S. and J.D. from Columbia University in New York, New York.

Mr. Ehrlich has experience as an accountant, an attorney and as an investment banker. He has been involved with public companies since the late 1960s, both as an investment banker and as the chief financial officer and a director of Mattel, where he was instrumental in helping to uncover fraudulent practices in the preparation of certain of that company's financial statements, and he continued to serve as a director of Mattel through the late 1980s. After leaving Mattel, Mr. Ehrlich founded his own boutique investment banking company and became a director of certain of the companies involved in his investment banking business. Mr. Ehrlich ultimately became the Chairman and CEO of Fresenius USA, Inc. and of PSCX, prior to becoming our Chief Financial Officer in 1991 and our Chief Executive Officer in 2002. We believe that Mr. Ehrlich's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Table of Contents

Steven Esses has been a director since July 2002, our Executive Vice President since January 2003, our Chief Operating Officer from February 2003 until February 2012 and our President since December 2005. From 2000 until 2002, Mr. Esses was a principal with Stillwater Capital Partners, Inc., a New York-based investment research and advisory company (hedge fund) specializing in alternative investment strategies. During this time, Mr. Esses also acted as an independent consultant to new and existing businesses in the areas of finance and business development. In 1995, Mr. Esses founded the Dunkin' Donuts franchise in Israel and was its Managing Director and CEO until 2005. Before founding Dunkin' Donuts Israel, Mr. Esses was the Director of Retail Jewelry Franchises with Hamilton Jewelry, and before that he served as Executive Director of Operations for the Conway Organization, a major off-price retailer with 17 locations.

Mr. Esses has been actively involved in the day-to-day management of companies since he was 22, when he co-founded a company that eventually went public. He has worked in retail and wholesale, in high-tech and low-tech, in a variety of industries. Throughout his career, he has been highly numbers-oriented, focusing on budgetary and fiscal matters and on building business value. We believe that Mr. Esses's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Dr. Jay M. Eastman has been one of our directors since October 1993. From November 1991 to December 2011, Dr. Eastman served as President and Chief Executive Officer of Lucid, Inc., a public company that is developing laser technology applications for medical diagnosis and treatment; since December 2011, Dr. Eastman has served as a director and Chief Science Officer of Lucid. Dr. Eastman served as Senior Vice President of Strategic Planning of PSCX from December 1995 through October 1997. Dr. Eastman is also a director of Dimension Technologies, Inc., a developer and manufacturer of 3D displays for computer and video displays. From 1981 until 1983, Dr. Eastman was the Director of the University of Rochester's Laboratory for Laser Energetics, where he was a member of the staff from 1975 to 1981. Dr. Eastman holds a B.S. and a Ph.D. in Optics from the University of Rochester in New York.

Dr. Eastman brings to our Board the unique perspective of a trained scientist who has also been deeply involved in the business world. Since many of our company's products are of a "high-tech" nature, Dr. Eastman's scientific background is extremely valuable to the Board. Additionally, Dr. Eastman brings to the Board his experiences as President and Chief Executive Officer of a high-tech company, as well as his experience as a director of other public companies. We believe that Dr. Eastman's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Seymour Jones has been one of our directors since August 2005. Mr. Jones has been a clinical professor of accounting at New York University Stern School of Business since September 1993. Professor Jones teaches courses in accounting, tax, forensic accounting and legal aspects of entrepreneurism. He is also the Associate Director of Ross Institute of Accounting Research at Stern School of Business. His primary research areas include audit committees, auditing, entrepreneurship, financial reporting, and fraud. Professor Jones is the principal author of numerous books including *Conflict of Interest*, *The Coopers & Lybrand Guide to Growing Your Business*, *The Emerging Business* and *The Bankers Guide to Audit Reports and Financial Statements*. From April 1974 to September 1995, Mr. Jones was a senior partner of the accounting firm of Coopers & Lybrand, a legacy firm of PricewaterhouseCoopers LLP ("PwC"). Professor Jones is a certified public accountant in New York State. Professor Jones received a B.A. in economics from City College, City University of New York, and an M.B.A. from NYU Stern.

Mr. Jones brings many years of experience as an audit partner at PwC with extensive financial accounting knowledge that is critical to our board of directors. Mr. Jones's experience with accounting principles, financial reporting rules and regulations, evaluating financial results and generally overseeing the financial reporting process of large public companies from an independent auditor's perspective and as a professor of accounting makes him an invaluable asset to our board of directors. We believe that Mr. Jones's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Michael E. Marrus has been one of our directors since October 2007. With 25 years of experience as an investment banker, Mr. Marrus has most recently been a Senior Managing Director at Dominick and Dominick and a Managing Director of Merriman Capital, Inc., a financial services firm focused on growth companies. From 1998 to 2009, he was a Managing Director of C.E. Unterberg, Towbin & Co., an investment banking firm that was acquired by Collins Stewart plc. Prior to joining Unterberg, Towbin, Mr. Marrus was a Principal and founding member of Fieldstone Private Capital Group, an investment banking firm specializing in corporate, project and structured finance. Previously, he was employed at Bankers Trust Company, initially in the Private Equity and Merchant Banking Groups and subsequently in BT Securities, the securities affiliate of Bankers Trust. Mr. Marrus has an A.B. from Brown University and an M.B.A. from the Graduate School of Business, University of Chicago.

Mr. Marrus has been involved in mergers and acquisitions as an investment banker and has experience in company valuation in a wide range of industries, a critical skill set for us. We believe that Mr. Marrus's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Arthur S. Leibowitz has been one of our directors since June 2009. Mr. Leibowitz is a lecturer at Adelphi University School of Business where he teaches courses in accounting to both graduate and undergraduate students. Before joining Adelphi University, Mr. Leibowitz was an audit and business assurance partner at PwC. During his twenty-seven years at PwC, Mr. Leibowitz served in a national leadership role for PwC's retail industry group and was the portfolio audit partner for one of PwC's leading private equity firms. Mr. Leibowitz is a certified public accountant in New York State and received a B.S. in accounting from Brooklyn College in New York.

Mr. Leibowitz brings many years of experience as an audit and business assurance partner at PwC with extensive financial accounting knowledge that is critical to our board of directors. His skills are a vital asset to our board of directors at a time when accurate and transparent accounting, a sound financial footing and exemplary governance practices are essential. We believe that Mr. Leibowitz's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Thomas J. Paup has been our Vice President – Finance since December 2005 and our Chief Financial Officer since February 2006; in May 2013, Mr. Paup was promoted to Senior Vice President. Mr. Paup is currently also a Finance Lecturer at Eastern Michigan University. Mr. Paup was an Affiliated Partner with McMillan|Doolittle LLP from March 2002 until accepting this position with us, and prior thereto, he was an Executive in Residence and Finance Instructor at DePaul University's Kellstadt Graduate School of Business. Prior to his teaching experience, Mr. Paup spent over 25 years in the retail industry. Most recently, between 1997 and 2000, Mr. Paup was the Executive Vice President and Chief Financial Officer and member of the Board of Directors of Montgomery Ward and Company. Mr. Paup brings a broad background of strategic and operational management experiences from the department store industry, where he served as CFO of Lord & Taylor and Kaufmann's and Controller of Bloomingdale's and Robinson-May. Mr. Paup holds an MBA in Finance and a BBS from Eastern Michigan University.

Board Leadership Structure

Until this year, we had chosen to combine the positions of Chairman of the Board and Chief Executive Officer; however, beginning with Mr. Ehrlich's upcoming retirement from the position of Chief Executive Officer in October 2014, we intend to divide these responsibilities. We will retain Mr. Ehrlich as Chairman, and Mr. Esses will become our Chief Executive Officer.

Our independent directors have not chosen to formally designate one of their number as lead independent director.

Committees of the Board of Directors

Our board of directors has an Audit Committee, a Compensation Committee, a Nominating Committee and an Executive and Finance Committee.

Table of Contents

Created in December 1993, the purpose of the Audit Committee is to review with management and our independent auditors the scope and results of the annual audit, the nature of any other services provided by the independent auditors, changes in the accounting principles applied to the presentation of our financial statements, and any comments by the independent auditors on our policies and procedures with respect to internal accounting, auditing and financial controls. The Audit Committee was established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934, as amended. In addition, the Audit Committee is charged with the responsibility for making decisions on the engagement of independent auditors. As required by law, the Audit Committee operates pursuant to a charter, available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html. The Audit Committee consists of Prof. Jones (Chair) and Messrs. Leibowitz and Marrus. We have determined that each of Prof. Jones and Mr. Leibowitz qualifies as an "audit committee financial expert" under applicable SEC and Nasdaq regulations. Prof. Jones and Mr. Leibowitz, as well as all the other members of the Audit Committee, are "independent," as independence is defined in Rule 4200(a)(15) of the National Association of Securities Dealers' listing standards and under Item 7(d)(3)(iv) of Schedule 14A of the proxy rules under the Exchange Act.

The Compensation Committee, also created in December 1993, recommends annual compensation arrangements for the Chief Executive Officer and Chief Financial Officer and reviews annual compensation arrangements for all officers and significant employees. The Compensation Committee operates pursuant to a charter, available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html. The Compensation Committee consists of Dr. Eastman (Chair) and Prof. Jones and Mr. Marrus, all of whom are independent non-employee directors.

The Executive and Finance Committee, created in July 2001, exercises the powers of the Board during the intervals between meetings of the Board, in the management of the property, business and affairs of the Company (except with respect to certain extraordinary transactions). The Executive and Finance Committee consists of Messrs. Ehrlich (Chair), Esses and Marrus.

The Nominating Committee, created in March 2003, identifies and proposes candidates to serve as members of the Board of Directors. Proposed nominees for membership on the Board of Directors submitted in writing by stockholders to the Secretary of the Company will be brought to the attention of the Nominating Committee. The Nominating Committee consists of Prof. Jones (Chair), Dr. Eastman and Mr. Leibowitz, all of whom are "independent," as independence is defined in Rule 4200(a)(15) of the National Association of Securities Dealers' listing standards and under Item 7(d)(3)(iv) of Schedule 14A of the proxy rules under the Exchange Act. The Nominating Committee operates under a formal charter that governs its duties. The Nominating Committee's charter is publicly available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html.

Code of Ethics

We have adopted a Code of Ethics, as required by Nasdaq listing standards and the rules of the SEC, that applies to our principal executive officer, our principal financial officer and our principal accounting officer. The Code of Ethics is publicly available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html. If we make substantive amendments to the Code of Ethics or grant any waiver, including any implicit waiver, that applies to anyone subject to the Code of Ethics, we will disclose the nature of such amendment or waiver on the website or in a report on Form 8-K in accordance with applicable Nasdaq and SEC rules.

Code of Conduct

We have adopted a general Code of Conduct, as required by Nasdaq listing standards and the rules of the SEC, that applies to all of our employees. The Code of Conduct is publicly available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html.

Table of Contents

Whistleblower Policy

We have adopted a Whistleblower Policy, as required by Nasdaq listing standards, in order to ensure compliance with the provisions of the Sarbanes-Oxley Act of 2002. The Whistleblower Policy is publicly available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html. Employees with complaints about our compliance with applicable legal and regulatory requirements relating to accounting, auditing and internal control matters may submit their complaints in person, by mail or other written communication or by telephone to our Complaint Administrator. The Complaint Administrator can be contacted anonymously, by submitting the form located on our corporate website at http://arotech.com/compro/complaint.html. Complaints sent in this manner will automatically be stripped of all computer-encoded information identifying the originating e-mail address, and will then automatically be forwarded to the Complaint Administrator's regular e-mail address at Arotech.

Director Compensation

Non-employee members of our Board of Directors are entitled to a cash retainer in 2012 of $3,500 (plus expenses) per quarter, plus $500 per quarter for each committee on which such outside directors serve. (In 2011, the Directors were paid a cash retainer of $7,000 per quarter but voluntarily accepted a reduced retainer in 2012 as an expense control measure.) The Chairman of the Audit Committee receives an additional retainer of $1,500 per quarter, and the Chairman of the Compensation Committee receives an additional retainer of $1,000 per quarter. No per-meeting fees are paid. In addition, we have adopted a Non-Employee Director Equity Compensation Plan, pursuant to which non-employee directors receive an initial grant of a number of restricted shares having a fair market value on the date of grant equal to $25,000 upon their election as a director, and an annual grant on March 31 of each year of a number of restricted shares having a fair market value on the date of grant equal to $15,000. Each grant of restricted stock shall become free of restrictions in three equal installments on each of the first, second and third anniversaries of the grant, unless the director resigns from the Board prior to such vesting. Furthermore, all restrictions lapse prior to the consummation of a merger or consolidation involving us, our liquidation or dissolution, any sale of substantially all of our assets or any other transaction or series of related transactions as a result of which a single person or several persons acting in concert own a majority of our then-outstanding common stock.

The following table shows the compensation earned or received by each of our non-officer directors for the year ended December 31, 2013:

DIRECTOR COMPENSATION

Name	Fees Earned or Paid in Cash	Stock Awards Granted 2013	Total	Stock Awards Vested[1] 2013
Dr. Jay M. Eastman	$ 20,000	$ 15,000	$ 35,000	$ 12,244(2)
Edward J. Borey[8]	$ 18,000	$ 15,000	$ 33,000	$ 12,244(3)
Seymour Jones	$ 22,000	$ 15,000	$ 37,000	$ 12,244(4)
Elliot Sloyer[8]	$ 20,000	$ 15,000	$ 35,000	$ 12,244(5)
Michael E. Marrus	$ 20,000	$ 15,000	$ 35,000	$ 12,244(6)
Arthur S. Leibowitz	$ 16,000	$ 15,000	$ 31,000	$ 12,244(7)

(1) This column reflects the 2013 compensation expense for stock based awards for the year ended December 31, 2013.
(2) As of December 31, 2013, Dr. Eastman held 24,566 unvested restricted shares of our common stock.
(3) As of December 31, 2013, Mr. Borey held no unvested restricted shares of our common stock.
(4) As of December 31, 2013, Prof. Jones held 24,566 unvested restricted shares of our common stock.
(5) As of December 31, 2013, Mr. Sloyer held no unvested restricted shares of our common stock.
(6) As of December 31, 2013, Mr. Marrus held 24,566 unvested restricted shares of our common stock.
(7) As of December 31, 2013, Mr. Leibowitz held 24,566 unvested restricted shares of our common stock.
(8) This individual retired as a director effective November 12, 2013.

Table of Contents

Significant Employees

Our significant employees as of February 28, 2014, and their ages as of December 31, 2013, are as follows:

Name	Age	Position
Dean Krutty	48	President, Training and Simulation Division
Ronen Badichi	48	President, Battery and Power Systems Division
Yaakov Har-Oz	56	Senior Vice President, General Counsel and Secretary
Norman E. Johnson	61	Corporate Controller, Chief Accounting Officer

Dean Krutty became President of the Simulation Division in January 2005, after having spent the prior thirteen years as a member of the FAAC management team. He began his career at FAAC as an electrical engineer in FAAC's part task trainer division and most recently served as FAAC's Director of Military Operations. He also has significant experience managing programs in the training and simulation industry. Mr. Krutty holds a B.S. in electrical engineering from the Michigan State University.

Ronen Badichi became the General Manager of Epsilor Electronic Industries in May 2005 and the President of our Battery Division in December 2007. Prior to joining Epsilor, Mr. Badichi served since 1999 as the General Manager of Maoz Industries, a high end supplier of displays to the aviation industry. Prior thereto, Mr. Badichi was a project manager at BAE Systems and served as the F-16 Avionics Integration manager in the Israeli Air Force, with the rank of Captain. Mr. Badichi holds a B.Sc. in Physics and Electro-Optic Engineering from the Lev Institute of Technology in Jerusalem.

Yaakov Har-Oz has served as our Vice President and General Counsel since October 2000 and as our corporate Secretary since December 2000; in December 2005 Mr. Har-Oz was promoted to Senior Vice President. From 1994 until October 2000, Mr. Har-Oz was a partner in the Jerusalem law firm of Ben-Ze'ev, Hacohen & Co. Prior to moving to Israel in 1993, he was an administrative law judge and in private law practice in New York. Mr. Har-Oz holds a B.A. from Brandeis University in Waltham, Massachusetts and a J.D. from Vanderbilt Law School (where he was an editor of the law review) in Nashville, Tennessee. He is a member of the New York bar and the Israel Chamber of Advocates.

Norman E. Johnson has served as our Controller and as our Chief Accounting Officer since August 2006. Prior to joining Arotech, Mr. Johnson was the Corporate Controller with Catuity Inc., a Nasdaq-listed provider of loyalty and gift card solutions. Prior to Catuity, he was with the McCoig Group, a Detroit based holding company, and from March 2000 to August 2004 he was the Corporate Controller of Learning Care Group Inc., a $250 million Nasdaq-listed provider of child care and educational services. Mr. Johnson holds a B.S. in Accounting from Central Michigan University in Mt. Pleasant, Michigan.

Section 16(a) Beneficial Ownership Reporting Compliance

Under the securities laws of the United States, our directors, certain of our officers and any persons holding more than ten percent of our common stock are required to report their ownership of our common stock and any changes in that ownership to the Securities and Exchange Commission. Specific due dates for these reports have been established and we are required to report any failure to file by these dates during 2013. We are not aware of any instances during 2013, not previously disclosed by us, where such "reporting persons" failed to file the required reports on or before the specified dates.

Table of Contents

ITEM 11. EXECUTIVE COMPENSATION

Cash and Other Compensation

Summary Compensation Table

The following table, which should be read in conjunction with the explanations provided below, shows the compensation that we paid (or accrued) to our executive officers during the fiscal years ended December 31, 2013 and 2012:

SUMMARY COMPENSATION TABLE[(1)]

Name and Principal Position	Year	Salary	Bonus	Stock Awards Granted(2)	All Other Compensation	Total
Robert S. Ehrlich	2013	$ 444,356	$ 379,900	$ 365,000	$ 135,423(3)	$ 1,321,679
Chairman, Chief Executive Officer and a director	2012	$ 431,910	$ 120,533	$ 230,000	$ 90,361(4)	$ 872,804
Thomas J. Paup	2013	$ 201,400	$ 100,500	$ 273,750	$ –(5)	$ 575,650
Senior Vice President – Finance and Chief Financial Officer	2012	$ 175,000	$ 68,805	$ 72,000	$ (3,137)(5)	$ 312,668
Steven Esses	2013	$ 273,437(6)	$ 205,400	$ 273,750	$ 398,878(7)	$ 1,151,465
President and a director	2012	$ 232,566(8)	$ 145,200	$ 172,500	$ 386,851(9)	$ 903,279

(1) We paid the amounts reported for each named executive officer in U.S. dollars and/or New Israeli Shekels (NIS). We have translated amounts paid in NIS into U.S. dollars at the exchange rate of NIS into U.S. dollars at the time of payment or accrual, except that certain items are pursuant to corporate policy paid at a set exchange rate that may be higher than the actual exchange rate on the date of payment. The difference, which was a positive number in 2012 and 2013, has been reported under "Salary." The exchange rate differences for Mr. Ehrlich were $88,797 and $62,843 for 2013 and 2012, respectively. The exchange rate differences for Mr. Esses were $54,642 and $33,838 for 2013 and 2012, respectively.

(2) Reflects the value of awards of restricted stock or restricted stock units granted to our executive officers based on the compensation cost of their stock-based awards – see Note 13.c. of the Notes to Consolidated Financial Statements. The number of shares of restricted stock or restricted stock units received by our executive officers pursuant to such awards in 2013, vesting entirely after one (dependent 33% on tenure and 67% on performance), was as follows: Mr. Ehrlich, 100,000; Mr. Esses, 75,000; Mr. Paup, 75,000. None of these shares came up for vesting in 2013. The number of shares of restricted stock or restricted stock units received by our executive officers pursuant to such awards in 2012, vesting in equal thirds over three years (dependent entirely on tenure), was as follows: Mr. Ehrlich, 100,000; Mr. Esses, 75,000. One-third of these shares vested in 2013. The number of shares of restricted stock or restricted stock units received by our executive officers pursuant to such awards in 2011, vesting one-half after one year (dependent 25% on tenure and 75% on performance) and one-half after two years (dependent 33% on tenure and 67% on performance), was as follows: Mr. Ehrlich, 200,000; Mr. Esses, 150,000; Mr. Paup, 120,000. The second tranche of these shares (a total of 235,000 shares) came up for vesting in December 2012, and of the 67% dependent on performance, 156,667 shares – or 100% of the total – vested.

(3) Of this amount, $91,834 represents the change in our accrual for severance pay that will be payable to Mr. Ehrlich upon his leaving our employ other than if he is terminated for cause, such as a breach of trust; $32,205 represents the change of our accrual for vacation pay; $3,578 represents tax reimbursements and $7,806 represents other normal or mandated Israeli benefits.

(4) Of this amount, $(31,467) (the obligation declined due to exchange rate differences) represents the change in our accrual for severance pay that will be payable to Mr. Ehrlich upon his leaving our employ other than if he is terminated for cause, such as a breach of trust; $30,720 represents the change of our accrual for vacation pay; $30,131 represents tax reimbursements and $60,977 represents other normal or mandated Israeli benefits.

Table of Contents

(5) Represents the increase (decrease) in our accrual for Mr. Paup for accrued but unused vacation days.

(6) Does not include approximately $148,723 that we paid in consulting fees to Sampen Corporation, a New York corporation owned by members of Steven Esses's immediate family, from which Mr. Esses receives a salary. See "Item 13. Certain Relationships and Related Transactions – Consulting Agreement with Sampen Corporation," below.

(7) Of this amount, $38,745represents payments to Israeli pension and education funds; $38,856 represents the change in our accrual for severance pay that will be payable to Mr. Esses upon his leaving our employ other than if he is terminated for cause, such as a breach of trust; $28,680 represents sick pay redemption; $214,559 represents the change in sick pay accruals; $8,687 represents the change of our accrual for vacation pay; $750 represents tax reimbursements; and $68,601 represents other normal or mandated Israeli benefits.

(8) Does not include approximately $186,000 that we paid in consulting fees to Sampen Corporation, a New York corporation owned by members of Steven Esses's immediate family, from which Mr. Esses receives a salary. See "Item 13. Certain Relationships and Related Transactions – Consulting Agreement with Sampen Corporation," below.

(9) Of this amount, $33,102 represents payments to Israeli pension and education funds; $232,066 represents the change in our accrual for severance pay that will be payable to Mr. Esses upon his leaving our employ other than if he is terminated for cause, such as a breach of trust; $26,856 represents sick pay redemption; $2,227 represents the change of our accrual for vacation pay; $645 represents tax reimbursements; and $58,117 represents other normal or mandated Israeli benefits.

Executive Loans

In 2000, we extended a loan to one of our Named Executive Officers. This loan is summarized in the following table, and is further described under "Item 13. Certain Relationships and Related Transactions – Officer Loan," below.

Name of Borrower	Date of Loan	Original Principal Amount of Loan	Amount Outstanding as of 12/31/2013	Terms of Loan
Robert S. Ehrlich	02/09/2000	$ 329,163	$ 452,995	Twenty-five-year non-recourse loan to purchase our stock, secured by the shares of stock purchased.

Plan-Based Awards

Grants of Restricted Stock or Restricted Stock Units

During 2013, the Compensation Committee approved the grant of a total of 250,000 shares of restricted stock or restricted stock units to our executive officers (in connection with their amended and restated employment agreements). The table below sets forth each equity award granted to our executive officers during the year ended December 31, 2013.

GRANTS OF PLAN-BASED AWARDS

Name	Grant Date	All Other Stock Awards: Number of Shares of Stocks	Grant Date Fair Value of Stock Awards (1)
Robert S. Ehrlich(2)	12/23/2013	100,000	$ 365,000
Steven Esses(2)	12/23/2013	75,000	$ 273,750
Thomas J. Paup(2)	12/23/2013	75,000	$ 273,750

(1)Reflects the aggregate market value of the shares of restricted stock or restricted stock units determined based on the closing price of our common stock on the Nasdaq Global Market on the date of grant.

(2)The restricted shares or restricted stock units vest on December 31, 2014 (dependent 33% on tenure and 67% on performance).

Table of Contents

Stock Option Exercises and Vesting of Restricted Stock Awards

Our executive officers did not exercise any stock options during 2013. The following table presents awards of restricted stock or restricted stock units that vested during the year ended December 31, 2013.

STOCK VESTED

Name	Number of Shares Acquired on Vesting (#)	Value Realized on Vesting[1] ($)
Robert S. Ehrlich	133,334	$ 465,336
Steven Esses	100,000	$ 349,000
Thomas J. Paup	60,000	$ 209,400

[1] Reflects the aggregate market value of the shares of restricted stock or restricted stock units determined based on a per share price of $3.49, the closing price of our common stock on the Nasdaq Global Market on December 31, 2013, which was the last trading day of 2013.

Outstanding Equity Awards at Fiscal Year-End

The table below sets forth information for our executive officers with respect to option, restricted stock and restricted stock unit values at the end of the fiscal year ended December 31, 2013.

OUTSTANDING EQUITY AWARDS AT FISCAL YEAR-END

	Stock Awards			
			Equity Incentive Plan Awards	
Name	Number of Shares that Have Not Vested (#)	Market Value of Shares that Have Not Vested(2) ($)	Number of Unearned Shares that Have Not Vested (#)	Market Value of Unearned Shares that Have Not Vested(1) ($)
Robert S. Ehrlich	66,666	$ 232,664	133,334	$ 465,336
Steven Esses	50,000	$ 174,500	100,000	$ 349,000
Thomas J. Paup	–	$ –	60,000	$ 209,400

[1] Reflects the aggregate market value of the shares of restricted stock or restricted stock units determined based on a per share price of $3.49, the closing price of our common stock on the Nasdaq Global Market on December 31, 2013, which was the last trading day of 2013.

Employment Contracts

Robert S. Ehrlich

Mr. Ehrlich is party to an amended and restated employment agreement with us executed in May 2013 and amended in November 2013. The term of this employment agreement expires on December 31, 2015. The employment agreement provides that Mr. Ehrlich will serve as our Chairman of the Board and Chief Executive Officer until September 30, 2014, and thereafter as our Chairman of the Board.

The employment agreement, as amended, provides for a monthly base salary of NIS 144,554 (approximately $41,465 per month based on the exchange rate on December 31, 2013), as adjusted annually for Israeli inflation (but with no retroactive inflation adjustment for 2013 in respect of inflation during 2012). Additionally, the board may at its discretion raise Mr. Ehrlich's base salary.

Table of Contents

The employment agreement provides that we will pay an annual bonus, on a sliding scale, in an amount equal to 25% of Mr. Ehrlich's annual base salary then in effect if the results we actually attain for the year in question are 100% or more of the amount we budgeted at the beginning of the year, up to a maximum of 75% of his annual base salary then in effect if the results we actually attain for the year in question are 120% or more of the amount we budgeted at the beginning of the year. Budget targets in the past have included combinations of revenues, EBITDA, backlog, and/or other factors. Mr. Ehrlich's previous employment agreement had a similar bonus provision (but with a higher (35%) threshold bonus). For 2012 and 2013, the Compensation Committee choose financial targets for determining eligibility for the above-referenced cash incentive bonus that are determined in part on the achievement of set budgetary forecast targets for adjusted EBITDA, a non-GAAP measurement, and in part on the achievement of other targets – in the case of 2012, targets for revenues, and in the case of 2013, targets for revenues and adjusted EBITDA. The Board's adjusted budget for 2013 for continuing operations called for adjusted EBITDA of $3.1 million with revenues of at least $87.7 million. Actual results were EBITDA of $6.5 million with revenues of $88.6 million. New bonus targets will be chosen for 2014 based upon future budgetary forecasts.

The employment agreement also contains various benefits customary in Israel for senior executives, tax and financial planning expenses and an automobile, and contains confidentiality and non-competition covenants. Pursuant to the employment agreements, we granted Mr. Ehrlich demand and "piggyback" registration rights covering shares of our common stock held by him.

We can terminate Mr. Ehrlich's employment agreement in the event of death or disability or for "Cause" (defined as conviction of certain crimes, willful failure to carry out directives of our board of directors or gross negligence or willful misconduct). Mr. Ehrlich has the right to terminate his employment upon a change in our control or for "Good Reason," which is defined to include adverse changes in employment status or compensation, our insolvency, material breaches and certain other events.

Upon termination of employment, the employment agreement provides for payment of all accrued and unpaid compensation and benefits (including under most circumstances Israeli statutory severance, described under "Item 1. Business – Employees," above), and (unless we have terminated the agreement for Cause or Mr. Ehrlich has terminated the agreement without Good Reason) bonuses (to the extent earned) due for the year in which employment is terminated. Furthermore, in respect of any termination by us other than termination for Cause, all outstanding options and all restricted shares will be fully vested. Restricted shares that have vested prior to the date of termination are not forfeited under any circumstances, including termination for Cause.

The employment agreement further provides that Mr. Ehrlich's severance payment of $1,625,400, which has been fully earned, shall be paid to him as follows:

(i) By immediate transfer to Mr. Ehrlich of the shares of our common stock issued to him (but since held by us) in April 2009 (described below), which we and Mr. Ehrlich then agreed would be valued at $240,000, irrespective of any changes in the market value of the shares.

(ii) By immediate transfer to Mr. Ehrlich of $774,377 in cash, which was transferred to Mr. Ehrlich in 2013 from Mr. Ehrlich's Rabbi Trust established by trust agreement dated December 23, 2003.

(iii) The remaining $611,023 of the severance payment is being paid to Mr. Ehrlich in 30 equal monthly installments of $20,367.43 each on or before the last day of each calendar month by wire transfer to an account specified in writing by Mr. Ehrlich, beginning with the calendar month of May 2013 through and including the calendar month of October 2015.

A table describing the payments that would have been due to Mr. Ehrlich under his employment agreement had Mr. Ehrlich's employment with us been terminated at the end of 2013 under various circumstances (pursuant to the terms of his then-current employment agreement) appears under "Potential Payments and Benefits upon Termination of Employment – Robert S. Ehrlich," below.

Table of Contents

In April 2009, we, with the agreement of Mr. Ehrlich, funded a portion of his severance security by means of issuing to him, in trust, restricted stock having a value (based on the closing price of our stock on the Nasdaq Stock Market on the date on which Mr. Ehrlich and our board of directors agreed on this arrangement) of $240,000, a total of 328,767 shares. We agreed with Mr. Ehrlich that the economic risk of gain or loss on these shares is to be borne by Mr. Ehrlich. Should Mr. Ehrlich leave our employ under circumstances in which he is not entitled to his severance package (primarily, termination for Cause as defined in his employment agreement), this number of shares would be returned to us for cancellation.

Steven Esses

Mr. Esses is party to an amended and restated employment agreement with EFL and guaranteed by us executed in May 2013 and amended in November 2013. The term of this employment agreement expires on December 31, 2015. The employment agreement provides that Mr. Esses will serve as our President until September 30, 2014, and thereafter as our President and Chief Executive Officer.

The employment agreement as amended provides for a monthly base salary of NIS 97,115 (approximately $27,858 at the rate of exchange in effect on March 15, 2014), as adjusted for Israeli inflation (but with no retroactive inflation adjustment for 2013 in respect of inflation during 2012). Additionally, the board may at its discretion raise Mr. Esses’s base salary.

The Esses Employment Agreement provides that if the results we actually attain in a given year are at least 100% of the amount we budgeted at the beginning of the year, we will pay a bonus, on a sliding scale, in an amount equal to a minimum of 25% of Mr. Esses’s annual base salary then in effect, up to a maximum of 75% of his annual base salary then in effect if the results we actually attain for the year in question are 120% or more of the amount we budgeted at the beginning of the year. Budget targets in the past have included combinations of revenues, EBITDA, backlog, and/or other factors. Mr. Esses’s previous employment agreement had a similar bonus provision (but with a lower (20%) threshold bonus). For 2012 and 2013, the Compensation Committee choose financial targets for determining eligibility for the above-referenced cash incentive bonus that are determined in part on the achievement of set budgetary forecast targets for adjusted EBITDA, a non-GAAP measurement, and in part on the achievement of other targets – in the case of 2012, targets for revenues, and in the case of 2013, targets for revenues and adjusted EBITDA. The Board’s adjusted budget for 2013 for continuing operations called for adjusted EBITDA of $3.1 million with revenues of at least $87.7 million. Actual results were EBITDA of $6.5 million with revenues of $88.6 million. New bonus targets will be chosen for 2014 based upon future budgetary forecasts.

The employment agreement also contains various benefits customary in Israel for senior executives, tax and financial planning expenses and an automobile, and contains confidentiality and non-competition covenants. Pursuant to the employment agreements, we granted Mr. Esses demand and “piggyback” registration rights covering shares of our common stock held by him.

We can terminate Mr. Esses’s employment agreement in the event of death or disability or for “Cause” (defined as conviction of certain crimes, willful failure to carry out directives of our board of directors or gross negligence or willful misconduct). Mr. Esses has the right to terminate his employment upon a change in our control or for “Good Reason,” which is defined to include adverse changes in employment status or compensation, our insolvency, material breaches and certain other events. Additionally, Mr. Esses may retire (after age 65), retire early (after age 55) or terminate his agreement for any reason upon 150 days’ notice.

Table of Contents

Upon termination of employment, the employment agreement provides for payment of all accrued and unpaid compensation (including under most circumstances Israeli statutory severance, described under “Item 1. Business – Employees,” above), and (unless we have terminated the agreement for Cause or Mr. Esses has terminated the agreement without Good Reason and without giving us 150 days’ notice of termination) bonuses (to the extent earned) due for the year in which employment is terminated (in an amount of not less than 20% of base salary) and severance pay equal to the greater of (i) twenty-four (24) times monthly salary, and (ii) NIS 3,144,000 (approximately $902,500 at the rate of exchange in effect on March 15, 2014). Furthermore, Mr. Esses will receive, in respect of all benefits, an additional sum in the amount of (i) $75,000, in the case of termination due to disability, good reason, death, or non-renewal, or (ii) $150,000, in the case of termination due to early retirement, retirement, change of control or change of location. Additionally, in respect of any termination due to a change of control or a change in the primary location from which Mr. Esses shall have conducted his business activities during the 60 days prior to such change, all outstanding options and all restricted shares will be fully vested. Restricted shares that have vested prior to the date of termination are not forfeited under any circumstances, including termination for Cause.

A table describing the payments that would have been due to Mr. Esses under his employment agreement had Mr. Esses’s employment with us been terminated at the end of 2013 under various circumstances (pursuant to the terms of his then-current employment agreement) appears under “Potential Payments and Benefits upon Termination of Employment – Steven Esses,” below.

In April 2009, we, with the agreement of Mr. Esses, funded a portion of his severance security by means of issuing to him, in trust, restricted stock having a value (based on the closing price of our stock on the Nasdaq Stock Market on the date on which Mr. Esses and our board of directors agreed on this arrangement) of $200,000, a total of 273,973 shares. We agreed with Mr. Esses that the economic risk of gain or loss on these shares is to be borne by Mr. Esses. Should Mr. Esses leave our employ under circumstances in which he is not entitled to his severance package (primarily, termination for Cause as defined in his employment agreement), these shares would be returned to us for cancellation.

See also “Item 13. Certain Relationships and Related Transactions – Consulting Agreement with Sampen Corporation,” below.

Thomas J. Paup

Mr. Paup is party to an amended and restated employment agreement with us executed in May 2013 and amended in January 2014, having a term running until December 31, 2015. The employment agreement provides that Mr. Paup will serve as our Senior Vice President – Finance and Chief Financial Officer.

Under the terms of his employment agreement as amended, Mr. Paup is entitled to receive a base salary of $225,000, as adjusted annually for inflation (but with no retroactive inflation adjustment for 2013 in respect of inflation during 2012).

The employment agreement provides that if the results we actually attain in a given year are at least 90% of the amount we budgeted at the beginning of the year, we will pay a bonus, on a sliding scale, in an amount equal to a minimum of 16.5% of Mr. Paup’s annual base salary then in effect, up to a maximum of 50% of his annual base salary then in effect if the results we actually attain for the year in question are 120% or more of the amount we budgeted at the beginning of the year. Mr. Paup’s previous employment agreement had a similar bonus provision (but with a higher (20%) threshold bonus). For 2012 and 2013, the Compensation Committee choose financial targets for determining eligibility for the above-referenced cash incentive bonus that are determined in part on the achievement of set budgetary forecast targets for adjusted EBITDA, a non-GAAP measurement, and in part on the achievement of other targets – in the case of 2012, targets for revenues, and in the case of 2013, targets for revenues and adjusted EBITDA. The Board’s adjusted budget for 2013 for continuing operations called for adjusted EBITDA of $3.1 million with revenues of at least $87.7 million. Actual results were EBITDA of $6.5 million with revenues of $88.6 million. New bonus targets will be chosen for 2014 based upon future budgetary forecasts.

Table of Contents

Mr. Paup's employment agreement provides that if we terminate his agreement other than for cause (defined as conviction of certain crimes, willful failure to carry out directives of our board of directors or gross negligence or willful misconduct), we must pay Mr. Paup severance in an amount of twelve times his monthly salary. Restricted shares that have vested prior to the date of termination are not forfeited under any circumstances, including termination for Cause.

A table describing the payments that would have been due to Mr. Paup under his employment agreement had Mr. Paup's employment with us been terminated at the end of 2013 under various circumstances (pursuant to the terms of his then-current employment agreement) appears under "Potential Payments and Benefits upon Termination of Employment – Thomas J. Paup," below.

Others

Other employees have entered into individual employment agreements with us. These agreements govern the basic terms of the individual's employment, such as salary, vacation, overtime pay, severance arrangements and pension plans. Subject to Israeli law, which restricts a company's right to relocate an employee to a work site farther than sixty kilometers from his or her regular work site, we have retained the right to transfer certain employees to other locations and/or positions provided that such transfers do not result in a decrease in salary or benefits. All of these agreements also contain provisions governing the confidentiality of information and ownership of intellectual property learned or created during the course of the employee's tenure with us. Under the terms of these provisions, employees must keep confidential all information regarding our operations (other than information which is already publicly available) received or learned by the employee during the course of employment. This provision remains in force for five years after the employee has left our service. Further, intellectual property created during the course of the employment relationship belongs to us.

A number of the individual employment agreements, but not all, contain non-competition provisions which restrict the employee's rights to compete against us or work for an enterprise which competes against us. Such provisions generally remain in force for a period of two years after the employee has left our service.

Under the laws of Israel, an employee of ours who has been dismissed from service, died in service, retired from service upon attaining retirement age, or left due to poor health, maternity or certain other reasons, is entitled to severance pay at the rate of one month's salary for each year of service, *pro rata* for partial years of service. We currently fund this obligation by making monthly payments to approved private provident funds and by its accrual for severance pay in the consolidated financial statements. See Note 2.q. **of the Notes to the Consolidated Financial Statements.**

Potential Payments and Benefits upon Termination of Employment

This section sets forth in tabular form quantitative disclosure regarding estimated payments and other benefits that would have been received by certain of our executive officers if their employment had terminated on December 31, 2013 (the last business day of the fiscal year), pursuant to the terms of their then-current employment agreements.

For a narrative description of the severance and change in control arrangements in the current employment contracts of Messrs. Ehrlich, Esses and Paup, see "– Employment Contracts," above. Each of Messrs. Ehrlich and Esses will be eligible to receive severance payments in excess of accrued but unpaid items only if he signs a general release of claims.

Table of Contents

Robert S. Ehrlich

The following table describes the potential payments and benefits upon employment termination for Robert S. Ehrlich, our Chairman and Chief Executive Officer, pursuant to applicable law and the terms of his then-current employment agreement with us, as if his employment had terminated on December 31, 2013 (the last business day of the fiscal year) under the various scenarios described in the column headings as explained in the footnotes below.

ROBERT S. EHRLICH

Payments and Benefits	Death or Disability[(1)]	Cause[(2)]	Good Reason[(3)]	Other Employee Termination[(4)]
Accrued but unpaid:				
Base salary	$ 32,123	$ 32,123	$ 32,123	$ 32,123
Vacation	142,086	142,086	142,086	142,086
Recuperation pay[(5)]	449	449	449	449
Benefits:				
Continuing education fund[(6)]	2,409	2,409	2,409	2,409
Contractual severance	1,625,400	1,625,400	1,625,400	1,625,400
Statutory severance[(7)]	1,012,182	–	1,012,182	–
TOTAL:	$ 2,814,649	$ 1,802,467	$ 2,814,649	$ 1,802,467

(1) “Disability” is defined in Mr. Ehrlich’s employment agreement as a physical or mental infirmity which impairs Mr. Ehrlich’s ability to substantially perform his duties and which continues for a period of at least 180 consecutive days.

(2) “Cause” is defined in Mr. Ehrlich’s employment agreement as (i) conviction for fraud, crimes of moral turpitude or other conduct which reflects on us in a material and adverse manner; (ii) a willful failure to carry out a material directive of our Board of Directors, *provided* that such directive concerned matters within the scope of Mr. Ehrlich’s duties, would not give Mr. Ehrlich “Good Reason” to terminate his agreement (see footnote 4 below) and was capable of being reasonably and lawfully performed; (iii) conviction in a court of competent jurisdiction for embezzlement of our funds; and (iv) reckless or willful misconduct that is materially harmful to us.

(3) “Good Reason” is defined in Mr. Ehrlich’s employment agreement as (i) a change in Mr. Ehrlich’s status, title, position or responsibilities which, in Mr. Ehrlich’s reasonable judgment, represents a reduction or demotion in his status, title, position or responsibilities as in effect immediately prior thereto (other than the planned change in responsibilities and title resulting from the planned assumption by Steven Esses of the position of Chief Executive Officer in October 2014); (ii) a reduction in Mr. Ehrlich’s base salary; (iii) the failure by us to continue in effect any material compensation or benefit plan in which Mr. Ehrlich is participating; (iv) our insolvency or the filing (by any party, including us) of a petition for our winding-up; (v) any material breach by us of any provision of Mr. Ehrlich’s employment agreement; (vi) any purported termination of Mr. Ehrlich’s employment for cause by us which does not comply with the terms of Mr. Ehrlich’s employment agreement; and (vii) any movement of the location where Mr. Ehrlich is generally to render his services to us from the Jerusalem/Tel Aviv area of Israel.

(4) “Other Employee Termination” means a termination by Mr. Ehrlich of his employment other than for Good Reason.

(5) Pursuant to Israeli law and our customary practice, we pay Mr. Ehrlich in July of each year the equivalent of ten days’ “recuperation pay” at the statutory rate of NIS 371 (approximately $99) per day.

(6) Pursuant to Israeli law, we must contribute an amount equal to 7.5% of Mr. Ehrlich’s base salary to a continuing education fund, up to the permissible tax-exempt salary ceiling according to the income tax regulations in effect from time to time. At December 31, 2013, the ceiling then in effect was NIS 15,712 (approximately $4,209).

(7) Under Israeli law, employees terminated other than for cause receive severance in the amount of one month’s base salary for each year of work, at their salary rate at the date of termination.

Table of Contents

Steven Esses

The following table describes the potential payments and benefits upon employment termination for Steven Esses, our President, pursuant to applicable law and the terms of his then-current employment agreement with us, as if his employment had terminated on December 31, 2013 (the last business day of the fiscal year) under the various scenarios described in the column headings as explained in the footnotes below.

See also "Item 13. Certain Relationships and Related Transactions – Consulting Agreement with Sampen Corporation," below.

STEVEN ESSES

Payments and Benefits	Non-Renewal[1]	Death or Disability[2]	Cause[3]	Good Reason[4]	Change of Control[5]	Retirement [6]	Early Retirement [7]	Other Employee Termination [8]
Accrued but unpaid[9]:

Benefits				75,000	150,000	150,000	150,000	
TOTAL:	$ 1,577,125	$ 1,577,125	$ 346,572	$ 1,652,125	$ 1,727,125	$ 1,727,125	$ 1,727,125	$ 346,572

(1) "Non-renewal" is defined in Mr. Esses's employment agreement as a decision, made with written notice of at least 90 days in advance of the effective date of such decision, by either us or Mr. Esses not to renew Mr. Esses's employment for an additional two-year term. Pursuant to the terms of Mr. Esses's employment agreement, in the absence of such notice, Mr. Esses's employment agreement automatically renews.

(2) "Disability" is defined in Mr. Esses's employment agreement as a physical or mental infirmity which impairs Mr. Esses's ability to substantially perform his duties and which continues for a period of at least 180 consecutive days.

(3) "Cause" is defined in Mr. Esses's employment agreement as (i) conviction for fraud, crimes of moral turpitude or other conduct which reflects on us in a material and adverse manner; (ii) a willful failure to carry out a material directive of our Chief Executive Officer, *provided* that such directive concerned matters within the scope of Mr. Esses's duties, would not give Mr. Esses "Good Reason" to terminate his agreement (see footnote 4 below) and was capable of being reasonably and lawfully performed; (iii) conviction in a court of competent jurisdiction for embezzlement of our funds; and (iv) reckless or willful misconduct that is materially harmful to us.

(4) "Good Reason" is defined in Mr. Esses's employment agreement as (i) (a) a change in Mr. Esses's status, title, position or responsibilities which, in Mr. Esses's reasonable judgment, represents a reduction or demotion in his status, title, position or responsibilities as in effect immediately prior thereto, (b) a change in the primary location from which Mr. Esses shall have conducted his business activities during the 60 days prior to such change, (c) a change in the composition of a majority of the Board of directors, or (d) the failure to promote Mr. Esses to the position of President and Chief Executive Officer on or before October 1, 2104; or (ii) a reduction in Mr. Esses's base salary; (iii) the failure by us to continue in effect any material compensation or benefit plan in which Mr. Esses is participating; (iv) our insolvency or the filing (by any party, including us) of a petition for our winding-up; (v) any material breach by us of any provision of Mr.

Esses's employment agreement; and (vi) any purported termination of Mr. Esses's employment for cause by us which does not comply with the terms of Mr. Esses's employment agreement.

(5) Represents additional payment due to Mr. Esses should he terminate his employment under the circumstances set forth in clause (i)(c) of footnote 4 above.

(7) "Retirement" is defined as Mr. Esses terminating his employment with us at age 65 or older on at least 150 days' prior notice.

Table of Contents

(8)"Early Retirement" is defined as Mr. Esses terminating his employment with us at age 55 or older (up to age 65) on at least 150 days' prior notice.

(9)Any termination by Mr. Esses of his employment with us that does not fit into any of the prior categories, including but not limited to Mr. Esses terminating his employment with us, with or without notice, other than at the end of an employment term or renewal thereof, in circumstances that do not fit into any of the prior categories.

(10)Does not include a total of $9,000 in accrued but unpaid consulting fees due at December 31, 2013 to Sampen Corporation, a New York corporation owned by members of Steven Esses's immediate family, from which Mr. Esses receives a salary. See "Item 13. Certain Relationships and Related Transactions – Consulting Agreement with Sampen Corporation," below.

(11)Limited to an aggregate of 30 days.

(12)Pursuant to Israeli law and our customary practice, we pay Mr. Esses in July of each year the equivalent of six days' "recuperation pay" at the statutory rate of NIS 374 (approximately $108) per day.

(13)Payments to managers' insurance, a benefit customarily given to senior executives in Israel, come to a total of 15.83% of base salary, consisting of 8.33% for payments to a fund to secure payment of statutory severance obligations, 5% for pension and 2.5% for disability. The managers' insurance funds reflected in the table do not include the 8.33% payments to a fund to secure payment of statutory severance obligations with respect to amounts paid prior to December 31, 2012, which funds are reflected in the table under the "Statutory severance" heading.

(14)Pursuant to Israeli law, we must contribute an amount equal to 7.5% of Mr. Esses's base salary to a continuing education fund, up to the permissible tax-exempt salary ceiling according to the income tax regulations in effect from time to time. At December 31, 2013, the ceiling then in effect was NIS 15,712 (approximately $4,527). In Mr. Esses's case, we have customarily contributed to his continuing education fund in excess of the tax-exempt ceiling, and then reimbursed Mr. Esses for the tax. The sums in the table reflect this additional contribution and the resultant tax reimbursement.

(15)Under Israeli law, employees terminated other than for cause receive severance in the amount of one month's base salary for each year of work, at their salary rate at the date of termination.

Thomas J. Paup

The following table describes the potential payments and benefits upon employment termination for Thomas J. Paup, our Senior Vice President – Finance and Chief Financial Officer, pursuant to applicable law and the terms of his then-current employment agreement with us, as if his employment had terminated on December 31, 2013 (the last business day of the fiscal year) under the various scenarios described in the column headings as explained in the footnotes below.

THOMAS J. PAUP

Payments and Benefits	Death or Disability(1)	Cause(2)	Non-Renewal(3)	Termination at Will(4)
Accrued but unpaid:				
Base salary	$ 8,392	$ 8,392	$ 8,392	$ 8,392
Vacation	11,619	11,619	11,619	11,619
Contractual severance	–	–	402,800	201,400
TOTAL:	$ 20,011	$ 20,011	$ 422,811	$ 221,411

(1) "Disability" is defined in Mr. Paup's employment agreement as a physical or mental infirmity which impairs Mr. Paup's ability to substantially perform his duties and which continues for a period of at least 180 consecutive days.

(2) "Cause" is defined in Mr. Paup's employment agreement as (i) a breach of trust by Mr. Paup, including, for example, but without limitation, commission of an act of moral turpitude, theft, embezzlement, self-dealing or insider trading; (ii) the unauthorized disclosure by Mr. Paup of confidential information of or relating to us; (iii) a material breach by Mr. Paup of his employment agreement; or (iv) any act of, or omission by, Mr. Paup which, in our reasonable judgment, amounts to a serious failure by Mr. Paup to perform his responsibilities or functions or in the exercise of his authority, which failure, in our reasonable judgment, rises to a level of gross nonfeasance, misfeasance or malfeasance.

Table of Contents

(3) "Non-Renewal" is defined in Mr. Paup's employment agreement as the agreement coming to the end of the Term and not being extended or immediately succeeded by a new substantially similar employment agreement.

(4) "Termination at Will" is defined in Mr. Paup's employment agreement as Mr. Paup terminating his employment with us on written notice of at least 120 days in advance of the effective date of such termination.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Security Ownership of Certain Beneficial Owners and Management

The following table sets forth information regarding the security ownership, as of February 28, 2014, of those persons owning of record or known by us to own beneficially more than 5% of our common stock and of each of our Named Executive Officers and directors, and the shares of common stock held by all of our directors and executive officers as a group.

Name and Address of Beneficial Owner(1)	Shares Beneficially Owned(2)(3)	Percentage of Total Shares Outstanding(3)
Robert S. Ehrlich	1,401,143(4)	6.9%
Steven Esses	1,002,480(5)	5.0%
Thomas J. Paup	233,596(6)	1.2%
Dr. Jay M. Eastman	74,124(7)	*
Prof. Seymour Jones	74,124(8)	*
Michael E. Marrus	77,414(9)	*
Arthur S. Leibowitz	59,433(10)	*
All of our directors and executive officers as a group (7 persons)	2,922,314(11)	13.1%

* Less than one percent.

(1) The address of each named beneficial owner is in care of Arotech Corporation, 1229 Oak Valley Drive, Ann Arbor, Michigan 48108.

(2) Unless otherwise indicated in these footnotes, each of the persons or entities named in the table has sole voting and sole investment power with respect to all shares shown as beneficially owned by that person, subject to applicable community property laws.

(3) Based on 20,163,163 shares of common stock outstanding as of February 28, 2014. For purposes of determining beneficial ownership of our common stock, owners of options exercisable within sixty days are considered to be the beneficial owners of the shares of common stock for which such securities are exercisable. The percentage ownership of the outstanding common stock reported herein is based on the assumption (expressly required by the applicable rules of the Securities and Exchange Commission) that only the person whose ownership is being reported has exercised his options for shares of common stock.

(4) Consists of 890,612 shares held directly by Mr. Ehrlich, 166,666 shares of unvested restricted stock (the vesting of 66,667 of which is subject to future performance criteria), 328,767 shares held as part of a trust securing the payment of Mr. Ehrlich's severance package pursuant to the terms of our employment agreement with him, 3,571 shares held by Mr. Ehrlich's wife (in which shares Mr. Ehrlich disclaims beneficial ownership), and 11,527 shares held in Mr. Ehrlich's pension plan.

(5) Consists of 603,507 shares held directly by Mr. Esses, 125,000 shares of unvested restricted stock (the vesting of 50,000 of which is subject to future performance criteria), and 273,973 shares held as part of a trust securing the payment of Mr. Esses's severance package pursuant to the terms of our employment agreement with him.

(6) Consists of 233,596 shares held directly by Mr. Paup and does not include 75,000 unvested restricted stock units (the vesting of 50,000 of which is subject to future performance criteria).

(7) Consists of 49,558 shares owned directly by Dr. Eastman and 24,566 shares of unvested restricted stock.

(8) Consists of 49,558 shares owned directly by Prof. Jones and 24,566 shares of unvested restricted stock.

(9) Consists of 52,848 shares owned directly by Mr. Marrus and 24,566 shares of unvested restricted stock.

Table of Contents

(10) Consists of 34,867 shares owned directly by Mr. Leibowitz and 24,566 shares of unvested restricted stock.

(11) Includes 464,930 shares of unvested restricted stock (the vesting of 116,667 of which is subject to future performance criteria), 602,740 shares of restricted stock held as part of trusts securing payment of severance, and does not include Mr. Paup's 75,000 unvested restricted stock units (the vesting of 50,000 of which is subject to future performance criteria).

Securities Authorized for Issuance Under Equity Compensation Plans

The following table sets forth certain information, as of December 31, 2012, with respect to our 2004, 2007 and 2009 equity compensation plans, as well as any other stock options and warrants previously issued by us (including individual compensation arrangements) as compensation for goods and services:

EQUITY COMPENSATION PLAN INFORMATION

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders[1]	8,960	$ 5.46	3,665,862

(1) For a description of the material features of grants of options and warrants other than options granted under our employee stock option plans, see Note 13.c. of the Notes to the Consolidated Financial Statements.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Officer Loans

On February 9, 2000, Mr. Ehrlich exercised 9,404 stock options. Mr. Ehrlich paid the exercise price of the stock options and certain taxes that we paid on his behalf by giving us a non-recourse promissory note due in 2025 in the amount of $329,163, bearing annual interest at 1% over the then-current federal funds rate announced from time to time by the *Wall Street Journal*, secured by the shares of our common stock acquired through the exercise of the options and certain compensation due to Mr. Ehrlich upon termination. As of December 31, 2013, the aggregate amount outstanding pursuant to this promissory note was $452,995.

Consulting Agreement with Sampen Corporation

We have an amended and restated consulting agreement with Sampen Corporation that we executed in May 2013. Sampen is a New York corporation owned by members of Steven Esses's immediate family, and Mr. Esses is an employee of both the Company and of Sampen. The term of this consulting agreement is until December 31, 2015.

Pursuant to the terms of our agreement with Sampen, Sampen provides one of its employees to us for such employee to serve as (i) until September 30, 2014, our President, and (ii) from October 1, 2014, as our President and Chief Executive Officer. We pay Sampen $8,960

per month, plus an annual bonus, on a sliding scale, in an amount equal to a minimum of 25% of Sampen's annual base compensation then in effect if the results we actually attain for the year in question are 100% or more of the amount we budgeted at the beginning of the year, up to a maximum of 75% of its annual base compensation then in effect if the results we actually attain for the year in question are 120% or more of the amount we budgeted at the beginning of the year. We also pay Sampen, to cover the cost of our use of Sampen's offices as an ancillary New York office and the attendant expenses and insurance costs, an amount equal to 16% of each monthly payment of base compensation.

Table of Contents

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

In accordance with the requirements of the Sarbanes-Oxley Act of 2002 and the Audit Committee's charter, all audit and audit-related work and all non-audit work performed by our independent accountants, BDO USA, LLP ("BDO"), is approved in advance by the Audit Committee, including the proposed fees for such work. The Audit Committee is informed of each service actually rendered.

- *Audit Fees.* Audit fees billed or expected to be billed to us by BDO for the audit of the financial statements included in our Annual Report on Form 10-K, and reviews of the financial statements included in our Quarterly Reports on Form 10-Q, for the years ended December 31, 2013 and 2012 totaled approximately $343,000 and $362,000, respectively.

- *Audit-Related Fees*. BDO billed or expected to bill us zero and $371,000 (principally consultation related to mergers and acquisitions) for the fiscal years ended December 31, 2013 and 2012, respectively, for assurance and related services that are reasonably related to the performance of the audit or review of our financial statements.

- *Tax Fees.* BDO billed or expected to bill us an aggregate of zero and $51,000 (including consultation related to mergers and acquisitions) for the fiscal years ended December 31, 2013 and 2012, respectively, for tax services, principally advice regarding the preparation of income tax returns.

- *All Other Fees.* BDO billed or expected to bill us an aggregate of zero for both fiscal years ended December 31, 2013 and 2012 for permitted non-audit services.

Applicable law and regulations provide an exemption that permits certain services to be provided by our outside auditors even if they are not pre-approved. We have not relied on this exemption at any time since the Sarbanes-Oxley Act was enacted.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Arotech Corporation:

Ann Arbor, Michigan

We have audited the accompanying consolidated balance sheets of Arotech Corporation and subsidiaries (the "Company") as of December 31, 2013 and 2012 and the related consolidated statements of operations, changes in stockholders' equity and cash flows for the years then ended. In connection with our audits of the financial statements, we have also audited the financial statement schedule listed in the accompanying index. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and schedule. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Arotech Corporation and subsidiaries at December 31, 2013 and 2012, and the results of its operations and its cash flows for the years then ended**,** in conformity with accounting principles generally accepted in the United States of America.

Also, in our opinion, the financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

AROTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 1:– GENERAL

a. Corporate structure:

Arotech Corporation ("Arotech") and its wholly-owned subsidiaries (the "Company") provide defense and security products for the military, law enforcement and homeland security markets, including advanced zinc-air and lithium batteries and chargers, and multimedia interactive simulators/trainers. The Company operates primarily through its wholly-owned subsidiaries FAAC Incorporated ("FAAC"), based in Ann Arbor, Michigan with locations in Royal Oak, Michigan and Orlando, Florida; Electric Fuel Battery Corporation ("EFB"), based in Auburn, Alabama; and Epsilor-Electric Fuel Ltd. ("Epsilor-EFL"), based in Dimona, Israel with a location in Beit Shemesh, Israel. EFB and Epsilor-EFL form the Company's Battery and Power Systems Division. IES Interactive Training ("IES") and Realtime Technologies ("RTI") were merged with FAAC in 2007 and 2010, respectively, to create Arotech's Training and Simulation Division. Pursuant to a management decision in the fourth quarter of 2011 and sale in 2012, the Company's Armor Division, consisting of M.D.T. Protective Industries, Ltd. ("MDT"), based in Lod, Israel, and MDT Armor Corporation ("MDT Armor"), based in Auburn, Alabama, along with the trade name of Armour of America Incorporated ("AoA"), are reflected as discontinued operations for all periods presented.

b. Impairment of goodwill and other long-lived assets:

Goodwill and indefinite-lived intangible assets are tested for impairment at least annually and between annual tests in certain circumstances, and written down when impaired. Goodwill is tested for impairment by comparing the fair value of the Company's reporting units with their carrying value. All of the Company's continuing reporting units have goodwill. Fair value is determined using discounted cash flows. Significant estimates used in the methodologies include estimates of future cash flows, future short-term and long-term growth rates and weighted average cost of capital.

In September 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2011-08, "Intangibles—Goodwill and Other (Topic 350): Testing Goodwill for Impairment." ASU 2011-08 amends the guidance in Accounting Standards Codification ("ASC") 350, Intangibles – Goodwill and Other. Under the revised guidance, when testing goodwill for impairment, the Company has the option of performing a qualitative assessment in order to determine whether it needs to calculate the fair value of a reporting unit. If the Company determines, on the basis of qualitative factors, that it is more likely than not that the fair value of the reporting unit is greater than the carrying amount, the two-step impairment test would not be required. The Company early adopted the ASU in 2011.

In June 2013, December 2013 and June 2012, the Company determined, using qualitative factors, that the goodwill for the Training and Simulation reporting unit was not impaired. The Company originally used a June 30 date because this allowed the Company to use internal resources that are available before starting the annual audit process but Management determined that an impairment review as of December 31, 2013 would be more appropriate as it better aligns the timing of the Company's budget process with this test. In June 2013, December 2013 and June 2012, the Company completed the first step of the quantitative analysis of the goodwill in the Battery and Power Systems reporting unit, in which it computed a fair value of that reporting unit. Because the fair value was greater than the carrying value of the reporting unit at each measurement date, the second step of the quantitative impairment assessment was not required and no goodwill was impaired. Although the valuation for Battery and Power Systems Division exceeded the reporting unit's carrying value by over 19%, the Company will continue to monitor the actual results of the reporting unit versus the forecast as of December 31, 2013 used for the impairment review and reevaluate the goodwill as required. Additionally, the Company performed a complete long-lived asset impairment review of the discontinued Armor reporting unit in 2011 that resulted in the full impairment of that unit's goodwill ($1,792,339) and property and equipment ($1,487,219), as reported in discontinued operating results for that year.

Table of Contents

AROTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 1:– GENERAL (Cont.)

The Company also considers its current market capitalization compared to the sum of the estimated fair values of its reporting units in conjunction with each impairment assessment. As part of this consideration, management recognizes that the market capitalization of the Company may not be an accurate representation of the sum of the reporting unit fair values for the following reasons:

- The long term horizon of the valuation process versus a short term valuation using current market conditions;
- The valuation by individual business segments versus the market share value based on the Company as a whole, including unallocated corporate costs;
- The Company's stock is thinly traded and widely dispersed with minimal institutional ownership, and thus not followed by major market analysts, leading management to conclude that the market in the Company's securities was not acting as an informationally efficient reflection of all known information regarding the Company and thereby serves to understate their value; and
- Control premiums reflected in the reporting unit fair values but not in the Company's stock price.

The Company's long-lived assets and amortizable identifiable intangibles are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of the carrying amount of assets to be held and used is measured by a comparison of the carrying amount of the assets to the future undiscounted cash flows expected to be generated by use of the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets.

As of the December 31, 2013 valuation date, the Company's market capitalization was $70.4 million, which did not, in management's view, suggest that the fair value estimates used in its impairment assessment required any adjustment.

c. Related parties

The Company has had a consulting agreement with Sampen Corporation since 2005. Sampen is a New York corporation owned by members of the immediate family of one of the Company's executive officers, and this executive officer is an employee of both the Company and of Sampen. In 2013, the term of this consulting agreement was extended until December 31, 2015, unless either Sampen or the Company terminates the agreement sooner.

Pursuant to the terms of the Company's agreement with Sampen, Sampen provides one of its employees to the Company for such employee to serve as (i) until September 30, 2014, President of the Company, and (ii) from October 1, 2014, President and Chief Executive Officer of the Company. The Company pays Sampen $8,960 per month, plus an annual bonus, on a sliding scale, in an amount equal to a minimum of 25% of Sampen's annual base compensation then in effect, up to a maximum of 75% of its annual base compensation then in effect if the results the Company actually attained for the year in question are 120% or more of the amount the Company budgeted at the beginning of the year. The Company also pays Sampen to cover the cost of the Company's use of Sampen's offices as an ancillary New York office and the attendant expenses and insurance costs, an amount equal to 16% of each monthly payment of base compensation.

During the years ended December 31, 2013 and 2012, the Company incurred a total of $148,723 and $185,856, respectively, related to Sampen.

On February 9, 2000, Mr. Ehrlich, the Company's Chief Executive Officer, exercised 9,404 stock options. Mr. Ehrlich paid the exercise price of the stock options and certain taxes that the Company paid on his behalf by giving the Company a non-recourse promissory note due in 2025 in the amount of $329,163, bearing annual interest at 1% over the then-current federal funds rate announced from time to time by the *Wall Street Journal*, secured by the shares of the Company's common stock acquired through the exercise of the options and certain compensation

due to Mr. Ehrlich upon termination. As of December 31, 2013 and 2012, the aggregate amount outstanding pursuant to this promissory note was $452,995. Additionally, there is a former employee with the same arrangement.

Table of Contents

AROTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 1:– GENERAL (Cont.)

On June 10, 2002, Mr. Ehrlich exercised 3,571 stock options. Mr. Ehrlich paid the exercise price of the stock options by giving the Company a non-recourse promissory note due in 2012 in the amount of $36,500, bearing simple annual interest at a rate equal to the lesser of (i) 5.75%, and (ii) 1% over the then-current federal funds rate announced from time to time, secured by the shares of the Company's common stock acquired through the exercise of the options. As of December 31, 2012, the aggregate amount outstanding pursuant to this promissory note was $46,593, which was not repaid and was charged to paid in capital in the fourth quarter of 2012. Pursuant to the terms of the note, the shares of stock securing the note were returned to the Company and retired in 2013 when the loan was not repaid.

d. Discontinued operations

In December 2011, the Company's Board of Directors approved management's plan to sell the Armor Division. The sale of the assets was completed in June 2012 at a cash purchase price of $50,000. Unless otherwise indicated, discontinued operations are not included in the Company's reported results.

Unless otherwise noted, amounts and disclosures throughout the Notes to Consolidated Financial Statements relate to the Company's continuing operations. The assets and liabilities of the discontinued operation after impairment, the revenues and expenses of the discontinued operation and a list of unusual expenses relating to the discontinued operation are shown below.

Table of Contents

AROTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 1:– GENERAL (Cont.)

The operations in 2013 primarily represent the completion of certain contracts that were not assumed by the buyer of the Armor Division.

The Company retained the facility used by the Armor operations and currently leases it to the buyer of those operations under a three year operating lease for $9,300 per month. The Company is marketing the facility for sale, and it has no recorded book value as of December 31, 2013. The Company remains responsible for the outstanding mortgage on this facility, which was transferred to Arotech in 2013.

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States (“U.S. GAAP”).

a. Use of estimates:

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

b. Financial statements in U.S. dollars:

A majority of the revenues of the Company are generated in U.S. dollars (“dollars”). In addition, a substantial portion of the Company’s costs are incurred in dollars. Management believes that the dollar is the primary currency of the economic environment in which the Company operates. Thus, the functional and reporting currency of the Company including most of its subsidiaries is the dollar. Accordingly, monetary accounts maintained in currencies other than dollars are remeasured into dollars, with resulting gains and losses reflected in the consolidated statements of operations as financial income or expenses, as appropriate.

Table of Contents

AROTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The majority of transactions of MDT (discontinued) and Epsilor-EFL are in New Israel Shekels ("NIS") and a substantial portion of MDT's and Epsilor-EFL's costs is incurred in NIS. Management believes that the NIS is the functional currency of MDT and Epsilor-EFL. Accordingly, the financial statements of MDT and Epsilor-EFL have been translated into dollars. All balance sheet accounts have been translated using the exchange rates in effect at the balance sheet date. Statement of operations amounts have been translated using the weighted average exchange rate for the period. The resulting translation adjustments are reported as a component of accumulated other comprehensive income (loss) in stockholders' equity. As of December 31, 2012 all accumulated other comprehensive income related to the Armor Division, in the amount of $189,969, was recorded as an adjustment to the loss on sale in discontinued operations.

c. Principles of consolidation:

The consolidated financial statements include the accounts of Arotech and its wholly owned subsidiaries. Intercompany balances and transactions have been eliminated upon consolidation.

d. Cash equivalents:

Cash equivalents are short-term highly liquid investments that are readily convertible to cash with maturities of three months or less when acquired.

e. Restricted collateral deposits:

Restricted collateral deposits are primarily invested in highly liquid deposits which are used as a security for the Company's performance guarantees at FAAC and Epsilor-EFL.

f. Marketable securities:

The Company determines the appropriate classification of its investments in debt and equity securities at the time of purchase and reevaluates such determinations at each balance sheet date. Investment in securities are classified as available-for-sale and stated at fair value, with unrealized gains and losses reported in accumulated other comprehensive income (loss), a separate component of stockholders' equity. Realized gains and losses on sales of investments, as determined on a specific identification basis, are included in the consolidated statements of operations. The Company did not hold any marketable securities at either December 21, 2013 or 2012.

g. Inventories:

Inventories are stated at the lower of cost or market value. Inventory write-offs and write-down provisions are provided to cover risks arising from slow-moving items or technological obsolescence and for market prices lower than cost. The Company periodically evaluates the quantities on hand relative to current and historical selling prices and historical and projected sales volume. Based on this evaluation, provisions are made to write inventory down to its market value. In 2013 and 2012, the Company wrote off approximately $186,000 and $57,000, respectively, of obsolete inventory, which has been included in the cost of revenues.

Cost is determined as follows:

Raw and packaging materials – by the average cost method or FIFO.

Work in progress – represents the cost of manufacturing with additions of allocable indirect and direct manufacturing costs.

Finished products – on the basis of direct manufacturing costs with additions of allocable indirect manufacturing costs.

Table of Contents

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

h. Property and equipment:

Property and equipment are stated at cost net of accumulated depreciation and investment grants received from the State of Israel for investments in fixed assets under the Law for the Encouragement of Capital Investments, 5719-1959 (the “Investments Law”). The Company did not receive any investment grants in 2013 and 2012.

Depreciation is calculated by the straight-line method over the following estimated useful lives of the assets:

	Depreciable life (in years)
Computers and related equipment	3 to 5
Motor vehicles	5 to 7
Office furniture and equipment	10
Machinery, equipment and installations	10
Buildings	30
Land	Not depreciated
Leasehold improvements	Shorter of the term of the lease or the life of the asset
Demo inventory	5

i. Revenue recognition:

The Company is a defense and security products and services company, engaged in two business areas: interactive simulation for military, law enforcement and commercial markets; and batteries and charging systems for the military. During 2013 and 2012, the Company recognized revenues (i) from the sale and customization of interactive training systems and from the maintenance services in connection with such systems (Training and Simulation Division); (ii) from the sale of batteries, chargers and adapters to the military, and under certain development contracts with the U.S. Army (Battery and Power Systems Division); and (iii) from the sale of lifejacket lights (Battery and Power Systems Division).

Revenues from products sold by the Battery and Power Systems Division are recognized when persuasive evidence of an agreement exists, delivery has occurred, the fee is fixed or determinable, collectability is probable, and no further obligation remains. Typically revenue is recognized, per the contract, when the transaction is entered into the U.S. Government’s Wide Area Workflow system, which occurs after the products have been accepted at the plant or when shipped. Sales to other entities are recorded in accordance with the contract, either when shipped or delivered. Normally, in this division, there are no further obligations that would preclude the recognition of revenue.

Revenues from contracts in the Training and Simulation Division and Battery and Power Systems Division that involve customization of the system to customer specifications are recognized using contract accounting on a percentage of completion method, in accordance with the “Input Method.” The amount of revenue recognized is based on the percentage to completion achieved. The percentage to completion is measured by monitoring progress using records of actual time, materials and other costs incurred to date in the project compared to the total estimated project requirement. Estimates of total project requirements are based on prior experience of customization, delivery and acceptance of the same or similar technology and are reviewed and updated regularly by management. Provisions for estimated losses on uncompleted

contracts are made in the period in which such losses are first determined, in the amount of the estimated loss on the entire contract. Normally there are no further obligations that would preclude the recognition of revenue.

Table of Contents

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The Company believes that the use of the percentage of completion method is appropriate as the Company has the ability to make reasonably dependable estimates of the extent of progress towards completion, contract revenues and contract costs. In addition, contracts executed include provisions that clearly specify the enforceable rights regarding services to be provided and received by the parties to the contracts, the consideration to be exchanged and the manner and the terms of settlement, including in cases of terminations for convenience. In all cases, the Company expects to perform its contractual obligations and its customers are expected to satisfy their obligations under the contract.

Revenues from simulators that do not require significant customization are recognized when persuasive evidence of an agreement exists, delivery has occurred, no significant obligations with regard to implementation remain, the fee is fixed or determinable and collectability is probable.

Maintenance and support revenue included in multiple element arrangements is deferred and recognized on a straight-line basis over the term of the maintenance and support services. Revenues from training are recognized when it is performed. The Vendor Specific Objective Evidence ("VSOE") of fair value of the maintenance, training and support services is determined based on the price charged when sold separately or when renewed.

Unbilled receivables include cost and gross profit earned in excess of billing.

Deferred revenues include unearned amounts received under maintenance and support services, customer prepayments and billing in excess of costs and estimated earnings on uncompleted contracts.

j. Warranty:

The Company typically offers a one to two year warranty for most of its products. The specific terms and conditions of those warranties vary depending upon the product sold and country in which the Company does business. The Company estimates the costs that may be incurred under its basic limited warranty, including parts and labor, and records deferred revenue in the amount of such costs at the time product revenue is recognized. Factors that affect the Company's warranty liability include the number of installed units, historical and anticipated rates of warranty claims, and cost per claim. The Company periodically assesses the adequacy of its reserves and adjusts the amounts as necessary. (See Note 17.)

k. Research and development cost:

The Company capitalizes certain software development costs, subsequent to the establishment of technological feasibility. Based on the Company's product development process, technological feasibility is established upon the completion of a working model or a detailed program design. Research and development costs incurred in the process of developing product improvements or new products are generally charged to expenses as incurred. Significant costs incurred by the Company between completion of the working model or a detailed program design and the point at which the product is ready for general release have been capitalized. Capitalized software costs will be amortized by the greater of the amount computed using: (i) the ratio that current gross revenues from sales of the software bears to the total of current and anticipated future gross revenues from sales of that software, or (ii) the straight-line method over the estimated useful life of the product (one to three years). The Company assesses the net realizable value of this intangible asset on a regular basis by determining whether the amortization of the asset over its remaining life can be recovered through undiscounted future operating cash flows from the specific software product sold. Based on its most recent analyses, management believes that no impairment of capitalized software development costs exists as of December 31, 2013.

In 2013 and 2012, the Training and Simulation Division capitalized approximately $4,000 and $335,000, respectively, in software development costs that will be amortized on a straight-line method over 2 years, the useful life of the software.

Table of Contents

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

l. Income taxes:

The Company accounts for income taxes under the asset and liability method, whereby deferred tax assets and liability account balances are determined based on tax credit carryforwards and differences between the financial reporting and the tax basis of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company provides a valuation allowance, if necessary, to reduce deferred tax assets to their estimated realizable value.

The Company has adopted the provisions of the FASB ASC 740-10. FASB ASC 740-10 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken in a tax return. The Company must determine whether it is “more-likely-than-not” that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets the more-likely-than-not recognition threshold, the position is measured to determine the amount of benefit to recognize in the financial statements. Uncertain tax positions require determinations and estimated liabilities to be made based on provisions of the tax law which may be subject to change or varying interpretation. If the Company’s determinations and estimates prove to be inaccurate, the resulting adjustments could be material to the Company’s future financial statements.

m. Concentrations of credit risk:

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, restricted collateral deposits and trade receivables. Cash and cash equivalents are invested mainly in U.S. dollar deposits with major Israeli and U.S. banks. Such deposits in the U.S. may be in excess of insured limits and are not insured in other jurisdictions. Management believes that the financial institutions that hold the Company’s investments are financially sound and, accordingly, minimal credit risk exists with respect to these investments.

The trade receivables of the Company are mainly derived from sales to customers located primarily in the United States and Israel along with the countries listed in footnote 16.c. Management believes that credit risks are moderated by the diversity of its end customers and geographical sales areas. The Company performs ongoing credit evaluations of its customers’ financial condition. An allowance for doubtful accounts is determined with respect to those accounts that the Company has determined to be doubtful of collection.

The Company had no off-balance-sheet concentration of credit risk such as foreign exchange contracts, option contracts or other foreign currency hedging arrangements.

n. Basic and diluted net income (loss) per share:

Basic net income (loss) per share is computed based on the weighted average number of shares of common stock outstanding during each year. Diluted net income (loss) per share is computed based on the weighted average number of shares of common stock outstanding during each year, plus dilutive common stock equivalents related to outstanding stock options and non-vested restricted stock. All common stock equivalents are excluded from the calculation of the diluted net loss per common share because all such securities are anti-dilutive for periods incurring a loss. The total weighted average number of shares related to the outstanding common stock equivalents excluded from the calculations of diluted net income (loss) per share was 611,700 and 614,968 for the years ended December 31, 2013 and 2012, respectively.

o. Accounting for stock-based compensation:

Stock-based awards to employees are recognized as compensation expense based on the calculated fair value on the date of grant. The Company determines the fair value of options using the Black-Scholes option pricing model. This model requires subjective assumptions, including future stock price volatility and expected term.

Table of Contents

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The Company did not grant any options in 2013 or 2012. The Company assumed a 20% forfeiture rate on existing options for both years. The Company typically uses a 5-10% forfeiture rate for restricted stock and restricted stock units and adjusts both forfeiture rates based on historical forfeitures. Each restricted stock unit is equal to one share of Company stock and is redeemable only for stock.

p. Fair value of financial instruments:

The following methods and assumptions were used by the Company in estimating their fair value disclosures for financial instruments using the required three-tier value hierarchy, which prioritizes the inputs used in measuring fair value as follows: (Level 1) observable inputs such as quoted prices in active markets; (Level 2) inputs other than the quoted prices in active markets that are observable either directly or indirectly; and (Level 3) unobservable inputs in which there is little or no market data, which may require the Company to develop its own assumptions.

The carrying amounts of cash and cash equivalents, restricted collateral deposits, trade and other receivables, short-term bank credit, and trade payables approximate their fair value due to the short-term maturity of such instruments.

The fair values of long-term promissory notes are estimated by discounting the future cash flows using current interest rates for loans of similar terms and maturities. The carrying amount of the long-term liabilities approximates their fair value (Level 3).

q. Severance pay:

The Company’s liability for severance pay for its Israeli employees is calculated pursuant to Israeli severance pay law based on the most recent salary of the employees multiplied by the number of years of employment as of the balance sheet date. Israeli employees are entitled to one month’s salary for each year of employment, or a portion thereof. The Company’s liability for all of its Israeli employees is fully provided for by monthly deposits into severance pay funds held by insurance companies on behalf of the employees, insurance policies and by accrual. The fair value of these funds, which are considered Level 2 fair value measurements, is recorded as an asset in the Company’s balance sheet.

In addition, according to certain employment agreements, the Company is obligated to provide for a special severance pay in addition to amounts due to certain employees pursuant to Israeli severance pay law. During the years ended December 31, 2013 and 2012, the Company had made a provision of $49,387 and $217,733, respectively, for this special severance pay. As of December 31, 2013 and 2012, the unfunded severance pay in that regard amounted to $1,317,231 and $1,267,844, respectively.

Pursuant to the terms of the respective employment agreements between the Company and its Chief Executive Officer and its President, funds to secure payment of their respective contractual severance amounts are to be deposited for their benefit, with payments to be made pursuant to an agreed-upon schedule. These funds continue to be owned by the Company, which benefits from all gains and bears the risk of all losses resulting from investments of these funds.

The deposited funds include profits and losses accumulated up to the balance sheet date. The deposited funds may be withdrawn only upon the fulfillment of the obligation pursuant to Israeli severance pay law or labor agreements. The fair value of the deposited funds is based on the cash surrender value of these policies and includes immaterial profits.

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

In April 2009, the Company, with the agreement of its Chief Executive Officer and its President, funded an additional portion of their severance security by means of issuing to them, in trust, restricted stock having a value (based on the closing price of the Company's stock on the Nasdaq Stock Market on the date on which the executives and the Company's board of directors agreed to this arrangement) of $440,000, a total of 602,740 shares. The Company agreed with the executives that the economic risk of gain or loss on these shares is to be borne by them. Should they leave the Company's employ under circumstances in which they are not entitled to their severance package (primarily, termination for Cause as defined in their employment agreement), these shares would be returned to the Company for cancellation and because of this, these shares are not included in the basic EPS calculation.

Severance expenses for continuing operations for the years ended December 31, 2013 and 2012 amounted to $13,647 and $19,216, respectively.

r. Advertising costs:

The Company records advertising costs as incurred. Advertising expense for the years ended December 31, 2013 and 2012 was approximately $71,000 and $156,000, respectively.

s. New accounting pronouncements:

In July 2012, the FASB issued ASU 2012-02 "Intangibles - Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment" ("ASU 2012-02"). ASU 2012-02 permits entities to first assess qualitative factors to determine whether it is more likely than not that the fair value of an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test. Under the amendments in ASU 2012-02, an entity is not required to calculate the fair value of an indefinite-lived intangible asset unless it determines that it is more likely than not that the fair value of the asset is less than its carrying amount. An entity also will have the option to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. ASU 2012-02 is effective for interim and annual indefinite-lived intangible asset impairment tests performed for fiscal years beginning on or after September 15, 2012, with early adoption permitted. The Company's adoption of ASU 2012-02 did not have a material impact on its consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. This ASU is intended to improve the reporting of reclassifications out of accumulated other comprehensive income. The ASU requires an entity to report, either on the face of the statement where net income is presented or in the notes to the financial statements, the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. GAAP to be reclassified in their entirety to net income. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP that provide additional detail about those amounts. The amendments in this ASU apply to all entities that issue financial statements that are presented in conformity with U.S. GAAP and that report items of other comprehensive income. For public entities, the amendments in this ASU are effective prospectively for reporting periods beginning after December 15, 2012. The impact of adoption of this ASU by the Company was not material.

No other new accounting pronouncements issued or effective during 2013 have had or are expected to have a significant impact on the Company's consolidated financial statements.

t. Share repurchase:

In February 2009, the Company's Board of Directors authorized the repurchase in the open market or in privately negotiated transactions of up to $1,000,000 of the Company's common stock. Through December 31, 2013, the Company repurchased 638,611 shares for a total of $869,931

– there were no shares repurchased in 2013 or 2012. The program now expires in August 2014. The repurchase program is subject to management’s discretion.

b. Other intangible assets:

		December 31,			
		2013		2012	
	Useful life	Cost	Net book value	Cost	Net book value
Technology	4 - 8 years	$ 6,788,000	$ 94,715	$ 6,788,000	$ 189,429
Capitalized software costs	1 - 3 years	3,694,091	129,437	3,690,416	491,433
Trademarks	10 years	28,000	11,200	28,000	14,000
Backlog/customer relationship	1 - 10 years	744,000	24,800	744,000	31,000
Customer list	2 - 10 years	6,773,645	–	6,773,645	621,740
		18,027,736	$ 260,151	18,024,061	$ 1,347,602
Exchange rate differences		–		91,671	
Less - accumulated amortization		(17,767,585)		(16,676,459)	
Amortized cost		260,151		1,439,273	
Trademarks (indefinite lives)		799,000		799,000	
Net book value		$ 1,059,151		$ 2,238,273	

Amortization expense amounted to $1,091,126 and $1,185,539 for the years ended December 31, 2013 and 2012, respectively, including amortization of capitalized software costs of $365,671 and $460,085, respectively.

c. Estimated amortization expenses for the years shown is as follows:

Year ending December 31,	
2014	$ 233,151
2015	27,000
Total	$ 260,151

Goodwill and other intangible assets are adjusted on a quarterly basis for any change due to currency fluctuations and any variation is included in the accumulated other comprehensive income on the Balance Sheet.

NOTE 8:– SHORT-TERM BANK CREDIT AND LOANS

As amended in February 2013, the primary line of $15,000,000, subject to borrowing base limitations and outstanding letters of credit, is denominated in U.S. dollars. This line is secured by Arotech's assets and the assets of the Company's other domestic subsidiaries and guaranteed by the Company and its other domestic subsidiaries, incurs interest at a rate of LIBOR plus 375 basis points and has an unused line of credit fee of 0.35%. This credit facility expires May 31, 2015. The credit agreement contains certain covenants, including minimum Earnings Before Interest, Taxes, Depreciation and Amortization ("EBITDA"), quarterly Maximum Increase in Net Advance to Affiliates of less than 90% of EBITDA and an annual Fixed Charge Coverage Ratio of not less than 1.1 to 1.0. The Company was in compliance with all covenants at December 31, 2013 and management believes that the Company will be in compliance with these covenants during 2014.

NOTE 9:– OTHER ACCOUNTS PAYABLE AND ACCRUED EXPENSES

The following is a summary of other accounts payable and accrued expenses as of December 31, 2013 and 2012:

December 31,

	2013	2012
Employees and payroll accruals	$ 4,172,710	$ 3,003,048
Accrued vacation pay	893,654	811,910
Accrued expenses	764,806	369,800
Government authorities	180,871	68,152
Total	$ 6,012,041	$ 4,252,910

Table of Contents

In U.S. dollars

NOTE 10:– COMMITMENTS AND CONTINGENT LIABILITIES

a. Royalty commitments:

Under Epsilor-EFL's research and development agreements with the Office of the Chief Scientist ("OCS"), and pursuant to applicable laws, Epsilor-EFL is required to pay royalties at the rate of 3%-3.5% of net sales of products developed with funds provided by the OCS, up to an amount equal to 100% of research and development grants received from the OCS. (Amounts due in respect of projects approved after 1999 also bear interest at the LIBOR rate.) Epsilor-EFL is obligated to pay royalties only on sales of products in respect of which OCS participated in their development. Should the project fail, Epsilor-EFL will not be obligated to pay any royalties or refund the grants.

Royalties paid or accrued for the years ended December 31, 2013 and 2012 to the OCS amounted to $14,997 and zero, respectively.

b. Lease commitments:

The Company rents its facilities under various operating lease agreements, which expire on various dates through 2018. The minimum rental payments under non-cancelable operating leases are as follows:

Minimum rental payments	December 31
2014	$ 880,548
2015	556,105
2016	551,748
2017	551,748
2018	154,608
Total	$ 2,694,757

Total rent expenses for the years ended December 31, 2013 and 2012 were $887,796 and $924,864, respectively.

There are no remaining capital lease obligations.

c. Guarantees:

The Company obtained bank guarantees in the amount of $830,338 in connection with (i) obligations of one of the Company's subsidiaries to the Israeli customs authorities, and (ii) the obligation of one of the Company's subsidiaries to secure the return of products loaned to the Company from one of its customers.

d. Liens:

As security for compliance with the terms related to the investment grants from the State of Israel, Epsilor-EFL has registered floating liens (that is, liens that apply not only to assets owned at the time but also to after-acquired assets) on all of its assets, in favor of the State of Israel.

The Company has $432,000 in credit liens collateralized by the assets of the Company and guaranteed by the Company.

Epsilor-EFL has recorded a lien on all of its assets in favor of its banks to secure lines of credit. In addition Epsilor-EFL has a specific pledge on assets in respect of which government guaranteed loans were given.

e. Litigation and other claims:

As of the date of this filing, there were no material pending legal proceedings against the Company.

Table of Contents

In U.S. dollars

NOTE 11:– LONG TERM DEBT

a. Mortgage Note, Ann Arbor, Michigan:

In July 2011, the Training and Simulation Division purchased a building for $1,500,000 containing both office and lab space. The building was financed with a $1,100,000 mortgage loan that was obtained through the Company's primary bank. The note requires a payment (principal and interest) of approximately $8,000 per month at an interest rate of LIBOR plus 375 basis points per annum with a balloon payment due in May 2017. (See Note 8 for the relevant covenants.) In December 2012, FAAC leased surplus space of the purchased building to a non-profit organization for $6,300 per month as office space for a term of 10 years with an option to terminate the lease with a one year prior notice in May 2018.

b. Mortgage Note, Auburn, Alabama:

In March 2007, the Company purchased space for the now-discontinued Armor Division in Auburn, Alabama for approximately $1,100,000 pursuant to a seller-financed secured purchase money mortgage. Half the mortgage is payable over ten years in equal monthly installments based on a 20-year amortization of the full principal amount, and the remaining half is payable at the end of ten years in a balloon payment. The note requires a payment (principal and interest) of approximately $9,300 per month at an interest rate of 8.0% per annum. In September 2013, the Company transferred the seller-financed mortgage to Arotech from the discontinued Armor Division.The Company is currently leasing this building to the buyer of the Armor Division for approximately $9,300 per month under a three year lease expiring in June 2015.

c. Term loans, Israel:

In February 2012, the Company negotiated a short term loan with a local bank in Israel. The funds were released to the Company in three tranches of $250,000 each in February, March and April 2012. The interest rate for this loan was prime plus 1.2% and was repaid in three tranches in February, March and April 2013. The balance of this loan as of December, 2013 was zero.

d. Minimum loan payments:

Minimum loan payments	December 31,
2014	$ 95,382
2015	98,734
2016	102,356
2017	836,341
2018	55,000
Thereafter	737,917
Total	$ 1,925,730

NOTE 12:– COSTS AND ESTIMATED EARNINGS ON UNCOMPLETED CONTRACTS

Billings in excess of costs generated under the percentage-of-completion method are recorded as deferred revenues until the revenue recognition criteria are met. Deferred revenues include unearned amounts received under maintenance and support services and customer deposits of $287,830 and $16,202 for 2013 and 2012, respectively, and billing in excess of costs and estimated earnings on uncompleted contracts.

NOTE 12:– COSTS AND ESTIMATED EARNINGS ON UNCOMPLETED CONTRACTS (Cont.)

The following is a summary of the costs and estimated earnings on uncompleted contracts as of December 31, 2013 and 2012. Open contracts are expected to be completed in the following year. The billings in excess of costs are included in the deferred revenue line of the balance sheet:

	Year ended December 31,	
	2013	2012
Costs incurred on uncompleted contracts	$ 133,537,092	$ 111,128,026
Estimated earnings	24,312,101	18,649,855
	157,849,193	129,777,881
Less billings to date	(152,849,352)	(117,503,299)
Total	$ 4,999,841	$ 12,274,582
Costs and estimated earnings in excess of billings	$ 8,463,920	$ 13,374,004
Billings in excess of costs and estimated earnings (included in deferred revenues)	(3,464,079)	(1,099,422)
Total	$ 4,999,841	$ 12,274,582

NOTE 13:– STOCKHOLDERS' EQUITY

a. Stockholders' rights:

The Company's shares confer upon the holders the right to receive notice to participate and vote in the general meetings of the Company and right to receive dividends, if and when declared.

b. The Company has adopted the following stock award plans, whereby options may be granted for purchase of shares of the Company's common stock and where restricted shares and restricted stock units may be granted and approved by the Board of Directors. Each restricted stock unit is equal to one share of Company stock and is redeemable only for stock. Under the terms of the award plans, the Board of Directors or the designated committee grants options, restricted stock and restricted stock units. The Board of Directors or the designated committee also determines the vesting period and the exercise terms:

1. 2007 Non-Employee Director Equity Compensation Plan – 750,000 shares reserved for issuance, of which 371,853 were available for future grants to outside directors as of December 31, 2013.

2. 2009 Equity Incentive Plan – 5,000,000 shares reserved for issuance, of which 3,118,801were available for future grants to employees and consultants as of December 31, 2013.

3. Under these plans, options generally expire no later than 5-10 years from the date of grant. Each option can be exercised to purchase one share, conferring the same rights as the other common shares. Options that are cancelled or forfeited before expiration become available for future grants. The options generally vest over a three-year period (33.3% per annum) and restricted shares and restricted stock units also generally vest after three years or pursuant to defined performance criteria; in the event that employment is terminated within that period, unvested restricted shares and restricted stock units generally revert back to the Company.

4. Deferred stock compensation is amortized and recorded as compensation expense ratably over the vesting period of the option or the restriction period of the restricted shares and restricted stock units. The stock compensation expense that has been charged in the consolidated statements of operations in respect of options, restricted shares and restricted stock units to employees and directors in 2013 and

2012 was $437,306 and $447,680, respectively. The calculated intrinsic value of vested and unvested options as of December 31, 2013 and 2012 was zero.

In U.S. dollars

NOTE 13:– STOCKHOLDERS' EQUITY(Cont.)

5. A summary of the status of the Company's plans and other share options, restricted shares and restricted stock units granted as of December 31, 2013 and 2012, and changes during the years ended on those dates, is presented below:

Stock Options:

	2013			2012		
	Amount		Weighted average exercise price	Amount		Weighted average exercise price
Options outstanding at beginning of year	12,228	$	5.46	64,953	$	7.80
Changes during year:						
Granted	–	$	–	–	$	–
Exercised	–	$	–	–	$	–
Forfeited	(3,268)	$	5.46	(52,725)	$	8.34
Options outstanding at end of year	8,960	$	5.46	12,228	$	5.46
Options vested at end of year	8,960	$	5.46	12,228	$	5.46

Restricted Shares and Restricted Stock Units:

	2013			2012		
	Shares		Weighted average fair value at grant date	Shares		Weighted average fair value at grant date
Non-vested at the beginning of the year	844,270	$	1.30	636,488	$	1.43
Changes during year:						
Restricted stock granted	270,550	$	2.94	517,582	$	1.17
Restricted units granted	110,180	$	1.67	60,000	$	1.67
Vested	(434,732)	$	1.22	(310,497)	$	1.29
Forfeited	(205,522)	$	1.41	(59,303)	$	1.49
Non-vested at the end of the year	584,746	$	2.52	844,270	$	1.30
Restricted shares vested at end of year	2,478,231	$	2.08	2,353,996	$	1.97

6. The remaining total compensation cost related to non-vested restricted share and restricted stock unit awards not yet recognized (before applying a forfeiture rate) in the income statement as of December 31, 2013 was $537,575. The weighted average period over which this compensation cost is expected to be recognized is approximately one year.

7. On January 1, 2009, the Company adopted FASB ASC 260-45-28, Share-Based Payment Arrangements, which classifies unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) as participating securities and requires them to be included in the computation of diluted earnings per share using the two class method. The Company has determined that the unvested restricted stock issued to our employees and directors are "participating securities" and as such, are included, net of estimated forfeitures, in the total shares used to calculate the Company's diluted loss per share but not the basic loss per share as they are anti-dilutive.

In U.S. dollars

NOTE 14:– INCOME TAXES

a. General:

As of December 31, 2013, Arotech has net operating loss carryforwards for U.S. federal income tax purposes of $39.6 million, which are available to offset future taxable income, if any, expiring in 2020 through 2032. Utilization of U.S. net operating losses is subject to substantial annual limitations due to the “change in ownership” provisions of the Internal Revenue Code of 1986 and similar state provisions. The annual limitation may result in the expiration of net operating losses before utilization.

At December 31, 2012, the Company had net deferred tax assets before valuation allowance of $43.9 million. The deferred tax assets are primarily composed of federal, state and foreign tax net operating loss (“NOL”) carryforwards. Due to uncertainties surrounding the Company’s ability to generate future taxable income to realize these assets, a full valuation allowance has been established to offset its net deferred tax asset. Additionally, the future utilization of the Company’s NOL carryforwards to offset future taxable income is subject to a substantial annual limitation as a result of IRC Section 382 changes that have occurred. Any carryforwards that will expire prior to utilization as a result of such limitations will be removed from deferred tax assets with a corresponding reduction of the valuation allowance.

The Company has indefinite-lived intangible assets consisting of trademarks and goodwill. These indefinitely-lived intangible assets are not amortized for financial reporting purposes. However, these assets are tax deductible, and therefore amortized over 15 years for tax purposes. As such, deferred income tax expense and a deferred tax liability arise as a result of the tax-deductibility of these indefinitely-lived intangible assets. The resulting deferred tax liability, which is expected to continue to increase over time, will have an indefinite life, resulting in what is referred to as a “naked tax credit.” This deferred tax liability could remain on the Company’s balance sheet indefinitely unless there is an impairment of the related assets (for financial reporting purposes), or the business to which those assets relate were to be disposed of.

Due to the fact that the aforementioned deferred tax liability could have an indefinite life, it is not netted against the Company’s deferred tax assets when determining the required valuation allowance. Doing so would result in the understatement of the valuation allowance and related deferred income tax expense.

The Company has also evaluated its income tax positions under FASB ASC 740-10 as of December 31, 2013 and the Company believes that it has no material uncertain tax positions and therefore has no uncertain tax position reserves and does not expect to provide for any such reserves. The Company does not believe that the unrecognized tax benefits will change within 12 months of this reporting date. It is the Company’s policy that any assessed penalties and interest on uncertain tax positions would be charged to income tax expense.

The Company does not provide for U.S. federal income taxes on the undistributed earnings of its foreign subsidiaries because such earnings are re-invested and, in the opinion of management, will continue to be re-invested indefinitely.

The Company files income tax returns, including returns for its subsidiaries, with federal, state, local and foreign jurisdictions. The Company is no longer subject to IRS examination for periods prior to 2009, although carryforward losses that were generated prior to 2010 may still be adjusted by the IRS if they are used in a future period. Additionally, the Company is no longer subject to examination in Israel for periods prior to 2009.

The Company files consolidated tax returns for its U.S. entities.

NOTE 14:– INCOME TAXES (Cont.)

b. Israeli subsidiary (Epsilor-EFL):

Effective January 1, 2011 Epsilor-EFL's tax rate was 10% in 2011 and 2012 and will be reduced to 6% by 2015. In addition, dividends paid from the profits of Epsilor-EFL are subject to tax at the rate of 15% in the hands of their recipient and tax exempt on dividends paid to Israeli company. As of December 31, 2013, there are no tax exempt profits earned by Epsilor–EFL by Israel law that will be distributed as a dividend and accordingly no deferred tax liability was recorded as of December 31, 2013. Furthermore, management has indicated that it has no intention of declaring any dividend.

On August 5, 2013, the Law for Change of National Priorities (Legislative Amendments for Achieving the Budgetary Goals for 2013-2014), 2013 (hereinafter - the 2013 Amendments) was published in Reshumot (the Israeli government official gazette), which enacts, among other things, the following amendments:

- Raising the corporate tax rate to 26.5% (instead of 25%) beginning in 2014 and thereafter.

- Commencing tax year 2014 and thereafter the tax rate on the income of preferred enterprises of a qualifying Company in Development Zone A as stated in the Encouragement of Capital Investment Law, 1959 (hereinafter - the Encouragement Law) shall increase to 9% (instead of 7% in 2014 and 6% in 2015 and thereafter) and for companies located in zones other than Zone A the rate shall increase to 16% (instead of 12.5% in 2014 and 12% in 2015 and thereafter).

- In addition, the tax rate on dividends distributed on January 1, 2014 and thereafter originating from preferred income under the Encouragement Law will be raised to 20% (instead of 15%).

c. Merger of Epsilor and EFL:

On June 25, 2009, two of the Company's Israeli subsidiaries, Epsilor and EFL, entered into a merger agreement pursuant to which EFL merged all of its assets and liabilities into Epsilor, with Epsilor the survivor of the merger (the "Merged Company").

Through the merger date, EFL accumulated certain tax losses (the "EFL Loss"). 20% of the EFL Loss was cancelled and is not available to offset any future income. The remaining amount of the EFL Loss (the "Remaining Loss") was absorbed into the Merged Company and is available to offset the Merged Company's income after July 1, 2009; provided that for the 16 tax years following the merger, losses will not be available to offset the Merged Company's income in excess of the lesser of (i) 6.25% of the original amount of the Remaining Loss, or (ii) 50% of the Merged Company's total taxable income in that year prior to giving effect to the application of any of the EFL Loss.

As of December 31, 2013, the Merged Company has tax loss carryforwards, generated by EFL, of $95,762,000, which is available indefinitely to offset future taxable income.

NOTE 14:– INCOME TAXES (Cont.)

d. Consolidated deferred income taxes:

Deferred income taxes reflect tax credit carryforwards and the net tax effects of temporary differences between the carrying amounts of asse and liabilities for financial reporting purposes and amounts used for income tax purposes. Significant components of the Company's deferred ta assets are as follows:

	December 31,	
	2013	2012
U.S. operating loss carryforward	$ 15,836,153	$ 17,286,287
Foreign operating loss carryforward	23,852,782	21,366,068
Total operating loss carryforward	39,688,935	38,652,355
Temporary differences:		
Compensation and benefits	2,321,718	2,026,176
Warranty reserves	1,165,515	1,005,118
Foreign temporary differences	445,129	797,247
All other temporary differences	2,321,650	1,461,543
Total temporary differences	6,254,012	5,290,084
Deferred tax asset before valuation allowance	45,942,947	43,942,439
Valuation allowance	(45,942,947)	(43,942,439)
Total deferred tax asset	$ –	$ –
Deferred tax liability	$ 5,423,275	$ 4,920,021

The Company provided valuation allowances for the deferred tax assets resulting from tax loss carryforwards and other temporary differences. Management currently believes that it is more likely than not that the deferred tax assets related to the operating loss carryforwards and other temporary differences will not be realized. The change in the valuation allowance during 2013 was $(2.0 million).

e. Income (loss) from continuing operations before taxes on income are as follows:

	Year ended December 31	
	2013	2012
Domestic	$ 4,215,005	$ 260,481
Foreign	(888,315)	(1,660,719)
	$ 3,326,690	$ (1,400,238)

f. Taxes on income were comprised of the following:

	Year ended December 31	
	2013	2012
Current federal taxes	$ 117,448	$ –
Current state and local taxes	327,747	29,656
Deferred taxes	481,052	598,500

Taxes in respect of prior years	126,473	–
Expense	$ 1,052,720	$ 628,156
Domestic	$ 926,247	$ 628,156
Foreign	126,473	–
Expense	$ 1,052,720	$ 628,156

NOTE 16:– SEGMENT INFORMATION

a. General:

The Company operates in two continuing business segments (see Note 1.a. for a brief description of the Company's business).

The Company's reportable segments have been determined in accordance with the Company's internal management structure, which is organized based on operating activities. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies. The Company evaluates performance based on two primary factors: the segment's operating income and the segment's contribution to the Company's future strategic growth.

Securities registered pursuant to section 12(g) of the Act: **Common Stock, $0.01 par value**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. **Yes** ¸ **No** ¡

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. **Yes** ¸ **No** ¡

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days: **Yes** ¡ **No** ¸

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). **Yes** ¡ **No** ¸

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant’s knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer: ¨ Accelerated filer: ¨ Non-accelerated filer: ¨ Smaller reporting company: ¡

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). **Yes** ¨ **No** ¡

The aggregate market value of the registrant’s voting stock held by non-affiliates of the registrant as of June 29, 2012 was approximately $13,134,959 (based on the last sale price of such stock on such date as reported by The Nasdaq Global Market and assuming, for the purpose of this calculation only, that all of the registrant’s directors and executive officers are affiliates).

(Applicable only to corporate registrants) Indicate the number of shares outstanding of each of the registrant’s classes of common stock, as of the latest practicable date: **16,174,187 as of 3/31/2013**

Documents incorporated by reference: **None**

PRELIMINARY NOTE

This annual report contains historical information and forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to our business, financial condition and results of operations. The words “estimate,” “project,” “intend,” “expect” and similar expressions are intended to identify forward-looking statements. These forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those contemplated in such forward-looking statements. Further, we operate in an industry sector where securities values may be volatile and may be influenced by economic and other factors beyond our control. In the context of the forward-looking information provided in this annual report and in other reports, please refer to the discussions of risk factors detailed in, as well as the other information contained in, our other filings with the Securities and Exchange Commission.

Electric Fuel® is a registered trademark and Arotech™ is a trademark of Arotech Corporation, formerly known as Electric Fuel Corporation. All company and product names mentioned may be trademarks or registered trademarks of their respective holders. Unless otherwise indicated, “we,” “us,” “our” and similar terms refer to Arotech and its subsidiaries.

TABLE OF CONTENTS

Table of Contents

PART I

ITEM 1. BUSINESS

General

We are a defense and security products and services company, engaged in two business areas: interactive simulation for military, law enforcement and commercial markets; and batteries and charging systems for the military. We operate primarily through our various subsidiaries, which we have organized into two divisions. Our divisions and subsidiaries (both 100% owned by us) are as follows:

- We develop, manufacture and market advanced high-tech multimedia and interactive digital solutions for use-of-force training and driving training of military, law enforcement, security and other personnel through our ***Training and Simulation Division***:
  - We provide simulators, systems engineering and software products to the United States military, government and private industry through our subsidiary FAAC Incorporated, located in Ann Arbor, Michigan (“FAAC”); and
  - Through FAAC, we provide specialized “use of force” training for police, security personnel and the military under the trade name IES Interactive Training (“IES”).
- We manufacture and sell lithium and Zinc-Air batteries for defense and security products, including our Soldier Wearable Integrated Power Equipment System (SWIPES)™ power hubs, and other military applications through our ***Battery and Power Systems Division***:
  - We develop and sell rechargeable and primary lithium batteries and smart chargers to the military and to private defense industry in the Middle East, Europe and Asia under our Epsilor nameplate (“Epsilor”), through our subsidiary Epsilor-Electric Fuel, Ltd. (“Epsilor-EFL”), at Epsilor-EFL’s facilities located in Dimona, Israel (in Israel’s Negev desert area);
  - We develop, manufacture and market primary Zinc-Air batteries, rechargeable batteries and battery chargers for the military, focusing on applications that demand high energy and light weight, as well as our Soldier Wearable Integrated Power Equipment System (SWIPES)™ power hub product, through our subsidiary Electric Fuel Battery Corporation, located in Auburn, Alabama (“EFB”); and
  - We produce water-activated lifejacket lights for commercial aviation and marine applications under our Electric Fuel nameplate (“EFL”), at Epsilor-EFL’s facilities located in Beit Shemesh, Israel (between Jerusalem and Tel-Aviv).

Background

We were incorporated in Delaware in 1990 under the name “Electric Fuel Corporation,” and we changed our name to “Arotech Corporation” on September 17, 2003. Unless the context requires otherwise, all references to us refer collectively to Arotech Corporation and Arotech’s wholly-owned Israeli subsidiary Epsilor-EFL; and Arotech’s wholly-owned United States subsidiaries, EFB and FAAC. Additionally, we operate under the trade names of IES Interactive Training (“IES”), Realtime Technologies (“RTI”) and Electric Fuel Limited (“EFL). Unless otherwise indicated, all reported figures include only these operations and exclude the discontinued Armor segment.

Between 2002 and December 2011, we were also engaged in utilizing advanced engineering concepts to manufacture military and paramilitary armored vehicles, and employing sophisticated lightweight materials to produce aviation armor, through our Armor Division. In December 2011, our Board of Directors approved management’s plan to sell our Armor Division in order to focus on the more profitable and growth-oriented aspects of our business. We completed the sale of our Armor Division in June 2012.

Table of Contents

For financial information concerning the business segments in which we operate, see Note 16.b. of the Notes to the Consolidated Financial Statements. For financial information about geographic areas in which we engage in business, see Note 16.c. of the Notes to the Consolidated Financial Statements.

Facilities

Our principal executive offices are located at 1229 Oak Valley Drive, Ann Arbor, Michigan 48108, and our toll-free telephone number at our executive offices is (800) 281-0356. Our corporate website is www.arotech.com. Our periodic reports, as well as recent filings relating to transactions in our securities by our executive officers and directors, that have been filed with the Securities and Exchange Commission in EDGAR format are made available through hyperlinks located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html, as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. Reference to our websites does not constitute incorporation of any of the information thereon or linked thereto into this annual report.

The offices and facilities of Epsilor-EFL are located in Israel (in Beit Shemesh and Dimona, both of which are within Israel's pre-1967 borders). Most of the members of our senior management work extensively out of Epsilor-EFL's facilities in Beit Shemesh; our financial operations are conducted primarily from our principal executive offices in Ann Arbor. FAAC's home offices and facilities are located in Ann Arbor, Michigan, Royal Oak, Michigan and Orlando, Florida. The facilities of EFB are located in Auburn, Alabama.

Training and Simulation Division

We develop, manufacture and market advanced high-tech multimedia and interactive digital solutions for use-of-force training and driver training of military, law enforcement, security and other personnel through our Training and Simulation Division, the larger of our two divisions. During 2012 and 2011, revenues from our Training and Simulation Division were approximately $59.3 million and $42.9 million, respectively.

The Training and Simulation Division concentrates on three different product areas:

× ¨ ¨ Our *Vehicle Simulation* group provides high fidelity vehicle simulators for use in operator training and is marketed under our FAAC and Realtime Technologies nameplates;

× ¨ ¨ Our *Military Operations* group provides weapon simulations used to train military pilots in the effective use of air launched weapons and is also marketed under our FAAC nameplate; and

× ¨ ¨ Our *Use of Force* group provides training products focused on the proper employment of hand carried weapons and is marketed under our IES Interactive Training nameplate.

Vehicle Simulation

We provide simulators, systems engineering and software products focused on training vehicle operators for cars and trucks. We provide these products to the United States military, government, municipalities, and private industry through our FAAC nameplate. Our fully interactive driver-training systems feature state-of-the-art vehicle simulator technology enabling training in situation awareness, risk analysis and decision making, emergency reaction and avoidance procedures, and proper equipment operation techniques. Our simulators have successfully trained hundreds of thousands of drivers.

Our Vehicle Simulation group focuses on the development and delivery of complete driving simulations for a wide range of vehicle types – such as trucks, automobiles, subway trains, buses, fire trucks, police cars, ambulances, airport ground vehicles, and military vehicles. In 2012, our Vehicle Simulations group accounted for approximately 8.8% of our Training and Simulation Division's revenues.

We believe that we have held a dominant market share in U.S. military wheeled vehicle operator driver training simulators since 1999 and that we are currently one of three significant participants in the U.S. municipal wheeled vehicle simulators market.

Table of Contents

In January 2008, we added Realtime Technologies Incorporated to our Vehicle Simulation group. RTI specializes in multi-body vehicle dynamics modeling and graphical simulation solutions. RTI offers simulation software applications, consulting services, and custom software and hardware development services primarily for use by the automobile industry and universities engaged in the study of vehicle performance or operator/vehicle interactions. We merged RTI into FAAC in January 2010.

Military Operations

In the area of Military Operations, we believe we are a premier developer of validated, high fidelity analytical models and simulations of tactical air and land warfare systems for all branches of the Department of Defense and its related industrial contractors. Our simulations are found in systems ranging from instrumented air combat and maneuver training ranges (such as Top Gun), full task training devices such as the F-18 Weapon Tactics Trainer, and in the on-board computer of many fighter jet aircraft. We supply on-board software to support weapon launch decisions for the F-15, F-16, F-18, F-22 and Joint Strike Fighter (JSF) fighter aircraft. Additionally, FAAC is a prime contractor in respect of the U.S. Army's Virtual Clearance Training Suite (VCTS) program. In 2012, our Military Operations group (including VCTS) accounted for 78.0% of our Training and Simulation Division's revenues. Our VCTS project accounted for 56.0 % of our Training and Simulation Division's revenues.

Use-of-Force

We are a leading provider of interactive, multimedia, fully digital training simulators for law enforcement, security, military and similar applications. With a large customer base spread over twenty countries around the world, we are a leader in the supply of simulation training products to law enforcement, governmental, and commercial clients. We conduct our interactive training activities and market our interactive training products, such as the MILO (Multiple Interactive Learning/training Objectives) System, the A2Z Classroom Trainer (a state-of-the-art Computer Based Training (CBT) system that allows students to interact with realistic interactive scenarios projected life-size in the classroom), and the Range FDU (firearm diagnostics unit), using our IES Interactive Training nameplate. In 2012, our Use of Force group accounted for 9.8% of our Training and Simulation Division's revenues.

Warranty

We typically offer a one to two year warranty for most of our products. Additionally, we sell extended warranties to our existing customers. In 2012, warranty revenue accounted for 3.4% of our Training and Simulation Division's revenues.

Marketing and Customers

We market our Simulation Division products to all branches of the U.S. military, federal and local government, municipal transportation departments, and public safety groups. Municipalities throughout the U.S. are using our vehicle simulators and use-of-force products, and our penetration in Asia, Europe and the Americas continues through the use of commissioned sales agents and regional distributors.

We have long-term relationships, many of over ten years' duration, with the U.S. Air Force, U.S. Navy, U.S. Army, U.S. Marine Corps, Department of Homeland Security, and most major Department of Defense training and simulation prime contractors and related subcontractors. The quality of our customer relationships is illustrated by the multiple program contract awards we have earned from many of our customers.

Competition

Our technical excellence, superior product reliability, and high customer satisfaction have enabled us to develop market leadership and attractive competitive positions in each of our product areas.

Vehicle Simulators

Several potential competitors in this segment are large, diversified defense and aerospace conglomerates who do not focus on our specific niches. As such, we are able to provide service on certain large military contracts through strategic agreements with these organizations or can compete directly with these organizations based on our strength in developing higher quality software solutions. In municipal market

applications, we compete against smaller, less sophisticated software companies. Many of our competitors have financial, technical, marketing, sales, manufacturing, distribution and other resources significantly greater than ours.

Table of Contents

Military Operations

Currently no significant competitors participate in the markets we serve around our weapon simulation niche. Our over 30-year history in this space provides a library of resources that would require a competitor to invest heavily in to offer a comparable product. The companies that could logically compete with us if they chose would be the companies that now subcontract this work to us: Boeing, Raytheon and Cubic.

Use of Force

We compete against a number of established companies that provide similar products and services, many of which have financial, technical, marketing, sales, manufacturing, distribution and other resources significantly greater than ours. There are also companies whose products do not compete directly, but are sometimes closely related. Firearms Training Systems, Inc., Advanced Interactive Systems, Inc., and LaserShot Inc. are our main competitors in this space.

Battery and Power Systems Division

We manufacture and sell Lithium and Zinc-Air batteries for defense and security products and other military applications through our Battery and Power Systems Division. During 2012 and 2011, revenues from our Battery and Power Systems Division were approximately $20.8 million and $19.3 million, respectively.

Lithium Batteries and Charging Systems for the Military

Introduction

We sell lithium batteries and charging systems, including the SWIPES™ power hubs we produce for the Army's Soldier Warrior program, to the military through our subsidiaries Epsilor-EFL and EFB.

We specialize in the design and manufacture of primary and rechargeable batteries, related electronic circuits and associated chargers for military applications. We have experience in working with government agencies, the military and large corporations. Our technical team has significant expertise in the fields of electrochemistry, electronics, software and battery design, production, packaging and testing.

Our Soldier Wearable Integrated Power Equipment System, or SWIPES™, power hub utilizes the MOLLE vest and integrates force protection electronics and communications equipment with an advanced battery. The system utilizes a modular power distribution system that is powered by BA-8180/U, BA-8140/U Zinc-air batteries or the LI-145, BB2590 rechargeable batteries for direct power of equipment, allowing for extended mission times without the burden of power source swaps or charging due to their high energy density, and reducing battery weight soldiers carry by up to 30%. The batteries continuously charge the secondary batteries inside various devices, such as two way radios, GPS units and shot detection systems. The SWIPES™ product allows for individual tailoring by the warfighter and is designed to accept new applications as they become available. The SWIPES™ power hub was recognized by the U.S Army Research, Development and Engineering Command as one of the U.S. Army's ten greatest inventions of 2010.

Competition

The main competitors for our lithium-ion battery products are Bren-tronics Inc. in the United States, which controls much of the U.S. rechargeable market, ABSL Power Solutions Limited (a wholly owned subsidiary of CIP Industries Incorporated LLP) in the United Kingdom, which has the majority of the English military market, and Ultralife Batteries, Inc. in the United States. On the primary end of the market there are a host of players who include the cell manufacturers themselves, including Saft S.A. and Ultralife Batteries, Inc.

It should be noted that a number of OEMs, such as Motorola, have internal engineering groups that can develop competitive products in-house. Additionally, many of our competitors have financial, technical, marketing, sales, manufacturing, distribution and other resources significantly greater than ours.

Table of Contents

Marketing

We market to our existing customers through direct sales. To generate new customers and applications, we rely on our working relationship with a selection of OEMs, with the intent of having these OEMs design our products into their equipment, thereby creating a market with a high entry barrier. Another avenue for market entry is via strategic relationships with major cell manufacturers. We are now starting direct marketing efforts to emerging markets where we believe the number of local mature competitors is limited.

Manufacturing

Our battery production lines for military batteries and chargers have been ISO-9001 certified since 1994. We believe that Epsilor-EFL's 23,000 square foot facility in Dimona, Israel has the necessary capabilities and operations to support our production cycle.

Zinc-Air Batteries and Chargers for the Military

Introduction

We base our strategy in the field of Zinc-Air military batteries on the development and commercialization of our Zinc-Air battery technology, as applied in the batteries we produce for the U.S. Army's Communications and Electronics Command (CECOM), through our subsidiary EFB. We will continue to seek new applications for our technology in defense projects, wherever synergistic technology and business benefits may exist. We intend to continue to develop our battery products for defense agencies, and plan to sell our products either directly to such agencies or through prime contractors. We will also look to extend our reach to military markets outside the United States.

Our batteries have been used in both Afghanistan (Operation Enduring Freedom) and in Iraq (Operation Iraqi Freedom). Our BA-8180/U Zinc-Air battery was recognized by the U.S Army Research, Development and Engineering Command as one of the U.S. Army's ten greatest inventions of 2003.

Our Zinc-Air batteries, rechargeable batteries and battery chargers for the military are manufactured through EFB. EFB's facilities have been granted ISO 9001 "Top Quality Standard" certification.

Markets/Applications

As an external alternative to the popular lithium based BA-5590/U, the BA-8180/U can be used in many applications operated by the BA-5590/U. The BA-8180/U can be used for a variety of military applications.

Customers

The principal customers for our Zinc-Air batteries during 2012 were the U.S. Army's Communications-Electronics Command (CECOM) and the Defense Logistics Agency (DLA). In addition, we continue to further penetrate Special Forces and other specific U.S. military units with direct sales.

Competition

The BA-8180/U is the only Zinc-Air battery to hold a U.S. Army battery designation and an NSN. It does, however, compete with other primary (disposable) batteries, and primarily lithium based batteries. In some cases it will also compete with rechargeable batteries.

Zinc-Air batteries are inherently safer than primary lithium battery packs in storage, transportation, use, and disposal, and are more cost-effective. They are lightweight, with up to twice the energy density of primary lithium battery packs. Zinc-Air batteries for the military are also under development by Rayovac Corporation. Rayovac's military Zinc-Air batteries utilize cylindrical cells, rather than the prismatic cells that we developed. While cylindrical cells may provide higher specific power than our prismatic cells, we believe they will generally have lower energy densities and be more difficult to manufacture.

The most popular competing primary battery in use by the US Armed Forces is the BA-5590/U, which uses lithium-sulfur dioxide ($LiSO_2$) cells. The largest suppliers of $LiSO_2$ batteries to the US military are believed to be Saft America Inc. and Eagle Picher Technologies LLC. The battery compartment of most military communications equipment, as well as other military equipment, is designed for the XX90

family of batteries, of which the BA-5590/U battery is the most commonly deployed. Another primary battery in this family is the BA-5390/U, which uses lithium-manganese dioxide ($LiMnO_2$) cells. Suppliers of $LiMnO_2$ batteries include Ultralife Batteries Inc., Saft and Eagle Picher.

Table of Contents

Rechargeable batteries in the XX90 family include lithium-ion (BB-2590/U) and nickel-metal hydride (BB-390/U) batteries which may be used in training missions in order to save the higher costs associated with primary batteries. These rechargeable batteries have also become more prevalent in combat use as their energy densities improve, their availability expands and their State-of-Charge Indicator (SOCI) technologies become more reliable.

Our BA-8180/U does not fit inside the XX90 battery compartment of any military equipment, and therefore is connected externally using an interface adapter that we also sell to the Army. Our battery offers greatly extended mission time, along with lower total mission cost, and these significant advantages often greatly outweigh the slight inconvenience of fielding an external battery.

Manufacturing

EFB maintains a battery and electronics development and manufacturing facility in Auburn, Alabama, housed in a 30,000-square-foot light industrial space leased from the City of Auburn. We also have production capabilities for some battery components at Epsilor-EFL's facility in Beit Shemesh, Israel. Both of these facilities have received ISO 9001 "Top Quality Standard" certification.

Lifejacket Lights

Products

We have a product line consisting of seven lifejacket light models, five for use with marine life jackets and two for use with aviation life vests, all of which work in both freshwater and seawater. Each of our lifejacket lights is certified for use by relevant governmental agencies under various U.S. and international regulations. We manufacture, assemble and package all our lifejacket lights through Epsilor-EFL in our factory in Beit Shemesh, Israel.

Marketing

We market our marine safety products through our own network of distributors in Europe, the United States, Asia and Oceania. We market our lights to the commercial aviation industry through an independent company that receives a commission on sales.

Competition

The largest manufacturer of aviation and marine safety products, including TSO and SOLAS-approved lifejacket lights, is ACR Electronics Inc. of Hollywood, Florida. Other significant competitors in the marine market include Daniamant Aps of Denmark and England, and SIC of Italy.

Backlog

We generally sell our products under standard purchase orders. Orders constituting our backlog are subject to changes in delivery schedules and are typically cancelable by our customers until a specified time prior to the scheduled delivery date. Accordingly, our backlog is not necessarily an accurate indication of future sales. As of December 31, 2012 and 2011, our backlog for the following year was approximately $87.7 million and $81.9 million, respectively, divided between our divisions as follows:

Division	2012	2011
Training and Simulation Division	$ 72,404,000	$ 71,732,000
Battery and Power Systems Division	15,293,000	10,196,000
TOTAL:	$ 87,697,000	$ 81,928,000

Table of Contents

Major Customers

During 2012 and 2011, including both of our divisions, various branches of the United States military accounted for approximately 54% and 46% of our revenues. See “Item 1A. Risk Factors – Risks Related to Government Contracts,” below.

Patents and Trade Secrets

We rely on certain proprietary technology and seek to protect our interests through a combination of patents, trademarks, copyrights, know-how, trade secrets and security measures, including confidentiality agreements. Our policy generally is to secure protection for significant innovations to the fullest extent practicable. Further, we seek to expand and improve the technological base and individual features of our products through ongoing research and development programs.

We rely on the laws of unfair competition and trade secrets to protect our proprietary rights. We attempt to protect our trade secrets and other proprietary information through confidentiality and non-disclosure agreements with customers, suppliers, employees and consultants, and through other security measures. However, we may be unable to detect the unauthorized use of, or take appropriate steps to enforce our intellectual property rights. Effective trade secret protection may not be available in every country in which we offer or intend to offer our products and services to the same extent as in the United States. Failure to adequately protect our intellectual property could harm or even destroy our brands and impair our ability to compete effectively. Further, enforcing our intellectual property rights could result in the expenditure of significant financial and managerial resources and may not prove successful. Although we intend to protect our rights vigorously, there can be no assurance that these measures will be successful.

Research and Development

During the years ended December 31, 2012 and 2011, our gross research and product development expenditures were approximately $2.0 million and $1.4 million, respectively.

Employees

As of December 31, 2012, we had approximately 340 full-time employees worldwide. Our success will depend in large part on our ability to attract and retain skilled and experienced employees.

With respect to those of our employees who are Israeli residents, Israeli law generally requires severance pay upon the retirement or death of an employee or termination of employment without due cause; additionally, some of our senior employees have special severance arrangements, certain of which are described under “Item 11. Executive Compensation – Employment Contracts,” below. We currently partially fund our ongoing severance obligations by making monthly payments to approved severance funds or insurance policies.

ITEM 1A. RISK FACTORS

The following factors, among others, could cause actual results to differ materially from those contained in forward-looking statements made in this Report and presented elsewhere by management from time to time.

Business-Related Risks

We have had a history of losses and may incur future losses.

We were incorporated in 1990 and began our operations in 1991. We have funded our operations principally from funds raised in the initial public offering of our common stock in February 1994; subsequent public and private offerings of our common stock and equity and debt securities convertible or exercisable into shares of our common stock; research contracts and supply contracts; funds received under research and development grants from the Government of Israel; and sales of products that we and our subsidiaries manufacture. We have incurred significant net losses since our inception. Additionally, as of December 31, 2012, we had an accumulated deficit (including discontinued operations) of approximately $185.4 million. In an effort to reduce operating expenses and maximize available resources, we have consolidated certain of our subsidiaries, shifted personnel and reassigned responsibilities. We have also taken a variety of other measures to limit spending and will continue to assess our internal processes to seek additional cost-structure improvements. Although we believe that such

steps will help to reduce our operating expenses and maximize our available resources, there can be no assurance that we will ever be able to achieve or maintain profitability consistently or that our business will continue to exist.

Table of Contents

We need significant amounts of capital to operate and grow our business and to pay our debt.

We require substantial funds to operate our business, including marketing our products and developing and marketing new products and to pay our outstanding debt as it comes due. To the extent that we are unable to fully fund our operations, including repaying our outstanding debt, through profitable sales of our products and services, we will need to seek additional funding, including through the issuance of equity or debt securities. In addition, based on our internal forecasts, the assumptions described under "Liquidity and Capital Resources" below, and subject to the other risk factors described herein, we believe that our present cash position and anticipated cash flows from operations and lines of credit along with a lending commitment from a new lender should be sufficient to satisfy our current estimated cash requirements for 2013. However, in the event our internal forecasts and other assumptions regarding our liquidity prove to be incorrect, we may need to seek additional funding. There can be no assurance that we will obtain any such additional financing in a timely manner, on acceptable terms, or at all. If additional funds are raised by issuing equity securities or convertible debt securities, stockholders may incur further dilution. If we incur additional indebtedness, we may be subject to affirmative and negative covenants that may restrict our ability to operate or finance our business. If additional funding is not secured, we will have to modify, reduce, defer or eliminate parts of our present and anticipated future commitments and/or programs.

Our existing indebtedness may adversely affect our ability to obtain additional funds and may increase our vulnerability to economic or business downturns.

Our bank and other indebtedness (short and long term) totaled approximately $11.5 million as of December 31, 2012 (not including trade payables, other account payables, seller-financed mortgages, capital leases, and accrued severance pay), of which $9.8 million was bank working capital lines of credit. In addition, we may incur additional indebtedness in the future. Accordingly, we are subject to the risks associated with significant indebtedness, including:

… we must dedicate a portion of our cash flows from operations to pay principal and interest and, as a result, we may have less funds available for operations and other purposes;

… it may be more difficult and expensive to obtain additional funds through financings, if available at all;

… we are more vulnerable to economic downturns and fluctuations in interest rates, less able to withstand competitive pressures and less flexible in reacting to changes in our industry and general economic conditions; and

… if we default under any of our existing debt instruments, including paying the outstanding principal when due, and if our creditors demand payment of a portion or all of our indebtedness, we may not have sufficient funds to make such payments.

The occurrence of any of these events could materially adversely affect our results of operations and financial condition and adversely affect our stock price.

Failure to comply with the terms of our indebtedness could result in a default that could have material adverse consequences for us.

A failure to comply with the obligations contained in the agreements governing our indebtedness could result in an event of default under such agreements which could result in an acceleration of debt under other instruments evidencing indebtedness that contain cross-acceleration or cross-default provisions. If our indebtedness were to be accelerated, there can be no assurance that our future cash flow or assets would be sufficient to repay in full such indebtedness. In February 2013, our primary bank increased our credit line by 50%, from $10.0 million to $15.0 million, and the expiration of the credit line was extended to May 31, 2015. The new credit agreement also contains certain covenants for 2013, which are measured on a rolling twelve-month basis, limiting the Maximum Increase in Net Advance to Affiliates to less than 90% of EBITDA and meeting a Fixed Charge Coverage Ratio of not less than 1.1 to 1.0.

Table of Contents

We may not generate sufficient cash flow to service all of our debt obligations.

Our ability to make payments on our indebtedness and to fund our operations depends on our ability to generate cash in the future. Our future operating performance is subject to market conditions and business factors that are beyond our control. Consequently, we cannot assure you that we will generate sufficient cash flow to pay the principal and interest on our debt. If our cash flows and capital resources are insufficient to allow us to make scheduled payments on our debt, we may have to reduce or delay capital expenditures, sell assets, seek additional capital or restructure or refinance our debt. We cannot assure you that the terms of our debt will allow for these alternative measures or that such measures would satisfy our scheduled debt service obligations. In addition, in the event that we are required to dispose of material assets or restructure or refinance our debt to meet our debt obligations, we cannot assure you as to the terms of any such transaction or how quickly such transaction could be completed. Our ability to refinance our indebtedness or obtain additional financing will depend on, among other things:

- our financial condition at the time;
- restrictions in the agreements governing our other indebtedness; and
- other factors, including the condition of the financial markets and our industry.

Our earnings may decline if we write off additional goodwill and other intangible assets.

As of December 31, 2012, we had recorded goodwill of $30.6 million and any future impairment of goodwill or other intangible assets may have a significant impact on earnings. Goodwill is not amortized, but is tested for impairment at the reporting unit level. Goodwill is required to be tested for impairment annually and between annual tests if events or circumstances indicate that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. There are numerous risks that may cause the fair value of a reporting unit to fall below its carrying amount, which could lead to the measurement and recognition of goodwill impairment. These risks include, but are not limited to, adverse changes in legal factors or the business climate, an adverse action or assessment by a regulator, a more-likely-than-not expectation that all or a significant portion of a reporting unit may be disposed of, a sustained decline in our market capitalization, significant negative variances between actual and expected financial results, and lowered expectations of future financial results.

Some of the components of our products pose potential safety risks which could create potential liability exposure for us.

Some of the components of our products contain elements that are known to pose potential safety risks. In addition to these risks, there can be no assurance that accidents in our facilities will not occur. Any accident, whether occasioned by the use of all or any part of our products or technology or by our manufacturing operations, could adversely affect commercial acceptance of our products and could result in significant production delays or claims for damages resulting from injuries. Any of these occurrences would materially adversely affect our operations and financial condition. In the event that our products fail to perform as specified, users of these products may assert claims for substantial amounts. These claims could have a materially adverse effect on our financial condition and results of operations. There is no assurance that the amount of the general product liability insurance that we maintain will be sufficient to cover potential claims or that the present amount of insurance can be maintained at the present level of cost, or at all.

We are subject to the Dodd-Frank Wall Street Reform and Consumer Protection Act disclosure requirements regarding the use of "conflict minerals"

Beginning in 2014, the Dodd-Frank Wall Street Reform and Consumer Protection Act will impose new disclosure requirements regarding the use of "conflict minerals" mined from the Democratic Republic of Congo and adjoining countries in products, whether or not these products are manufactured by third parties. The definition of "conflict minerals" includes tin, tantalum, tungsten and gold, and their derivatives, some of which we use in the activities of our Battery Division. These new requirements could affect the pricing, sourcing and availability of minerals used in the manufacture of our products. There will be additional costs associated with complying with the disclosure requirements, such as costs related to determining the source of any conflict minerals used in our products. Our supply chain is complex and we may be unable to verify the origins for all metals used in our products. We may also encounter challenges with our customers and stockholders if we are unable to certify that our products are conflict free.

Table of Contents

Our fields of business are highly competitive.

The competition to develop defense and security products and to obtain funding for the development of these products is, and is expected to remain, intense.

Our defense and security products compete with other manufacturers of specialized training systems.

Various battery technologies are being considered for use in defense and safety products by other manufacturers and developers, including the following: lead-acid, nickel-cadmium, nickel-iron, nickel-zinc, nickel-metal hydride, sodium-sulfur, sodium-nickel chloride, zinc-bromine, lithium-ion, lithium-polymer, lithium-iron sulfide, primary lithium, rechargeable alkaline and Zinc-Air.

Many of our competitors have financial, technical, marketing, sales, manufacturing, distribution and other resources significantly greater than ours. If we are unable to compete successfully in each of our operating areas, our business and results of operations could be materially adversely affected.

Our business is dependent on proprietary rights that may be difficult to protect and could affect our ability to compete effectively.

Our ability to compete effectively will depend on our ability to maintain the proprietary nature of our technology and manufacturing processes through a combination of patent and trade secret protection, non-disclosure agreements and licensing arrangements.

Litigation, or participation in administrative proceedings, may be necessary to protect our proprietary rights. This type of litigation can be costly and time consuming and could divert company resources and management attention to defend our rights, and this could harm us even if we were to be successful in the litigation. In the absence of patent protection, and despite our reliance upon our proprietary confidential information, our competitors may be able to use innovations similar to those used by us to design and manufacture products directly competitive with our products. In addition, no assurance can be given that others will not obtain patents that we will need to license or design around. To the extent any of our products are covered by third-party patents, we could need to acquire a license under such patents to develop and market our products.

Despite our efforts to safeguard and maintain our proprietary rights, we may not be successful in doing so. In addition, competition is intense, and there can be no assurance that our competitors will not independently develop or patent technologies that are substantially equivalent or superior to our technology. In the event of patent litigation, we cannot assure you that a court would determine that we were the first creator of inventions covered by our issued patents or pending patent applications or that we were the first to file patent applications for those inventions. If existing or future third-party patents containing broad claims were upheld by the courts or if we were found to infringe third-party patents, we may not be able to obtain the required licenses from the holders of such patents on acceptable terms, if at all. Failure to obtain these licenses could cause delays in the introduction of our products or necessitate costly attempts to design around such patents, or could foreclose the development, manufacture or sale of our products. We could also incur substantial costs in defending ourselves in patent infringement suits brought by others and in prosecuting patent infringement suits against infringers.

We also rely on trade secrets and proprietary know-how that we seek to protect, in part, through non-disclosure and confidentiality agreements with our customers, employees, consultants, and entities with which we maintain strategic relationships. We cannot assure you that these agreements will not be breached, that we would have adequate remedies for any breach or that our trade secrets will not otherwise become known or be independently developed by competitors.

Table of Contents

We are dependent on key personnel and our business would suffer if we fail to retain them.

We are highly dependent on the president of our FAAC subsidiary and the general managers of our Epsilor-EFL subsidiary and the loss of the services of either or both of these persons could adversely affect us. We are especially dependent on the services of our Chairman and Chief Executive Officer, Robert S. Ehrlich, and our President, Steven Esses. The loss of either Mr. Ehrlich or Mr. Esses could have a material adverse effect on us. We are party to employment agreements with Mr. Ehrlich and Mr. Esses, both which agreements expire at the end of 2013. We do not have key-man life insurance on either Mr. Ehrlich or Mr. Esses.

We face risks related to general domestic and global economic conditions.

In general, our operating results can be significantly affected by negative economic conditions, high labor, material and commodity costs and unforeseen changes in demand for our products and services. These risks are heightened as economic conditions globally have deteriorated significantly and may remain at recessionary levels for the foreseeable future. The current recessionary conditions could have a potentially significant negative impact on demand for our products and services, which may have a direct negative impact on our sales and profitability, as well as our ability to generate sufficient internal cash flows or access credit at reasonable rates to meet future operating expenses, service debt and fund capital expenditures.

We face risks related to the current credit crisis.

Disruption in credit markets may impact demand for our products and services, as well as our ability to manage normal relationships with our customers, suppliers and creditors. Tighter credit markets could result in supplier or customer disruptions.

The potential bankruptcy of certain suppliers could leave us exposed to certain risks of collection of outstanding receivables. If any of our suppliers declare bankruptcy, this could have a material adverse effect on our business, financial condition and results of operations.

There are risks involved with the international nature of our business.

A significant portion of our sales are made to customers located outside the U.S., primarily in Europe and Asia. In 2012 and 2011, 20.4% and 26.7%, respectively, of our revenues, were derived from sales to customers located outside the U.S. We expect that our international customers will continue to account for a substantial portion of our revenues in the near future. Sales to international customers may be subject to political and economic risks, including political instability, currency controls, exchange rate fluctuations, foreign taxes, longer payment cycles and changes in import/export regulations and tariff rates. In addition, various forms of protectionist trade legislation have been and in the future may be proposed in the U.S. and certain other countries. Any resulting changes in current tariff structures or other trade and monetary policies could adversely affect our sales to international customers. See also "Israel-Related Risks," below.

Risks Related to Government Contracts

A significant portion of our business is dependent on government contracts and reduction or reallocation of defense or law enforcement spending could reduce our revenues.

Many of our Training and Simulation Division's customers to date have been in the public sector of the U.S., including the federal, state and local governments, and in the public sectors of a number of other countries. Additionally, the majority of EFB's sales to date of battery products for the military and defense sectors have been in the public sector in the United States. A significant decrease in the overall level or allocation of defense or law enforcement spending in the U.S. or other countries could reduce our revenues and have a material adverse effect on our future results of operations and financial condition.

Sales to public sector customers are subject to a multiplicity of detailed regulatory requirements and public policies as well as to changes in training and purchasing priorities. Contracts with public sector customers may be conditioned upon the continuing availability of public funds, which in turn depends upon lengthy and complex budgetary procedures, and may be subject to certain pricing constraints. Moreover, U.S. government contracts and those of many international government customers may generally be terminated for a variety of factors when it is in the best interests of the government and contractors may be suspended or debarred for misconduct at the discretion of the government. There can be no assurance that these factors or others unique to government contracts or the loss or suspension of necessary regulatory licenses will not reduce our revenues and have a material adverse effect on our future results of operations and financial condition.

Table of Contents

A decline in the U.S. Government defense budget, changes in budgetary priorities or timing of contract awards may adversely affect our future revenues and limit our growth prospects.

Revenues under contracts with the U.S. Department of Defense ("DoD"), either as a prime contractor or subcontractor to other contractors, represent a substantial portion of our total revenues. Our operating results could be adversely affected by spending caps or changes in the budgetary priorities of the U.S. Government or the DoD, as well as delays in program starts or the award of contracts or task orders under contracts.

In August 2011, Congress enacted the Budget Control Act of 2011 (the "Budget Control Act") which, while raising the existing statutory limit on the amount of permissible federal debt, also committed the U.S. government to significantly reducing the federal deficit over ten years. The Budget Control Act established caps on discretionary spending through 2021, reducing federal spending by approximately $940 billion relative to the fiscal year 2012 Presidential Budget submission. It also established a Joint Committee of Congress (the "Joint Committee") that was responsible for identifying an additional $1.2 to $1.5 trillion in deficit reductions by November 23, 2011. The Joint Committee was unable to identify the additional deficit reductions by this deadline thereby triggering a second provision of the Budget Control Act called "sequestration," which calls for very substantial automatic spending cuts split between defense and non-defense programs originally scheduled to start in January 2013 and continue over a nine-year period. While the sequestration that was scheduled to begin in January 2013 has been deferred until March 2013, and members of Congress are discussing various options to prevent or further defer sequestration and the automatic spending cuts scheduled to begin in March 2013, we cannot predict whether any such efforts will succeed.

While the impact of sequestration is yet to be determined, automatic across-the-board cuts would approximately double the $487 billion top-line reduction already reflected in the defense funding over a ten-year period, with a $52 billion reduction occurring in the government's fiscal year 2013. The resulting automatic across-the-board budget cuts in sequestration could have significant consequences to our business and industry. While it is unclear whether sequestration will occur and what the exact impact of it would be, we are continuously reviewing our operations in an attempt to identify those programs that could be at risk so that we can make appropriate contingency plans. These or other factors could result in a significant decline in, or redirection of, current and future budgets and could adversely affect our operating performance, including the possible loss of revenue and reduction in our operating cash flow.

Our U.S. government contracts may be terminated at any time and may contain other unfavorable provisions.

The U.S. government typically can terminate or modify any of its contracts with us either for its convenience or if we default by failing to perform under the terms of the applicable contract. A termination arising out of our default could expose us to liability and have a material adverse effect on our ability to re-compete for future contracts and orders. Our U.S. government contracts contain provisions that allow the U.S. government to unilaterally suspend us from receiving new contracts pending resolution of alleged violations of procurement laws or regulations, reduce the value of existing contracts, issue modifications to a contract and control and potentially prohibit the export of our products, services and associated materials.

Government agencies routinely audit government contracts. These agencies review a contractor's performance on its contract, pricing practices, cost structure and compliance with applicable laws, regulations and standards. If we are audited, we will not be reimbursed for any costs found to be improperly allocated to a specific contract, while we would be required to refund any improper costs for which we had already been reimbursed. Therefore, an audit could result in a substantial adjustment to our revenues. If a government audit uncovers improper or illegal activities, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeitures of profits, suspension of payments, fines and suspension or debarment from doing business with United States government agencies. We could suffer serious reputational harm if allegations of impropriety were made against us. A governmental determination of impropriety or illegality, or an allegation of impropriety, could have a material adverse effect on our business, financial condition or results of operations.

Table of Contents

We may be liable for penalties under a variety of procurement rules and regulations, and changes in government regulations could adversely impact our revenues, operating expenses and profitability.

Our defense and commercial businesses must comply with and are affected by various government regulations that impact our operating costs, profit margins and our internal organization and operation of our businesses. Among the most significant regulations are the following:

- the U.S. Federal Acquisition Regulations, which regulate the formation, administration and performance of government contracts;
- the U.S. Truth in Negotiations Act, which requires certification and disclosure of all cost and pricing data in connection with contract negotiations; and
- the U.S. Cost Accounting Standards, which impose accounting requirements that govern our right to reimbursement under certain cost-based government contracts.

These regulations affect how we and our customers do business and, in some instances, impose added costs on our businesses. Any changes in applicable laws could adversely affect the financial performance of the business affected by the changed regulations. With respect to U.S. government contracts, any failure to comply with applicable laws could result in contract termination, price or fee reductions or suspension or debarment from contracting with the U.S. government.

We may not be able to receive or retain the necessary licenses or authorizations required for us to export or re-export our products, technical data or services, or to transfer technology from foreign sources (including our own subsidiaries) and to work collaboratively with them. Denials of such licenses and authorizations could have a material adverse effect on our business and results of operations.

U.S. regulations concerning export controls require us to screen potential customers, destinations, and technology to ensure that sensitive equipment, technology and services are not exported in violation of U.S. policy or diverted to improper uses or users.

In order for us to export certain products, technical data or services, we are required to obtain licenses from the U.S. government, often on a transaction-by-transaction basis. These licenses are generally required for the export of the military versions of our products and technical data and for defense services. We cannot be sure of our ability to obtain the U.S. government licenses or other approvals required to export our products, technical data and services for sales to foreign governments, foreign commercial customers or foreign destinations.

In addition, in order for us to obtain certain technical know-how from foreign vendors and to collaborate on improvements on such technology with foreign vendors, including at times our own foreign subsidiaries, we may need to obtain U.S. government approval for such collaboration through manufacturing license or technical assistance agreements approved by U.S. government export control agencies.

The U.S. government has the right, without notice, to revoke or suspend export licenses and authorizations for reasons of foreign policy, issues over which we have no control.

Failure to receive required licenses or authorizations would hinder our ability to export our products, data and services and to use some advanced technology from foreign sources. This could have a material adverse effect on our business, results of operations and financial condition.

Our failure to comply with export control rules could have a material adverse effect on our business.

Our failure to comply with these rules could expose us to significant criminal or civil enforcement action by the U.S. government, and a conviction could result in denial of export privileges, as well as contractual suspension or debarment under U.S. government contracts, either of which could have a material adverse effect on our business, results of operations and financial condition.

Table of Contents

Our operating margins may decline under our fixed-price contracts if we fail to estimate accurately the time and resources necessary to satisfy our obligations.

Some of our contracts are fixed-price contracts under which we bear the risk of any cost overruns. Our profits are adversely affected if our costs under these contracts exceed the assumptions that we used in bidding for the contract. Often, we are required to fix the price for a contract before we finalize the project specifications, which increases the risk that we will misprice these contracts. The complexity of many of our engagements makes accurately estimating our time and resources more difficult. In the event we fail to estimate our time and resources accurately, our expenses will increase and our profitability, if any, under such contracts will decrease.

If we are unable to retain our contracts with the U.S. government and subcontracts under U.S. government prime contracts in the competitive rebidding process, our revenues may suffer.

Upon expiration of a U.S. government contract or subcontract under a U.S. government prime contract, if the government customer requires further services of the type provided in the contract, there is frequently a competitive rebidding process. We cannot guarantee that we, or if we are a subcontractor that the prime contractor, will win any particular bid, or that we will be able to replace business lost upon expiration or completion of a contract. Further, all U.S. government contracts are subject to protest by competitors. The termination or nonrenewal of several of our significant contracts could result in considerable revenue shortfalls.

The loss of, or a significant reduction in, U.S. military business would have a material adverse effect on us.

U.S. military contracts account for a significant portion of our business. The U.S. military funds these contracts in annual increments. These contracts require subsequent authorization and appropriation that may not occur or that may be greater than or less than the total amount of the contract. Changes in the U.S. military's budget, spending allocations and the timing of such spending could adversely affect our ability to receive future contracts. None of our contracts with the U.S. military has a minimum purchase commitment, and the U.S. military generally has the right to cancel its contracts unilaterally without prior notice. We manufacture for the U.S. batteries for communications devices. The loss of, or a significant reduction in, U.S. military business for our batteries could have a material adverse effect on our business, financial condition, results of operations and liquidity.

Market-Related Risks

The price of our common stock is volatile.

The market price of our common stock has been volatile in the past and may change rapidly in the future. The following factors, among others, may cause significant volatility in our stock price:

… announcements by us, our competitors or our customers;

… the introduction of new or enhanced products and services by us or our competitors;

… changes in the perceived ability to commercialize our technology compared to that of our competitors;

… rumors relating to our competitors or us;

… actual or anticipated fluctuations in our operating results;

… the issuance of our securities, including warrants, in connection with financings and acquisitions; and

… general market or economic conditions.

Table of Contents

If our shares were to be delisted, our stock price might decline further and we might be unable to raise additional capital.

One of the continued listing standards for our stock on the Nasdaq Stock Market (both the Nasdaq Global Market, on which our stock is currently listed, and the Nasdaq Capital Market) is the maintenance of a $1.00 bid price. Our stock price has periodically traded below $1.00 in the recent past. If our bid price were to decrease and remain below $1.00 for 30 consecutive business days, Nasdaq could notify us of our failure to meet the continued listing standards, after which we would have 180 calendar days to correct such failure or be delisted from the Nasdaq Global Market. Although we would have the opportunity to appeal any potential delisting, there can be no assurances that this appeal would be resolved favorably. As a result, there can be no assurance that our common stock will remain listed on the Nasdaq Global Market. If our common stock were to be delisted from the Nasdaq Global Market, we might apply to be listed on the Nasdaq Capital Market if we then met the initial listing standards of the Nasdaq Capital Market (other than the $1.00 minimum bid standard). If we were to move to the Nasdaq Capital Market, current Nasdaq regulations would give us the opportunity to obtain an additional 180-day grace period if we meet certain net income, stockholders' equity or market capitalization criteria; if at the end of that period we had not yet achieved compliance with the minimum bid price rule, we would be subject to delisting from the Nasdaq Capital Market. Although we would have the opportunity to appeal any potential delisting, there can be no assurances that this appeal would be resolved favorably. In addition, we may be unable to satisfy the other continued listing requirements. As a result, there can be no assurance that our common stock will remain listed on the Nasdaq Stock Market.

While our stock would continue to trade on the over-the-counter bulletin board following any delisting from the Nasdaq, any such delisting of our common stock could have an adverse effect on the market price of, and the efficiency of the trading market for, our common stock. Trading volume of over-the-counter bulletin board stocks has been historically lower and more volatile than stocks traded on an exchange or the Nasdaq Stock Market. As a result, holders of our securities could find it more difficult to sell their securities. Also, if in the future we were to determine that we need to seek additional equity capital, it could have an adverse effect on our ability to raise capital in the public equity markets.

In addition, if we fail to maintain Nasdaq listing for our securities, and no other exclusion from the definition of a "penny stock" under the Securities Exchange Act of 1934, as amended, is available, then any broker engaging in a transaction in our securities would be required to provide any customer with a risk disclosure document, disclosure of market quotations, if any, disclosure of the compensation of the broker-dealer and its salesperson in the transaction and monthly account statements showing the market values of our securities held in the customer's account. The bid and offer quotation and compensation information must be provided prior to effecting the transaction and must be contained on the customer's confirmation. If brokers become subject to the "penny stock" rules when engaging in transactions in our securities, they would become less willing to engage in transactions, thereby making it more difficult for our stockholders to dispose of their shares.

We do not anticipate paying cash dividends.

We currently intend to retain any future earnings for funding growth and, as a result, do not expect to pay any cash dividends in the foreseeable future. Additionally, our ability to declare dividends should we decide to do so is restricted by the terms of our debt agreements.

Our certificate of incorporation and bylaws and Delaware law contain provisions that could discourage a takeover.

Provisions of our amended and restated certificate of incorporation may have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from attempting to acquire, control of us. These provisions could limit the price that certain investors might be willing to pay in the future for shares of our common stock. These provisions:

- divide our board of directors into three classes serving staggered three-year terms;

- only permit removal of directors by stockholders "for cause," and require the affirmative vote of at least 85% of the outstanding common stock to so remove; and

- allow us to issue preferred stock without any vote or further action by the stockholders.

Table of Contents

The classification system of electing directors and the removal provision may tend to discourage a third-party from making a tender offer or otherwise attempting to obtain control of us and may maintain the incumbency of our board of directors, as the classification of the board of directors increases the difficulty of replacing a majority of the directors. These provisions may have the effect of deferring hostile takeovers, delaying changes in our control or management, or may make it more difficult for stockholders to take certain corporate actions. The amendment of any of these provisions would require approval by holders of at least 85% of the outstanding common stock.

Israel-Related Risks

A significant portion of our operations takes place in Israel, and we could be adversely affected by the economic, political and military conditions in that region.

The offices and facilities of Epsilor-EFL are located in Israel (in Beit Shemesh and Dimona, both of which are within Israel's pre-1967 borders). Most of our senior management is located in Beit Shemesh. Although we expect that most of our sales will continue to be made to customers outside Israel, we are nonetheless directly affected by economic, political and military conditions in that country. Accordingly, any major hostilities involving Israel or the interruption or curtailment of trade between Israel and its present trading partners could have a material adverse effect on our operations. Since the establishment of the State of Israel in 1948, a number of armed conflicts have taken place between Israel and its Arab neighbors and a state of hostility, varying in degree and intensity, has led to security and economic problems for Israel.

Historically, Arab states have boycotted any direct trade with Israel and to varying degrees have imposed a secondary boycott on any company carrying on trade with or doing business in Israel. Although in October 1994, the states comprising the Gulf Cooperation Council (Saudi Arabia, the United Arab Emirates, Kuwait, Dubai, Bahrain and Oman) announced that they would no longer adhere to the secondary boycott against Israel, and Israel has entered into certain agreements with Egypt, Jordan, the Palestine Liberation Organization and the Palestinian Authority, Israel has not entered into any peace arrangement with Syria or Lebanon. Moreover, since September 2000, there has been a significant deterioration in Israel's relationship with the Palestinian Authority. Efforts to resolve the problem have failed to result in an agreeable solution.

In July and August of 2006, Israel was involved in a full-scale armed conflict with Hezbollah, a Lebanese Islamist Shiite militia group and political party, in southern Lebanon, which involved missile strikes against civilian targets in northern Israel that resulted in economic losses. On August 14, 2006, a ceasefire was declared relating to that armed conflict, although it is uncertain whether or not the ceasefire will continue to hold.

Israel withdrew unilaterally from the Gaza Strip and certain areas in northern Samaria in 2005. Thereafter Hamas, an Islamist terrorist group responsible for many attacks, including missile strikes against Israeli civilian targets, won the majority of the seats in the Parliament of the Palestinian Authority in January 2006 and took control of the entire Gaza Strip, by force, in June 2007. Since then, Hamas and other Palestinian movements have launched thousands of missiles from the Gaza strip into civilian targets in southern Israel. In late 2008, a sharp increase in rocket fire from Gaza on Israel's western Negev region, extending as far as 25 miles into Israeli territory and disrupting most day-to-day civilian activity in the proximity of the border with the Gaza Strip, prompted the Israeli government to launch military operations against Hamas that lasted approximately three weeks. Israel declared a unilateral ceasefire in January 2009, which substantially diminished the frequency of, but did not eliminate, Hamas rocket attacks against Israeli cities. In November 2012, following an increase in rocket attacks and hostile activity originating from the Gaza Strip, the Israeli government launched an air attack on Hamas. Rockets were fired into Israel extending as far as Tel Aviv and Jerusalem. After seven days, a ceasefire was agreed to by Israel and Hamas. Since then, rocket attacks have been significantly reduced, but not totally stopped. There can be no assurance that this period of relative calm will continue, especially in light of continuing rhetoric between Iran and Israel.

Our Israeli production facilities in the cities of Beit Shemesh and Dimona, are located approximately 27 miles and 38 miles, respectively, from the nearest point of the border with the Gaza Strip. There can be no assurance that Hamas will not begin to use on a more frequent basis longer-range missiles capable of reaching our facilities, which could result in a significant disruption of the Israel-based portion of our business. Additionally, recent political events, including political uprisings, social unrest and regime change, in various countries in the Middle East and North Africa have weakened the stability of those countries, which could result in extremists coming to power, including in countries with which Israel has signed peace treaties that may not be respected by extremists. In addition, Iran has threatened to attack Israel and is widely believed to be developing nuclear weapons. Iran is also believed to have a strong influence among extremist groups in the region, such as Hamas in Gaza and Hezbollah in Lebanon. This situation may potentially escalate in the future to violent events which may affect Israel and us. Any major hostilities involving Israel, including as a result of the military conflicts between the Fatah and Hamas in Gaza

Strip, Judea and Samaria, or the interruption or curtailment of trade between Israel and its present trading partners could have a material adverse effect on our business, operating results and financial condition.

Table of Contents

In addition to the foregoing, since the end of 2010, numerous acts of protest and civil unrest have taken place in several countries in the Middle East and North Africa, many of which involved significant violence. The civil unrest in Egypt, which borders Israel, resulted in significant changes to the country's government. In Syria, also bordering Israel, large and violent protests against the government are taking place. The ultimate effect of these developments on the political and security situation in the Middle East and on Israel's position within the region is not clear at this time.

Service of process and enforcement of civil liabilities on us and our officers may be difficult to obtain.

We are organized under the laws of the State of Delaware and will be subject to service of process in the United States. However, approximately 26.9% of our assets are located outside the United States. In addition, two of our directors and some of our executive officers are residents of Israel and a portion of the assets of such directors and executive officers are located outside the United States.

There is doubt as to the enforceability of civil liabilities under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, in original actions instituted in Israel. As a result, it may not be possible for investors to enforce or effect service of process upon these directors and executive officers or to judgments of U.S. courts predicated upon the civil liability provisions of U.S. laws against our assets, as well as the assets of these directors and executive officers. In addition, awards of punitive damages in actions brought in the U.S. or elsewhere may be unenforceable in Israel.

Exchange rate fluctuations between the U.S. dollar and the Israeli NIS may negatively affect our earnings.

Although a substantial majority of our revenues and a substantial portion of our expenses are denominated in U.S. dollars, a portion of our costs, including personnel and facilities-related expenses, is incurred in New Israeli Shekels (NIS). Inflation in Israel will have the effect of increasing the dollar cost of our operations in Israel, unless it is offset on a timely basis by a devaluation of the NIS relative to the dollar. In 2012, the inflation-adjusted NIS appreciated against the dollar.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our primary executive offices are located in FAAC's offices, consisting of approximately 17,300 square feet of office and warehouse space in Ann Arbor, Michigan, pursuant to a lease expiring in July 2018. FAAC has also leased 17,200 square feet of office and warehouse space adjacent to our main offices pursuant to a lease beginning in June 2006 and expiring in July 2017. Additionally, pursuant to a lease expiring in October 2014, FAAC is leasing approximately 10,000 square feet of office and lab space in Orlando, Florida. FAAC also leases approximately 6,900 square feet in Royal Oak, Michigan pursuant to a lease terminating in April 2014.

In August 2011, FAAC purchased 40,000 square feet of office and warehouse space in Ann Arbor, Michigan, approximately three miles from its current location, where it began to consolidate certain of its operations beginning in 2011. Subsequently, in December 2012, FAAC leased 7,000 square feet of surplus space of the purchased building to a non-profit organization as office space for a term of 10 years with an option to terminate the lease at any time after May 2018 with a one year prior notice given at any time after May 2017.

EFB operates out of our leased Auburn, Alabama facilities, constituting approximately 30,000 square feet, which is leased from the City of Auburn through January, 2014.

Table of Contents

Our management and administrative facilities and research, development and production facilities for the manufacture and assembly of our Survivor Locator Lights, constituting approximately 21,000 square feet, are located in Beit Shemesh, Israel, located between Jerusalem and Tel-Aviv (within Israel's pre-1967 borders). The lease for these facilities in Israel expires on December 31, 2017; we have the ability to terminate the lease upon three months' written notice at the end of November 2013. Most of the members of our senior management, including our Chief Executive Officer and our President, work extensively out of our Beit Shemesh facility. Our Chief Financial Officer works out of our Ann Arbor, Michigan facility.

Our Epsilor-EFL subsidiary rents approximately 23,000 square feet of factory, office and warehouse space in Dimona, Israel, in Israel's Negev desert (within Israel's pre-1967 borders), on a month-to-month basis.

In March 2007, we purchased 16,700 square feet of space for the now discontinued Armor Division in Auburn, Alabama for approximately $1.1 million pursuant to a seller-financed secured purchase money mortgage. Half of the mortgage is payable over ten years in equal monthly installments based on a 20-year amortization of the full principal amount, and the remaining half is payable at the end of ten years in a balloon payment. The building is currently leased to a third party and has been listed for sale with a local real estate agent. Additionally, the carrying value of this property was written down to zero as part of the 2011 Armor Division impairment.

We believe that our existing and currently planned facilities are adequate to meet our current and foreseeable future needs.

ITEM 3. LEGAL PROCEEDINGS

As of the date of this filing, there were no material pending legal proceedings against us, and there were no material legal proceedings active against us during 2012.

ITEM 4. MINE SAFETY DISCLOSURES

None.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is traded on the Nasdaq Global Market. Our Nasdaq ticker symbol is "ARTX." The following table sets forth, for the periods indicated, the range of high and low sales prices of our common stock on the Nasdaq Global Market System:

Year Ended December 31, 2012	High	Low
Fourth Quarter	$ 1.18	$ 0.90
Third Quarter	$ 1.00	$ 0.71
Second Quarter	$ 1.30	$ 0.85
First Quarter	$ 1.39	$ 1.11
Year Ended December 31, 2011	**High**	**Low**
Fourth Quarter	$ 1.64	$ 1.11
Third Quarter	$ 2.24	$ 1.31
Second Quarter	$ 2.47	$ 1.18
First Quarter	$ 1.74	$ 1.29

As of February 28, 2013 we had approximately 169 holders of record of our common stock.

Share Repurchase Program

In February of 2009, we authorized the repurchase in the open market or in privately negotiated transactions of up to $1.0 million of our common stock. Pursuant to this plan, through December 31, 2012 we have repurchased 638,611 shares of our common stock for $869,931 ($857,018 net of commissions), all of which was purchased after April 1, 2009. We did not repurchase any shares during 2012.

The repurchase program is subject to management's discretion.

Dividends

We have never paid any cash dividends on our common stock. The Board of Directors presently intends to retain all earnings for use in our business. Any future determination as to payment of dividends will depend upon our financial condition and results of operations and such other factors as the Board of Directors deems relevant. Additionally, our ability to declare dividends should we decide to do so is restricted by the terms of our debt agreements.

Annual Stockholders Meeting

We held our 2012 Annual Meeting of Stockholders on August 13, 2012. Our 2013 Annual Meeting of Stockholders will be held on Monday, June 24, 2013 commencing at 9:00 a.m., eastern daylight time, by webcast.

In light of the foregoing and in accordance with Rules 14a-5(f) and 14a-8(e)(2) under the Securities Exchange Act of 1934, as amended, we will consider stockholder proposals submitted in connection with our 2013 Annual Meeting to have been submitted in a timely fashion if such proposals are received by us at our principal offices no later than April 15, 2013. If a proposal is received after April 15, 2013, the proxies designated by the Board of Directors of the Company will have discretionary authority to vote on the proposal under circumstances consistent with the proxy rules of the Securities and Exchange Commission.

We expect to mail our Notice of Annual Meeting and Notice of Internet Availability of Proxy Materials, containing links to our Annual Report to Stockholders for the year ended December 31, 2012 and our Proxy Statement for the 2013 Annual Meeting, on or about May 14, 2013.

ITEM 6. SELECTED FINANCIAL DATA

Not applicable.

Table of Contents

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve inherent risks and uncertainties. When used in this discussion, the words "believes," "anticipated," "expects," "estimates" and similar expressions are intended to identify such forward-looking statements. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those projected. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly release the result of any revisions to these forward-looking statements that may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors including, but not limited to, those set forth elsewhere in this report. Please see "Risk Factors," above, and in our other filings with the Securities and Exchange Commission.

The following discussion and analysis should be read in conjunction with the Consolidated Financial Statements contained in Item 8 of this report, and the notes thereto. We have rounded amounts reported here to the nearest thousand, unless such amounts are more than $1.0 million, in which event we have rounded such amounts to the nearest hundred thousand.

General

We are a defense and security products and services company, engaged in two business areas: interactive simulation for military, law enforcement and commercial markets; and batteries and charging systems for the military. We operate in two business units:

× ¨ ¨ We develop, manufacture and market advanced high-tech multimedia and interactive digital solutions for use-of-force training and driving training of military, law enforcement, security and other personnel (our ***Training and Simulation Division***); and

× ¨ ¨ We manufacture and sell lithium and Zinc-Air batteries for defense and security products, including our Soldier Wearable Integrated Power Equipment System (SWIPES)™ power hubs, and other military applications (our ***Battery and Power Systems Division***).

Between 2002 and December 2011, we were also engaged in utilizing advanced engineering concepts to manufacture military and paramilitary armored vehicles, and employing sophisticated lightweight materials to produce aviation armor, through our Armor Division. In December 2011, our Board of Directors approved management's plan to sell our Armor Division in order to focus on the more profitable and growth-oriented aspects of our business. We completed the sale of our Armor Division in June 2012.

The discontinuation of the Armor Division for accounting purposes resulted in a one-time, pre-tax charge during the fourth quarter of 2011 of approximately $3.9 million, reflecting an impairment of goodwill and intangibles ($1.8 million), an impairment of other long-lived assets ($1.5 million), a write-off of a joint venture investment ($269,000), and costs associated with change of control provisions and other non-statutory severance expenses ($302,000). Almost all these charges are non-cash impacting items. In 2012, an additional pre-tax adjustment of approximately $829,000 was recorded to reflect a loss upon the sale.

Critical Accounting Policies

The preparation of financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, allowance for bad debts, stock compensation, taxes, inventory, contingencies and deferred warranty revenue, impairment of intangible assets and goodwill. We base our estimates and judgments on historical experience and on various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Under different assumptions or conditions, actual results may differ from these estimates.

Table of Contents

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Revenue Recognition

Significant management judgments and estimates must be made and used in connection with the recognition of revenue in any accounting period. Material differences in the amount of revenue in any given period may result if these judgments or estimates prove to be incorrect or if management's estimates change on the basis of development of the business or market conditions. Management judgments and estimates have been applied consistently and have been reliable historically.

A portion of our revenue is derived from license agreements that entail the customization of FAAC's simulators to the customer's specific requirements. Revenues from initial license fees for such arrangements are recognized in accordance with FASB ASC 605-35 based on the percentage of completion method over the period from signing of the license through to customer acceptance, as such simulators require significant modification or customization that takes time to complete. The percentage of completion is measured by monitoring progress using records of actual time incurred to date in the project compared with the total estimated project requirement, which corresponds to the costs related to earned revenues. Estimates of total project requirements are based on prior experience of customization, delivery and acceptance of the same or similar technology and are reviewed and updated regularly by management.

We believe that the use of the percentage of completion method is appropriate as we have the ability to make reasonably dependable estimates of the extent of progress towards completion, contract revenues and contract costs. In addition, contracts executed include provisions that clearly specify the enforceable rights regarding services to be provided and received by the parties to the contracts, the consideration to be exchanged and the manner and terms of settlement. In all cases we expect to perform our contractual obligations and our licensees are expected to satisfy their obligations under the contract. The complexity of the estimation process and the issues related to the assumptions, risks and uncertainties inherent with the application of the percentage of completion method of accounting affect the amounts of revenue and related expenses reported in our consolidated financial statements. A number of internal and external factors can affect our estimates, including labor rates, utilization and specification and testing requirement changes.

We account for our other revenues from IES simulators in accordance with the provisions of FASB ASC 985-605. We exercise judgment and use estimates in connection with the determination of the amount of software license and services revenues to be recognized in each accounting period.

Stock Based Compensation

We account for stock options and awards issued to employees in accordance with the fair value recognition provisions of FASB ASC 505-50. Under FASB ASC 505-50, stock-based awards to employees are required to be recognized as compensation expense, based on the calculated fair value on the date of grant. We determine the fair value of options using the Black Scholes option pricing model. This model requires subjective assumptions, including future stock price volatility and expected term, which affect the calculated values.

Allowance for Doubtful Accounts

We make judgments as to our ability to collect outstanding receivables and provide allowances for the portion of receivables when collection becomes doubtful. Provisions are made based upon a specific review of all significant outstanding receivables. In determining the provision, we analyze our historical collection experience and current economic trends. We reassess these allowances each accounting period. Historically, our actual losses and credits have been consistent with these provisions. If actual payment experience with our customers is different than our estimates, adjustments to these allowances may be necessary resulting in additional charges to our statement of operations.

Table of Contents

Accounting for Income Taxes

Significant judgment is required in determining our worldwide income tax expense provision. In the ordinary course of a global business, there are many transactions and calculations where the ultimate tax outcome is uncertain. Some of these uncertainties arise as a consequence of cost reimbursement arrangements among related entities, the process of identifying items of revenue and expense that qualify for preferential tax treatment and segregation of foreign and domestic income and expense to avoid double taxation. Although we believe that our estimates are reasonable, the final tax outcome of these matters may be different than that which is reflected in our historical income tax provisions and accruals.

We have provided a valuation allowance on our net deferred tax assets, which includes federal and foreign net operating loss carryforwards, because of the uncertainty regarding their realization. Our accounting for deferred taxes under FASB ASC 740-10, involves the evaluation of a number of factors concerning the realizability of our deferred tax assets. In concluding that a valuation allowance was required, we primarily considered such factors as our history of operating losses and expected future losses in certain jurisdictions and the nature of our deferred tax assets. We provide valuation allowances in respect of deferred tax assets resulting principally from the carryforward of tax losses. Management currently believes that it is more likely than not that our deferred tax assets in the U.S. and Israel will not be realized in the foreseeable future. We do not provide for U.S. federal income taxes on the undistributed earnings of our foreign subsidiaries because such earnings are re-invested and, in the opinion of management, will continue to be re-invested indefinitely.

We have indefinitely-lived intangible assets consisting of trademarks and goodwill. Pursuant to FASB ASC 350-10, these indefinitely-lived intangible assets are not amortized for financial reporting purposes. However, these assets are tax deductible, and therefore amortized over 15 years for tax purposes. As such, deferred income tax expense and a deferred tax liability arise as a result of the tax-deductibility of these indefinitely-lived intangible assets. The resulting deferred tax liability, which is expected to continue to increase over time, will have an indefinite life, resulting in what is referred to as a “naked tax credit.” This deferred tax liability could remain on our balance sheet indefinitely for continuing operations unless there is an impairment of the related assets (for financial reporting purposes), or the business to which those assets relate were to be disposed of.

Due to the fact that the aforementioned deferred tax liability could have an indefinite life, it should not be netted against our deferred tax assets (which primarily relate to net operating loss carryforwards) when determining the required valuation allowance. Doing so would result in the understatement of the valuation allowance and related deferred income tax expense.

We have adopted the provisions of the FASB ASC 740-10. FASB ASC 740-10 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken in a tax return. We must determine whether it is “more-likely-than-not” that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets the more-likely-than-not recognition threshold, the position is measured to determine the amount of benefit to recognize in the financial statements. Uncertain tax positions require determinations and estimated liabilities to be made based on provisions of the tax law which may be subject to change or varying interpretation. If our determinations and estimates prove to be inaccurate, the resulting adjustments could be material to our future financial statements.

In addition, we operate within multiple taxing jurisdictions and may be subject to audits in these jurisdictions. These audits can involve complex issues that may require an extended period of time for resolution. In management’s opinion, adequate provisions for income taxes have been made.

Table of Contents

Inventories

Our policy for valuation of inventory and commitments to purchase inventory, including the determination of obsolete or excess inventory, requires us to perform a detailed assessment of inventory at each balance sheet date, which includes a review of, among other factors, an estimate of future demand for products within specific time horizons, valuation of existing inventory, as well as product lifecycle and product development plans. The estimates of future demand that we use in the valuation of inventory are the basis for our revenue forecast, which is also used for our short-term manufacturing plans. Inventory reserves are also provided to cover risks arising from slow-moving items. We write down our inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based on assumptions about future demand and market conditions. We may be required to record additional inventory write-down if actual market conditions are less favorable than those projected by our management. For fiscal 2012, no significant changes were made to the underlying assumptions related to estimates of inventory valuation or the methodology applied.

Goodwill

As of December 31, 2012, we had recorded goodwill of $30.6 million (subsequent to the 2011 goodwill impairment in the amount of $1.8 million in connection with our decision to reflect the operations of the Armor Division as discontinued, referred to below). We allocate goodwill acquired in a business combination to the appropriate reporting unit as of the acquisition date. Currently our reporting units are also our reportable segments and the associated goodwill was determined when the specific businesses in the reportable segments were purchased. Under FASB ASC 350-10, goodwill and intangible assets deemed to have indefinite lives are no longer amortized but are subject to annual impairment tests, and tests between annual tests in certain circumstances, based on estimated fair value in accordance with FASB ASC 350-10, and written down when impaired.

In September 2011, the FASB issued ASU No. 2011-08, "Intangibles – Goodwill and Other (Topic 350): Testing Goodwill for Impairment." ASU 2011-08 amends the guidance in Accounting Standards Codification ASC 350-10. Under the revised guidance, when testing goodwill for impairment we have the option of performing a qualitative assessment before calculating the fair value of a reporting unit. If we determine, on the basis of qualitative factors, that it is more likely than not that the fair value of the reporting unit is greater than the carrying amount, the two-step impairment test would not be required. If we cannot determine on the basis of qualitative factors that goodwill is not impaired, goodwill is then tested for impairment by using a discounted cash flow analysis. This type of analysis requires us to make assumptions and estimates regarding industry economic factors and the profitability of future business strategies. Significant estimates used in the methodologies include estimates of future cash flows, future short-term and long-term growth rates, weighted average cost of capital and estimates of market multiples for the reportable units. It is our policy to conduct impairment testing based on our current business strategy in light of present industry and economic conditions, as well as future expectations. In assessing the recoverability of our goodwill, we may be required to make assumptions regarding estimated future cash flows and other factors to determine the fair value of the respective assets. This process is subjective and requires judgment at many points throughout the analysis. If our estimates or their related assumptions change in subsequent periods or if actual cash flows are below our estimates, we may be required to record impairment charges for these assets not previously recorded.

We completed our annual goodwill impairment review using the financial results as of the quarter ended June 30, 2012 along with our forecasted plan developed in the fourth quarter. We use a June 30 date because this allows us to use internal resources that are available before we start our annual audit process (we wait until our June 30 financials were reviewed by our external auditors before we start the actual goodwill impairment analysis). In both 2012 and 2011, we determined, using qualitative factors, that the Training and Simulation goodwill was not impaired. In both 2012 and 2011, we completed the first step of the quantitative analysis of the goodwill in the Battery and Power Systems reporting unit, in which we computed a fair value of that reporting unit. Because the fair value was greater than the carrying value of the unit at the measurement date, the second step of the quantitative impairment assessment was not required and no goodwill was impaired. Although the valuation for Battery and Power Systems Division exceeded the reporting unit's carrying value by 14%, we will continue to monitor the actual results of the reporting unit versus the forecast used for the impairment review and re-evaluate the goodwill as required.

Table of Contents

Subsequent to our 2011 annual goodwill impairment review, in December 2011, in connection with our decision to sell our Armor Division and to reflect the operations of the Armor Division as discontinued, we identified an impairment of goodwill and other intangible assets identified with the Armor Division and, as a result, we recorded a goodwill impairment charge in the amount of $1.8 million during the fourth quarter of 2011.

Although the cumulative carrying value of our reporting units included in continuing operations exceeded our market value as of the impairment review, management nevertheless determined that the fair value of the respective reporting units exceeded their respective carrying values, and therefore, there would be no impairment charges relating to goodwill. Several factors contributed to this determination:

- The long term horizon of the valuation process versus a short term valuation using current market conditions;
- The valuation by individual business segments versus the market share value based on our company as a whole;
- The fact that our stock is thinly traded and widely dispersed with minimal institutional ownership, and thus not followed by major market analysts, leading management to conclude that the market in our securities was not acting as an informationally efficient reflection of all known information regarding us; and
- Control premiums reflected in the reporting unit fair values but not in our stock price.

In view of the above factors, management felt that in the current market our stock was undervalued, especially when compared to the estimated future cash flows of the underlying entities.

Other Intangible Assets

Other intangible assets are amortized to the Statement of Operations over the period during which benefits are expected to accrue, currently estimated at one to ten years.

The determination of the value of such intangible assets requires us to make assumptions regarding future business conditions and operating results in order to estimate future cash flows and other factors to determine the fair value of the respective assets. If these estimates or the related assumptions change in the future, we could be required to record additional impairment charges.

Contingencies

We are from time to time involved in legal proceedings and other claims. We are required to assess the likelihood of any adverse judgments or outcomes to these matters, as well as potential ranges of probable losses. We have not made any material changes in the accounting methodology used to establish our self-insured liabilities during the past three fiscal years.

A determination of the amount of reserves required, if any, for any contingencies are made after careful analysis of each individual issue. The required reserves may change due to future developments in each matter or changes in approach, such as a change in the settlement strategy in dealing with any contingencies, which may result in higher net loss.

If actual results are not consistent with our assumptions and judgments, we may be exposed to gains or losses that could be material.

Table of Contents

Warranty Reserves

Upon shipment of products to our customers, we defer revenue for the estimated cost to repair or replace products along with the appropriate margin for goods that may be returned under warranty. Our warranty period is typically twelve months from the date of shipment to the end user customer. For existing products, the deferred revenue is estimated based on actual historical experience. For new products, the warranty deferred revenue is based on historical experience of similar products until such time as sufficient historical data has been collected on the new product. Factors that may impact our warranty costs in the future include our reliance on our contract manufacturer to provide quality products and the fact that our products are complex and may contain undetected defects, errors or failures in either the hardware or the software.

Functional Currency

We consider the United States dollar to be the currency of the primary economic environment in which we and EFL operate and, therefore, both we and EFL have adopted and are using the United States dollar as our functional currency. Transactions and balances originally denominated in U.S. dollars are presented at the original amounts. Gains and losses arising from non-dollar transactions and balances are included in net income.

The majority of financial transactions of Epsilor is in New Israeli Shekels ("NIS") and a substantial portion of Epsilor's costs is incurred in NIS. Management believes that the NIS is the functional currency of Epsilor. Accordingly, the financial statements of Epsilor have been translated into U.S. dollars. All balance sheet accounts have been translated using the exchange rates in effect at the balance sheet date. Statement of operations amounts have been translated using the average exchange rate for the period. The resulting translation adjustments are reported as a component of accumulated other comprehensive loss in stockholders' equity.

Executive Summary

Overview of Results of Operations

We incurred operating losses for the years ended December 31, 2012 and 2011. While we expect to continue to derive revenues from the sale of products that we manufacture and the services that we provide, there can be no assurance that we will be able to achieve or maintain profitability on a consistent basis.

A portion of our operating loss during 2012 and 2011 arose as a result of non-cash and impairment charges. These charges were primarily related to our prior acquisitions, financings and stock-based awards to employees. To the extent that we continue certain of these activities during 2013, we would expect to continue to incur such non-cash charges in the future.

Acquisitions

In acquisition of subsidiaries, part of the purchase price is allocated to intangible assets and goodwill. Amortization of intangible assets related to acquisition of subsidiaries is recorded based on the estimated expected life of the assets. Accordingly, for a period of time following an acquisition, we incur a non-cash charge related to amortization of intangible assets in the amount of a fraction (based on the useful life of the intangible assets) of the amount recorded as intangible assets. Such amortization charges continued during 2012. We are required to review intangible assets for impairment whenever events or changes in circumstances indicate that carrying amount of the assets may not be recoverable. If we determine, through the impairment review process, that an intangible asset has been impaired, we must record the impairment charge in our statement of operations.

In the case of goodwill, the assets recorded as goodwill are not amortized; instead, we are required to perform an annual impairment review. If we determine, through the impairment review process, that goodwill has been impaired, we must record the impairment charge in our statement of operations.

We incurred non-cash charges for amortization of intangible assets in 2012 and 2011 in the amount of $1.2 million and $1.9 million, respectively. In addition, we incurred non-cash charges in discontinued operations for impairment of goodwill and other intangible assets in the amount of $1.8 million during 2011 in respect of our Armor Division. See "Critical Accounting Policies – Goodwill," above.

Table of Contents

FINANCINGS AND ISSUANCES OF RESTRICTED SHARES, RESTRICTED STOCK UNITS, OPTIONS AND WARRANTS

The non-cash charges that relate to our financings occurred in connection with our issuance of convertible debt securities with detachable warrants. When we issued convertible securities, we recorded a discount (representing the value of the detachable warrants and the derivative features of the debt) that was amortized ratably over the life of the debenture. When a debenture is converted, however, the entire remaining unamortized discount was immediately recognized as expense in the quarter in which the debenture was converted. During 2012 and 2011, we recorded credits of approximately zero and $161,000, respectively, attributable to debt discount amortization.

During 2012 and 2011, we issued restricted shares and restricted stock units to certain of our employees and to our directors. Each restricted stock unit is equal to one share of Company stock and is redeemable only for stock. These shares were issued as stock bonuses or were the required annual grant to directors, and are restricted for a period of up to three years from the date of issuance. Relevant accounting rules provide that the aggregate amount of the difference between the purchase price of the restricted shares or restricted stock units (in this case, generally zero) and the market price of the shares on the date of grant is taken as a general and administrative expense, amortized over the life of the period of the restriction.

We incurred non-cash charges related to stock-based compensation in 2012 and 2011 in the amount of $448,000 and $408,000, respectively.

During the third quarter of 2008 and pursuant to the terms of a Securities Purchase Agreement dated August 14, 2008, we issued and sold to a group of institutional investors 10% senior convertible notes in the aggregate principal amount of $5.0 million due August 15, 2011. These notes were convertible at any time prior to August 15, 2011 at a conversion price of $2.24 per share.

As part of the securities purchase agreement, we issued to the purchasers of our 10% senior convertible notes due August 15, 2011, warrants to purchase an aggregate of 558,036 shares of common stock at any time prior to August 15, 2011 at a price of $2.24 per share. Due to certain exercise price reset provisions, the warrants were accounted for as liabilities at fair value with changes in fair value reflected as financial income or expense amounting to $161,000 of income in 2011 through the date such warrants expired unexercised.

Overview of Operating Performance and Backlog

Overall, our pre-tax loss from continuing operations for 2012 was $1.4 million on revenues of $80.1 million, compared to a pre-tax loss of $3.4 million on revenues of $62.1 million during 2011. As of December 31, 2012, our overall backlog for continuing operations totaled $87.7 million.

In our Training and Simulation Division, revenues increased from approximately $42.9 million in 2011 to $59.3 million in 2012. As of December 31, 2012, our backlog for our Training and Simulation Division totaled $72.4 million.

In our Battery and Power Systems Division, revenues increased from approximately $19.3 million in 2011 to approximately $20.8 million in 2012. As of December 31, 2012, our backlog for our Battery and Power Systems Division totaled $15.3 million.

Common Stock Repurchase Program

In February 2009, we authorized the repurchase in the open market or in privately negotiated transactions of up to $1.0 million of our common stock. Pursuant to this plan, through December 31, 2012 we have repurchased 638,611 shares of our common stock for $869,931 ($857,018 net of commissions), all of which was purchased after April 1, 2009. At December 31, 2012, we had remaining authorization for the repurchase of up to $142,982 in shares of our common stock. The repurchase program, which expires on August 13, 2013, is subject to the discretion of our management.

Results of Operations

Results exclude the operations of the Armor Division, which we reflect as discontinued.

Table of Contents

Summary

Following is a table summarizing our results of continuing operations for the years ended December 31, 2012 and 2011, after which we present a narrative discussion and analysis:

	Year Ended December 31, 2012	Year Ended December 31, 2011
Revenues:		
Training and Simulation Division	$ 59,270,768	$ 42,881,573
Battery and Power Systems Division	20,779,666	19,254,005
	$ 80,050,434	$ 62,135,578
Cost of revenues:		
Training and Simulation Division	$ 44,822,270	$ 29,715,897
Battery and Power Systems Division	17,318,768	16,235,033
	$ 62,141,038	$ 45,950,930
Research and development expenses:		
Training and Simulation Division	$ 698,349	$ 819,879
Battery and Power Systems Division	1,345,369	581,989
	$ 2,043,718	$ 1,401,868
Selling and marketing expenses:		
Training and Simulation Division	$ 4,513,244	$ 4,399,952
Battery and Power Systems Division	974,666	854,939
	$ 5,487,910	$ 5,254,891
General and administrative expenses:		
Training and Simulation Division	$ 3,456,873	$ 3,844,279
Battery and Power Systems Division	946,727	1,211,114
Corporate	5,649,165	5,622,462

Table of Contents

Fiscal Year 2012 compared to Fiscal Year 2011

Revenues. During 2012, we (through our subsidiaries) recognized revenues as follows:

× ¨ ¨ **Training and Simulation Division** - FAAC, IES and RTI recognized revenues from the sale of military operations and vehicle simulators, interactive use-of-force training systems and from the provision of maintenance services in connection with such systems.

× ¨ ¨ **Battery and Power Systems Division** - EFB and Epsilor-EFL recognized revenues from the sale of batteries, chargers, adapters and power hub products to the military and commercial customers, and under certain development contracts with the U.S. Army.

× ¨ ¨ **Battery and Power Systems Division** - Epsilor-EFL also recognized revenues from the sale of water-activated battery (WAB) lifejacket lights.

Revenues for continuing operations for 2012 totaled $80.1 million, compared to $62.1 million in 2011, an increase of $18.0 million, or 28.8%. This increase was primarily attributable to the following factors:

× ¨ ¨ Increased revenues from our Training and Simulation Division ($16.4 million more in 2012 versus 2011), due primarily to revenue in 2012 related to a major new contract (VCTS).

× ¨ ¨ Increased revenues from our Battery and Power Systems Division ($1.5 million more in 2012 versus 2011), due to an increase of $3.2 million in U.S. sales of SWIPES™, partially offset by a $1.3 million decrease in Israeli sales.

The table below details the percentage of total recognized revenue by type of arrangement for the years ended December 31, 2012 and 2011:

	Year Ended December 31,	
Type of Revenue	**2012**	**2011**
Sale of products	96.0%	93.8%
Maintenance and support agreements	2.8%	4.3%
Long term research and development contracts	1.2%	1.9%
Total	100.0%	100.0%

Cost of revenues. Cost of revenues totaled $62.1 million during 2012, compared to $46.0 million in 2011, an increase of $16.1 million, or 35.2%, due primarily to increased revenues in our Training and Simulation Division and the higher costs associated with the new VCTS contract, as well as increased sales in the U.S. of the SWIPES™ system. Cost of revenues as a percentage of revenue remained essentially flat in our Battery and Power Systems Division but increased in our Training and Simulation Division due primarily to the product mix and the VCTS contract.

Research and development expenses. Research and development expenses for 2012 were $2.0 million, compared to $1.4 million during 2011, an increase of $642,000, or 45.8%, due primarily to increased spending in the Battery and Power Systems Division for continuing research on the SWIPES™ system, offset by a small reduction of expenses in the Training and Simulation Division.

Table of Contents

Selling and marketing expenses. Selling and marketing expenses for 2012 were $5.5 million, compared to $5.3 million in 2011, an increase of $233,000, or 4.4%, due primarily to an increase in the sales force and increases in the demonstration of new products to the military in the Battery and Power Systems Division.

General and administrative expenses. General and administrative expenses for 2012 were $10.1 million, compared to $10.7 million in 2011, a decrease of $625,000, or 5.9%. This decrease was primarily attributable to reductions in corporate and division compensation of $568,000 and a $128,000 reduction in legal expense compared to 2011.

Amortization of intangible assets. Amortization of intangible assets totaled $1.2 million in 2012, compared to $1.9 million in 2011, a decrease of $720,000, or 37.8%, due primarily to decreased charges for fully amortized capitalized software in our Training and Simulation Division.

Financial expenses, net. Financial expense totaled $548,000 in 2012, compared to financial expense of 331,000 in 2011, an increase of $217,000, or 65.6%, due primarily to an increase in corporate interest and bank charges of $239,000 along with a $161,000 decrease in credits recorded in 2011 for warrants. The expense increase was offset by a foreign currency adjustment of $(345,000).

Income taxes. With respect to some of our subsidiaries that generated net income during 2012, we were able to offset federal taxes against our accumulated loss carry forward. We recorded $628,000 in tax expense in 2012, compared to $1.6 million in tax expense in 2011, a decrease of $980,000, or 61.0%, mainly concerning state and local taxes and taxes in Israel along with “naked” credits (“naked” credits occur when deferred tax liabilities that are created by indefinite-lived assets such as goodwill cannot be used as a source of taxable income to support the realization of deferred tax assets). This amount includes the required adjustment of taxes due to the deduction of goodwill “naked” credits for U.S. federal taxes, which totaled $599,000 and $1.0 million respectively, in non-cash expenses in 2012 and 2011.

Net loss. Due to the factors cited above, net loss from continuing operations was reduced to $2.0 million in 2012 from $5.0 million in 2011, a difference of $3.0 million.

Discontinued Operations. As cited above, we have discontinued our Armor Division (see Note 1.d. of the Notes to the Consolidated Financial Statements), which generated a net loss of $988,000 2012. During 2012, we had incurred additional expenses related to the sale of the Armor Division. Almost all of these charges are non-cash impacting items.

Liquidity and Capital Resources

As of December 31, 2012, we had $1.6 million in cash and $186,000 in restricted collateral deposits, as compared to December 31, 2011, when we had $2.3 million in cash and $1.7 million in restricted collateral deposits. We also had $380,000 in available, unused bank lines of credit with our main bank as of December 31, 2012, under a $10.0 million credit facility under our FAAC subsidiary, which is secured by our assets and the assets of our other subsidiaries and guaranteed by us.

Effective April 30, 2012, we and FAAC entered into an agreement with a different primary bank that has provided us with a replacement $10.0 million credit facility under our FAAC subsidiary, which is secured by Arotech assets and the assets of our other domestic subsidiaries and guaranteed by Arotech and our other domestic subsidiaries, at a rate of LIBOR plus 375 basis points. This credit facility was scheduled to expire May 2013. The new 2012 credit agreement contains certain covenants, including minimum Earnings Before Interest, Taxes, Depreciation and Amortization (“EBITDA”), quarterly Maximum Increase in Net Advance to Affiliates of less than 90% of EBITDA and an annual Fixed Charge Coverage Ratio of not less than 1.1 to 1.0. At the end of 2012 and as of the filing date of this report, we met all required current covenants. In February 2013, to support our growth, our primary bank increased our credit line by 50%, from $10 million to $15 million, and the expiration of the credit line was extended to May 31, 2015. The new credit agreement carries an interest rate of 30 day LIBOR plus 375 basis points and an unused line of credit fee of 0.35%. The new credit agreement also contains certain covenants, which are measured on a rolling twelve-month basis, limiting the Maximum Increase in Net Advance to Affiliates to less than 90% of EBITDA in 2013 and meeting a Fixed Charge Coverage Ratio of not less than 1.1 to 1.0.

Table of Contents

We used available funds in 2012 primarily for sales and marketing, continued research and development expenditures, and other working capital needs. We purchased approximately $950,000 of property and equipment during 2012. Our net property and equipment amounted to $4.5 million as of December 31, 2012.

Net cash used in operating activities for 2012 and 2011 was $4.4 million and $5.8 million, respectively, a net change in usage of $1.4 million. This difference was due primarily to the increased working capital funding requirements for our major projects at both the Simulation and Training Division (VCTS) and Battery and Power Systems Division (SWIPES™). The timing of cash inflows and outflows has impacted us due to the substantial purchases of products to fulfill these contracts. Additionally, the increases in working capital were offset by a decrease in the net loss from continuing operations of $2.9 million. Net cash used in operating activities has been impacted by a significant increase in unbilled receivables.

Net cash provided by (used in) investing activities for 2012 and 2011 was $371,000 and $(2.7) million, a net change of $3.1 million. This difference was due primarily to the release of $1.6 million in restricted funds due to the completion of a significant contract by the Training and Simulation Division along with a reduction of $1.7 million in property and equipment purchases. This was offset by a redemption of available for sale securities of $399,000 recorded in 2011.

Net cash provided by financing activities for 2012 and 2011 was $3.5 million and $4.6 million, respectively, a change of $1.1 million. This difference was due primarily to changes in short term borrowing under our primary line of credit to support the timing differences associated with our major projects at the Training and Simulation Division and the Battery and Power Systems Division.

As of December 31, 2012, we had approximately $9.8 million in short-term bank debt and $1.9 million in long-term debt outstanding for continuing operations, including current maturities, as compared to December 31, 2011, when we had approximately $6.6 million in short-term bank debt and $1.0 million in long-term debt outstanding for continuing operations, including current maturities.

Subject to all of the reservations regarding “forward-looking statements” set forth above, we believe that our present cash position, anticipated cash flows from operations and availability under our lines of credit should be sufficient to satisfy our current estimated cash requirements through the remainder of 2013. In this connection, we note that from time to time our working capital needs are partially dependent on our subsidiaries’ lines of credit.

Over the long term, we will need to be profitable, at least on a cash-flow basis, and maintain that profitability in order to avoid future capital infusions. Additionally, we would need to raise additional capital or sell assets in order to fund any future acquisitions.

Effective Corporate Tax Rate

We and certain of our subsidiaries incurred net operating losses during the years ended December 31, 2012 and 2011. With respect to some of our U.S. subsidiaries that operated at a net profit during 2012, we were able to offset federal taxes against our net operating loss carryforward. These subsidiaries are, however, subject to state taxes that cannot be offset against our net operating loss carryforward. We also set up a tax liability for the impact of the deductions taken for goodwill.

As of December 31, 2012, we had a U.S. net operating loss carryforward of approximately $43.3 million that is available to offset future taxable income under certain circumstances, expiring primarily from 2020 through 2032, and foreign net operating and capital loss carryforwards of approximately $85.4 million, which are available indefinitely to offset future taxable income under certain circumstances.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of December 31, 2012, our management, including the principal executive officer and principal financial officer, evaluated our disclosure controls and procedures related to the recording, processing, summarization, and reporting of information in our periodic reports that we file with the SEC. These disclosure controls and procedures are intended to ensure that material information relating to us, including our subsidiaries, is made known to our management, including these officers, by other of our employees, and that this information is recorded, processed, summarized, evaluated, and reported, as applicable, within the time periods specified in the SEC's rules and forms. Due to the inherent limitations of control systems, not all misstatements may be detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Any system of controls and procedures, no matter how well designed and operated, can at best provide only reasonable assurance that the objectives of the system are met and management necessarily is required to apply its judgment in evaluating the cost benefit relationship of possible controls and procedures. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. Our controls and procedures are intended to provide only reasonable, not absolute, assurance that the above objectives have been met.

Based on their evaluation as of December 31, 2012, our principal executive officer and principal financial officer were able to conclude that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) were effective.

We will continue to review and evaluate the design and effectiveness of our disclosure controls and procedures on an ongoing basis and to improve our controls and procedures over time and correct any deficiencies that we may discover in the future. Our goal is to ensure that our senior management has timely access to all material financial and non-financial information concerning our business. While we believe the present design of our disclosure controls and procedures is effective to achieve our goal, future events affecting our business may cause us to modify our disclosure controls and procedures.

Management's Report on Internal Control Over Financial Reporting

Our management, including our principal executive and financial officers, is responsible for establishing and maintaining adequate internal control over our financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our management has evaluated the effectiveness of our internal controls as of the end of the period covered by this Annual Report on Form 10-K for the year ended December 31, 2012. In making our assessment of internal control over financial reporting, management used the criteria set forth by the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission in *Internal Control – Integrated Framework.*

Based on management's assessment and these criteria, our management concluded that our internal control over financial reporting was effective as of December 31, 2012.

This annual report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit us to provide only management's report in this annual report.

Changes in Internal Controls Over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during our last fiscal quarter to which this Annual Report on Form 10-K relates that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

Table of Contents

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Executive Officers, Directors and Significant Employees

Executive Officers and Directors

Our executive officers and directors and their ages as of February 28, 2013 were as follows:

Name	Age	Position
Robert S. Ehrlich	75	Chairman of the Board and Chief Executive Officer
Steven Esses	49	President and Director
Dr. Jay M. Eastman	64	Director
Edward J. Borey	62	Director
Seymour Jones	81	Director
Elliot Sloyer	48	Director
Michael E. Marrus	49	Director
Arthur S. Leibowitz	59	Director
Thomas J. Paup	64	Vice President – Finance and Chief Financial Officer

Our by-laws provide for a board of directors of one or more directors. There are currently seven directors. Under the terms of our certificate of incorporation, the board of directors is composed of three classes of similar size, each elected in a different year, so that only one-third of the board of directors is elected in any single year. Dr. Eastman and Messrs. Esses and Marrus are designated Class I directors and have been elected for a term expiring in 2015 and until their successors are elected and qualified; Prof. Jones and Messrs. Ehrlich and Leibowitz are designated Class II directors elected for a term expiring in 2014 and until their successors are elected and qualified; and Messrs. Borey and Sloyer are designated Class III directors elected for a term that expires in 2013 and until their successors are elected and qualified. A majority of the Board is “independent” under relevant SEC and Nasdaq regulations.

Robert S. Ehrlich has been our Chairman of the Board since January 1993 and our Chief Executive Officer since October 2002. From May 1991 until January 1993, Mr. Ehrlich was our Vice Chairman of the Board, from May 1991 until October 2002 he was our Chief Financial Officer, and from October 2002 until December 2005, Mr. Ehrlich also held the title of President. Mr. Ehrlich was a director of Eldat, Ltd., an Israeli manufacturer of electronic shelf labels, from June 1999 to August 2003. From 1987 to June 2003, Mr. Ehrlich served as a director of PSC Inc. (“PSCX”), a manufacturer and marketer of laser diode bar code scanners, and, between April 1997 and June 2003, Mr. Ehrlich was the chairman of the board of PSCX. Mr. Ehrlich received a B.S. and J.D. from Columbia University in New York, New York.

Mr. Ehrlich has experience as an accountant, an attorney and as an investment banker. He has been involved with public companies since the late 1960s, both as an investment banker and as the chief financial officer and a director of Mattel, where he was instrumental in helping to uncover fraudulent practices in the preparation of certain of that company’s financial statements, and he continued to serve as a director of Mattel through the late 1980s. After leaving Mattel, Mr. Ehrlich founded his own boutique investment banking company and became a director of certain of the companies involved in his investment banking business. Mr. Ehrlich ultimately became the Chairman and CEO of Fresenius USA, Inc. and of PSCX, prior to becoming our Chief Financial Officer in 1991 and our Chief Executive Officer in 2002. We believe that Mr. Ehrlich’s background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Table of Contents

Steven Esses has been a director since July 2002, our Executive Vice President since January 2003, our Chief Operating Officer from February 2003 until February 2012 and our President since December 2005. From 2000 until 2002, Mr. Esses was a principal with Stillwater Capital Partners, Inc., a New York-based investment research and advisory company (hedge fund) specializing in alternative investment strategies. During this time, Mr. Esses also acted as an independent consultant to new and existing businesses in the areas of finance and business development. In 1995, Mr. Esses founded the Dunkin' Donuts franchise in Israel and was its Managing Director and CEO until 2005. Before founding Dunkin' Donuts Israel, Mr. Esses was the Director of Retail Jewelry Franchises with Hamilton Jewelry, and before that he served as Executive Director of Operations for the Conway Organization, a major off-price retailer with 17 locations.

Mr. Esses has been actively involved in the day-to-day management of companies since he was 22, when he co-founded a company that eventually went public. He has worked in retail and wholesale, in high-tech and low-tech, in a variety of industries. Throughout his career, he has been highly numbers-oriented, focusing on budgetary and fiscal matters and on building business value. We believe that Mr. Esses's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Dr. Jay M. Eastman has been one of our directors since October 1993. From 1991 to 2011, Dr. Eastman served as President and Chief Executive Officer of Lucid, Inc., a public company that is developing laser technology applications for medical diagnosis and treatment; since December 2011, Dr. Eastman has served as a director and Chief Science Officer of Lucid. Dr. Eastman served as Senior Vice President of Strategic Planning of PSCX from December 1995 through October 1997. Dr. Eastman is also a director of Dimension Technologies, Inc., a developer and manufacturer of 3D displays for computer and video displays. From 1981 until 1983, Dr. Eastman was the Director of the University of Rochester's Laboratory for Laser Energetics, where he was a member of the staff from 1975 to 1981. Dr. Eastman holds a B.S. and a Ph.D. in Optics from the University of Rochester in New York.

Dr. Eastman brings to our Board the unique perspective of a trained scientist who has also been deeply involved in the business world. Since many of our company's products are of a "high-tech" nature, Dr. Eastman's scientific background is extremely valuable to the Board. Additionally, Dr. Eastman brings to the Board his experiences as Chairman and Chief Executive Officer of a high-tech company, as well as his experience as a director of other public companies. We believe that Dr. Eastman's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Edward J. Borey has been one of our directors since December 2003. From July 2004 until October 2006, Mr. Borey served as Chairman and Chief Executive Officer of WatchGuard Technologies, Inc., a leading provider of network security solutions (NasdaqGM: WGRD). From December 2000 to September 2003, Mr. Borey served as President, Chief Executive Officer and a director of PSCX. Prior to joining PSCX, Mr. Borey was President and CEO of TranSenda (May 2000 to December 2000). Previously, Mr. Borey held senior positions in the automated data collection industry. At Intermec Technologies Corporation (1995-1999), he was Executive Vice President and Chief Operating Officer and also Senior Vice President/General Manager of the Intermec Media subsidiary. Mr. Borey holds a B.S. in Economics from the State University of New York, College of Oswego, an M.A. in Public Administration from the University of Oklahoma, and an M.B.A. in Finance from Santa Clara University.

Mr. Borey has served as the chief executive officer of two public companies and as chief operating officer of one public and one private company, some of which were very active in mergers and acquisitions. He has a wealth of experience in the issues facing public companies and businesses in general, including in turnaround situations, and he has strong experience in marketing in North America, Europe and Asia. His background also includes experience with support and maintenance of military ground vehicles and auxiliary ground vehicles, fixed and rotary aircraft, and simulation for the United States and foreign militaries. We believe that Mr. Borey's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Seymour Jones has been one of our directors since August 2005. Mr. Jones has been a clinical professor of accounting at New York University Stern School of Business since September 1993. Professor Jones teaches courses in accounting, tax, forensic accounting and legal aspects of entrepreneurism. He is also the Associate Director of Ross Institute of Accounting Research at Stern School of Business. His primary research areas include audit committees, auditing, entrepreneurship, financial reporting, and fraud. Professor Jones is the principal author of numerous books including *Conflict of Interest*, *The Coopers & Lybrand Guide to Growing Your Business*, *The Emerging Business* and *The Bankers Guide to Audit Reports and Financial Statements*. From April 1974 to September 1995, Mr. Jones was a senior partner of the accounting firm of Coopers & Lybrand, a legacy firm of PricewaterhouseCoopers LLP ("PwC"). Professor Jones is a certified public accountant in New York State. Professor Jones received a B.A. in economics from City College, City University of New York, and an M.B.A. from NYU Stern.

Mr. Jones brings many years of experience as an audit partner at PwC with extensive financial accounting knowledge that is critical to our board of directors. Mr. Jones's experience with accounting principles, financial reporting rules and regulations, evaluating financial results and generally overseeing the financial reporting process of large public companies from an independent auditor's perspective and as a professor of accounting makes him an invaluable asset to our board of directors. We believe that Mr. Jones's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Elliot Sloyer has served as a director since October 2007. Mr. Sloyer is a Managing Member of WestLane Capital Management, LLC, which he founded in 2005. From 1992 until 2005, Mr. Sloyer was a founder and Managing Director of Harbor Capital Management, LLC, which managed convertible arbitrage portfolios. Mr. Sloyer is active in community organizations and currently serves on the investment committee of a charitable organization. Mr. Sloyer also serves as a director of Trans-Lux Corporation, a designer and manufacturer of digital signage display solutions (OTC: TNLX). Mr. Sloyer has a B.A. from New York University.

Mr. Sloyer's investment advisor experience brings valuable insight to the Board in enabling us to anticipate the reactions and concerns of the investment community. We believe that Mr. Sloyer's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Michael E. Marrus has been one of our directors since October 2007. Since October 2011, Mr. Marrus has been a Managing Director of Dominick & Dominick LLC, one of the oldest, privately-held investment firms in the United States. From 2009 to 2011, Mr. Marrus was a Managing Director of Merriman Curhan Ford, Inc., a financial services firm focused on growth companies. From 1998 to 2009, he was a Managing Director of C.E. Unterberg, Towbin & Co., an investment banking firm that was acquired by Collins Stewart plc. Prior to joining Unterberg, Towbin, Mr. Marrus was a Principal and founding member of Fieldstone Private Capital Group, an investment banking firm specializing in corporate, project and structured finance. Previously, he was employed at Bankers Trust Company, initially in the Private Equity and Merchant Banking Groups and subsequently in BT Securities, the securities affiliate of Bankers Trust. Mr. Marrus has an A.B. from Brown University and an M.B.A. from the Graduate School of Business, University of Chicago.

Mr. Marrus has been involved in mergers and acquisitions as an investment banker and has experience in company valuation in a wide range of industries, a critical skill set for us. We believe that Mr. Marrus's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Arthur S. Leibowitz has been one of our directors since June 2009. Mr. Leibowitz is a lecturer at Adelphi University School of Business where he teaches courses in accounting to both graduate and undergraduate students. Before joining Adelphi University, Mr. Leibowitz was an audit and business assurance partner at PwC. During his twenty-seven years at PwC, Mr. Leibowitz served in a national leadership role for PwC's retail industry group and was the portfolio audit partner for one of PwC's leading private equity firms. Mr. Leibowitz is a certified public accountant in New York State and received a B.S. in accounting from Brooklyn College in New York.

Mr. Leibowitz brings many years of experience as an audit and business assurance partner at PwC with extensive financial accounting knowledge that is critical to our board of directors. His skills are a vital asset to our board of directors at a time when accurate and transparent accounting, a sound financial footing and exemplary governance practices are essential. We believe that Mr. Leibowitz's background and experience make him appropriate to serve as one of our directors in light of our business and structure.

Thomas J. Paup has been our Vice President – Finance since December 2005 and our Chief Financial Officer since February 2006. Mr. Paup is currently also a Finance Lecturer at Eastern Michigan University. Mr. Paup was an Affiliated Partner with McMillan|Doolittle LLP from March 2002 until accepting this position with us, and prior thereto, he was an Executive in Residence and Finance Instructor at DePaul University's Kellstadt Graduate School of Business. Prior to his teaching experience, Mr. Paup spent over 25 years in the retail industry. Most recently, between 1997 and 2000, Mr. Paup was the Executive Vice President and Chief Financial Officer and member of the Board of Directors of Montgomery Ward and Company. Mr. Paup brings a broad background of strategic and operational management experiences from the department store industry, where he served as CFO of Lord & Taylor and Kaufmann's and Controller of Bloomingdale's and Robinson-May. Mr. Paup holds an MBA in Finance and a BBS from Eastern Michigan University.

Table of Contents

Board Leadership Structure

We have chosen to combine the positions of Chairman of the Board and Chief Executive Officer. We believe that Mr. Ehrlich's long experience in business, both as a director and as chairman of the board of other public companies, as well as his unique understanding of our business, make it desirable that he serve as Chairman of our Board of Directors, and that the size of our company and the nature of our business do not require that the positions of Chairman and of Chief Executive Officer be bifurcated.

Our independent directors have not chosen to formally designate one of their number as lead independent director.

Committees of the Board of Directors

Our board of directors has an Audit Committee, a Compensation Committee, a Nominating Committee and an Executive and Finance Committee.

Created in December 1993, the purpose of the Audit Committee is to review with management and our independent auditors the scope and results of the annual audit, the nature of any other services provided by the independent auditors, changes in the accounting principles applied to the presentation of our financial statements, and any comments by the independent auditors on our policies and procedures with respect to internal accounting, auditing and financial controls. The Audit Committee was established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934, as amended. In addition, the Audit Committee is charged with the responsibility for making decisions on the engagement of independent auditors. As required by law, the Audit Committee operates pursuant to a charter, available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html. The Audit Committee consists of Prof. Jones (Chair) and Messrs. Borey, Sloyer and Leibowitz. We have determined that each of Prof. Jones and Mr. Leibowitz qualifies as an "audit committee financial expert" under applicable SEC and Nasdaq regulations. Prof. Jones and Mr. Leibowitz, as well as all the other members of the Audit Committee, are "independent," as independence is defined in Rule 4200(a)(15) of the National Association of Securities Dealers' listing standards and under Item 7(d)(3)(iv) of Schedule 14A of the proxy rules under the Exchange Act.

The Compensation Committee, also created in December 1993, recommends annual compensation arrangements for the Chief Executive Officer and Chief Financial Officer and reviews annual compensation arrangements for all officers and significant employees. The Compensation Committee operates pursuant to a charter, available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html. The Compensation Committee consists of Dr. Eastman (Chair) and Messrs. Marrus and Sloyer, all of whom are independent non-employee directors.

The Executive and Finance Committee, created in July 2001, exercises the powers of the Board during the intervals between meetings of the Board, in the management of the property, business and affairs of the Company (except with respect to certain extraordinary transactions). The Executive and Finance Committee consists of Messrs. Ehrlich (Chair), Esses, Marrus and Sloyer.

The Nominating Committee, created in March 2003, identifies and proposes candidates to serve as members of the Board of Directors. Proposed nominees for membership on the Board of Directors submitted in writing by stockholders to the Secretary of the Company will be brought to the attention of the Nominating Committee. The Nominating Committee consists of Mr. Marrus (Chair), Dr. Eastman and Prof. Jones, all of whom are "independent," as independence is defined in Rule 4200(a)(15) of the National Association of Securities Dealers' listing standards and under Item 7(d)(3)(iv) of Schedule 14A of the proxy rules under the Exchange Act. The Nominating Committee operates under a formal charter that governs its duties. The Nominating Committee's charter is publicly available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html.

Table of Contents

Code of Ethics

We have adopted a Code of Ethics, as required by Nasdaq listing standards and the rules of the SEC, that applies to our principal executive officer, our principal financial officer and our principal accounting officer. The Code of Ethics is publicly available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html. If we make substantive amendments to the Code of Ethics or grant any waiver, including any implicit waiver, that applies to anyone subject to the Code of Ethics, we will disclose the nature of such amendment or waiver on the website or in a report on Form 8-K in accordance with applicable Nasdaq and SEC rules.

Code of Conduct

We have adopted a general Code of Conduct, as required by Nasdaq listing standards and the rules of the SEC, that applies to all of our employees. The Code of Conduct is publicly available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html.

Whistleblower Policy

We have adopted a Whistleblower Policy, as required by Nasdaq listing standards, in order to ensure compliance with the provisions of the Sarbanes-Oxley Act of 2002. The Whistleblower Policy is publicly available through a hyperlink located on the investor relations page of our website, at http://www.arotech.com/compro/investor.html. Employees with complaints about our compliance with applicable legal and regulatory requirements relating to accounting, auditing and internal control matters may submit their complaints in person, by mail or other written communication or by telephone to our Complaint Administrator. The Complaint Administrator can be contacted anonymously, by submitting the form located on our corporate website at http://arotech.com/compro/complaint.html. Complaints sent in this manner will automatically be stripped of all computer-encoded information identifying the originating e-mail address, and will then automatically be forwarded to the Complaint Administrator’s regular e-mail address at Arotech.

Director Compensation

Non-employee members of our Board of Directors are entitled to a cash retainer in 2012 of $3,500 (plus expenses) per quarter, plus $500 per quarter for each committee on which such outside directors serve. (In 2011, the Directors were paid a cash retainer of $7,000 per quarter but voluntarily accepted a reduced retainer in 2012 as an expense control measure.) The Chairman of the Audit Committee receives an additional retainer of $1,500 per quarter, and the Chairman of the Compensation Committee receives an additional retainer of $1,000 per quarter. No per-meeting fees are paid. In addition, we have adopted a Non-Employee Director Equity Compensation Plan, pursuant to which non-employee directors receive an initial grant of a number of restricted shares having a fair market value on the date of grant equal to $25,000 upon their election as a director, and an annual grant on March 31 of each year of a number of restricted shares having a fair market value on the date of grant equal to $15,000. Each grant of restricted stock shall become free of restrictions in three equal installments on each of the first, second and third anniversaries of the grant, unless the director resigns from the Board prior to such vesting. Restrictions lapse automatically in the event of a director being removed for service other than for cause, or being nominated as a director but failing to be elected, or death, disability or mandatory retirement. Furthermore, all restrictions lapse prior to the consummation of a merger or consolidation involving us, our liquidation or dissolution, any sale of substantially all of our assets or any other transaction or series of related transactions as a result of which a single person or several persons acting in concert own a majority of our then-outstanding common stock.

Table of Contents

The following table shows the compensation earned or received by each of our non-officer directors for the year ended December 31, 2012:

DIRECTOR COMPENSATION

Name	Fees Earned or Paid in Cash	Stock Awards Granted 2012	Total	Stock Awards Vested[1] 2012
Dr. Jay M. Eastman	$ 23,500	$ 15,000	$ 38,500	$ 15,853[2]
Edward J. Borey	$ 21,500	$ 15,000	$ 36,500	$ 15,853[3]
Seymour Jones	$ 25,500	$ 15,000	$ 40,500	$ 15,853[4]
Elliot Sloyer	$ 23,500	$ 15,000	$ 38,500	$ 15,853[5]
Michael E. Marrus	$ 23,500	$ 15,000	$ 38,500	$ 15,853[6]
Arthur S. Leibowitz	$ 19,500	$ 15,000	$ 34,500	$ 12,759[7]

(1) This column reflects the 2012 compensation expense for stock based awards for the year ended December 31, 2012.
(2) As of December 31, 2012, Dr. Eastman held 22,146 unvested restricted shares of our common stock.
(3) As of December 31, 2012, Mr. Borey held 22,146 unvested restricted shares of our common stock.
(4) As of December 31, 2012, Prof. Jones held 22,146 unvested restricted shares of our common stock.
(5) As of December 31, 2012, Mr. Sloyer held 22,146 unvested restricted shares of our common stock.
(6) As of December 31, 2012, Mr. Marrus held 22,146 unvested restricted shares of our common stock.
(7) As of December 31, 2012, Mr. Leibowitz held 22,146 unvested restricted shares of our common stock.

Significant Employees

Our significant employees as of February 28, 2013, and their ages as of December 31, 2012, are as follows:

Name	Age	Position
Dean Krutty	47	President, Training and Simulation Division
Ronen Badichi	47	President, Battery and Power Systems Division
Yaakov Har-Oz	55	Senior Vice President, General Counsel and Secretary
Norman E. Johnson	60	Corporate Controller, Chief Accounting Officer

Dean Krutty became President of the Simulation Division in January 2005, after having spent the prior thirteen years as a member of the FAAC management team. He began his career at FAAC as an electrical engineer in FAAC’s part task trainer division and most recently served as FAAC’s Director of Military Operations. He also has significant experience managing programs in the training and simulation industry. Mr. Krutty holds a B.S. in electrical engineering from the Michigan State University.

Ronen Badichi became the General Manager of Epsilor Electronic Industries in May 2005 and the President of our Battery Division in December 2007. Prior to joining Epsilor, Mr. Badichi served since 1999 as the General Manager of Maoz Industries, a high end supplier of displays to the aviation industry. Prior thereto, Mr. Badichi was a project manager at BAE Systems and served as the F-16 Avionics Integration manager in the Israeli Air Force, with the rank of Captain. Mr. Badichi holds a B.Sc. in Physics and Electro-Optic Engineering from the Lev Institute of Technology in Jerusalem.

Yaakov Har-Oz has served as our Vice President and General Counsel since October 2000 and as our corporate Secretary since December 2000; in December 2005 Mr. Har-Oz was promoted to Senior Vice President. From 1994 until October 2000, Mr. Har-Oz was a partner in the Jerusalem law firm of Ben-Ze’ev, Hacohen & Co. Prior to moving to Israel in 1993, he was an administrative law judge and in private law practice in New York. Mr. Har-Oz holds a B.A. from Brandeis University in Waltham, Massachusetts and a J.D. from Vanderbilt Law School (where he was an editor of the law review) in Nashville, Tennessee. He is a member of the New York bar and the Israel Chamber of Advocates.

Table of Contents

Norman E. Johnson has served as our Controller and as our Chief Accounting Officer since August 2006. Prior to joining Arotech, Mr. Johnson was the Corporate Controller with Catuity Inc., a Nasdaq-listed provider of loyalty and gift card solutions. Prior to Catuity, he was with the McCoig Group, a Detroit based holding company, and from March 2000 to August 2004 he was the Corporate Controller of Learning Care Group Inc., a $250 million Nasdaq-listed provider of child care and educational services. Mr. Johnson holds a B.S. in Accounting from Central Michigan University in Mt. Pleasant, Michigan.

Section 16(a) Beneficial Ownership Reporting Compliance

Under the securities laws of the United States, our directors, certain of our officers and any persons holding more than ten percent of our common stock are required to report their ownership of our common stock and any changes in that ownership to the Securities and Exchange Commission. Specific due dates for these reports have been established and we are required to report any failure to file by these dates during 2012. We are not aware of any instances during 2012, not previously disclosed by us, where such “reporting persons” failed to file the required reports on or before the specified dates, except as follows:

(i) Mr. Paup was required to file a Form 4 on or prior to December 21, 2012 in connection with his exercise of 5,555 Restricted Stock Units. He reported these transactions in a Form 5 filed on February 14, 2013.

ITEM 11. EXECUTIVE COMPENSATION

Cash and Other Compensation

Summary Compensation Table

The following table, which should be read in conjunction with the explanations provided below, shows the compensation that we paid (or accrued) to our executive officers during the fiscal years ended December 31, 2012 and 2011:

SUMMARY COMPENSATION TABLE[(1)]

Name and Principal Position	Year	Salary	Bonus	Stock Awards Granted[(2)]	All Other Compensation	Total
Robert S. Ehrlich	2012	$ 431,910	$ 120,533	$ 230,000	$ 90,361[(3)]	$ 872,804
Chairman, Chief Executive Officer and a director	2011	$ 502,583	$ 180,000	$ 262,000	$ 150,148[(4)]	$ 1,094,731
Thomas J. Paup	2012	$ 175,000	$ 68,805	$ 72,000	$ (3,137)[(5)]	$ 312,668
Vice President – Finance and Chief Financial Officer	2011	$ 190,000	$ 47,641	$ 157,200	$ 4,675[(5)]	$ 399,516
Steven Esses	2012	$ 232,566[(6)]	$ 145,200	$ 172,500	$ 386,851[(7)]	$ 903,279
President and a director	2011	$ 239,856[(8)]	$ 143,661	$ 196,500	$ 352,182[(9)]	$ 883,242

(1) We paid the amounts reported for each named executive officer in U.S. dollars and/or New Israeli Shekels (NIS). We have translated amounts paid in NIS into U.S. dollars at the exchange rate of NIS into U.S. dollars at the time of payment or accrual, except that certain items are pursuant to corporate policy paid at a set exchange rate that may be higher than the actual exchange rate on the date of payment. The difference, which was a positive number in 2011 and 2012, has been reported under “Salary.” The exchange rate differences for Mr. Ehrlich were $62,843 and $102,583 for 2012 and 2011, respectively. The exchange rate differences for Mr. Esses were $33,838 and $48,957 for 2012 and 2011, respectively. Additionally, Mr. Ehrlich and Mr. Paup voluntarily reduced their salary in the 2nd quarter of 2012 as a cost control measure.

Table of Contents

(2) Reflects the value of awards of restricted stock or restricted stock units granted to our executive officers based on the compensation cost of their stock-based awards – see Note 13.c. of the Notes to Consolidated Financial Statements. The number of shares of restricted stock or restricted stock units received by our executive officers pursuant to such awards in 2012 (in connection with their amended and restated employment agreements), vesting entirely after two years (dependent 33% on tenure and 67% on performance), was as follows: Mr. Ehrlich, 100,000; Mr. Esses, 75,000; Mr. Paup, 60,000. None of these shares came up for vesting in 2012. The number of shares of restricted stock or restricted stock units received by our executive officers pursuant to such awards in 2011, vesting one-half after one year (dependent 25% on tenure and 75% on performance) and one-half after two years (dependent 33% on tenure and 67% on performance), was as follows: Mr. Ehrlich, 100,000; Mr. Esses, 150,000; Mr. Paup, 120,000. The first tranche of these shares came up for vesting in December 2011, and of the 75% dependent on performance, one-third – or 25% of the total – vested; shares not vesting were cancelled. The second tranche of these shares came up for vesting in December 2012, and of the 67% dependent on performance, 156,667 shares – or 67% of the total – vested.

(3) Of this amount, $(31,467) (the obligation declined due to exchange rate differences) represents the change in our accrual for severance pay that will be payable to Mr. Ehrlich upon his leaving our employ other than if he is terminated for cause, such as a breach of trust; $30,720 represents the change of our accrual for vacation pay; $30,131 represents tax reimbursements and $60,977 represents other normal or mandated Israeli benefits.

(4) Of this amount, $24,654 represents the change in our accrual for severance pay that will be payable to Mr. Ehrlich upon his leaving our employ other than if he is terminated for cause, such as a breach of trust; $29,241 represents the change of our accrual for vacation pay; $55,526 represents tax reimbursements and $40,727 represents other normal or mandated Israeli benefits.

(5) Represents the increase (decrease) in our accrual for Mr. Paup for accrued but unused vacation days.

(6) Does not include approximately $186,000 that we paid in consulting fees to Sampen Corporation, a New York corporation owned by members of Steven Esses's immediate family, from which Mr. Esses receives a salary. See "Item 13. Certain Relationships and Related Transactions – Consulting Agreement with Sampen Corporation," below.

(7) Of this amount, $33,102 represents payments to Israeli pension and education funds; $232,066 represents the change in our accrual for severance pay that will be payable to Mr. Esses upon his leaving our employ other than if he is terminated for cause, such as a breach of trust; $26,856 represents sick pay redemption; $2,227 represents the change of our accrual for vacation pay; $645 represents tax reimbursements; and $58,117 represents other normal or mandated Israeli benefits.

(8) Does not include $185,856 that we paid in consulting fees to Sampen Corporation, a New York corporation owned by members of Steven Esses's immediate family, from which Mr. Esses receives a salary. See "Item 13. Certain Relationships and Related Transactions – Consulting Agreement with Sampen Corporation," below.

(9) Of this amount, $34,281 represents payments to Israeli pension and education funds; $166,209 represents the change in our accrual for severance pay that will be payable to Mr. Esses upon his leaving our employ other than if he is terminated for cause, such as a breach of trust; $27,256 represents sick pay redemption; $15,896 represents the change of our accrual for vacation pay; $23,868 represents tax reimbursements; and $35,715 represents other normal or mandated Israeli benefits.

Table of Contents

Executive Loans

In 2000 and 2002, we extended certain loans to certain of our Named Executive Officers. These loans are summarized in the following table, and are further described under "Item 13. Certain Relationships and Related Transactions – Officer Loans," below.

Name of Borrower	Date of Loan		Original Principal Amount of Loan		Amount Outstanding as of 12/31/2012	Terms of Loan
Robert S. Ehrlich	02/09/2000	$	329,163	$	452,995	Twenty-five-year non-recourse loan to purchase our stock secured by the shares of stock purchased.
Robert S. Ehrlich	06/10/2002	$	36,500	$	–	Ten-year non-recourse loan to purchase our stock, secured by the shares of stock purchased.

Plan-Based Awards

Grants of Stock Options

We did not grant any stock options to our executive officers during 2012.

Grants of Restricted Stock or Restricted Stock Units

During 2012, the Compensation Committee approved the grant of a total of 235,000 shares of restricted stock or restricted stock units to our executive officers (in connection with their amended and restated employment agreements). The table below sets forth each equity award granted to our executive officers during the year ended December 31, 2012.

GRANTS OF PLAN-BASED AWARDS

Name	Grant Date	All Other Stock Awards: Number of Shares of Stocks		Grant Date Fair Value of Stock Awards (1)
Robert S. Ehrlich(2)	01/01/2012	100,000	$	120,000
Robert S. Ehrlich(3)	11/12/2012	100,000	$	110,000
Steven Esses(2)	01/01/2012	75,000	$	90,000
Steven Esses(3)	11/12/2012	75,000	$	82,500
Thomas J. Paup(2)	01/01/2012	60,000	$	79,800

(1) Reflects the aggregate market value of the shares of restricted stock or restricted stock units determined based on the closing price of our common stock on the Nasdaq Global Market on the date of grant.
(2) The restricted shares or restricted stock units vest entirely after two years, in December 2013 (dependent 33% on tenure and 67% on performance).
(3) The restricted shares vest equally over three years starting in June 2013.

Stock Option Exercises and Vesting of Restricted Stock Awards

Our executive officers did not exercise any stock options during 2012. The following table presents awards of restricted stock or restricted stock units that vested during the year ended December 31, 2012.

Table of Contents

STOCK VESTED

Name	Number of Shares Acquired on Vesting (#)	Value Realized on Vesting[(1)] ($)
Robert S. Ehrlich	100,000	$ 103,000
Steven Esses	75,000	$ 77,250
Thomas J. Paup	60,000	$ 61,800

(1) Reflects the aggregate market value of the shares of restricted stock or restricted stock units determined based on a per share price of $1.03, the closing price of our common stock on the Nasdaq Global Market on December 31, 2012, which was the last trading day of 2012.

Outstanding Equity Awards at Fiscal Year-End

The table below sets forth information for our executive officers with respect to option, restricted stock and restricted stock unit values at the end of the fiscal year ended December 31, 2012.

OUTSTANDING EQUITY AWARDS AT FISCAL YEAR-END

	Stock Awards			
			Equity Incentive Plan Awards	
Name	Number of Shares that Have Not Vested (#)	Market Value of Shares that Have Not Vested[(1)] ($)	Number of Unearned Shares that Have Not Vested (#)	Market Value of Unearned Shares that Have Not Vested[(1)] ($)
Robert S. Ehrlich	133,334	$ 137,334	66,666	$ 68,666
Steven Esses	100,000	$ 103,000	50,000	$ 51,500
Thomas J. Paup	20,000	$ 20,600	40,000	$ 41,200

(1) Reflects the aggregate market value of the shares of restricted stock or restricted stock units determined based on a per share price of $1.03, the closing price of our common stock on the Nasdaq Global Market on December 31, 2012, which was the last trading day of 2012.

Employment Contracts

Robert S. Ehrlich

Mr. Ehrlich is party to an amended and restated employment agreement with us executed in February 2012. The term of this employment agreement expires on December 31, 2013.

The employment agreement provides for a base salary of NIS 150,000 (approximately $39,400 per month based on the exchange rate on January 1, 2012), as adjusted annually for Israeli inflation. Additionally, the board may at its discretion raise Mr. Ehrlich's base salary. The employment agreement also granted Mr. Ehrlich a retention bonus in the amount of 100,000 shares of restricted stock, which vests on December 31, 2013, with such vesting being contingent on Mr. Ehrlich being employed by us on the scheduled vesting date and on performance criteria to be established by the Compensation Committee of our Board of Directors.

The employment agreement provides that we will pay an annual bonus, on a sliding scale, in an amount equal to 35% of Mr. Ehrlich's annual base salary then in effect if the results we actually attain for the year in question are 90% or more of the amount we budgeted at the beginning of the year, up to a maximum of 75% of his annual base salary then in effect if the results we actually attain for the year in question are 120% or more of the amount we budgeted at the beginning of the year. Mr. Ehrlich's previous employment agreement had an identical bonus provision. For 2011 and 2012, the Compensation Committee choose financial targets for determining eligibility for the above-referenced cash incentive bonus that are determined in part on the achievement of set budgetary forecast targets for adjusted EBITDA, a non-GAAP measurement, and in part on the achievement of other targets – in the case of 2011, targets for backlog, and in the case of 2012, targets for revenues. The Board's adjusted budget for 2012 for continuing operations called for adjusted EBITDA of $2.39 million with revenues of at least $79 million. Actual results were EBITDA of $2.64 million with revenues of $80.1 million. New bonus targets will be chosen for 2013 based upon future budgetary forecasts.

The employment agreement also contains various benefits customary in Israel for senior executives, tax and financial planning expenses and an automobile, and contain confidentiality and non-competition covenants. Pursuant to the employment agreements, we granted Mr. Ehrlich demand and "piggyback" registration rights covering shares of our common stock held by him.

We can terminate Mr. Ehrlich's employment agreement in the event of death or disability or for "Cause" (defined as conviction of certain crimes, willful failure to carry out directives of our board of directors or gross negligence or willful misconduct). Mr. Ehrlich has the right to terminate his employment upon a change in our control or for "Good Reason," which is defined to include adverse changes in employment status or compensation, our insolvency, material breaches and certain other events. Additionally, Mr. Ehrlich may terminate his agreement for any reason upon 120 days' notice.

Upon termination of employment, the employment agreement provides for payment of all accrued and unpaid compensation and benefits (including under most circumstances Israeli statutory severance, described under "Item 1. Business – Employees," above), and (unless we have terminated the agreement for Cause or Mr. Ehrlich has terminated the agreement without Good Reason and without giving us 120 days' notice of termination) bonuses (to the extent earned) due for the year in which employment is terminated and severance pay in the amount of up to $1,625,400. Furthermore, in respect of any termination by us other than termination for Cause or termination of the agreement due to Mr. Ehrlich's death or disability, or by Mr. Ehrlich other than for Good Reason, all outstanding options and all restricted shares will be fully vested. Restricted shares that have vested prior to the date of termination are not forfeited under any circumstances, including termination for Cause.

A table describing the payments that would have been due to Mr. Ehrlich under his employment agreement had Mr. Ehrlich's employment with us been terminated at the end of 2012 under various circumstances (pursuant to the terms of his then-current employment agreement) appears under "Potential Payments and Benefits upon Termination of Employment – Robert S. Ehrlich," below.

In April 2009, we, with the agreement of Mr. Ehrlich, funded a portion of his severance security by means of issuing to him, in trust, restricted stock having a value (based on the closing price of our stock on the Nasdaq Stock Market on the date on which Mr. Ehrlich and our board of directors agreed on this arrangement) of $240,000, a total of 328,767 shares. We agreed with Mr. Ehrlich that the economic risk of gain or loss on these shares is to be borne by Mr. Ehrlich. Should Mr. Ehrlich leave our employ under circumstances in which he is not entitled to his severance package (primarily, termination for Cause as defined in his employment agreement), these shares would be returned to us for cancellation.

Steven Esses

Mr. Esses is party to an amended and restated employment agreement with EFL and guaranteed by us executed in February 2012. The term of this employment agreement expires on December 31, 2013.

The employment agreement provides for a base salary in 2012 of NIS 71,587 per month (approximately $18,800 at the rate of exchange in effect on January 1, 2012), and a base salary in 2013 of NIS 129,187 per month (approximately $33,900 at the rate of exchange in effect on January 1, 2012), as adjusted for Israeli inflation during 2012. Additionally, the board may at its discretion raise Mr. Esses's base salary. The agreement also provides for a stock retention bonus of 75,000 shares of restricted stock, which vests on December 31, 2013, with such vesting being contingent on Mr. Esses being employed by us on the scheduled vesting date and on performance criteria to be established by the Compensation Committee of our Board of Directors.

Table of Contents

The employment agreement provides that if the results we actually attain in a given year are at least 90% of the amount we budgeted at the beginning of the year, we will pay a bonus, on a sliding scale, in an amount equal to a minimum of 20% of Mr. Esses's annual base salary then in effect, up to a maximum of 75% of his annual base salary then in effect if the results we actually attain for the year in question are 120% or more of the amount we budgeted at the beginning of the year. Mr. Esses's previous employment agreement had an identical bonus provision. For 2011 and 2012, the Compensation Committee choose financial targets for determining eligibility for the above-referenced cash incentive bonus that are determined in part on the achievement of set budgetary forecast targets for adjusted EBITDA, a non-GAAP measurement, and in part on the achievement of other targets – in the case of 2011, targets for backlog, and in the case of 2012, targets for revenues. The Board's adjusted budget for 2012 for continuing operations called for adjusted EBITDA of $2.39 million with revenues of at least $79 million. Actual results were EBITDA of $2.64 million with revenues of $80.1 million. New bonus targets will be chosen for 2013 based upon future budgetary forecasts.

The employment agreement also contains various benefits customary in Israel for senior executives, tax and financial planning expenses and an automobile, and contain confidentiality and non-competition covenants. Pursuant to the employment agreements, we granted Mr. Esses demand and "piggyback" registration rights covering shares of our common stock held by him.

We can terminate Mr. Esses's employment agreement in the event of death or disability or for "Cause" (defined as conviction of certain crimes, willful failure to carry out directives of our board of directors or gross negligence or willful misconduct). Mr. Esses has the right to terminate his employment upon a change in our control or for "Good Reason," which is defined to include adverse changes in employment status or compensation, our insolvency, material breaches and certain other events. Additionally, Mr. Esses may retire (after age 65), retire early (after age 55) or terminate his agreement for any reason upon 150 days' notice.

Upon termination of employment, the employment agreement provides for payment of all accrued and unpaid compensation (including under most circumstances Israeli statutory severance, described under "Item 1. Business – Employees," above), and (unless we have terminated the agreement for Cause or Mr. Esses has terminated the agreement without Good Reason and without giving us 150 days' notice of termination) bonuses (to the extent earned) due for the year in which employment is terminated (in an amount of not less than 20% of base salary) and severance pay, as follows: (A) before the end of the first year of the agreement, a total of (i) $307,200 plus (ii) twenty-four (24) times monthly salary; or (B) at or after the end of the first year of the agreement, twenty-four (24) times monthly salary. Furthermore, Mr. Esses will receive, in respect of all benefits, an additional sum in the amount of (i) $75,000, in the case of termination due to disability, Good Reason, death, or non-renewal, or (ii) $150,000, in the case of termination due to early retirement, retirement, change of control or change of location. Additionally, in respect of any termination due to a change of control or a change in the primary location from which Mr. Esses shall have conducted his business activities during the 60 days prior to such change, all outstanding options and all restricted shares will be fully vested. Restricted shares that have vested prior to the date of termination are not forfeited under any circumstances, including termination for Cause.

A table describing the payments that would have been due to Mr. Esses under his employment agreement had Mr. Esses's employment with us been terminated at the end of 2012 under various circumstances (pursuant to the terms of his then-current employment agreement) appears under "Potential Payments and Benefits upon Termination of Employment – Steven Esses," below.

In April 2009, we, with the agreement of Mr. Esses, funded a portion of his severance security by means of issuing to him, in trust, restricted stock having a value (based on the closing price of our stock on the Nasdaq Stock Market on the date on which Mr. Esses and our board of directors agreed on this arrangement) of $200,000, a total of 273,973 shares. We agreed with Mr. Esses that the economic risk of gain or loss on these shares is to be borne by Mr. Esses. Should Mr. Esses leave our employ under circumstances in which he is not entitled to his severance package (primarily, termination for Cause as defined in his employment agreement), these shares would be returned to us for cancellation.

See also “Item 13. Certain Relationships and Related Transactions – Consulting Agreement with Sampen Corporation,” below.

Thomas J. Paup

Mr. Paup is party to an amended and restated employment agreement with us executed in February 2012, having a term running until December 31, 2014. Under the terms of his employment agreement, Mr. Paup is entitled to receive a base salary of $190,000 per annum, as adjusted annually for inflation. The agreement also provides for a stock retention bonus of 60,000 shares of restricted stock, which vests on December 31, 2013, with such vesting being contingent on Mr. Paup being employed by us on the scheduled vesting date and on performance criteria to be established by the Compensation Committee of our Board of Directors.

The employment agreement provides that if the results we actually attain in a given year are at least 90% of the amount we budgeted at the beginning of the year, we will pay a bonus, on a sliding scale, in an amount equal to a minimum of 20% of Mr. Paup’s annual base salary then in effect, up to a maximum of 50% of his annual base salary then in effect if the results we actually attain for the year in question are 120% or more of the amount we budgeted at the beginning of the year. Mr. Paup’s previous employment agreement had an identical bonus provision. For 2011 and 2012, the Compensation Committee choose financial targets for determining eligibility for the above-referenced cash incentive bonus that are determined in part on the achievement of set budgetary forecast targets for adjusted EBITDA, a non-GAAP measurement, and in part on the achievement of other targets – in the case of 2011, targets for backlog, and in the case of 2012, targets for revenues. The Board’s adjusted budget for 2012 for continuing operations called for adjusted EBITDA of $2.39 million with revenues of at least $79 million. Actual results were EBITDA of $2.64 million with revenues of $80.1 million. New bonus targets will be chosen for 2013 based upon future budgetary forecasts.

Mr. Paup’s employment agreement provides that if we terminate his agreement other than for cause (defined as conviction of certain crimes, willful failure to carry out directives of our board of directors or gross negligence or willful misconduct), we must pay Mr. Paup severance in an amount of twelve times his monthly salary (doubled in the event of termination by reason of a change of control), with an additional three months’ severance payable if Mr. Paup completes the three-year term of his agreement. Additionally, in respect of any termination due to a change of control, all outstanding options and all restricted shares will be fully vested. Restricted shares that have vested prior to the date of termination are not forfeited under any circumstances, including termination for Cause.

A table describing the payments that would have been due to Mr. Paup under his employment agreement had Mr. Paup’s employment with us been terminated at the end of 2012 under various circumstances (pursuant to the terms of his then-current employment agreement) appears under “Potential Payments and Benefits upon Termination of Employment – Thomas J. Paup,” below.

Others

Other employees have entered into individual employment agreements with us. These agreements govern the basic terms of the individual’s employment, such as salary, vacation, overtime pay, severance arrangements and pension plans. Subject to Israeli law, which restricts a company’s right to relocate an employee to a work site farther than sixty kilometers from his or her regular work site, we have retained the right to transfer certain employees to other locations and/or positions provided that such transfers do not result in a decrease in salary or benefits. All of these agreements also contain provisions governing the confidentiality of information and ownership of intellectual property learned or created during the course of the employee’s tenure with us. Under the terms of these provisions, employees must keep confidential all information regarding our operations (other than information which is already publicly available) received or learned by the employee during the course of employment. This provision remains in force for five years after the employee has left our service. Further, intellectual property created during the course of the employment relationship belongs to us.

Table of Contents

A number of the individual employment agreements, but not all, contain non-competition provisions which restrict the employee's rights to compete against us or work for an enterprise which competes against us. Such provisions generally remain in force for a period of two years after the employee has left our service.

Under the laws of Israel, an employee of ours who has been dismissed from service, died in service, retired from service upon attaining retirement age, or left due to poor health, maternity or certain other reasons, is entitled to severance pay at the rate of one month's salary for each year of service, *pro rata* for partial years of service. We currently fund this obligation by making monthly payments to approved private provident funds and by its accrual for severance pay in the consolidated financial statements. See Note 2.q. of the Notes to the Consolidated Financial Statements.

Potential Payments and Benefits upon Termination of Employment

This section sets forth in tabular form quantitative disclosure regarding estimated payments and other benefits that would have been received by certain of our executive officers if their employment had terminated on December 31, 2012 (the last business day of the fiscal year), pursuant to the terms of their then-current employment agreements.

For a narrative description of the severance and change in control arrangements in the current employment contracts of Messrs. Ehrlich, Esses and Paup, see "– Employment Contracts," above. Each of Messrs. Ehrlich and Esses will be eligible to receive severance payments in excess of accrued but unpaid items only if he signs a general release of claims.

Robert S. Ehrlich

The following table describes the potential payments and benefits upon employment termination for Robert S. Ehrlich, our Chairman and Chief Executive Officer, pursuant to applicable law and the terms of his then-current employment agreement with us, as if his employment had terminated on December 31, 2012 (the last business day of the fiscal year) under the various scenarios described in the column headings as explained in the footnotes below.

ROBERT S. EHRLICH

Payments and Benefits	**Death or Disability[(1)]**	**Cause[(2)]**	**Good Reason[(3)]**	**Change of Control[(4)]**	**Termination at Will[(5)]**	**Other Employee Termination [(6)]**

(1) "Disability" is defined in Mr. Ehrlich's employment agreement as a physical or mental infirmity which impairs Mr. Ehrlich's ability to substantially perform his duties and which continues for a period of at least 180 consecutive days.

Table of Contents

(2) "Cause" is defined in Mr. Ehrlich's employment agreement as (i) conviction for fraud, crimes of moral turpitude or other conduct which reflects on us in a material and adverse manner; (ii) a willful failure to carry out a material directive of our Board of Directors, *provided* that such directive concerned matters within the scope of Mr. Ehrlich's duties, would not give Mr. Ehrlich "Good Reason" to terminate his agreement (see footnote 4 below) and was capable of being reasonably and lawfully performed; (iii) conviction in a court of competent jurisdiction for embezzlement of our funds; and (iv) reckless or willful misconduct that is materially harmful to us.

(3) "Good Reason" is defined in Mr. Ehrlich's employment agreement as (i) a change in Mr. Ehrlich's status, title, position or responsibilities which, in Mr. Ehrlich's reasonable judgment, represents a reduction or demotion in his status, title, position or responsibilities as in effect immediately prior thereto; (ii) a reduction in Mr. Ehrlich's base salary; (iii) the failure by us to continue in effect any material compensation or benefit plan in which Mr. Ehrlich is participating; (iv) our insolvency or the filing (by any party, including us) of a petition for our winding-up; (v) any material breach by us of any provision of Mr. Ehrlich's employment agreement; (vi) any purported termination of Mr. Ehrlich's employment for cause by us which does not comply with the terms of Mr. Ehrlich's employment agreement; and (vii) any movement of the location where Mr. Ehrlich is generally to render his services to us from the Jerusalem/Tel Aviv area of Israel.

(4) "Change of Control" is defined in Mr. Ehrlich's employment agreement as (i) the acquisition (other than from us in any public offering or private placement of equity securities) by any person or entity of beneficial ownership of 20% or more of the combined voting power of our then-outstanding voting securities; or (ii) individuals who, as of January 1, 2000, were members of our Board of Directors (the "Original Board"), together with individuals approved by a vote of at least 2/3 of the individuals who were members of the Original Board and are then still members of our Board, cease for any reason to constitute at least 1/3 of our Board; or (iii) approval by our shareholders of a complete winding-up or an agreement for the sale or other disposition of all or substantially all of our assets.

(5) "Termination at Will" is defined in Mr. Ehrlich's employment agreement as Mr. Ehrlich terminating his employment with us on written notice of at least 120 days in advance of the effective date of such termination.

(6) "Other Employee Termination" means a termination by Mr. Ehrlich of his employment without giving us the advance notice of 120 days needed to make such a termination qualify as a "Termination at Will."

(7) Pursuant to Israeli law and our customary practice, we pay Mr. Ehrlich in July of each year the equivalent of ten days' "recuperation pay" at the statutory rate of NIS 371 (approximately $99) per day.

(8) Pursuant to Israeli law, we must contribute an amount equal to 7.5% of Mr. Ehrlich's base salary to a continuing education fund, up to the permissible tax-exempt salary ceiling according to the income tax regulations in effect from time to time. At December 31, 2012, the ceiling then in effect was NIS 15,712 (approximately $4,209). In Mr. Ehrlich's case, we have customarily contributed to his continuing education fund in excess of the tax-exempt ceiling, and then reimbursed Mr. Ehrlich for the tax. The sums in the table reflect this additional contribution and the resultant tax reimbursement.

(9) Under Israeli law, employees terminated other than for cause receive severance in the amount of one month's base salary for each year of work, at their salary rate at the date of termination.

Steven Esses

The following table describes the potential payments and benefits upon employment termination for Steven Esses, our President, pursuant to applicable law and the terms of his then-current employment agreement with us, as if his employment had terminated on December 31, 2012 (the last business day of the fiscal year) under the various scenarios described in the column headings as explained in the footnotes below.

Statutory severance(15)	177,155	177,155	–	177,155	177,155	177,155	177,155	177,155	–
Benefits	–	–	–	75,000	150,000	150,000	150,000	150,000	–
TOTAL:	$1,168,788	$1,168,788	$ 130,565	$ 1,243,788	$1,318,788	$1,318,788	$ 1,318,788	$ 1,318,788	$ 130,565

(1) "Non-renewal" is defined in Mr. Esses's employment agreement as a decision, made with written notice of at least 90 days in advance of the effective date of such decision, by either us or Mr. Esses not to renew Mr. Esses's employment for an additional two-year term. Pursuant to the terms of Mr. Esses's employment agreement, in the absence of such notice, Mr. Esses's employment agreement automatically renews.

(2) "Disability" is defined in Mr. Esses's employment agreement as a physical or mental infirmity which impairs Mr. Esses's ability to substantially perform his duties and which continues for a period of at least 180 consecutive days.

(3) "Cause" is defined in Mr. Esses's employment agreement as (i) conviction for fraud, crimes of moral turpitude or other conduct which reflects on us in a material and adverse manner; (ii) a willful failure to carry out a material directive of our Chief Executive Officer, *provided* that such directive concerned matters within the scope of Mr. Esses's duties, would not give Mr. Esses "Good Reason" to terminate his agreement (see footnote 4 below) and was capable of being reasonably and lawfully performed; (iii) conviction in a court of competent jurisdiction for embezzlement of our funds; and (iv) reckless or willful misconduct that is materially harmful to us.

(4) "Good Reason" is defined in Mr. Esses's employment agreement as (i) a change in (a) Mr. Esses's status, title, position or responsibilities which, in Mr. Esses's reasonable judgment, represents a reduction or demotion in his status, title, position or responsibilities as in effect immediately prior thereto, or (b) in the primary location from which Mr. Esses shall have conducted his business activities during the 60 days prior to such change; or (ii) a reduction in Mr. Esses's base salary; (iii) the failure by us to continue in effect any material compensation or benefit plan in which Mr. Esses is participating; (iv) our insolvency or the filing (by any party, including us) of a petition for our winding-up; (v) any material breach by us of any provision of Mr. Esses's employment agreement; and (vi) any purported termination of Mr. Esses's employment for cause by us which does not comply with the terms of Mr. Esses's employment agreement.

(5) "Change of Control" is defined in Mr. Esses's employment agreement as (i) the acquisition (other than from us in any public offering or private placement of equity securities) by any person or entity of beneficial ownership of 30% or more of the combined voting power of our then-outstanding voting securities; or (ii) individuals who, as of January 1, 2000, were members of our Board of Directors (the "Original Board"), together with individuals approved by a vote of at least 2/3 of the individuals who were members of the Original Board and are then still members of our Board, cease for any reason to constitute at least 1/3 of our Board; or (iii) approval by our shareholders of a complete winding-up or an agreement for the sale or other disposition of all or substantially all of our assets.

(6) "Change of location" is defined in Mr. Esses's employment agreement as a change in the primary location from which Mr. Esses shall have conducted his business activities during the 60 days prior to such change.

(7) "Retirement" is defined as Mr. Esses terminating his employment with us at age 65 or older on at least 150 days' prior notice.

(8) "Early Retirement" is defined as Mr. Esses terminating his employment with us at age 55 or older (up to age 65) on at least 150 days' prior notice.

(9) Any termination by Mr. Esses of his employment with us that does not fit into any of the prior categories, including but not limited to Mr. Esses terminating his employment with us, with or without notice, other than at the end of an employment term or renewal thereof, in circumstances that do not fit into any of the prior categories.

(10) Does not include a total of $186,000 in accrued but unpaid consulting fees due at December 31, 2012 to Sampen Corporation, a New York corporation owned by members of Steven Esses's immediate family, from which Mr. Esses receives a salary. See "Item 13. Certain Relationships and Related Transactions – Consulting Agreement with Sampen Corporation," below.

Table of Contents

(11)Limited to an aggregate of 30 days.

(12)Pursuant to Israeli law and our customary practice, we pay Mr. Esses in July of each year the equivalent of six days' "recuperation pay" at the statutory rate of NIS 365 (approximately $96) per day.

(13)Payments to managers' insurance, a benefit customarily given to senior executives in Israel, come to a total of 15.83% of base salary, consisting of 8.33% for payments to a fund to secure payment of statutory severance obligations, 5% for pension and 2.5% for disability. The managers' insurance funds reflected in the table do not include the 8.33% payments to a fund to secure payment of statutory severance obligations with respect to amounts paid prior to December 31, 2011, which funds are reflected in the table under the "Statutory severance" heading.

(14)Pursuant to Israeli law, we must contribute an amount equal to 7.5% of Mr. Esses's base salary to a continuing education fund, up to the permissible tax-exempt salary ceiling according to the income tax regulations in effect from time to time. At December 31, 2012, the ceiling then in effect was NIS 15,712 (approximately $4,112). In Mr. Esses's case, we have customarily contributed to his continuing education fund in excess of the tax-exempt ceiling, and then reimbursed Mr. Esses for the tax. The sums in the table reflect this additional contribution and the resultant tax reimbursement.

(15)Under Israeli law, employees terminated other than for cause receive severance in the amount of one month's base salary for each year of work, at their salary rate at the date of termination.

Thomas J. Paup

The following table describes the potential payments and benefits upon employment termination for Thomas J. Paup, our Vice President – Finance and Chief Financial Officer, pursuant to applicable law and the terms of his then-current employment agreement with us, as if his employment had terminated on December 31, 2012 (the last business day of the fiscal year) under the various scenarios described in the column headings as explained in the footnotes below.

THOMAS J. PAUP

Payments and Benefits	**Death or Disability(1)**	**Cause(2)**	**Change of Control(3)**	**Non-Renewal(4)**	**Termination at Will(5)**
Accrued but unpaid:					
Base salary	$ 7,491	$ 7,491	$ 7,491	$ 7,491	$ 7,491
Vacation	8,060	8,060	8,060	8,060	8,060
Contractual severance	–	–	380,000	190,000	47,500
TOTAL:	$ 15,551	$ 15,551	$ 395,551	$ 205,551	$ 63,051

(1) "Disability" is defined in Mr. Paup's employment agreement as a physical or mental infirmity which impairs Mr. Paup's ability to substantially perform his duties and which continues for a period of at least 180 consecutive days.

(2) "Cause" is defined in Mr. Paup's employment agreement as (i) a breach of trust by Mr. Paup, including, for example, but without limitation, commission of an act of moral turpitude, theft, embezzlement, self-dealing or insider trading; (ii) the unauthorized disclosure by Mr. Paup of confidential information of or relating to us; (iii) a material breach by Mr. Paup of his employment agreement; or (iv) any act of, or omission by, Mr. Paup which, in our reasonable judgment, amounts to a serious failure by Mr. Paup to perform his responsibilities or functions or in the exercise of his authority, which failure, in our reasonable judgment, rises to a level of gross nonfeasance, misfeasance or malfeasance.

(3) "Change of Control" is defined in Mr. Paup's employment agreement as (i) the acquisition (other than from us in any public offering or private placement of equity securities) by any person or entity of beneficial ownership of 30% or more of the combined voting power of our then-outstanding voting securities; or (ii) individuals who, as of December 31, 2007, were members of our Board of Directors (the "Original Board"), together with individuals approved by a vote of at least 2/3 of the individuals who were members of the Original Board and are then still members of our Board, cease for any reason to constitute at least 1/3 of our Board; or (iii) approval by our shareholders of a complete winding-up or an agreement for the sale or other disposition of all or substantially all of our assets.

(4) "Non-Renewal" is defined in Mr. Paup's employment agreement as the agreement coming to the end of the Term and not being extended or immediately succeeded by a new substantially similar employment agreement.

(5) "Termination at Will" is defined in Mr. Paup's employment agreement as Mr. Paup terminating his employment with us on written notice of at least 120 days in advance of the effective date of such termination.

Table of Contents

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Security Ownership of Certain Beneficial Owners and Management

The following table sets forth information regarding the security ownership, as of February 28, 2013, of those persons owning of record or known by us to own beneficially more than 5% of our common stock and of each of our Named Executive Officers and directors, and the shares of common stock held by all of our directors and executive officers as a group.

Name and Address of Beneficial Owner(1)	Shares Beneficially Owned(2)(3)	Percentage of Total Shares Outstanding(3)
Robert S. Ehrlich	1,409,688(4)	8.7%
Steven Esses	995,480(5)	6.2%
Thomas J. Paup	293,596(6)	1.8%
Dr. Jay M. Eastman	61,193(7)	*
Edward J. Borey	62,335(8)	*
Prof. Seymour Jones	61,193(9)	*
Elliot Sloyer	192,918(10)	1.2%
Michael E. Marrus	64,483(11)	*
Arthur S. Leibowitz	46,502(12)	*
All of our directors and executive officers as a group (9 persons)	3,147,388(13)	19.5%

* Less than one percent.

(1) The address of each named beneficial owner is in care of Arotech Corporation, 1229 Oak Valley Drive, Ann Arbor, Michigan 48108.

(2) Unless otherwise indicated in these footnotes, each of the persons or entities named in the table has sole voting and sole investment power with respect to all shares shown as beneficially owned by that person, subject to applicable community property laws.

(3) Based on 16,174,187 shares of common stock outstanding as of February 28, 2013. For purposes of determining beneficial ownership of our common stock, owners of options exercisable within sixty days are considered to be the beneficial owners of the shares of common stock for which such securities are exercisable. The percentage ownership of the outstanding common stock reported herein is based on the assumption (expressly required by the applicable rules of the Securities and Exchange Commission) that only the person whose ownership is being reported has exercised his options for shares of common stock.

(4) Consists of 899,111 shares held directly by Mr. Ehrlich, 166,667 shares of unvested restricted stock (the vesting of 66,667 of which is subject to future performance criteria), 328,767 shares held as part of a trust securing the payment of Mr. Ehrlich's severance package pursuant to the terms of our employment agreement with him, 3,571 shares held by Mr. Ehrlich's wife (in which shares Mr. Ehrlich disclaims beneficial ownership), and 11,527 shares held in Mr. Ehrlich's pension plan.

(5) Consists of 596,507 shares held directly by Mr. Esses, 125,000 shares of unvested restricted stock (the vesting of 50,000 of which is subject to future performance criteria), and 273,973 shares held as part of a trust securing the payment of Mr. Esses's severance package pursuant to the terms of our employment agreement with him.

(6) Consists of 253,596 shares held directly by Mr. Paup and 40,000 unvested restricted stock units (the vesting of which is subject to future performance criteria).

(7) Consists of 39,047 shares owned directly by Dr. Eastman and 22,146 shares of unvested restricted stock.

(8) Consists of 40,189 shares owned directly by Mr. Borey and 22,146shares of unvested restricted stock.

(9) Consists of 39,047 shares owned directly by Prof. Jones and 22,146 shares of unvested restricted stock.

(10) Consists of 179,772 shares owned directly by Mr. Sloyer and 22,146 shares of unvested restricted stock.

(11) Consists of 42,337 shares owned directly by Mr. Marrus and 22,146 shares of unvested restricted stock.

(12) Consists of 24,356 shares owned directly by Mr. Leibowitz and 22,146 shares of unvested restricted stock.

(13) Includes 424,543 shares of unvested restricted stock (the vesting of 116,667 of which is subject to future performance criteria), 602,740 shares of restricted stock held as part of trusts securing payment of severance, and 40,000 unvested restricted stock units (the vesting of which is subject to future performance criteria).

Table of Contents

Securities Authorized for Issuance Under Equity Compensation Plans

The following table sets forth certain information, as of December 31, 2012, with respect to our 2004, 2007 and 2009 equity compensation plans, as well as any other stock options and warrants previously issued by us (including individual compensation arrangements) as compensation for goods and services:

EQUITY COMPENSATION PLAN INFORMATION

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders(1)	12,228	$ 5.46	3,665,862

(1) For a description of the material features of grants of options and warrants other than options granted under our employee stock option plans, see Note 13.c. of the Notes to the Consolidated Financial Statements.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Officer Loans

On February 9, 2000, Mr. Ehrlich exercised 9,404 stock options. Mr. Ehrlich paid the exercise price of the stock options and certain taxes that we paid on his behalf by giving us a non-recourse promissory note due in 2025 in the amount of $329,163, bearing annual interest at 1% over the then-current federal funds rate announced from time to time by the *Wall Street Journal*, secured by the shares of our common stock acquired through the exercise of the options and certain compensation due to Mr. Ehrlich upon termination. As of December 31, 2012, the aggregate amount outstanding pursuant to this promissory note was $452,995.

On June 10, 2002, Mr. Ehrlich exercised 3,571 stock options. Mr. Ehrlich paid the exercise price of the stock options by giving us a non-recourse promissory note due in 2012 in the amount of $36,500, bearing simple annual interest at a rate equal to the lesser of (i) 5.75%, and (ii) 1% over the then-current federal funds rate announced from time to time, secured by the shares of our common stock acquired through the exercise of the options. As of December 31, 2012, the aggregate amount outstanding pursuant to this promissory note was $46,593, which was not repaid and was charged to paid in capital in the fourth quarter. Pursuant to the terms of the note the shares of stock securing the note were returned to us and retired in 2013 when the loan was not repaid.

Consulting Agreement with Sampen Corporation

We have a consulting agreement with Sampen Corporation that we executed in March 2005, effective as of January 1, 2005. Sampen is a New York corporation owned by members of Steven Esses's immediate family, and Mr. Esses is an employee of both the Company and of Sampen. The term of this consulting agreement as extended was to have expired on December 31, 2012, and is extended automatically for additional terms of two years each unless either Sampen or we terminate the agreement sooner. We had previously given notice to Sampen of our intention to terminate this agreement effective December 31, 2012, but by mutual agreement we withdrew this notice prior to its effectiveness.

Pursuant to the terms of our agreement with Sampen, Sampen provides one of its employees to us for such employee to serve as our President. We pay Sampen $12,800 per month, plus an annual bonus, on a sliding scale, in an amount equal to a minimum of 20% of Sampen's annual base compensation then in effect, up to a maximum of 75% of its annual base compensation then in effect if the results we actually attain for the year in question are 120% or more of the amount we budgeted at the beginning of the year. We also pay Sampen, to cover the cost of our use of Sampen's offices as an ancillary New York office and the attendant expenses and insurance costs, an amount equal to 16% of each monthly payment of base compensation.

Table of Contents

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

In accordance with the requirements of the Sarbanes-Oxley Act of 2002 and the Audit Committee's charter, all audit and audit-related work and all non-audit work performed by our independent accountants, BDO USA, LLP ("BDO"), is approved in advance by the Audit Committee, including the proposed fees for such work. The Audit Committee is informed of each service actually rendered.

- *Audit Fees.* Audit fees billed or expected to be billed to us by BDO for the audit of the financial statements included in our Annual Report on Form 10-K, and reviews of the financial statements included in our Quarterly Reports on Form 10-Q, for the years ended December 31, 2012 and 2011 totaled approximately $313,000 and $340,000, respectively.

- *Audit-Related Fees*. BDO billed or expected to bill us $420,000 and $172,000 (principally consultation related to mergers and acquisitions) for the fiscal years ended December 31, 2012 and 2011, respectively, for assurance and related services that are reasonably related to the performance of the audit or review of our financial statements.

- *Tax Fees.* BDO billed or expected to bill us an aggregate of $51,000 and $87,000 (including consultation related to mergers and acquisitions) for the fiscal years ended December 31, 2012 and 2011, respectively, for tax services, principally advice regarding the preparation of income tax returns.

- *All Other Fees.* BDO billed or expected to bill us an aggregate of zero for the fiscal years ended December 31, 2012 and 2011, for permitted non-audit services.

Applicable law and regulations provide an exemption that permits certain services to be provided by our outside auditors even if they are not pre-approved. We have not relied on this exemption at any time since the Sarbanes-Oxley Act was enacted.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Arotech Corporation:

Ann Arbor, Michigan

We have audited the accompanying consolidated balance sheets of Arotech Corporation and subsidiaries (the "Company") as of December 31, 2012 and 2011 and the related consolidated statements of operations, changes in stockholders' equity and cash flows for the years then ended. In connection with our audits of the financial statements, we have also audited the financial statement schedule listed in the accompanying index. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and schedule. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Arotech Corporation and subsidiaries at December 31, 2012 and 2011, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

Also, in our opinion, the financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

/s/ BDO USA, LLP

Table of Contents

AROTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 1:– GENERAL

a. Corporate structure:

Arotech Corporation ("Arotech") and its wholly-owned subsidiaries (the "Company") provide defense and security products for the military, law enforcement and homeland security markets, including advanced zinc-air and lithium batteries and chargers, and multimedia interactive simulators/trainers. The Company operates primarily through its wholly-owned subsidiaries FAAC Incorporated ("FAAC"), based in Ann Arbor, Michigan with locations in Royal Oak, Michigan and Orlando, Florida; Electric Fuel Battery Corporation ("EFB"), based in Auburn, Alabama; and Epsilor-Electric Fuel Ltd. ("Epsilor-EFL"), based in Dimona, Israel with a location in Beit Shemesh, Israel. EFB and Epsilor-EFL form the Company's Battery and Power Systems Division. IES Interactive Training ("IES") and Realtime Technologies ("RTI") were merged with FAAC in 2007 and 2010, respectively, to create Arotech's Training and Simulation Division. Pursuant to a management decision in the fourth quarter of 2011 and sale in 2012, the Company's Armor Division, consisting of M.D.T. Protective Industries, Ltd. ("MDT"), based in Lod, Israel, and MDT Armor Corporation ("MDT Armor"), based in Auburn, Alabama, along with the trade name of Armour of America Incorporated ("AoA"), are reflected as discontinued operations for all periods presented.

b. Impairment of goodwill and other long-lived assets:

Goodwill and indefinite-lived intangible assets are tested for impairment at least annually and between annual tests in certain circumstances, and written down when impaired. Goodwill is tested for impairment by comparing the fair value of the Company's reporting units with their carrying value. All of the Company's continuing reporting units have goodwill. Fair value is determined using discounted cash flows. Significant estimates used in the methodologies include estimates of future cash flows, future short-term and long-term growth rates and weighted average cost of capital.

In September 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2011-08, "Intangibles—Goodwill and Other (Topic 350): Testing Goodwill for Impairment." ASU 2011-08 amends the guidance in Accounting Standards Codification ("ASC") 350, Intangibles – Goodwill and Other. Under the revised guidance, when testing goodwill for impairment, the Company has the option of performing a qualitative assessment in order to determine whether it needs to calculate the fair value of a reporting unit. If the Company determines, on the basis of qualitative factors, that it is more likely than not that the fair value of the reporting unit is greater than the carrying amount, the two-step impairment test would not be required. The Company early adopted the ASU in 2011.

In both 2012 and 2011, the Company determined, using qualitative factors, that the goodwill for the Training and Simulation reporting unit was not impaired. In both 2012 and 2011, the Company completed the first step of the quantitative analysis of the goodwill in the Battery and Power Systems reporting unit, in which it computed a fair value of that reporting unit. Because the fair value was greater than the carrying value of the unit at the measurement date, the second step of the quantitative impairment assessment was not required and no goodwill was impaired. Although the valuation for Battery and Power Systems Division exceeded the reporting unit's carrying value by 14%, the Company will continue to monitor the actual results of the reporting unit versus the forecast used for the impairment review and reevaluate the goodwill as required. Additionally, the Company performed a complete long-lived asset impairment review of the discontinued Armor reporting unit in 2011 that resulted in the full impairment of that unit's goodwill ($1,792,339) and property and equipment ($1,487,219), as reported in discontinued operating results.

Although the cumulative carrying value of the Company's reporting units exceeded the Company's market value as determined by its stock price as of the impairment review, management nevertheless determined that the fair value of the Training and Simulation and Battery and Power Systems reporting units exceeded their respective carrying values, and therefore, there would be no impairment charges relating to goodwill for these reporting units. Several factors contributed to this determination:

- The long term horizon of the valuation process versus a short term valuation using current market conditions;
- The valuation by individual business segments versus the market share value based on the Company as a whole, including unallocated corporate costs;

- The Company’s stock is thinly traded and widely dispersed with minimal institutional ownership, and thus not followed by major market analysts, leading management to conclude that the market in the Company’s securities was not acting as an informationally efficient reflection of all known information regarding the Company and thereby serves to understate their value; and

- Control premiums reflected in the reporting unit fair values but not in the Company’s stock price.

In U.S. dollars

NOTE 1:– GENERAL (Cont.)

The Company's long-lived assets and amortizable identifiable intangibles are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of the carrying amount of assets to be held and used is measured by a comparison of the carrying amount of the assets to the future undiscounted cash flows expected to be generated by the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets.

c. Related parties

The Company has had a consulting agreement with Sampen Corporation since 2005. Sampen is a New York corporation owned by members of the immediate family of one of the Company's executive officers, and this executive officer is an employee of both the Company and of Sampen. The term of this consulting agreement was extended automatically for an additional term of two years until December 31, 2014, unless either Sampen or the Company terminates the agreement sooner.

Pursuant to the terms of the Company's agreement with Sampen, Sampen provides one of its employees to the Company for such employee to serve as the Company's President. The Company pays Sampen $12,800 per month, plus an annual bonus, on a sliding scale, in an amount equal to a minimum of 20% of Sampen's annual base compensation then in effect, up to a maximum of 75% of its annual base compensation then in effect if the results the Company actually attained for the year in question are 120% or more of the amount the Company budgeted at the beginning of the year. The Company also pays Sampen to cover the cost of the Company's use of Sampen's offices as an ancillary New York office and the attendant expenses and insurance costs, an amount equal to 16% of each monthly payment of base compensation.

During the years ended December 31, 2012 and 2011, the Company incurred a total of $185,856 each year related to Sampen.

On February 9, 2000, Mr. Ehrlich, the Company's Chief Executive Officer, exercised 9,404 stock options. Mr. Ehrlich paid the exercise price of the stock options and certain taxes that the Company paid on his behalf by giving the Company a non-recourse promissory note due in 2025 in the amount of $329,163, bearing annual interest at 1% over the then-current federal funds rate announced from time to time by the *Wall Street Journal*, secured by the shares of the Company's common stock acquired through the exercise of the options and certain compensation due to Mr. Ehrlich upon termination. As of December 31, 2012 and 2011, the aggregate amount outstanding pursuant to this promissory note was $452,995. Additionally, there is a former employee with the same arrangement.

On June 10, 2002, Mr. Ehrlich exercised 3,571 stock options. Mr. Ehrlich paid the exercise price of the stock options by giving the Company a non-recourse promissory note due in 2012 in the amount of $36,500, bearing simple annual interest at a rate equal to the lesser of (i) 5.75%, and (ii) 1% over the then-current federal funds rate announced from time to time, secured by the shares of the Company's common stock acquired through the exercise of the options. As of December 31, 2012, the aggregate amount outstanding pursuant to this promissory note was $46,593, which was not repaid and was charged to paid in capital in the fourth quarter of 2012. Pursuant to the terms of the note, the shares of stock securing the note were returned to the Company and retired in 2013 when the loan was not repaid.

d. Discontinued operations

In December 2011, the Company's Board of Directors approved management's plan to sell the Armor Division. On March 8, 2012, the Company signed a non-binding letter of intent to sell the division to an Israeli public company. The sale of the assets was completed in June 2012 at a cash purchase price of $50,000. Unless otherwise indicated, discontinued operations are not included in the Company's reported results.

Unless otherwise noted, amounts and disclosures throughout the Notes to Consolidated Financial Statements relate to the Company's continuing operations. The assets and liabilities of the discontinued operation after impairment, the revenues and expenses of the discontinued operation and a list of unusual expenses relating to the discontinued operation are shown below.

The Company retained the facility used by the Armor operations and currently leases it to the buyer of those operations under a three year operating lease for $9,300 per month. The Company is marketing the facility for sale (it is included within Discontinued Operations), and it has no recorded book value as of December 31, 2012. The Company remains responsible for the outstanding mortgage on this facility, which was $950,000 as of December 31, 2012 (as further described in Note 11), and which it expects to either transfer with the sale of the facility or pay off with the related sales proceeds plus other available cash resources as necessary

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States ("U.S. GAAP").

a. Use of estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

b. Financial statements in U.S. dollars:

A majority of the revenues of the Company are generated in U.S. dollars ("dollars"). In addition, a substantial portion of the Company's costs are incurred in dollars. Management believes that the dollar is the primary currency of the economic environment in which the Company operates. Thus, the functional and reporting currency of the Company including most of its subsidiaries is the dollar. Accordingly, monetary accounts maintained in currencies other than dollars are remeasured into dollars, with resulting gains and losses reflected in the consolidated statements of operations as financial income or expenses, as appropriate.

The majority of transactions of MDT (discontinued) and Epsilor-EFL are in New Israel Shekels ("NIS") and a substantial portion of MDT's and Epsilor-EFL's costs is incurred in NIS. Management believes that the NIS is the functional currency of MDT and Epsilor-EFL. Accordingly, the financial statements of MDT and Epsilor-EFL have been translated into dollars. All balance sheet accounts have been translated using the exchange rates in effect at the balance sheet date. Statement of operations amounts have been translated using the weighted average exchange rate for the period. The resulting translation adjustments are reported as a component of accumulated other comprehensive income (loss) in stockholders' equity. All accumulated other comprehensive income related to the Armor Division, in the amount of $189,969, was recorded as an adjustment to the loss on sale in discontinued operations. As of December 31, 2012, all accumulated other comprehensive income represents foreign currency translation adjustments.

c. Principles of consolidation:

The consolidated financial statements include the accounts of Arotech and its wholly owned subsidiaries. Intercompany balances and transactions have been eliminated upon consolidation.

d. Cash equivalents:

Cash equivalents are short-term highly liquid investments that are readily convertible to cash with maturities of three months or less when acquired.

Table of Contents

AROTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

e. Restricted collateral deposits:

Restricted collateral deposits are primarily invested in highly liquid deposits which are used as a security for the Company's performance guarantees at FAAC and Epsilor-EFL.

f. Marketable securities:

The Company determines the appropriate classification of its investments in debt and equity securities at the time of purchase and reevaluates such determinations at each balance sheet date. Investment in securities are classified as available-for-sale and stated at fair value, with unrealized gains and losses reported in accumulated other comprehensive income (loss), a separate component of stockholders' equity. Realized gains and losses on sales of investments, as determined on a specific identification basis, are included in the consolidated statements of operations. The Company did not hold any marketable securities at either December 21, 2012 or 2011.

g. Inventories:

Inventories are stated at the lower of cost or market value. Inventory write-offs and write-down provisions are provided to cover risks arising from slow-moving items or technological obsolescence and for market prices lower than cost. The Company periodically evaluates the quantities on hand relative to current and historical selling prices and historical and projected sales volume. Based on this evaluation, provisions are made to write inventory down to its market value. In 2012 and 2011, the Company wrote off $57,000 and $145,000, respectively, of obsolete inventory, which has been included in the cost of revenues.

Cost is determined as follows:

Raw and packaging materials – by the average cost method or FIFO.

Work in progress – represents the cost of manufacturing with additions of allocable indirect and direct manufacturing costs.

Finished products – on the basis of direct manufacturing costs with additions of allocable indirect manufacturing costs.

h. Property and equipment:

Property and equipment are stated at cost net of accumulated depreciation and investment grants received from the State of Israel for investments in fixed assets under the Law for the Encouragement of Capital Investments, 5719-1959 (the "Investments Law"). The Company did not receive any investment grants in 2012 and 2011.

Depreciation is calculated by the straight-line method over the following estimated useful lives of the assets:

	Depreciable life (in years)
Computers and related equipment	3 to 5
Motor vehicles	5 to 7
Office furniture and equipment	10
Machinery, equipment and installations	10
Buildings	30
Land	Not depreciated
Leasehold improvements	Shorter of the term of the lease or the life of the asset

Demo inventory	5

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

i. Revenue recognition:

The Company is a defense and security products and services company, engaged in two business areas: interactive simulation for military, law enforcement and commercial markets; and batteries and charging systems for the military. During 2012 and 2011, the Company recognized revenues (i) from the sale and customization of interactive training systems and from the maintenance services in connection with such systems (Training and Simulation Division); (ii) from the sale of batteries, chargers and adapters to the military, and under certain development contracts with the U.S. Army (Battery and Power Systems Division); and (iii) from the sale of lifejacket lights (Battery and Power Systems Division).

Revenues from products sold by the Battery and Power Systems Division are recognized when persuasive evidence of an agreement exists, delivery has occurred, the fee is fixed or determinable, collectability is probable, and no further obligation remains. Typically revenue is recognized, per the contract, when the transaction is entered into the U.S. Government's Wide Area Workflow system, which occurs after the products have been accepted at the plant or when shipped. Sales to other entities are recorded in accordance with the contract, either when shipped or delivered. Normally, in this division, there are no further obligations that would preclude the recognition of revenue.

Revenues from contracts in the Training and Simulation Division that involve customization of the system to customer specifications are recognized using contract accounting on a percentage of completion method, in accordance with the "Input Method." The amount of revenue recognized is based on the percentage to completion achieved. The percentage to completion is measured by monitoring progress using records of actual time, materials and other costs incurred to date in the project compared to the total estimated project requirement. Estimates of total project requirements are based on prior experience of customization, delivery and acceptance of the same or similar technology and are reviewed and updated regularly by management. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are first determined, in the amount of the estimated loss on the entire contract. Normally there are no further obligations that would preclude the recognition of revenue.

The Company believes that the use of the percentage of completion method is appropriate as the Company has the ability to make reasonably dependable estimates of the extent of progress towards completion, contract revenues and contract costs. In addition, contracts executed include provisions that clearly specify the enforceable rights regarding services to be provided and received by the parties to the contracts, the consideration to be exchanged and the manner and the terms of settlement, including in cases of terminations for convenience. In all cases, the Company expects to perform its contractual obligations and its customers are expected to satisfy their obligations under the contract.

Revenues from simulators that do not require significant customization are recognized when persuasive evidence of an agreement exists, delivery has occurred, no significant obligations with regard to implementation remain, the fee is fixed or determinable and collectability is probable.

Maintenance and support revenue included in multiple element arrangements is deferred and recognized on a straight-line basis over the term of the maintenance and support services. Revenues from training are recognized when it is performed. The Vendor Specific Objective Evidence ("VSOE") of fair value of the maintenance, training and support services is determined based on the price charged when sold separately or when renewed.

Unbilled receivables include cost and gross profit earned in excess of billing.

Deferred revenues include unearned amounts received under maintenance and support services, customer prepayments and billing in excess of costs and estimated earnings on uncompleted contracts.

j. Warranty:

The Company typically offers a one to two year warranty for most of its products. The specific terms and conditions of those warranties vary depending upon the product sold and country in which the Company does business. The Company estimates the costs that may be incurred under its basic limited warranty, including parts and labor, and records deferred revenue in the amount of such costs at the time product revenue is recognized. Factors that affect the Company's warranty costs include the number of installed units, historical and anticipated rates of warranty claims, and cost per claim. The Company periodically assesses the adequacy of its reserves and adjusts the amounts as necessary. (See Note 17.)

Table of Contents

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

k. Research and development cost:

The Company capitalizes certain software development costs, subsequent to the establishment of technological feasibility. Based on the Company's product development process, technological feasibility is established upon the completion of a working model or a detailed program design. Research and development costs incurred in the process of developing product improvements or new products are generally charged to expenses as incurred. Significant costs incurred by the Company between completion of the working model or a detailed program design and the point at which the product is ready for general release have been capitalized. Capitalized software costs will be amortized by the greater of the amount computed using: (i) the ratio that current gross revenues from sales of the software bears to the total of current and anticipated future gross revenues from sales of that software, or (ii) the straight-line method over the estimated useful life of the product (one to three years). The Company assesses the net realizable value of this intangible asset on a regular basis by determining whether the amortization of the asset over its remaining life can be recovered through undiscounted future operating cash flows from the specific software product sold. Based on its most recent analyses, management believes that no impairment of capitalized software development costs exists as of December 31, 2012.

In 2012 and 2011, the Training and Simulation Division capitalized approximately $335,000 and $406,000, respectively, in software development costs that will be amortized on a straight-line method over 2 years, the useful life of the software.

l. Income taxes:

The Company accounts for income taxes under the asset and liability method, whereby deferred tax assets and liability account balances are determined based on tax credit carryforwards and differences between the financial reporting and the tax basis of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company provides a valuation allowance, if necessary, to reduce deferred tax assets to their estimated realizable value.

The Company has adopted the provisions of the FASB ASC 740-10. FASB ASC 740-10 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken in a tax return. The Company must determine whether it is "more-likely-than-not" that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets the more-likely-than-not recognition threshold, the position is measured to determine the amount of benefit to recognize in the financial statements. Uncertain tax positions require determinations and estimated liabilities to be made based on provisions of the tax law which may be subject to change or varying interpretation. If the Company's determinations and estimates prove to be inaccurate, the resulting adjustments could be material to the Company's future financial statements.

m. Concentrations of credit risk:

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, restricted collateral deposits and trade receivables. Cash and cash equivalents are invested mainly in U.S. dollar deposits with major Israeli and U.S. banks. Such deposits in the U.S. may be in excess of insured limits and are not insured in other jurisdictions. Management believes that the financial institutions that hold the Company's investments are financially sound and, accordingly, minimal credit risk exists with respect to these investments.

The trade receivables of the Company are mainly derived from sales to customers located primarily in the United States and Israel along with the countries listed in footnote 16.c. Management believes that credit risks are moderated by the diversity of its end customers and geographical sales areas. The Company performs ongoing credit evaluations of its customers' financial condition. An allowance for doubtful accounts is determined with respect to those accounts that the Company has determined to be doubtful of collection.

Table of Contents

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

The Company had no off-balance-sheet concentration of credit risk such as foreign exchange contracts, option contracts or other foreign hedging arrangements.

n. Basic and diluted net loss per share:

Basic net loss per share is computed based on the weighted average number of shares of common stock outstanding during each year. Diluted net loss per share is computed based on the weighted average number of shares of common stock outstanding during each year, plus dilutive common stock equivalents related to outstanding stock options, non-vested restricted stock, warrants and convertible debt. All common stock equivalents have been excluded from the calculation of the diluted net loss per common share because all such securities are anti-dilutive for all periods presented. The total weighted average number of shares related to the outstanding common stock equivalents excluded from the calculations of diluted net loss per share was 614,968 and 701,411 for the years ended December 31, 2012 and 2011, respectively.

o. Accounting for stock-based compensation:

Stock-based awards to employees are recognized as compensation expense based on the calculated fair value on the date of grant. The Company determines the fair value of options using the Black-Scholes option pricing model. This model requires subjective assumptions, including future stock price volatility and expected term.

The Company did not grant any options in 2012 or 2011. The Company assumed a 20% forfeiture rate on existing options for both years. The Company typically uses a 5-10% forfeiture rate for restricted stock and restricted stock units and adjusts both forfeiture rates based on historical forfeitures. Each restricted stock unit is equal to one share of Company stock and is redeemable only for stock.

p. Fair value of financial instruments:

The following methods and assumptions were used by the Company in estimating their fair value disclosures for financial instruments using the required three-tier value hierarchy, which prioritizes the inputs used in measuring fair value as follows: (Level 1) observable inputs such as quoted prices in active markets; (Level 2) inputs other than the quoted prices in active markets that are observable either directly or indirectly; and (Level 3) unobservable inputs in which there is little or no market data, which may require the Company to develop its own assumptions.

The carrying amounts of cash and cash equivalents, restricted collateral deposits, trade and other receivables, short-term bank credit, and trade payables approximate their fair value due to the short-term maturity of such instruments.

The fair value of available for sale securities was based on the quoted market price.

The fair values of long-term promissory notes are estimated by discounting the future cash flows using current interest rates for loans of similar terms and maturities. The carrying amount of the long-term liabilities approximates their fair value (Level 3).

q. Severance pay:

The Company’s liability for severance pay for its Israeli employees is calculated pursuant to Israeli severance pay law based on the most recent salary of the employees multiplied by the number of years of employment as of the balance sheet date. Israeli employees are entitled to one month’s salary for each year of employment, or a portion thereof. The Company’s liability for all of its Israeli employees is fully provided by monthly deposits with severance pay funds held by insurance companies on behalf of the employees, insurance policies and by accrual. The fair value of these funds, which are considered Level 2 fair value measurements, is recorded as an asset in the Company’s balance sheet.

Table of Contents

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

In addition, according to certain employment agreements, the Company is obligated to provide for a special severance pay in addition to amounts due to certain employees pursuant to Israeli severance pay law. As of December 31, 2012, the Company had made a provision of $217,733 for this special severance pay. As of December 31, 2012 and 2011, the unfunded severance pay in that regard amounted to $1,267,844 and $1,050,111, respectively.

Pursuant to the terms of the respective employment agreements between the Company and its Chief Executive Officer and its President, funds to secure payment of their respective contractual severance amounts are to be deposited for their benefit, with payments to be made pursuant to an agreed-upon schedule. These funds continue to be owned by the Company, which benefits from all gains and bears the risk of all losses resulting from investments of these funds.

The deposited funds include profits and losses accumulated up to the balance sheet date. The deposited funds may be withdrawn only upon the fulfillment of the obligation pursuant to Israeli severance pay law or labor agreements. The fair value of the deposited funds is based on the cash surrender value of these policies and includes immaterial profits.

In April 2009, the Company, with the agreement of its Chief Executive Officer and its President, funded an additional portion of their severance security by means of issuing to them, in trust, restricted stock having a value (based on the closing price of the Company's stock on the Nasdaq Stock Market on the date on which the executives and the Company's board of directors agreed to this arrangement) of $440,000, a total of 602,740 shares. The Company agreed with the executives that the economic risk of gain or loss on these shares is to be borne by them. Should they leave the Company's employ under circumstances in which they are not entitled to their severance package (primarily, termination for Cause as defined in their employment agreement), these shares would be returned to the Company for cancellation and because of this, these shares are not included in the basic EPS calculation.

Severance expenses for continuing operations for the years ended December 31, 2012 and 2011 amounted to $19,216 and $249,010, respectively.

r. Advertising costs:

The Company records advertising costs as incurred. Advertising expense for the years ended December 31, 2012 and 2011 was approximately $155,887 and $166,701, respectively.

s. New accounting pronouncements:

Effective January 1, 2011, the Company adopted ASU 2009-13, "Revenue Recognition (Accounting Standards Codification ASC 605 – Multiple-Deliverable Revenue Arrangements") and ASU 2009-14, "Software ASC 985 – Certain Revenue Arrangements That Include Software Elements." ASU 2009-13 modifies the requirements that must be met for an entity to recognize revenue from the sale of a delivered item that is part of a multiple-element arrangement when other items have not yet been delivered. ASU 2009-13 eliminates the requirement that all undelivered elements must have either: i) VSOE or ii) third-party evidence ("TPE"), before an entity can recognize the portion of an overall arrangement consideration that is attributable to items that already have been delivered. In the absence of VSOE or TPE of the standalone selling price for one or more delivered or undelivered elements in a multiple-element arrangement, entities are required to estimate the selling prices of those elements. Overall arrangement consideration is allocated to each element (both delivered and undelivered items) based on their relative selling prices, regardless of whether those selling prices are evidenced by VSOE or TPE or are based on the entity's estimated selling price. The residual method of allocating arrangement consideration has been eliminated. ASU 2009-14 modifies the software revenue recognition guidance to exclude from its scope tangible products that contain both software and non-software components that function together to deliver a product's essential functionality. Additionally, ASU 2009-14 provides guidance on how a vendor should allocate arrangement consideration to deliverables in an arrangement that includes both tangible products and software that is not essential to the product's functionality. ASU 2009-14 requires the same expanded disclosures that are included within ASU 2009-13. The impact of adoption did not have a significant impact on the Company's consolidated financial statements.

Table of Contents

In U.S. dollars

NOTE 2:– SIGNIFICANT ACCOUNTING POLICIES (Cont.)

In June 2011, the FASB issued ASU No. 2011-05, “Comprehensive Income (Topic 220) — Presentation of Comprehensive Income.” ASU 2011-05 eliminates the current option to report other comprehensive income and its components in the statement of changes in stockholders’ equity and requires that all non-owner changes in stockholders’ equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The Company adopted the disclosure standard in January 2012.

In July 2012, the FASB issued ASU 2012-02 “Intangibles - Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment” (“ASU 2012-02”). ASU 2012-02 permits entities to first assess qualitative factors to determine whether it is more likely than not that the fair value of an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test. Under the amendments in ASU 2012-02, an entity is not required to calculate the fair value of an indefinite-lived intangible asset unless it determines that it is more likely than not that the fair value of the asset is less than its carrying amount. An entity also will have the option to bypass the qualitative assessment for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. ASU 2012-02 is effective for interim and annual indefinite-lived intangible asset impairment tests performed for fiscal years beginning on or after September 15, 2012, with early adoption permitted. The Company’s adoption of ASU 2012-02 is not expected to have a material impact on its consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. This ASU is intended to improve the reporting of reclassifications out of accumulated other comprehensive income. The ASU requires an entity to report, either on the face of the statement where net income is presented or in the notes to the financial statements, the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. GAAP to be reclassified in their entirety to net income. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP that provide additional detail about those amounts. The amendments in this ASU apply to all entities that issue financial statements that are presented in conformity with U.S. GAAP and that report items of other comprehensive income. For public entities, the amendments in this ASU are effective prospectively for reporting periods beginning after December 15, 2012. The impact of adoption of this ASU by the Company is not expected to be material.

No other new accounting pronouncements issued or effective during 2012 have had or are expected to have a significant impact on the Company’s consolidated financial statements.

t. Share repurchase:

In February 2009, the Company’s Board of Directors authorized the repurchase in the open market or in privately negotiated transactions of up to $1,000,000 of the Company’s common stock. Through December 31, 2012, the Company repurchased 638,611 shares for a total of $869,931. The repurchase program, which expires on August 13, 2013, is subject to management’s discretion.

u. Reclassification:

Prior period amounts are reclassified, when necessary, to conform to the current period presentation.

NOTE 7:– GOODWILL AND OTHER INTANGIBLE ASSETS, NET (Cont.)

Amortization expense amounted to $1,185,539 and $1,905,097 for the years ended December 31, 2012 and 2011, respectively, including amortization of capitalized software costs of $460,085 and $603,393, respectively.

c. Estimated amortization expenses for the years shown is as follows:

Year ending December 31,		
2013	$	1,089,442
2014		231,160
2015		27,000
2016		–
Total	$	1,347,602

Goodwill and other intangible assets are adjusted on a quarterly basis for any change due to currency fluctuations and any variation is included in the accumulated other comprehensive income on the Balance Sheet.

NOTE 8:– SHORT-TERM BANK CREDIT AND LOANS

The Company has $10,723,000 authorized in credit lines from certain banks, of which $723,000 is denominated in NIS ($168,000 was outstanding as of December 31, 2012) and carries various interest rates up to 8.2%. The primary line of $10,000,000, subject to borrowing base limitations and outstanding letters of credit, is denominated in U.S. dollars. This line carries an interest rate of 30 day LIBOR plus 375 basis points which was 3.96% as of December 31, 2012. As of December 31, 2012, $9,620,000 was borrowed under the Company’s primary line. Approximately $380,000 of credit on the primary line was available at December 31, 2012. The Company’s primary credit facility and the Company’s building mortgage with the same bank contains certain covenants, including limiting the Company’s distributions to Arotech affiliates to $4,000,000, and meeting a Fixed Charge Coverage Ratio of not less than 1.1 to 1.0. The Company was in compliance with both of these covenants at December 31, 2012. Additionally, the loan is collateralized by the assets of Arotech and its subsidiaries.

In February 2013, to support the Company’s growth, our primary bank increased the Company’s credit line by 50%, from $10,000,000 to $15,000,000, and the expiration of the credit line was extended to May 31, 2015. The new credit agreement carries an interest rate of 30 day LIBOR plus 375 basis points and an unused line of credit fee of 0.35%. The new credit agreement also contains certain covenants, which are measured on a rolling twelve-month basis, limiting the Maximum Increase in Net Advance to Affiliates to less than 90% of EBITDA and meeting a Fixed Charge Coverage Ratio of not less than 1.1 to 1.0. It is expected that the Company will be in compliance with these covenants during 2013.

Previously, the Company had a $10.0 million credit facility with another bank that expired April 30, 2012 and a building mortgage with the same bank which contained certain covenants, including limiting the Company’s distributions to Arotech affiliates, limiting the Company’s operating cash flow to total fixed charges to a ratio of 1.25 to 1.00 and limiting the Company’s total liabilities to adjusted tangible net worth to a ratio of 2.50 to 1.00.

NOTE 9:– OTHER ACCOUNTS PAYABLE AND ACCRUED EXPENSES

The following is a summary of other accounts payable and accrued expenses as of December 31, 2012 and 2011:

	December 31,			
	2012		**2011**	
Employees and payroll accruals	$	3,003,048	$	2,083,209
Accrued vacation pay		811,910		758,093

Accrued expenses	369,800	530,079
Government authorities	68,152	262,752
Total	$ 4,252,910	$ 3,634,133

Table of Contents

In U.S. dollars

NOTE 10:– COMMITMENTS AND CONTINGENT LIABILITIES

a. Royalty commitments:

Under Epsilor-EFL's research and development agreements with the Office of the Chief Scientist ("OCS"), and pursuant to applicable laws, Epsilor-EFL is required to pay royalties at the rate of 3%-3.5% of net sales of products developed with funds provided by the OCS, up to an amount equal to 100% of research and development grants received from the OCS. (Amounts due in respect of projects approved after 1999 also bear interest at the LIBOR rate.) Epsilor-EFL is obligated to pay royalties only on sales of products in respect of which OCS participated in their development. Should the project fail, Epsilor-EFL will not be obligated to pay any royalties or refund the grants.

Royalties paid or accrued for the years ended December 31, 2012 and 2011 to the OCS amounted to zero and $1,946, respectively.

b. Lease commitments:

The Company rents its facilities under various operating lease agreements, which expire on various dates through 2018. The minimum rental payments under non-cancelable operating leases are as follows:

Minimum rental payments	December 31
2013	$ 860,306
2014	441,333
2015	362,624
2016	366,959
2017	371,294
Thereafter	98,266
Total	$ 2,500,782

Total rent expenses for the years ended December 31, 2012 and 2011 were $924,864 and $901,216, respectively.

The existing capital leases have terms from 3 to 5 years and are for equipment purchases. The equipment is classified under machinery and equipment in property and equipment.

The table below details the original value, accumulated depreciation and net book value of the assets included.

Leased Assets	December 31,	
	2012	**2011**
Equipment	$ 77,654	$ 77,654
Less: Accumulated depreciation	(77,654)	(52,164)
Net book value	$ –	$ 25,490

There are no remaining capital lease obligations.

c. Guarantees:

The Company obtained bank guarantees in the amount of $427,783 in connection with (i) obligations of one of the Company's subsidiaries to the Israeli customs authorities, and (ii) the obligation of one of the Company's subsidiaries to secure the return of products loaned to the Company from one of its customers.

d. Liens:

As security for compliance with the terms related to the investment grants from the State of Israel, Epsilor-EFL has registered floating liens (that is, liens that apply not only to assets owned at the time but also to after-acquired assets) on all of its assets, in favor of the State of Israel.

Table of Contents

AROTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 10:– COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)

The Company has $723,000 in credit liens collateralized by the assets of the Company and guaranteed by the Company.

Epsilor-EFL has recorded a lien on all of its assets in favor of its banks to secure lines of credit. In addition Epsilor-EFL has a specific pledge on assets in respect of which government guaranteed loans were given.

e. Litigation and other claims:

As of the date of this filing, there were no material pending legal proceedings against the Company.

NOTE 11:– LONG TERM DEBT

a. Subordinated convertible notes due August 15, 2011:

In August 2008, the Company issued $5,000,000 in 10% subordinated convertible notes due August 15, 2011 (the “Notes”). The Notes were convertible at the option of the holders at a fixed conversion price of $2.24. The principal amount of the Notes was payable over a period of three years, with the principal amount being amortized in eleven payments payable at the Company’s option in cash and/or stock, by requiring the holders to convert a portion of their Notes into shares of the Company’s common stock, provided certain conditions were met. The failure to meet such conditions could have made the Company unable to pay its Notes, causing it to default.

As of December 31, 2011, the Notes were paid in full and all associated warrants had expired.

b. Mortgage Note, Ann Arbor, Michigan:

In July 2011, the Simulation and Training Division purchased a building for $1,500,000 containing both office and lab space. The building was financed with a $1,100,000 mortgage loan that was obtained through the Company’s primary bank. The note requires a payment (principal and interest) of approximately $8,000 per month at an interest rate of LIBOR plus 375 basis points per annum with a balloon payment due in May 2017. In December 2012, FAAC leased surplus space of the purchased building to a non-profit organization for $6,300 per month as office space for a term of 10 years with an option to terminate the lease with a one year prior notice in May 2018. (See Note 8 for the relevant covenants relating to the mortgage.)

c. Mortgage Note, Auburn, Alabama:

In March 2007, the Company purchased space for the now-discontinued Armor Division in Auburn, Alabama for approximately $1,100,000 pursuant to a seller-financed secured purchase money mortgage. Half the mortgage is payable over ten years in equal monthly installments based on a 20-year amortization of the full principal amount, and the remaining half is payable at the end of ten years in a balloon payment. The note requires a payment (principal and interest) of approximately $9,300 per month at an interest rate of 8.0% per annum. The Company is currently leasing this building to the buyer of the Armor Division for approximately $9,300 per month under a three year lease.

d. Term loans, Israel:

In February 2012, the Company negotiated a short term loan with a local bank in Israel. The funds were released to the Company in three tranches of $250,000 each in February, March and April 2012. The interest rate for this loan is prime plus 1.2% and will be repaid in three tranches in February, March and April 2013. The balance of this loan as of December, 2012 was $811,834. The Company has additional long term debt outstanding of approximately $2,000 for a vehicle loan. This amount is payable in 2013.

e. Minimum loan payments:

Minimum loan payments	Continuing	Discontinued
2013	$ 888,839	$ 59,287
2014	55,000	40,382
2015	55,000	43,734
2016	55,000	47,356
2017	55,000	781,341
Thereafter	772,917	–
Total	$ 1,881,756	$ 972,100

NOTE 12:– COSTS AND ESTIMATED EARNINGS ON UNCOMPLETED CONTRACTS

Billings in excess of costs generated under the percentage-of-completion method are recorded as deferred revenues until the revenue recognition criteria are met. Deferred revenues include unearned amounts received under maintenance and support services, customer deposits of $16,202 and $55,201 for 2012 and 2011 respectively, and billing in excess of costs and estimated earnings on uncompleted contracts.

The following is a summary of the costs and estimated earnings on uncompleted contracts as of December 31, 2012 and 2011. Open contracts are expected to be completed in the following year:

	Year ended December 31,	
	2012	**2011**
Costs incurred on uncompleted contracts	$ 111,128,026	$ 82,310,317
Estimated earnings	18,649,855	18,064,955
	129,777,881	100,375,272
Less billings to date	(117,503,299)	(96,059,555)
Total	$ 12,274,582	$ 4,315,717
Unbilled receivables	$ 13,374,004	$ 5,722,781
Billings in excess of costs (included in deferred revenues)	(1,099,422)	(1,407,064)
Total	$ 12,274,582	$ 4,315,717

NOTE 13:– STOCKHOLDERS' EQUITY

a. Stockholders' rights:

The Company's shares confer upon the holders the right to receive notice to participate and vote in the general meetings of the Company and right to receive dividends, if and when declared.

b. Warrants:

As part of a securities purchase agreement entered into in August 2008, the Company issued to the purchasers of its 10% senior convertible notes due August 15, 2011, warrants to purchase an aggregate of 558,036 shares of common stock at any time prior to August 15, 2011 at a price of $2.24 per share. Due to certain exercise price reset provisions, the warrants were accounted for as liabilities at fair value with changes in fair value reflected as financial income or expense.

The Notes were fully paid and the warrants expired unexercised on August 15, 2011.

Table of Contents

AROTECH CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 13:– STOCKHOLDERS' EQUITY (Cont.)

c. The Company has adopted the following stock award plans, whereby options may be granted for purchase of shares of the Company's common stock and where restricted shares and restricted stock units may be granted and approved by the Board of Directors. Each restricted stock unit is equal to one share of Company stock and is redeemable only for stock. Under the terms of the award plans, the Board of Directors or the designated committee grants options, restricted stock and restricted stock units. The Board of Directors or the designated committee also determines the vesting period and the exercise terms:

1. 2007 Non-Employee Director Equity Compensation Plan – 750,000 shares reserved for issuance, of which 400,307 were available for future grants to outside directors as of December 31, 2012.

2. 2009 Equity Incentive Plan – 5,000,000 shares reserved for issuance, of which 3,265,555 were available for future grants to employees and consultants as of December 31, 2012.

3. Under these plans, options generally expire no later than 5-10 years from the date of grant. Each option can be exercised to purchase one share, conferring the same rights as the other common shares. Options that are cancelled or forfeited before expiration become available for future grants. The options generally vest over a three-year period (33.3% per annum) and restricted shares and restricted stock units also generally vest after three years or pursuant to defined performance criteria; in the event that employment is terminated within that period, unvested restricted shares and restricted stock units generally revert back to the Company.

4. Deferred stock compensation is amortized and recorded as compensation expense ratably over the vesting period of the option or the restriction period of the restricted shares and restricted stock units. The stock compensation expense that has been charged in the consolidated statements of operations in respect of options, restricted shares and restricted stock units to employees and directors in 2012 and 2011 was $447,680 and $408,492, respectively. The calculated intrinsic value of vested and unvested options for 2012 and 2011 was zero.

5. A summary of the status of the Company's plans and other share options, restricted shares and restricted stock units granted as of December 31, 2012 and 2011, and changes during the years ended on those dates, is presented below:

Stock Options:

	2012		2011	
	Amount	**Weighted average exercise price**	**Amount**	**Weighted average exercise price**
Options outstanding at beginning of year	64,953	$ 7.80	186,714	$ 6.36
Changes during year:				
Granted	–	–	–	–
Exercised	–	–	–	–
Forfeited	(52,725)	8.34	(121,761)	5.60
Options outstanding at end of year	12,228	$ 5.46	64,953	$ 7.80
Options vested at end of year	12,228	$ 5.46	64,953	$ 7.80

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In U.S. dollars

NOTE 13:– STOCKHOLDERS' EQUITY (Cont.)

Restricted Shares and Restricted Stock Units:

	2012			2011		
	Shares		Weighted average fair value at grant date	Shares		Weighted average fair value at grant date
Non-vested at the beginning of the year	636,488	$	1.43	406,813	$	1.60
Changes during year:						
Restricted stock granted	517,582	$	1.17	414,284	$	1.32
Restricted units granted	60,000	$	1.67	120,000	$	1.67
Vested	(310,497)	$	1.29	(304,609)	$	1.47
Forfeited	(59,303)	$	1.49	–	$	–
Non-vested at the end of the year	844,270	$	1.30	636,488	$	1.43
Restricted shares vested at end of year	2,353,996	$	1.97	2,043,499	$	2.07

6. The remaining total compensation cost related to non-vested restricted share and restricted stock unit awards not yet recognized (before applying a forfeiture rate) in the income statement as of December 31, 2012 was $327,750. The weighted average period over which this compensation cost is expected to be recognized is approximately two years.

7. On January 1, 2009, the Company adopted FASB ASC 260-45-28, Share-Based Payment Arrangements, which classifies unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) as participating securities and requires them to be included in the computation of diluted earnings per share using the two class method. The Company has determined that the unvested restricted stock issued to our employees and directors are "participating securities" and as such, are included, net of estimated forfeitures, in the total shares used to calculate the Company's diluted loss per share unless a net loss is reported, in which situation unvested stock awards are excluded from the number of shares outstanding for both basic and diluted earnings per share calculations..

NOTE 14:– INCOME TAXES

a. General:

As of December 31, 2012, Arotech has net operating loss carryforwards for U.S. federal income tax purposes of $43,300,000, which are available to offset future taxable income, if any, expiring in 2020 through 2032. Utilization of U.S. net operating losses is subject to substantial annual limitations due to the "change in ownership" provisions of the Internal Revenue Code of 1986 and similar state provisions. The annual limitation may result in the expiration of net operating losses before utilization.

At December 31, 2012, the Company had net deferred tax assets before valuation allowance of $43,942,000. The deferred tax assets are primarily composed of federal, state and foreign tax net operating loss ("NOL") carryforwards. Due to uncertainties surrounding the Company's ability to generate future taxable income to realize these assets, a full valuation allowance has been established to offset its net deferred tax asset. Additionally, the future utilization of the Company's NOL carryforwards to offset future taxable income is subject to a substantial annual limitation as a result of IRC Section 382 changes that have occurred. Any carryforwards that will expire prior to utilization as a result of such limitations will be removed from deferred tax assets with a corresponding reduction of the valuation allowance.

Table of Contents

In U.S. dollars

NOTE 14:– INCOME TAXES (Cont.)

The Company has indefinite-lived intangible assets consisting of trademarks and goodwill. These indefinitely-lived intangible assets are not amortized for financial reporting purposes. However, these assets are tax deductible, and therefore amortized over 15 years for tax purposes. As such, deferred income tax expense and a deferred tax liability arise as a result of the tax-deductibility of these indefinitely-lived intangible assets. The resulting deferred tax liability, which is expected to continue to increase over time, will have an indefinite life, resulting in what is referred to as a "naked tax credit." This deferred tax liability could remain on the Company's balance sheet indefinitely unless there is an impairment of the related assets (for financial reporting purposes), or the business to which those assets relate were to be disposed of.

Due to the fact that the aforementioned deferred tax liability could have an indefinite life, it is not netted against the Company's deferred tax assets when determining the required valuation allowance. Doing so would result in the understatement of the valuation allowance and related deferred income tax expense.

The Company has also reevaluated its income tax positions under FASB ASC 740-10 as of December 31, 2012 and the Company believes that it has no material uncertain tax positions and therefore has no uncertain tax position reserves and does not expect to provide for any such reserves. The Company does not believe that the unrecognized tax benefits will change within 12 months of this reporting date. It is the Company's policy that any assessed penalties and interest on uncertain tax positions would be charged to income tax expense.

The Company does not provide for U.S. federal income taxes on the undistributed earnings of its foreign subsidiaries because such earnings are re-invested and, in the opinion of management, will continue to be re-invested indefinitely.

The Company files income tax returns, including returns for its subsidiaries, with federal, state, local and foreign jurisdictions. The Company is no longer subject to IRS examination for periods prior to 2009, although carryforward losses that were generated prior to 2010 may still be adjusted by the IRS if they are used in a future period. Additionally, the Company is no longer subject to examination in Israel for periods prior to 2007.

The Company files consolidated tax returns for its U.S. entities.

b. Israeli subsidiary (Epsilor-EFL):

Effective January 1, 2011 Epsilor-EFL's tax rate was 10% in 2011 and 2012 and will be reduced to 6% by 2015. In addition, dividends paid from the profits of Epsilor-EFL are subject to tax at the rate of 15% in the hands of their recipient and tax exempt on dividends paid to Israeli company. As of December 31, 2012, there are no tax exempt profits earned by Epsilor–EFL by Israel law that will be distributed as a dividend and accordingly no deferred tax liability was recorded as of December 31, 2012. Furthermore, management has indicated that it has no intention of declaring any dividend.

c. Merger of Epsilor and EFL:

On June 25, 2009, two of the Company's Israeli subsidiaries, Epsilor and EFL, entered into a merger agreement pursuant to which EFL merged all of its assets and liabilities into Epsilor, with Epsilor the survivor of the merger (the "Merged Company").

Through the merger date, EFL accumulated certain tax losses (the "EFL Loss"). 20% of the EFL Loss was cancelled and is not available to offset any future income. The remaining amount of the EFL Loss (the "Remaining Loss") was absorbed into the Merged Company and is available to offset the Merged Company's income after July 1, 2009; provided that for the 16 tax years following the merger, losses will not be available to offset the Merged Company's income in excess of the lesser of (i) 6.25% of the original amount of the Remaining Loss, or (ii) 50% of the Merged Company's total taxable income in that year prior to giving effect to the application of any of the EFL Loss.

As of December 31, 2012, the Merged Company has tax loss carryforwards, generated by EFL, of $84,000,000, which is available indefinitely to offset future taxable income.

NOTE 14:– INCOME TAXES (Cont.)

d. Consolidated deferred income taxes:

Deferred income taxes reflect tax credit carryforwards and the net tax effects of temporary differences between the carrying amounts of asse and liabilities for financial reporting purposes and amounts used for income tax purposes. Significant components of the Company's deferred ta assets are as follows:

	December 31, 2012	December 31, 2011
U.S. operating loss carryforward	$ 17,286,287	$ 16,420,226
Foreign operating loss carryforward	21,366,068	20,938,603
Total operating loss carryforward	38,652,355	37,358,829
Temporary differences:		
Compensation and benefits	2,026,176	1,895,519
Warranty reserves	1,005,118	1,033,796
Foreign temporary differences	797,247	948,720
All other temporary differences	1,461,543	2,443,919
Total temporary differences	5,290,084	6,321,954
Deferred tax asset before valuation allowance	43,942,439	43,680,783
Valuation allowance	(43,942,439)	(43,680,783)
Total deferred tax asset	$ –	$ –
Deferred tax liability	$ 4,920,021	$ 4,321,521

The Company provided valuation allowances for the deferred tax assets resulting from tax loss carryforwards and other temporary differences. Management currently believes that it is more likely than not that the deferred tax assets related to the operating loss carryforwards and other temporary differences will not be realized. The change in the valuation allowance during 2012 was $261,000.

e. Loss from continuing operations before taxes on income are as follows:

	Year ended December 31 2012	Year ended December 31 2011
Domestic	$ 260,481	$ (1,965,158)
Foreign	(1,660,719)	(1,389,392)
	$ (1,400,238)	$ (3,354,550)

f. Taxes on income were comprised of the following:

	Year ended December 31 2012	Year ended December 31 2011
Current federal taxes	$ –	$ –
Current state and local taxes	29,656	(69,734)
Deferred taxes	598,500	1,678,345

Expense	$ 628,156	$ 1,608,611

Domestic	$ 628,156	$ 959,027
Foreign	–	649,584
Expense	$ 628,156	$ 1,608,611

NOTE 16:– SEGMENT INFORMATION (Cont.)

The Company’s reportable operating segments have been determined in accordance with the Company’s internal management structure, which is organized based on operating activities. The accounting policies of the operating segments are the same as those described in the summary of significant accounting policies. The Company evaluates performance based on two primary factors: the segment’s operating income and the segment’s contribution to the Company’s future strategic growth.

b. The following is information about reported segment gains, losses and assets:

	Training and Simulation Division	Battery and Power Systems Division	Corporate Expenses	Discontinued operations	Total Company
2012					
Revenues from outside customers	$ 59,270,768	$ 20,779,666	$ –	$ –	$ 80,050,434
Depreciation and amortization expenses [1]	(1,105,958)	(1,118,104)	(48,655)	–	(2,272,717)

CODE OF CONDUCT

FOR

OFFICERS, DIRECTORS AND EMPLOYEES

OF

AROTECH CORPORATION AND ITS SUBSIDIARIES

I. Purpose

This Code of Conduct of Arotech Corporation and its subsidiaries (collectively, the "Company") has been prepared to help all officers, directors and employees understand and comply with our policies and procedures. Overall, the purpose of our Code of Conduct is to deter wrongdoing and promote:

- honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;
- full, fair, accurate, timely and understandable disclosure in reports and documents that we file with, or submit to, the SEC and in other public communications made by us;
- compliance with applicable governmental laws, rules and regulations;
- prompt internal reporting of code violations to an appropriate person or persons identified in this Code of Conduct; and
- accountability for adherence to the Code of Conduct.

II. Policy

The Company is committed to the highest ethical standards and to compliance with all applicable laws and regulations. It is the obligation of our officers, directors and employees to:

- Conduct themselves honestly and ethically;
- Avoid conflicts of interest, and disclose to their immediate supervisors (or, if they are officers or directors, to the Chief Executive Officer of the Company) any relationship that appears to constitute a conflict of interest; and
- Comply with applicable governmental laws, rules and regulations.

III. Duty to Report Violations

You are responsible for reporting in good faith to the Company any circumstances that you believe may constitute a violation of this Code of Conduct. You should report suspected violations to your immediate supervisor or, if you are an officer or director of the Company or any of its subsidiaries, to the Chief Executive Officer of the Company. Supervisors receiving such reports are required to disclose such reports to the Chief Executive Officer of the Company. The Company will investigate these matters. There will be no action taken against you for good

faith reporting of suspected policy violations; however, you will not be protected from possible disciplinary action if you report in bad faith or have otherwise engaged in misconduct.

The Chief Executive Officer or the Chief Executive Officer's designee will investigate all asserted violations of this Code of Conduct relating to conduct by any employee who is not an officer or director of the Company. The Board of Directors of the Company will investigate all asserted violations of this Code of Conduct relating to conduct by any officer or director of the Company. Waivers of this Code of Conduct with respect to conduct by any employee also must be approved by the Chief Executive Officer or the Chief Executive Officer's designee. Any waiver to be granted to an officer or director must be approved by the Company's Board of Directors or a committee of the Board of Directors.

IV. Ethical Business Practices

The Company requires that you maintain lawful and ethical business practices at all times. Examples of certain prohibited activities are set forth below. These examples are intended to highlight some prohibited practices, but they do not address every kind of prohibited practice.

1. Bribery. Use of Company funds or property for illegal, unethical or otherwise improper purposes, including bribes, kickbacks and payoffs, is prohibited.

2. Political Contributions and Activities. In the United States, federal and many state laws prohibit corporations from making direct political contributions to candidates. No employee may make any political contribution of any kind, on the federal, state, or local level, in the name of the Company, or use Company funds or materials for this purpose. You should not make political contributions based on a promise to be reimbursed by the Company.

3. Gifts and Entertainment. You and members of your family must not solicit or accept loans, fees, services, or monetary gifts of any kind from suppliers, customers or others dealing with the Company. To the extent permitted by law, you may accept unsolicited non-monetary gifts or entertainment which conform to customary business practices and are not of significant value. Should you accept such gifts or entertainment, you must not give the person or entity offering such gifts or entertainment any preferential treatment.

V. Conflicts of Interest and Outside Associations and Activities

You have a duty to avoid business, financial, or other relationships that might conflict with the Company's interests or impair or influence your ability to discharge your duties. There are potential conflicts of interest inherent in certain situations such as when:

1. You or a member of your family has a direct or indirect financial interest in, or obligation to, an actual or potential competitor, supplier, or customer. (This does not include small stock ownership in publicly traded companies).

2. You conduct business on behalf of the Company with a supplier or customer in which a relative of yours is a representative, officer or director.

3. You acquire real property, leaseholds, patents, or other property or rights in which the Company has, or you have reason to believe that the Company is likely to have, an interest.

VI. Confidential Information and Trading Stock in a Public Company

It is illegal and against Company policy for you to buy or sell Company stock when in possession of "inside information."

As a general matter, inside information is any material, nonpublic information concerning a company or its business. Information may be considered "material" if (1) it would likely be considered important to an investor in deciding whether to purchase or sell the Company's securities, or (2) would reasonably be expected to have an impact on the price of the Company's stock if the information were publicly released. For example, inside information might include information relating to proposed acquisitions, important financial data, major new contracts, research projects, the status of a product in the governmental approval process, or significant management changes.

Even after information is publicly released, it should still be considered nonpublic until a sufficient amount of time has passed for the information to become generally available to, and absorbed by, the investing public. While the amount of time that must pass for information to be considered public may vary depending on the circumstances, generally, information may be considered to be public 24 hours following its release to the investing public.

In addition, the Company maintains a "blackout" policy with respect to trading in the Company's stock, prohibiting trading or exercise of options from two weeks before the end of the fiscal quarter until 24 hours after the release of that quarter's financial results (except pursuant to a previously-issued limit order), and you are required to comply with such policy.

VII. Cooperating with Governmental Authorities.

It is the policy of the Company to cooperate with governmental investigations or inquiries. Accordingly, if you reasonably believe that a governmental investigation or inquiry is in progress, you should communicate that information immediately to your immediate supervisor, or, if you are an officer or director of the Company or any of its subsidiaries, to the Chief Executive Officer of the Company.

You should never:

a. Destroy or alter any Company documents in anticipation of a request for those documents from any governmental agency or judicial authority.

b. Make any false or misleading statements to any governmental investigator during an investigation.

c. Attempt to cause any other Company employee or any other person to fail to provide information to a governmental investigator, or to provide false or misleading information.

VIII. Company Disclosure Obligations.

As a public company, the Company is required to make disclosures about its activities and operations in quarterly reports filed shortly after the end of its first three fiscal quarters and in an annual report filed shortly after the end of its fiscal year. It is the policy of the Company to make full, fair, accurate, timely and understandable disclosure in reports and documents that it files with, or submits to, the SEC and in other public communications made by the Company. While the disclosure rules are complex, *essentially the Company is obligated to disclose anything that a reasonable investor would want to consider in deciding whether to purchase or sell the Company's stock*. If you are aware of an act or omission which you believe satisfies this standard and you do not believe that such act or omission has been disclosed by the Company, you should describe that information to your immediate supervisor, or if you are an officer or director of the Company or any of its subsidiaries, to the Chief Executive Officer of the Company.

****

All information provided to immediate supervisors pursuant to this Code of Conduct is to be communicated by such immediate supervisor to the Chief Executive Officer of the Company or the Chief Executive Officer's designee.

Effect of this Code of Conduct. NOTHING PROVIDED FOR IN THIS CODE IS INTENDED TO CREATE A CONTRACT OF EMPLOYMENT FOR ANY INDIVIDUAL. Except as otherwise provided in a specific agreement of employment, employees may terminate their employment whenever they wish and for whatever reason, just as the Company may terminate an individual's employment at any time and for any reason.

SECTION B
PART B TECHNICAL PROPOSAL AND STATEMENTS AND CERTIFICATIONS REGARDING ELIGIBILITY

QUALIFICATIONS AND CERTIFICATIONS

NOTE: The Authority reserves the right to audit compliance with respect to each of the required statements and certifications in the forms submitted by Offerors, including but not limited to the Domestic U.S. Content Certification, Domestic U.S. Content Worksheet, and Final Assembly of Production (Non-Pilot) Vehicles in Massachusetts.

Questions Concerning Eligibility

Provide short answers (and attach relevant documents) to the following questions and requests:

1. Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.

2. Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.

3. Provide the names, title and telephone numbers of all officers.

4. Has the business or an owner or shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.

5. Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances. Please indicate whether it resulted in a termination for cause.

6. Have any of the business owners, shareholders, or officers every been convicted of felony violations of Federal, state or local laws? If yes, please describe the circumstances.

7. Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.

8. Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.

9. Provide the name, address, contact person and telephone of three business credit references, including but not limited to your primary banking institution.

10. Has the business or any of the business’s owners or shareholders ever filed for bankruptcy or invoked insolvency proceedings under state law?

11. Provide the last three (3) years of audited financial statements, or reasonable equivalent of the Offeror. If the Offeror is a joint venture or other combination of business entities, provide the last three (3) years audited financial statements for each entity.

12. Provide the business's current code of business ethics or equivalent.

Responses:

1. In the case CNR CRC would be awarded this contract and in the case Freedman Seating would be elected preferred supplier for seat, then Freedman Seating would be willing to apply for this certificate.
2. Freedman Seating is a privately help company with 100% ownership held by the Freedman family. Craig Freedman is the contact regarding this. He can be reached at (773) 524-2440 ext. 255.
3. Gerald Freedman, CEO (773) 524-2440 ext 231
   Craig Freedman, President (773) 524-2440 ext. 255
   Dan Cohen, Executive Vice President (773) 524-2440 ext 227
4. Freedman Seating has supplied seats for heavy duty transit buses for MBTA through several bus builders.
5. No
6. No
7. The company is involved in several product liability lawsuits in which the company rigorously defends itself. any awards against the company will be covered by insurance.

MASSACHUSETTS DEPT. OF REVENUE
P.O. BOX 7066
BOSTON, MA 02204

AMY PITTER, COMMISSIONER
ROBERT O'NEILL, BUREAU CHIEF

KUSTOM SEATING UNLIMITED, INC.
3000 MADISON STREET
BELLWOOD, IL 601042219

T/P ID 363512613
Date 1/24/2014
Bureau CERTIFICATE

CERTIFICATE OF GOOD STANDING AND/OR TAX COMPLIANCE

The Commissioner of Revenue certifies as of the above date, that the above named individual or entity is in compliance with its tax obligations payable under M.G.L. c. 62C, including corporation excise, sales and use taxes, sales tax on meals, withholding taxes, room occupancy excise and personal income taxes, with the following exceptions.

This Certificate certifies that individual taxpayers are in compliance with income tax obligations and any sales and use taxes, sales tax on meals, withholding taxes, and/or room occupancy taxes related to a sole proprietorship. Persons deemed responsible for the payment of these taxes on behalf of a corporation, partnership or other business entity may not use our automated process to obtain a Certificate.

This Certificate does not certify that the entity's standing as to taxes such as unemployment insurance administered by agencies other than the Department of Revenue, or taxes under any other provisions of law. Taxpayers required to collect or remit the following taxes must submit a separate request to certify compliance: Alcoholic Beverage Excise, Cigarette Excise, Sales Tax on Boats, International Fuels Tax Agreement, Smokeless Tobacco or Ferry Embarkation.

THIS IS NOT A WAIVER OF LIEN ISSUED UNDER GENERAL LAWS, CHAPTER 62C, SECTION 52.

Very truly yours

R. O'Neill

Robert O'Neill, Bureau Chief

The MBTA specification currently requires that the primary suppliers of subsystems delineated in Tab 1.1 to have the following information included in a Bidder's Proposal. We request that you provide this information to us so that it can be incorporated into our submittal. As noted in our cover letter, we are requesting clarification from MBTA regarding the need for this material. We will advise you of their response, but we must currently proceed as if it will be required. We request your return of this information by January 31, 2014.

1. Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.

   LECIP: Not Applicable – LECIP Inc. is incorporated in Illinois.

2. Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.

   LECIP Holdings Corporation +81-58-324-3121

3. Provide the names, title and telephone numbers of all officers.

Kazuo Ueno	CEO	312-626-2525
Chung Chung Tam	President & COO	312-626-2525
Fumitoshi Nakamura	CFO	312-626-2525
Toyoji Sugisawa	Secretary	312-626-2525

4. Has the business or an owner or shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.

   No.

5. Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances. Please indicate whether it resulted in a termination for cause.

   No.

6. Have any of the business owners, shareholders, or officers ever been convicted of felony violations of Federal, state or local laws? If yes, please describe the circumstances.

   No.

7. Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.

   No.

8. Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors of LECIP HOLDINGS CORPORATION:

We have audited the accompanying consolidated balance sheets of LECIP HOLDINGS CORPORATION (the "Company") and consolidated subsidiaries (together, the "Group") as of March 31, 2011 and 2010, and the related consolidated statements of income for the years then ended, the consolidated statement of comprehensive income for the year ended March 31, 2011, and the related consolidated statements of changes in equity, and cash flows for the years then ended, all expressed in Japanese yen. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of LECIP HOLDINGS CORPORATION and consolidated subsidiaries as of March 31, 2011 and 2010, and the consolidated results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in Japan.

Our audits also comprehended the translation of Japanese yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made in conformity with the basis stated in Note 1. Such U.S. dollar amounts are presented solely for the convenience of readers outside Japan.

See notes to consolidated financial statements

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEARS ENDED MARCH 31, 2011 AND 2010

1. BASIS OF PRESENTING CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements have been prepared in accordance with the provisions set forth in the Japanese Financial Instruments and Exchange Act and its related accounting regulations and in conformity with accounting principles generally accepted in Japan ("Japanese GAAP"), which are different in certain respects as to application and disclosure requirements of International Financial Reporting Standards.

Under Japanese GAAP, a consolidated statement of comprehensive income is required from the fiscal year ended March 31, 2011 and has been presented herein. Accordingly, accumulated other comprehensive income is presented in the consolidated balance sheet and the consolidated statement of changes in equity. Information with respect to other comprehensive income for the year ended March 31, 2010 is disclosed in Note 15. In addition, "net income before minority interests" is disclosed in the consolidated statement of income from the year ended March 31, 2011.

In preparing these consolidated financial statements, certain reclassifications and rearrangements have been made to the consolidated financial statements issued domestically in order to present them in a form which is more familiar to readers outside Japan. In addition, certain reclassifications have been made in the 2010 financial statements to conform to the classifications used in 2011.

The consolidated financial statements are stated in Japanese yen, the currency of the country in which LECIP HOLDINGS CORPORATION (the "Company") is incorporated and operates. The translations of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥ 83 to $ 1, the approximate rate of exchange at March 31, 2011. Such translations should not be construed as representations that the Japanese yen amounts could be converted into U.S. dollars at that or any other rate.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Consolidation **—** The consolidated financial statements as of March 31, 2011 include the accounts of the Company and its 5 significant (3 in 2010) subsidiaries (together, the "Group").

Under the control or influence concept, those companies in which the Company, directly or indirectly, is able to exercise control over operations are fully consolidated.

Investments in remaining non-consolidated subsidiaries are stated at cost. If the equity method of accounting had been applied to the investments in these companies, the effect on the accompanying consolidated financial statements would not be material.

All significant intercompany balances and transactions have been eliminated in consolidation. All material unrealized profit included in assets resulting from transactions within the Group is eliminated.

b. Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements **—** In May 2006, the Accounting Standards Board of Japan (the "ASBJ") issued ASBJ Practical Issues Task Force (PITF) No.18, "Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated

Financial Statements." PITF No.18 prescribes: (1) the accounting policies and procedures applied to a parent company and its subsidiaries for similar transactions and events under similar circumstances should in principle be unified for the presentation of the consolidated financial statements, (2) financial statements prepared by foreign subsidiaries in accordance with either International Financial Reporting Standards or the generally accepted accounting principles in the United States of America tentatively may be used for the consolidation process, (3) however, the following items should be adjusted in the consolidation process so that net income is accounted for in accordance with Japanese GAAP unless they are not material: 1) amortization of goodwill; 2) scheduled amortization of actuarial gain or loss of pensions that has been directly recorded in the equity; 3) expensing capitalized development costs of R&D; 4) cancellation of the fair value model of accounting for property, plant, and equipment and investment properties and incorporation of the cost model of accounting; 5) recording the prior years' effects of changes in accounting policies in the income statement where retrospective adjustments to financial statements have been incorporated; and 6) exclusion of minority interests from net income, if contained.

c. ***Cash Equivalents***—Cash equivalents are short-term investments that are readily convertible into cash and that are exposed to insignificant risk of changes in value. Cash equivalents include time deposits which mature within three months from the date of acquisition.

d. ***Inventories***— Inventories are stated at the lower of cost, determined by the average method for finished products and work in process, by the weighted average cost for merchandise and raw materials, and by the last purchase price method for supplies, or net selling value.

e. ***Investment Securities***—All investment securities are classified and accounted for, depending on management's intent, as available-for-sale securities, which are not classified as either trading securities or held-to-maturity securities, are reported at fair value, with unrealized gains and losses, net of applicable taxes, reported as a separate component of equity.

Non-marketable available-for-sale securities are stated at cost determined by the moving-average method. For other than temporary declines in fair value, investment securities are reduced to net realizable value by a charge to income.

f. ***Property, Plant and Equipment***—Property, plant and equipment are stated at cost. Depreciation of property, plant and equipment of the Company and its consolidated domestic subsidiary is computed substantially by the declining-balance method based on the estimated useful lives of the assets, while the straight-line method is applied to buildings acquired after April 1, 1998 and lease assets of the Company and its consolidated domestic subsidiary, and all property, plant and equipment of consolidated foreign subsidiaries. The range of useful lives is principally from 3 to 47 years for buildings and structures, and from 4 to 12 years for machinery and equipment. The useful lives for lease assets are the terms of the respective leases.

g. ***Long-lived assets***—The Group reviews its long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset or asset group may not be recoverable. An impairment loss would be recognized if the carrying amount of an asset or asset group exceeds the sum of the undiscounted future cash flows expected to result from the continued use and eventual disposition of the asset or asset group. The impairment loss would be measured at the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of the discounted cash flows from the continued use and eventual disposition of the asset or the net selling price at disposition.

h. ***Other assets***—Software for internal use is amortized over 5 years by the straight-line method.

i. ***Retirement and Pension Plans***—The Company and its domestic consolidated subsidiary have defined contribution pension plans for employees and unfunded retirement benefit plans for part-time employees.

For part-time employees, the Company and its domestic consolidated subsidiary have defined benefit pension plans and account for the liability for retirement benefits based on the amount that would be required if all the part-time employees are retired at each balance sheet date.

j. ***Asset Retirement Obligations***—In March 2008, the ASBJ published the accounting standard for asset retirement obligations, ASBJ Statement No.18 "Accounting Standard for Asset Retirement Obligations" and ASBJ Guidance No.21 "Guidance on Accounting Standard for Asset Retirement Obligations." Under this accounting standard, an asset retirement obligation is defined as a legal obligation imposed either by law or contract that results from the acquisition, construction, development and the normal operation of a tangible fixed asset and is associated with the retirement of such tangible fixed asset. The asset retirement obligation is recognized as the sum of the discounted cash flows required for the future asset retirement and is recorded in the period in which the obligation is incurred if a reasonable estimate can be made. If a reasonable estimate of the asset retirement obligation cannot be made in the period the asset retirement obligation is incurred, the liability should be recognized when a reasonable estimate of asset retirement obligation can be made. Upon initial recognition of a liability for an asset retirement obligation, an asset retirement cost is capitalized by increasing the carrying amount of the related fixed asset by the amount of the liability. The asset retirement cost is subsequently allocated to expense through depreciation over the remaining useful life of the asset. Over time, the liability is accreted to its present value each period. Any subsequent revisions to the timing or the amount of the original estimate of undiscounted cash flows are reflected as an increase or a decrease in the carrying amount of the liability and the capitalized amount of the related asset retirement cost. This standard was effective for fiscal years beginning on or after April 1, 2010.

The Company applied this accounting standard effective April 1, 2010. The effect of this change was to decrease operating income by ¥ 477 thousand ($ 6 thousand) and income before income taxes and minority interests by ¥ 2,702 thousand ($ 33 thousand).

k. ***Research and Development Costs***—Research and development costs are charged to income as incurred.

l. ***Leases***— In March 2007, the ASBJ issued ASBJ Statement No.13, "Accounting Standard for Lease Transactions," which revised the previous accounting standard for lease transactions issued in June 1993. The revised accounting standard for lease transactions was effective for fiscal years beginning on or after April 1, 2008.

Under the previous accounting standard, finance leases that were deemed to transfer ownership of the leased property to the lessee were capitalized. However, other finance leases were permitted to be accounted for as operating lease transactions if certain "as if capitalized" information was disclosed in the note to the lessee's financial statements. The revised accounting standard requires that all finance lease transactions be capitalized to recognize lease assets and lease obligations in the balance sheet.

The Company and its domestic consolidated subsidiary applied the revised accounting standard effective April 1, 2008. In addition, the Company accounted for leases which existed at the transition date and do not transfer ownership of the leased property to the lessee as operating lease transactions as perrmitted under the revised accounting standard.

All other leases are accounted for as operating leases.

m. ***Bonuses to directors and corporate auditors*** **—** Bonuses to directors and corporate auditors are accrued in the year to which such bonuses are attributable.

n. ***Construction Contracts*****—**In December 2007, the ASBJ issued ASBJ Statement No. 15, "Accounting Standard for Construction Contracts," and ASBJ Guidance No. 18, "Guidance on Accounting Standard for Construction Contracts." Under the previous Japanese GAAP, either the completed-contract method or the percentage-of-completion method was permitted to account for construction contracts. Under this new accounting standard, the construction revenue and construction costs should be recognized by the percentage-of-completion method, if the outcome of a construction contract can be estimated reliably. When total construction revenue, total construction costs and the stage of completion of the contract at the balance sheet date can be reliably measured, the outcome of a construction contract can be estimated reliably. If the outcome of a construction contract cannot be reliably estimated, the completed-contract method should be applied. When it is probable that the total construction costs will exceed total construction revenue, an estimated loss on the contract should be immediately recognized by providing for a loss on construction contracts. This standard is applicable to construction contracts and software development contracts and was effective for fiscal years beginning on or after April 1, 2009. The Company applied the accounting standard effective April 1, 2009 for its software sales contracts.

o. ***Income Taxes*****—**The provision for income taxes is computed based on the pretax income included in the consolidated statements of income. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Deferred taxes are measured by applying currently enacted tax laws to the temporary differences.

p. ***Foreign Currency Transactions*****—**All short-term and long-term monetary receivables and payables denominated in foreign currencies are translated into Japanese yen at the exchange rates at the balance sheet date. The foreign exchange gains and losses from translation are recognized in the income statement to the extent that they are not hedged by forward exchange contracts.

q. ***Foreign Currency Financial Statements*****—**The balance sheet accounts of the consolidated foreign subsidiaries are translated into Japanese yen at the current exchange rate as of the balance sheet date except for equity, which is translated at the historical rate. Differences arising from such translation were shown as "Foreign currency translation adjustments" under accumulated other comprehensive income in a separate component of equity.

Revenue and expense accounts of consolidated foreign subsidiaries are translated into yen at the average exchange rate.

r. ***Derivatives and Hedging Activities*****—**The Group uses derivative financial instruments to manage its exposures to fluctuations in foreign exchange. Foreign exchange forward contracts are utilized by the Group to reduce foreign currency exchange risks. The Group does not enter into derivatives for trading or speculative purposes.

Derivative financial instruments and foreign currency transactions are classified and accounted for as follows: a) all derivatives are recognized as either assets or liabilities and measured at fair value, and gains or losses on derivative transactions are recognized in the income statement and b) for derivatives used for hedging purposes, if derivatives qualify for hedge accounting because of the high correlation and effectiveness between the hedging instruments and the hedged items, gains or losses on derivatives are deferred until maturity of the hedged transactions.

The foreign currency forward contracts employed to hedge foreign exchange exposures for export sales are measured at fair value and the unrealized gains and losses are recognized in income.

Trade receivables and payables denominated in foreign currencies are translated at the contracted rates if the forward contracts qualify for hedge accounting.

s. ***Per Share Information*****—**Basic net income per share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding for the period, retroactively adjusted for stock splits.

Diluted net income per share is not disclosed since the Company has no dilutive securities.

Cash dividends per share presented in the accompanying consolidated statements of income are dividends applicable to the respective years including dividends to be paid after the end of the year.

t. New Accounting Pronouncements

Accounting Changes and Error Corrections**—**In December 2009, ASBJ issued ASBJ Statement No. 24 “Accounting Standard for Accounting Changes and Error Corrections” and ASBJ Guidance No. 24 “Guidance on Accounting Standard for Accounting Changes and Error Corrections.” Accounting treatments under this standard and guidance are as follows: (1) Changes in Accounting Policies - When a new accounting policy is applied with revision of accounting standards, the new policy is applied retrospectively unless the revised accounting standards include specific transitional provisions. When the revised accounting standards include specific transitional provisions, an entity shall comply with the specific transitional provisions. (2) Changes in Presentations - When the presentation of financial statements is changed, prior period financial statements are reclassified in accordance with the new presentation. (3) Changes in Accounting Estimates - A change in an accounting estimate is accounted for in the period of the change if the change affects that period only, and is accounted for prospectively if the change affects both the period of the change and future periods. (4) Corrections of Prior Period Errors - When an error in prior period financial statements is discovered, those statements are restated. This accounting standard and the guidance are applicable to accounting changes and corrections of prior period errors which are made from the beginning of the fiscal year that begins on or after April 1, 2011.

3. INVESTMENT SECURITIES

Investment securities at March 31, 2011 and 2010 consisted of the following:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Non-current:			
Equity securities	¥ 238,958	¥ 223,597	$2,879
Total	¥ 238,958	¥ 223,597	$2,879

The costs and aggregate fair values of investment securities at March 31, 2011 and 2010 were as follows:

	Thousands of Yen			
March 31, 2011	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities classified as:				
Available-for-sale:				
Equity securities	¥ 123,220	¥ 72,326	¥ 10,836	¥ 184,710

	Thousands of Yen			
March 31, 2010	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities classified as:				
Available-for-sale:				
Equity securities	¥ 114,047	¥ 56,557	¥ 1,255	¥ 169,349

	Thousands of U.S. Dollars			
March 31, 2011	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities classified as:				
Available-for-sale:				
Equity securities	$ 1,485	$ 871	$ 131	$ 2,225

Available-for-sale securities whose fair value is not readily determinable as of March 31, 2011 and 2010 were as follows:

	Carrying amount		
	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Available-for-sale:			
Equity securities	¥ 54,248	¥ 54,248	$ 654

There were no available-for-sale securities sold during the year ended March 31, 2011.

The information of available-for-sale securities which were sold during the year ended March 31, 2010 was as follows:

	Thousands of Yen		
March 31, 2010	Proceeds	Realized Gains	Realized Losses
Available-for-sale:			
Equity securities	¥ 11,380	¥ 848	-

The impairment losses on available-for-sale equity securities for the years ended March 31, 2011 and 2010 were ¥59 thousand ($1 thousand) and ¥7,862 thousand, respectively.

4. INVENTORIES

Inventories at March 31, 2011 and 2010 consisted of the following:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Merchandise and finished products	¥ 331,931	¥ 277,781	$3,999
Work-in-process	364,907	332,276	4,396
Raw materials	676,131	707,592	8,146
Supplies	10,343	14,378	125
Total	¥ 1,383,312	¥ 1,332,027	$ 16,666

5. LONG-LIVED ASSETS

The Group reviewed its long-lived assets for impairment as of March 31, 2011 and 2010. As a result, for the year ended March 31, 2010, the Group recognized an impairment loss of ¥19,619 thousand as other expense for certain assets of Thai LECIP Corporation Limited due to the close down of a plant. No impairment loss was recognized in 2011.

6. INVESTMENT PROPERTY

On November 28, 2008, the ASBJ issued ASBJ Statement No. 20, "Accounting Standard for Investment Property and Related Disclosures," and issued ASBJ Guidance No.23, "Guidance on Accounting Standard for Investment Property and Related Disclosures." This accounting standard and the guidance were applicable to investment property and related disclosures at the end of the fiscal years ending on or after March 31, 2010. The Group applied the new accounting standard and guidance effective March 31, 2010.

The Group was some rental properties such as office buildings in Gifu City. Rental income net of operating expenses for those rental properties was ¥29,407 thousand ($354 thousand) for the fiscal year ended March 31, 2011.

In addition, the carrying amounts, changes in such balances and market prices of such properties are as follows:

Thousands of Yen			
Carrying Amount			Fair Value
April 1, 2010	Increase/ (Decrease)	March 31, 2011	March 31, 2011

¥ 89,233	¥ (134)	¥89,099	¥353,000

Thousands of Yen			
Carrying Amount			Fair Value
April 1, 2009	Increase/ (Decrease)	March 31, 2010	March 31, 2010
¥ 95,041	¥ (5,808)	¥ 89,233	¥ 374,000

Thousands of U.S.Dollars			
Carrying Amount			Fair Value
April 1, 2010	Increase/ (Decrease)	March 31, 2011	March 31, 2011
$ 1,075	$ (2)	$1,073	$4,253

Notes:
1) Carrying amount recognized in balance sheet is net of accumulated depreciation and accumulated impairment losses, if any.
2) Fair values of properties as of March 31, 2011 and 2010 are measured by the Group in accordance with its Real-estate Appraisal Standard.

7. SHORT-TERM BORROWINGS AND LONG-TERM DEBT

Short-term borrowings at March 31, 2010 consisted mainly of bank overdrafts and notes to banks. The weighted average interest rate on short-term borrowings as of March 31, 2010 was 0.67%. There were no short-term borrowings at March 31, 2011.

Long-term debt at March 31, 2011 and 2010 consisted of the following:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Borrowings from banks due serially to March 2014 with weighted average interest rates of 1.24% (2011) and 1.38% (2010)	¥ 862,898	¥ 776,408	$ 10,396
Lease obligations	109,292	51,414	1,317
Total	972,190	827,822	11,713
Less: portion due within one year	(265,101)	(176,228)	(3,194)
Long-term debt, less current portion	¥ 707,089	¥ 651,594	$ 8,519

Annual maturities of long-term debt and lease obligations at March 31, 2011, were as follows:

Year ending March 31	Thousands of Yen	Thousands of U.S. Dollars
2012	¥ 265,101	$ 3,194
2013	484,979	5,843
2014	198,808	2,395
2015	16,380	197
2016	6,922	84
2017 and thereafter	-	-
Total	¥972,190	$11,713

The carrying amounts of assets pledged as collateral for short-term borrowings and long-term debt (including current portion) of ¥669,170 thousand ($8,062 thousand) at March 31, 2011 were as follows:

	Thousands of Yen	Thousands of U.S. Dollars
Property, plant and equipment—net of accumulated depreciation	¥ 1,108,908	$ 13,360

8. LIABILITY FOR RETIREMENT BENEFITS

The Company and its consolidated domestic subsidiary have retirement benefit plans for employees. The Company and its domestic consolidated subsidiary have defined contribution plans for employees and unfunded defined benefit pension plans for part-time employees.

The liability for employees' retirement benefits at March 31, 2011 and 2010 consisted of the following:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Projected benefit obligation	¥14,120	¥ 11,310	$ 170
Amount recognized as liability	¥14,120	¥ 11,310	$ 170

The components of net periodic benefit costs for the years ended March 31, 2011 and 2010 were as follows:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Service cost	¥79,176	¥ 109,851	$ 954
Additional retirement payments	10,698	2,034	129
Net periodic benefit costs	¥89,874	¥ 111,885	$1,083

9. EQUITY

Japanese companies are subject to the Companies Act of Japan (the "Companies Act"). The significant provisions in the Companies Act that affect financial and accounting matters are summarized below:

(a) Dividends
Under the Companies Act, companies can pay dividends at any time during the fiscal year in addition to the year-end dividend upon resolution at the shareholders meeting. For companies meeting certain criteria such as; (1) having a Board of Directors, (2) having independent auditors, (3) having a Board of Corporate Auditors, and (4) the term of service of the directors is prescribed as one year rather than two years of normal term by its articles of incorporation, the Board of Directors may declare dividends (except for dividends in kind) at any time during the fiscal year if the company has prescribed so in its articles of incorporation. However, the Company cannot do so because it does not meet all of the above criteria. Semiannual interim dividends may also be paid once a year upon resolution by the Board of Directors if the articles of incorporation of the company so stipulate. The Company qualifies for this provision. The Companies Act provides

certain limitations on the amounts available for dividends or the purchase of treasury stock. The limitation is defined as the amount available for distribution to the shareholders, but the amount of net assets after dividends must be maintained at no less than ¥ 3 million.

(b) Increases / decreases and transfer of common stock, reserve and surplus
The Companies Act requires that an amount equal to 10% of dividends must be appropriated as a legal reserve (a component of retained earnings) or as additional paid-in capital (a component of capital surplus) depending on the equity account charged upon the payment of such dividends until the total aggregate amount of legal reserve and additional paid-in capital equals 25% of the common stock. Under the Companies Act, the total amount of additional paid-in capital and legal reserve may be reversed without limitation. The Companies Act also provides that common stock, legal reserve, additional paid-in capital, other capital surplus and retained earnings can be transferred among the accounts under certain conditions upon resolution of the shareholders.

(c) Treasury stock and treasury stock acquisition rights
The Companies Act also provides for companies to purchase treasury stock and dispose of such treasury stock by resolution of the Board of Directors. The amount of treasury stock purchased cannot exceed the amount available for distribution to the shareholders which is determined by a specific formula. Under the Companies Act, stock acquisition rights are presented as a separate component of equity. The Companies Act also provides that companies can purchase both treasury stock acquisition rights and treasury stock. Such treasury stock acquisition rights are presented as a separate component of equity or deducted directly from stock acquisition rights.

10. INCOME TAXES

The Company and its domestic consolidated subsidiary are subject to Japanese national and local income taxes which, in the aggregate, resulted in normal effective statutory tax rate of approximately 39.8% for the years ended March 31, 2011 and 2010.

The tax effects of significant temporary differences and tax loss carry-forwards which resulted in deferred tax assets and liabilities at March 31, 2011 and 2010 were as follows:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Deferred Tax Assets:			
Allowance for bad debt	¥ 17,222	¥ 10,115	$208
Accrued bonuses	75,055	106,075	904
Accrued warranty	21,840	24,672	263
Accrued enterprise tax	16,985	4,495	205
Accrued retirement benefits to directors and corporate auditors	52,792	52,792	636
Accrued social insurance	10,491	14,564	126
Property, plant and equipment	27,540	32,946	332
Small depreciable property	21,185	10,575	255
Inventories	40,952	57,996	493
Impairment of long-lived assets	20,465	25,625	247
Loss on liquidation of a subsidiary	134,565	130,242	1,621
Amount of tax loss carry forwards	251,448	136,293	3,030
Other	30,542	33,264	368
Total	721,082	639,654	8,688
Less: valuation allowance	(193,292)	(142,116)	(2,329)
Total deferred tax assets	¥ 527,790	¥ 497,538	$6,359
Deferred Tax Liabilities:			
Unrealized gain on available-for-sale securities	¥ 24,455	¥ 21,993	$ 295
Other	127	149	2
Total deferred tax liabilities	¥ 24,582	¥ 22,142	297
Net deferred tax assets	¥ 503,208	¥ 475,396	$ 6,062

Reconciliations between the normal effective statutory tax rates and the actual effective tax rates reflected in the accompanying consolidated statements of income for the years ended March 31, 2011 and 2010 were as follows:

	2011	2010
Normal effective statutory tax rate	39.8 %	39.8 %
Expenses not deductible for income tax purposes	9.5	30.8
Revenues excluded from income tax such as dividend received	-	(1.6)
Per capita tax	4.5	21.2
Net change in valuation allowance	23.5	199.6
Tax adjustments	-	7.6
Different income rate applicable to certain consolidated subsidiaries	(4.8)	(6.3)
Loss on liquidation of a subsidiary	-	(280.5)
Foreign currency translation adjustment	9.2	-
Other - net	(1.0)	(0.7)
Actual effective tax rate	80.7 %	9.9 %

11. RESEARCH AND DEVELOPMENT COSTS

Research and development costs were ¥168,127 thousand ($2,026 thousand) and ¥164,460 thousand for the years ended March 31, 2011 and 2010, respectively.

12. LEASES

The Group leases certain machinery, computers and software.

Pro forma information of leased property whose lease inception was before March 31, 2008

ASBJ Statement No.13, "Accounting Standard for Lease Transactions" requires that all finance lease transactions be capitalized to recognize lease assets and lease obligations in the balance sheet. However, the ASBJ Statement No. 13 permits leases without ownership transfer of the leased property to the lessee and whose lease inception was before March 31, 2008 to continue to be accounted for as operating lease transactions if certain "as if capitalized" information is disclosed in the note to the financial statements. The Company applied ASBJ Statement No. 13 effective April 1, 2008 and accounted for such leases as operating lease transactions. Pro forma information of leased property whose lease inception was before March 31, 2008 was as follows:

(As lessee)

	Thousands of Yen			
March 31, 2011	Machinery	Tools	Other	Total
Acquisition cost	¥ 353,230	¥ 14,820	¥ 48,662	¥ 416,712
Accumulated depreciation	338,587	13,039	42,048	393,674
Net leased property	¥ 14,643	¥ 1,781	¥ 6,614	¥ 23,038

	Thousands of Yen			
March 31, 2010	Machinery	Tools	Other	Total
Acquisition cost	¥ 553,904	¥ 73,326	¥ 49,699	¥ 676,929
Accumulated depreciation	460,653	65,450	33,288	559,391
Net leased property	¥ 93,251	¥ 7,876	¥ 16,411	¥ 117,538

	Thousands of U.S. Dollars			
March 31, 2011	Machinery	Tools	Other	Total
Acquisition cost	$ 4,255	$ 178	$ 587	$ 5,020
Accumulated depreciation	4,079	157	507	4,743
Net leased property	$ 176	$ 21	$ 80	$ 277

Obligations under finance leases:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Due within one year	¥ 20,493	¥ 97,007	$ 247
Due after one year	3,502	23,995	42
Total	¥ 23,995	¥ 121,002	$ 289

Depreciation expense, interest expense and other information under finance leases:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Depreciation expense	¥ 94,501	¥ 130,875	$ 1,139
Interest expense	858	2,172	10
Total	¥ 95,359	¥ 133,047	$ 1,149
Lease payments	¥ 97,865	¥ 135,418	$ 1,179

Depreciation expense and interest expense, which are not reflected in the accompanying statements of income, are computed by the straight-line method and the interest method, respectively.

(As lessor)

Pro forma information of such leases which existed at the transition date on an "as if sold" basis for the years ended March 31, 2011 and 2010 was as follows:

	Buildings and structures		
	Thousands of Yen		Thousands of U.S. Dollars
March 31	2011	2010	2011
Acquisition cost	¥ 102,500	¥ 137,500	$ 1,235
Accumulated depreciation	55,888	59,886	673
Net leasing property	¥ 46,612	¥ 77,614	$ 562

Expected revenue:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Due within one year	¥ 3,876	¥ 6,132	$ 46
Due after one year	33,592	59,276	405
Total	¥ 37,468	¥ 65,408	$ 451

The amounts of expected revenue under the finance leases include the imputed interest revenue portion.

Lease revenue and depreciation expenses under finance leases:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Lease revenue	¥ 3,876	¥ 6,132	$ 47
Depreciation expenses	4,969	5,808	60

Expected lease revenues to be received under the non-cancelable operating lease subsequent to March 31, 2011 and 2010 were as follows:

	Thousands of Yen		Thousands of U.S. Dollars
	2011	2010	2011
Due within one year	¥ 17,280	¥ 36,252	$ 208
Due after one year	150,096	350,775	1,808
Total	¥ 167,376	¥ 387,027	$ 2,016

13. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES

On March 10, 2008, the ASBJ revised ASBJ Statement No. 10, "Accounting Standard for Financial Instruments," and issued ASBJ Guidance No.19, "Guidance on Accounting Standard for Financial Instruments and Related Disclosures." This accounting standard and the guidance was applicable to financial instruments and related disclosures at the end of the fiscal years ending on or after March 31, 2010. The Group applied the revised accounting standard and the new guidance effective March 31, 2010.

(1) Group policy for financial instruments

The Group uses financial instruments, mainly long-term debt including bank loans, based on its management and financing plan. Short-term bank borrowings are used to fund its ongoing operations. Derivatives are used, not for speculative purposes, but to manage exposure to financial risks as described in (2) below.

(2) Nature and extent of risks arising from financial instruments

Receivables such as trade notes and trade accounts are exposed to customer credit risk. Although receivables in foreign currencies are exposed to the market risk of fluctuation in foreign currency exchange rates, the position is hedged by using forward foreign currency contracts. Investment securities, mainly equity instruments of customers and suppliers of the Group, are exposed to the risk of market price fluctuations.

Payment terms of payables, such as trade notes and trade accounts, are five months or less. Although payables in foreign currencies are exposed to the market risk of fluctuation in foreign currency exchange rates, those risks are hedged by using forward foreign currency contracts.

Maturities of bank loans and long-term debt are six years or less after the balance sheet date.

Derivatives include forward foreign currency contracts, which are used to manage exposure to market risks from changes in foreign currency exchange rates of receivables and payables. Please see Note 14 for more detail about derivatives.

(3) Risk management for financial instruments

Credit Risk Management

Credit risk is the risk of economic loss arising from a counterparty's failure to repay or service debt according to the contractual terms. The Company and its subsidiaries manage their credit risks from receivables on the basis of internal guidelines, which include monitoring of payment terms and balances of customers to identify the default risk of customers at an early stage. Please see Note 14 for the detail about derivatives.

Market risk management

Foreign currency trade receivables and payables are exposed to market risk resulting from

fluctuations in foreign currency exchange rates. Such foreign exchange risk is hedged by forward foreign currency contracts.

Investment securities are managed by monitoring the market values and financial position of issuers on a regular basis.

Liquidity risk management

Liquidity risk comprises the risk that the Group cannot meet its contractual obligations in full on maturity dates. The Group manages its liquidity risk by holding adequate volumes of liquid assets, along with adequate financial planning by the planning and accounting department.

(4)Fair values of financial instruments

Fair values of financial instruments are based on a quoted price in active markets. If a quoted price is not available, other rational valuation techniques are used instead.

(a) Fair value of financial instruments

	Thousands of Yen		
March 31, 2011	Carrying Amount	Fair Value	Unrealized Gain/Loss
Cash and cash equivalents	¥ 883,347	¥ 883,347	-
Time deposits	70,000	70,000	-
Trade notes and accounts receivable	4,399,243	4,399,243	-
Investment securities	184,710	184,710	-
	¥ 5,537,300	¥ 5,537,300	-
Trade notes and accounts payable	¥ 2,145,398	¥ 2,145,398	-
Long-term debt including current portion	972,190	979,683	¥ 7,493
Other accounts payable	489,658	489,658	-
Income taxes payable	177,042	177,042	-
	¥ 3,784,288	¥ 3,791,781	¥ 7,493

	Thousands of Yen		
March 31, 2010	Carrying Amount	Fair Value	Unrealized Gain/Loss
Cash and cash equivalents	¥ 524,046	¥ 524,046	-
Time deposits	70,000	70,000	-
Trade notes and accounts receivable	5,723,193	5,723,193	-
Investment securities	169,349	169,349	-
	¥ 6,486,588	¥ 6,486,588	-
Trade notes and accounts payable	¥ 2,549,273	¥ 2,549,273	-
Short-term borrowings	660,000	660,000	-
Long-term debt including current portion	827,822	831,488	¥ 3,666
Other accounts payable	347,635	347,635	-
Income taxes payable	56,616	56,616	-
	¥ 4,441,346	¥ 4,445,012	¥ 3,666

March 31, 2011	Thousands of U.S. Dollars Carrying Amount	Fair Value	Unrealized Gain/Loss
Cash and cash equivalents	$ 10,643	$ 10,643	-
Time deposits	843	843	-
Trade notes and accounts receivable	53,003	53,003	-
Investment securities	2,225	2,225	-
	$ 66,714	$ 66,714	-
Trade notes and accounts payable	$ 25,848	$ 25,848	-
Long-term debt including current portion	11,713	11,803	$ 90
Other accounts payable	5,900	5,900	-
Income taxes payable	2,133	2,133	-
	$ 45,594	$ 45,684	$ 90

Cash and cash equivalents and Time deposits

The carrying values of cash and cash equivalents and time deposits approximate fair value because of their short maturities.

Trade notes and accounts receivables

The carrying values of trade notes and accounts receivables approximate fair value because of their short maturities.

Investment securities

The fair values of investment securities are measured at the quoted market price of the stock exchange for the equity instruments.

Trade notes and accounts payables, Short-term borrowings, Other accounts payable and Income taxes payable

The carrying values of these financial instruments approximate fair value because of their short maturities.

Long-term debt including current portion

The fair values of long-term debt are determined by discounting the cash flows related to the debt at the Group's assumed corporate borrowing rate.

(b) Financial instruments whose fair value cannot be reliably determined

	Thousands of Yen		Thousands of U.S.Dollars
	2011	2010	2011
Investments in equity instruments that do not have a quoted market price in an active market	¥ 54,249	¥54,249	$ 654
Investments in non-consolidated subsidiaries	¥163,645	¥108,845	$1,972

(5) Maturity analysis for financial assets and securities with contractual maturities

Please see Note 7 for annual maturities of long-term debt.

14. DERIVATIVES

The Company enters into foreign exchange forward contracts to reduce foreign currency exchange risk related to exports and imports. The Company does not enter into derivative transactions for trading or speculative purposes, and applies hedge accounting for all derivatives.

The Company holds foreign exchange forward contracts associated with exports and imports, only up to the estimated amounts of sales to and purchases from overseas customers and suppliers.

Although foreign exchange forward contracts and interest rate swaps are subject to market risk, the counterparties to these derivatives are limited to major domestic financial institutions and the Company does not anticipate any losses arising from market risk.

The Company has internal policies for derivative transactions. Under these internal policies, based on the requests from the department related to exports and imports, derivative transactions are carried out by the planning and accounting department of the Company. The planning and accounting department reports to the managers in charge of the operation periodically.

Since no derivatives contracts were outstanding at March 31, 2011 and 2010, quantitative information of derivatives were not disclosed.

15. COMPREHENSIVE INCOME

For the year ended March 31, 2010

Total comprehensive income for the year ended March 31, 2010 was the following:

	2010
Total comprehensive income attributable to:	
Owners of the parent	¥58,548
Minority interests	-
Total comprehensive income	¥58,548

Other comprehensive income for the year ended March 31, 2010 consisted of the following:

	2010
Other comprehensive income:	
Unrealized gain on available-for-sale securities	¥19,070
Foreign currency translation adjustments	(2,357)
Total other comprehensive income	¥16,713

16. NET INCOME PER SHARE

Basic net income per share ("EPS") for the years ended March 31, 2011 and 2010 is calculated as follows:

	Thousands of Yen	Thousands of Shares	Yen	U.S. Dollars
	Net income	Weighted average shares	EPS	
For the year ended March 31, 2011				
Basic EPS				
Net income available to common shareholders	¥ 46,893	6,390	¥ 7.34	$ 0.08
For the year ended March 31, 2010:				
Basic EPS				
Net income available to common shareholders	¥ 41,835	6,390	¥ 6.55	

17. SEGMENT INFORMATION

For the year ended March 31, 2011 and 2010

In March 2008, the ASBJ revised ASBJ Statement No. 17 "Accounting Standard for Segment Information Disclosures" and issued ASBJ Guidance No.20 "Guidance on Accounting Standard for Segment Information Disclosures." Under the standard and guidance, an entity is required to report financial and descriptive information about its reportable segments. Reportable segments are operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity about which separate financial information is available and such information is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Generally, segment information is required to be reported on the same basis as is used internally for evaluating operating segment performance and deciding how to allocate resources to operating segments. This accounting standard and the guidance are applicable to segment information disclosures for the fiscal years beginning on or after April 1, 2010.
The segment information for the year ended March31, 2010 under the revised accounting standard is also disclosed hereunder as required.

1. Description of reportable segments

The Group's reportable segments are those for which separate financial information is available and regular evaluation by the Company's management is being performed in order to decide how resources are allocated among the Group. Therefore, the Group consists of three segments; Transport Equipment, Sign and Display and Industrial Equipment. Transport Equipment segment provides system equipments for buses and trains and lighting equipments for vehicles. Sign and Display segment manufactures and sells neon transformers, lighting effect units for outside display, cold cathode lumps and power supply units for LED. Industrial Equipment segment consists of manufacturing terminal readers, power backup units, rechargers for battery-driven forklift, battery charger and board implementation.

2. Methods of measurement for the amounts of sales, profit (loss), assets and other items for each reportable segment

The accounting policies of each reportable segment are consistent to those disclosed in Note 2, "Summary of Significant Accounting Policies."

3. Information about sales, profit (loss), assets, liabilities and other items is as follows.

	Thousands of Yen							
	2011

名古屋ダイヤビルディング3号館
Tel: (052) 565 5511

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of LECIP HOLDINGS CORPORATION:

We have audited the accompanying consolidated balance sheet of LECIP HOLDINGS CORPORATION and its consolidated subsidiaries as of March 31, 2013, and the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information, all expressed in Japanese yen.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of LECIP HOLDINGS CORPORATION and its consolidated subsidiaries as of March 31, 2013, and the consolidated results of their operations and their cash flows for the year then ended in accordance with accounting principles generally accepted in Japan.

Convenience Translation

Our audit also comprehended the translation of Japanese yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made in accordance with the basis stated in Note 1 to the consolidated financial statements. Such U.S. dollar amounts are presented solely for the convenience of readers outside Japan.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
YEAR ENDED MARCH 31, 2013

1. BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS

The accompanying consolidated financial statements have been prepared in accordance with the provisions set forth in the Japanese Financial Instruments and Exchange Act and its related accounting regulations and in accordance with accounting principles generally accepted in Japan ("Japanese GAAP"), which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards.

In preparing these consolidated financial statements, certain reclassifications and rearrangements have been made to the consolidated financial statements issued domestically in order to present them in a form which is more familiar to readers outside Japan. In addition, certain reclassifications have been made in the 2012 consolidated financial statements to conform to the classifications used in 2013.

The consolidated financial statements are stated in Japanese yen, the currency of the country in which LECIP HOLDINGS CORPORATION (the "Company") is incorporated and operates. The translations of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥94.05 to $1, the approximate rate of exchange at March 31, 2013. Such translations should not be construed as representations that the Japanese yen amounts could be converted into U.S. dollars at that or any other rate.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Consolidation **—** The consolidated financial statements as of March 31, 2013, include the accounts of the Company and its seven (seven in 2012) significant subsidiaries (together, the "Group").

Under the control or influence concept, those companies in which the Company, directly or indirectly, is able to exercise control over operations are fully consolidated.

Investments in remaining nonconsolidated subsidiaries are stated at cost. If the equity method of accounting had been applied to the investments in these companies, the effect on the accompanying consolidated financial statements would not be material.

All significant intercompany balances and transactions have been eliminated in consolidation. All material unrealized profit included in assets resulting from transactions within the Group is also eliminated.

LECIP (SINGAPORE) PTE LTD is newly included in the scope of consolidation as it was established during the current fiscal year. LECIP U.S.A., INC. is excluded from the scope of consolidation, but the statement of income is consolidated, as it stopped business activities, and the effect of this company on the consolidated financial statements would not be material.

b. Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements **—** In May 2006, the Accounting Standards Board of Japan (the "ASBJ") issued ASBJ Practical Issues Task Force (PITF) No. 18, "Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements." PITF No. 18 prescribes that the accounting policies and procedures

applied to a parent company and its subsidiaries for similar transactions and events under similar circumstances should in principle be unified for the presentation of the consolidated financial statements. However financial statements prepared by foreign subsidiaries in accordance with either International Financial Reporting Standards or the generally accepted accounting principles in the United States of America tentatively may be used for the consolidation process, except for the following items which should be adjusted in the consolidation process so that net income is accounted for in accordance with Japanese GAAP, unless they are not material: (a) amortization of goodwill; (b) scheduled amortization of actuarial gain or loss of pensions that has been directly recorded in the equity; (c) expensing capitalized development costs of research and development (R&D); (d) cancellation of the fair value model of accounting for property, plant, and equipment and investment properties and incorporation of the cost model of accounting; and (e) exclusion of minority interests from net income, if contained in net income.

c. ***Cash Equivalents***—Cash equivalents are short-term investments that are readily convertible into cash and that are exposed to insignificant risk of changes in value. Cash equivalents include time deposits, which mature within three months from the date of acquisition.

d. ***Inventories***— Inventories are stated at the lower of cost, mainly determined by the annual-average method for finished products and work in process, the moving-average cost for merchandise and raw materials, and the last purchase price method for supplies, or net selling value.

e. ***Investment Securities***—All investment securities are classified and accounted for, depending on management's intent, as available-for-sale securities, which are not classified as either trading securities or held-to-maturity securities, and are reported at fair value, with unrealized gains and losses, net of applicable taxes, reported as a separate component of equity.

Nonmarketable available-for-sale securities are stated at cost determined by the moving-average method. For other-than-temporary declines in fair value, investment securities are reduced to net realizable value by a charge to income.

f. ***Property, Plant and Equipment***—Property, plant and equipment are stated at cost. Depreciation of property, plant and equipment of the Company and its consolidated domestic subsidiaries is computed substantially by the declining-balance method based on the estimated useful lives of the assets, while the straight-line method is applied to buildings acquired after April 1, 1998, and lease assets of the Company and its consolidated domestic subsidiaries, and all property, plant and equipment of consolidated foreign subsidiaries. The range of useful lives is principally from 3 to 47 years for buildings and structures, from 4 to 12 years for machinery and equipment, and from 2 to 20 for furniture and fixtures. The useful lives for lease assets are the terms of the respective leases.

g. ***Long-Lived Assets***—The Group reviews its long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset or asset group may not be recoverable. An impairment loss is recognized if the carrying amount of an asset or asset group exceeds the sum of the undiscounted future cash flows expected to result from the continued use and eventual disposition of the asset or asset group. The impairment loss would be measured at the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of the discounted cash flows from the continued use and eventual disposition of the asset or the net selling price at disposition.

h. ***Other assets***—Software for internal use is amortized over five years by the straight-line method. And software for sales is amortized over three years, which is the expected sales period, by straight-line method.

i. ***Retirement and Pension Plans—***The Company and its domestic consolidated subsidiaries have defined contribution pension plans for employees.

For part-time employees, the Company and its domestic consolidated subsidiaries have the severance lump-sum payment plan and account for the liability for retirement benefits based on the amount that would be required if all the part-time employees are retired at each balance sheet date.

Furthermore, additional retirement benefits are paid in some cases.

j. **Asset Retirement Obligations—**In March 2008, the ASBJ published ASBJ Statement No. 18, "Accounting Standard for Asset Retirement Obligations" and ASBJ Guidance No. 21, "Guidance on Accounting Standard for Asset Retirement Obligations." Under this accounting standard, an asset retirement obligation is defined as a legal obligation imposed either by law or contract that results from the acquisition, construction, development, and the normal operation of a tangible fixed asset and is associated with the retirement of such tangible fixed asset. The asset retirement obligation is recognized as the sum of the discounted cash flows required for the future asset retirement and is recorded in the period in which the obligation is incurred if a reasonable estimate can be made. If a reasonable estimate of the asset retirement obligation cannot be made in the period the asset retirement obligation is incurred, the liability should be recognized when a reasonable estimate of the asset retirement obligation can be made. Upon initial recognition of a liability for an asset retirement obligation, an asset retirement cost is capitalized by increasing the carrying amount of the related fixed asset by the amount of the liability. The asset retirement cost is subsequently allocated to expense through depreciation over the remaining useful life of the asset. Over time, the liability is accreted to its present value each period. Any subsequent revisions to the timing or the amount of the original estimate of undiscounted cash flows are reflected as an adjustment to the carrying amount of the liability and the capitalized amount of the related asset retirement cost.

k. **Research and Development Costs**—R&D costs are charged to income as incurred.

l. **Leases**—In March 2007, the ASBJ issued ASBJ Statement No. 13, "Accounting Standard for Lease Transactions," which revised the previous accounting standard for lease transactions. The revised accounting standard for lease transactions was effective for fiscal years beginning on or after April 1, 2008.

(As lessee) Under the previous accounting standard, finance leases that were deemed to transfer ownership of the leased property to the lessee were capitalized. However, other finance leases were permitted to be accounted for as operating lease transactions if certain "as if capitalized" information was disclosed in the note to the lessee's financial statements. The revised accounting standard requires that all finance lease transactions be capitalized by recognizing lease assets and lease obligations in the balance sheet.

(As Lessor) Under the previous accounting standard, finance leases that were deemed to transfer ownership of the leased property to the lessee were treated as sales. However, other finance leases were permitted to be accounted for as operating lease transactions if certain "as if sold" information was disclosed in the note to the lessor's financial statements. The revised accounting standard requires that all finance leases that are deemed to transfer ownership of the leased property to the lessee be recognized as lease receivables, and that all finance leases that are not deemed to transfer ownership of the leased property to the lessee be recognized as investments in lease.

The Company and its domestic consolidated subsidiaries applied the revised accounting standard effective April 1, 2008. In addition, the Company accounted for leases which existed at the transition date and do not transfer ownership of the leased property to the lessee as operating lease transactions as permitted under the revised accounting standard.

All other leases are accounted for as operating leases.

m. ***Bonuses to Directors and Audit & Supervisory Board Members—***Bonuses to directors and Audit & Supervisory Board Members are accrued at the end of the year to which such bonuses are attributable.

n. **Construction Contracts**—In December 2007, the ASBJ issued ASBJ Statement No. 15, "Accounting Standard for Construction Contracts," and ASBJ Guidance No. 18, "Guidance on Accounting Standard for Construction Contracts." Under this accounting standard, construction revenue and construction costs should be recognized by the percentage-of-completion method, if the outcome of a construction contract can be estimated reliably. When total construction revenue, total construction costs and the stage of completion of the contract at the balance sheet date can be reliably measured, the outcome of a construction contract is deemed to be estimated reliably. If the outcome of a construction contract cannot be reliably estimated, the completed-contract method should be applied. When it is probable that the total construction costs will exceed total construction revenue, an estimated loss on the contract should be immediately recognized by providing for a loss on construction contracts.

o. ***Income Taxes—***The provision for income taxes is computed based on the pretax income included in the consolidated statement of income. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Deferred taxes are measured by applying currently enacted tax laws to the temporary differences.

The Group files a tax return under the consolidated corporate-tax system, which allows companies to base tax payments on the combined profits or losses of the parent company and its wholly owned domestic subsidiaries.

p. ***Foreign Currency Transactions—***All short-term and long-term monetary receivables and payables denominated in foreign currencies are translated into Japanese yen at the exchange rates at the balance sheet date. The foreign exchange gains and losses from translation are recognized in the consolidated statement of income to the extent that they are not hedged by forward exchange contracts.

q. ***Foreign Currency Financial Statements—***The balance sheet accounts of the consolidated foreign subsidiaries are translated into Japanese yen at the current exchange rate as of the balance sheet date except for equity, which is translated at the historical rate. Differences arising from such translation are shown as "Foreign currency translation adjustments" under accumulated other comprehensive income in a separate component of equity.

Revenue and expense accounts of consolidated foreign subsidiaries are translated into yen at the average exchange rate.

r. ***Derivatives and Hedging Activities—***The Group uses derivative financial instruments to manage its exposures to fluctuations in foreign exchange. Foreign exchange forward contracts are utilized by the Group to reduce foreign currency exchange risks. The Group does not enter into derivatives for trading or speculative purposes.

Derivative financial instruments are classified and accounted for as follows: (1) all derivatives are recognized as either assets or liabilities and measured at fair value, and gains or losses on derivative transactions are recognized in the consolidated statement of income and (2) for derivatives used for hedging purposes, if such derivatives qualify for hedge accounting because of the high correlation and effectiveness between the hedging instruments and the hedged items, gains or losses on derivatives are deferred until maturity of the hedged transactions.

The foreign currency forward contracts are utilized to hedge foreign currency exposures for export sales and procurement from overseas suppliers. Trade receivables and payables denominated in foreign currencies are translated at the contracted rates if the forward contracts qualify for hedge accounting.

s. ***Per Share Information*****—**Basic net income per share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding for the period, retroactively adjusted for stock splits.

Diluted net income per share is not presented as the Company has no dilutive securities.

Cash dividends per share presented in the accompanying consolidated statements of income are dividends applicable to the respective years, including dividends to be paid after the end of the year.

t. ***Accounting Changes and Error Corrections***—In December 2009, the ASBJ issued ASBJ Statement No. 24, "Accounting Standard for Accounting Changes and Error Corrections" and ASBJ Guidance No. 24, "Guidance on Accounting Standard for Accounting Changes and Error Corrections." Accounting treatments under this standard and guidance are as follows: (1) Changes in Accounting Policies—When a new accounting policy is applied following revision of an accounting standard, the new policy is applied retrospectively unless the revised accounting standard includes specific transitional provisions, in which case the entity shall comply with the specific transitional provisions. (2) Changes in Presentation—When the presentation of financial statements is changed, prior-period financial statements are reclassified in accordance with the new presentation. (3) Changes in Accounting Estimates—A change in an accounting estimate is accounted for in the period of the change if the change affects that period only, and is accounted for prospectively if the change affects both the period of the change and future periods. (4) Corrections of Prior-Period Errors—When an error in prior-period financial statements is discovered, those statements are restated.

u. ***Accounting for Employee Stock Ownership Plan Trust***—Pursuant to the resolution by the meeting of the Board of Directors held on February 4, 2013, the Company has introduced an employee incentive plan ,"Employee Stock Ownership Plan (ESOP) Trust" and "Stock Granting ESOP Trust" (together the "Trust"), for the purpose of improving corporate value for the medium- and long-term perspective.

Acquisition and sales of the Company's shares by the Trust are accounted for under the assumption that the Company and the Trust are the same entity. Accordingly, assets, including the Company's shares owned by the Trust, and liabilities, and profits and loss of the Trust are included in the Company's consolidated balance sheet, consolidated statement of income, and consolidated statement of changes in equity.

At March 31, 2013, ESOP Trust and Stock Granting ESOP Trust held 238 thousand and 306 thousand shares of the Company, respectively.

3. INVESTMENT SECURITIES

Investment securities at March 31, 2013 and 2012, consisted of the following:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Non-current:			
Equity securities	¥ 279,241	¥ 278,024	$ 2,969
Total	¥ 279,241	¥ 278,024	$ 2,969

The costs and aggregate fair values of investment securities at March 31, 2013 and 2012, were as follows:

	Thousands of Yen			
March 31, 2013	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities classified as:				
Available-for-sale:				
Equity securities	¥ 152,217	¥ 77,434	¥ 3,685	¥ 225,966

	Thousands of Yen			
March 31, 2012	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities classified as:				
Available-for-sale:				
Equity securities	¥ 158,878	¥ 73,530	¥ 8,632	¥ 223,776

	Thousands of U.S. Dollars			
March 31, 2013	Cost	Unrealized Gains	Unrealized Losses	Fair Value
Securities classified as:				
Available-for-sale:				
Equity securities	$ 1,619	$ 823	$ 39	$ 2,403

The information of available-for-sale securities which were sold during the year ended March 31, 2013, was as follows:

	Thousands of Yen		
March 31, 2013	Proceeds	Realized Gains	Realized Losses
Available-for-sale:			
Equity securities	¥ 39,874	¥ 27,774	-

	Thousands of U.S. Dollars		
March 31, 2013	Proceeds	Realized Gains	Realized Losses
Available-for-sale:			
Equity securities	$ 424	$ 295	-

There were no available-for-sale securities sold during the year ended March 31, 2012.

The impairment losses on available-for-sale equity securities for the years ended March 31, 2013 and 2012, were ¥973 thousand ($10 thousand) and none, respectively.

4. INVENTORIES

Inventories at March 31, 2013 and 2012, consisted of the following:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Merchandise and finished products	¥ 411,047	¥ 342,623	$ 4,370
Work in process	424,526	503,240	4,514
Raw materials	602,135	637,419	6,402
Supplies	8,709	10,441	93
Total	¥ 1,446,417	¥ 1,493,723	$ 15,379

5. INVESTMENT PROPERTY

In November, 2008, the ASBJ issued ASBJ Statement No. 20, “Accounting Standard for Investment Property and Related Disclosures” and issued ASBJ Guidance No. 23, “Guidance on Accounting Standard for Investment Property and Related Disclosures.”

The Group has some rental properties such as office buildings in Gifu City. Rental income net of operating expenses for those rental properties was ¥29,770 thousand ($317 thousand) and ¥29,111 thousand for the fiscal years ended March 31, 2013 and 2012, respectively.

In addition, the carrying amounts, changes in such balances, and market prices of such properties are as follows:

Thousands of Yen			
Carrying Amount			Fair Value
April 1, 2012	Increase/ (Decrease)	March 31, 2013	March 31, 2013
¥ 82,957	¥ (13,792)	¥ 69,165	¥ 347,000

Thousands of Yen			
Carrying Amount			Fair Value
April 1, 2011	Increase/ (Decrease)	March 31, 2012	March 31, 2012
¥ 89,099	¥ (6,143)	¥ 82,956	¥ 353,000

Thousands of U.S. Dollars			
Carrying Amount			Fair Value
April 1, 2012	Increase/ (Decrease)	March 31, 2013	March 31, 2013
$ 882	$ (147)	$ 735	$ 3,690

Notes:
1) Carrying amount recognized in the consolidated balance sheet is net of accumulated depreciation and accumulated impairment losses, if any.
2) Fair values of properties as of March 31, 2013 and 2012, are measured by the Group in accordance with its Real-estate Appraisal Standard.

6. SHORT-TERM BORROWINGS AND LONG-TERM DEBT

Short-term borrowings at March 31, 2013, principally consisted of bank loans with average interest rate of 0.56%. There were no short-term borrowings at March 31, 2012.

Long-term debt at March 31, 2013 and 2012, consisted of the following:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Borrowings from banks due serially to March 2014 with weighted-average interest rates of 1.13 % (2013) and 1.16% (2012)	¥ 381,935	¥ 664,323	$ 4,061
Lease obligations	84,902	99,763	903
Total	466,837	764,086	4,964
Less portion due within one year	(258,352)	(505,291)	(2,747)
Long-term debt, less current portion	¥ 208,485	¥ 258,795	$ 2,217

Annual maturities of long-term debt and lease obligations at March 31, 2013, were as follows:

Year ending March 31	Thousands of Yen	Thousands of U.S. Dollars
2014	¥ 258,352	$ 2,747
2015	70,659	751
2016	53,673	571
2017	43,368	461
2018	39,513	420
2019 and thereafter	1,272	14
Total	¥ 466,837	$ 4,964

The carrying amounts of assets pledged as collateral for long-term debt (including current portion) of ¥ 683,346 thousand ($ 7,266 thousand) at March 31, 2013, were as follows:

	Thousands of Yen	Thousands of U.S. Dollars
Property, plant and equipment—net of accumulated depreciation	¥1,032,542	$10,979

7. LIABILITY FOR RETIREMENT BENEFITS

The Company and its domestic consolidated subsidiaries have defined contribution pension plans for employees and the severance lump-sum payment plan for part-time employees.

The liability for employees' retirement benefits at March 31, 2013 and 2012, consisted of the following:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Projected benefit obligation	¥ 17,000	¥ 15,080	$ 181
Amount recognized as liability	¥ 17,000	¥ 15,080	$ 181

The components of net periodic benefit costs for the years ended March 31, 2013 and 2012, were as follows:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Service cost	¥ 1,890	¥ 1,575	$ 20
Other	72,000	72,518	766
Net periodic benefit costs	¥ 73,890	¥ 74,093	$ 786

8. EQUITY

Japanese companies are subject to the Companies Act of Japan (the "Companies Act"). The significant provisions in the Companies Act that affect financial and accounting matters are summarized below:

a Dividends

Under the Companies Act, companies can pay dividends at any time during the fiscal year in addition to the year-end dividend upon resolution at the shareholders meeting. For companies meeting certain criteria such as; (1) having a Board of Directors, (2) having independent auditors, (3) having an Audit & Supervisory Board, and (4) the term of service of the directors is prescribed as one year rather than two years of normal term by its articles of incorporation, the Board of Directors may declare dividends (except for dividends in kind) at any time during the fiscal year if the company has prescribed so in its articles of incorporation. However, the Company cannot do so because it does not meet all of the above criteria. Semiannual interim dividends may also be paid once a year upon resolution by the Board of Directors if the articles of incorporation of the company so stipulate. The Company qualifies for this provision. The Companies Act provides certain limitations on the amounts available for dividends or the purchase of treasury stock. The limitation is defined as the amount available for distribution to the shareholders, but the amount of net assets after dividends must be maintained at no less than ¥ 3 million.

b Increases / Decreases and Transfer of Common Stock, Reserve and Surplus

The Companies Act requires that an amount equal to 10% of dividends must be appropriated as a legal reserve (a component of retained earnings) or as additional paid-in capital (a component of capital surplus), depending on the equity account charged upon the payment of such dividends, until the aggregate amount of legal reserve and additional paid-in capital equals 25% of the common stock. Under the Companies Act, the total amount of additional paid-in capital and legal reserve may be reversed without limitation. The

Companies Act also provides that common stock, legal reserve, additional paid-in capital, other capital surplus and retained earnings can be transferred among the accounts under certain conditions upon resolution of the shareholders.

c Treasury Stock and Treasury Stock Acquisition Rights

The Companies Act also provides for companies to purchase treasury stock and dispose of such treasury stock by resolution of the Board of Directors. The amount of treasury stock purchased cannot exceed the amount available for distribution to the shareholders which is determined by a specific formula. Under the Companies Act, stock acquisition rights are presented as a separate component of equity. The Companies Act also provides that companies can purchase both treasury stock acquisition rights and treasury stock. Such treasury stock acquisition rights are presented as a separate component of equity or deducted directly from stock acquisition rights.

9. INCOME TAXES

The Company and its domestic consolidated subsidiaries are subject to Japanese national and local income taxes which, in the aggregate, resulted in a normal effective statutory tax rate of approximately 37.2% and 39.8% for the years ended March 31, 2013 and 2012, respectively.

The tax effects of significant temporary differences and tax loss carryforwards which resulted in deferred tax assets and liabilities at March 31, 2013 and 2012, were as follows:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Deferred Tax Assets:			
Allowance for bad debt	¥ 25,657	¥ 25,907	$ 273
Accrued bonuses	120,627	116,668	1,283
Accrued warranty	22,640	19,096	241
Accrued enterprise tax	9,052	9,942	96
Accrued retirement benefits to directors and Audit & Supervisory Board Members	43,562	46,375	463
Accrued social insurance	17,482	17,105	186
Property, plant and equipment	15,507	20,403	165
Small depreciable property	6,825	8,714	72
Inventories	75,878	46,034	807
Impairment of long-lived assets	11,893	14,778	126
Loss on investment in nonconsolidated subsidiaries	67,558	126,280	718
Amount of tax loss carryforwards	138,844	142,678	1,476
Other	103,130	36,648	1,097
Total	658,655	630,628	7,003
Less valuation allowance	(252,315)	(204,811)	(2,683)
Total deferred tax assets	¥ 406,340	¥ 425,817	$ 4,320
Deferred Tax Liabilities:			
Unrealized gain on available-for-sale securities	¥ 25,664	¥ 22,584	$ 272
Other	82	96	1
Total deferred tax liabilities	¥ 25,746	¥ 22,680	$ 273
Net deferred tax assets	¥ 380,594	¥ 403,137	$ 4,047

Reconciliations between the normal effective statutory tax rates and the actual effective tax rates reflected in the accompanying consolidated statement of income for the year ended March 31, 2013, with the corresponding figures for 2012 were as follows:

	2013	2012
Normal effective statutory tax rate	37.2 %	39.8 %
Expenses not deductible for income tax purposes	3.7	6.7
Per capita tax	2.6	3.1
Net change in valuation allowance	3.4	16.7
Effect of the consolidated corporate tax system	(3.8)	(2.9)
Effect of tax rate reduction	-	6.7
Other - net	1.3	(0.4)
Actual effective tax rate	44.4 %	69.7 %

On December 2, 2011, new tax reform laws were enacted in Japan, which changed the normal effective statutory tax rate from approximately 39.8% to 37.2% effective for the fiscal years beginning on or after April 1, 2012 through March 31, 2015, and to 34.8% afterwards.

10. RESEARCH AND DEVELOPMENT COSTS

Research and development costs were ¥353,989 thousand ($ 3,764 thousand) and ¥292,837 thousand for the years ended March 31, 2013 and 2012, respectively.

11. LEASES

The Group leases certain machinery, computers, and software.

Pro forma information of leased property whose lease inception was before March 31, 2008

ASBJ Statement No. 13, "Accounting Standard for Lease Transactions" requires that all finance lease transactions be capitalized to recognize lease assets and lease obligations in the balance sheet. However, ASBJ Statement No. 13 permits leases without ownership transfer of the leased property to the lessee and whose lease inception was before March 31, 2008, to continue to be accounted for as operating lease transactions if certain "as if capitalized" information is disclosed in the note to the consolidated financial statements. The Company applied ASBJ Statement No. 13 effective April 1, 2008 and accounted for such leases as operating lease transactions. Pro forma information of leased property whose lease inception was before March 31, 2008, was as follows:

(As lessee)

	Thousands of Yen			
March 31, 2012	Machinery	Tools	Other	Total
Acquisition cost	¥ 19,980	¥ 7,040	¥ 12,100	¥ 39,120
Accumulated depreciation	19,219	6,649	9,882	35,750
Net leased property	¥ 761	¥ 391	¥ 2,218	¥ 3,370

There were no leases to be disclosed at March 31, 2013.

Obligations under finance leases:

	Thousands of Yen
	2012
Due within one year	¥ 3,502
Due after one year	-
Total	¥ 3,502

Depreciation expense, interest expense, and other information under finance leases:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Depreciation expense	¥ 3,370	¥ 18,667	$ 36
Interest expense	27	158	0
Total	¥ 3,397	¥ 18,825	$ 36
Lease payments	¥ 3,529	¥ 19,651	$ 38

Depreciation expense and interest expense, which are not reflected in the accompanying consolidated statement of income, are computed by the straight-line method and the interest method, respectively.

(As lessor)

Pro forma information of such leases which existed at the transition date on an "as if sold" basis for the years ended March 31, 2013 and 2012, was as follows:

	Buildings and structures		
	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Acquisition cost	¥ 102,500	¥ 102,500	$ 1,090
Accumulated depreciation	64,222	60,107	683
Net leasing property	¥ 38,278	¥ 42,393	$ 407

Expected revenue:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Due within one year	¥ 3,876	¥ 3,876	$ 41
Due after one year	25,840	29,716	275
Total	¥ 29,716	¥ 33,592	$ 316

The amounts of expected revenue under the finance leases include the imputed interest revenue portion.

Lease revenue and depreciation expenses under finance leases:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Lease revenue	¥ 3,876	¥ 3,876	$ 41
Depreciation expenses	4,115	4,219	44

Expected lease revenues to be received under the noncancelable operating lease subsequent to March 31, 2013 and 2012, were as follows:

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Due within one year	¥ 17,280	¥ 17,280	$ 184
Due after one year	115,536	132,816	1,228
Total	¥ 132,816	¥ 150,096	$ 1,412

12. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES

(1) Group Policy for Financial Instruments

The Group uses financial instruments, mainly long-term debt including bank loans, based on its management and financing plan. Short-term bank borrowings are used to fund its ongoing operations. Derivatives are used, not for speculative purposes, but to manage exposure to financial risks as described in (2) below.

(2) Nature and Extent of Risks Arising from Financial Instruments

Receivables such as trade notes and trade accounts are exposed to customer credit risk. Although receivables in foreign currencies are exposed to the market risk of fluctuation in foreign currency exchange rates, the position is hedged by using forward foreign currency contracts. Investment securities, mainly equity instruments of customers and suppliers of the Group, are exposed to the risk of market price fluctuations.

Payment terms of payables, such as trade notes and trade accounts, are five months or less. Although payables in foreign currencies are exposed to the market risk of fluctuation in foreign currency exchange rates, those risks are hedged by using forward foreign currency contracts.

Maturities of bank loans and long-term debt are six years or less after the balance sheet date.

Derivatives include forward foreign currency contracts, which are used to manage exposure to market risks from changes in foreign currency exchange rates of receivables and payables.

(3) Risk Management for Financial Instruments

Credit risk management

Credit risk is the risk of economic loss arising from a counterparty's failure to repay or service debt according to the contractual terms. The Company and its subsidiaries manage their credit risks from receivables on the basis of internal guidelines, which include monitoring of payment terms and balances of customers to identify the default risk of customers at an early stage.

Market risk management

Foreign currency trade receivables and payables are exposed to market risk resulting from fluctuations in foreign currency exchange rates. Such foreign exchange risk is hedged by forward foreign currency contracts.

Investment securities are managed by monitoring the market values and financial position of issuers on a regular basis.

Liquidity risk management

Liquidity risk comprises the risk that the Group cannot meet its contractual obligations in full on maturity dates. The Group manages its liquidity risk by holding adequate volumes of liquid assets, along with adequate financial planning by the planning and accounting department.

(4) Fair Values of Financial Instruments

Fair values of financial instruments are based on quoted price in active markets. If a quoted price is not available, another rational valuation technique is used instead.

(a) Fair value of financial instruments

	Thousands of Yen		
March 31, 2013	Carrying Amount	Fair Value	Unrealized Gain/Loss
Cash and cash equivalents	¥ 649,027	¥ 649,027	-
Time deposits	55,000	55,000	-
Trade notes and accounts receivable	5,084,821	5,084,821	-
Investment securities	225,966	225,966	-
	¥ 6,014814	¥ 6,014,814	-
Short-term bank loans	¥ 750,000	¥ 750,000	-
Trade notes and accounts payable	2,179,124	2,179,124	-
Long-term debt including current portion	466,837	466,327	¥ (510)
Other accounts payable	445,188	445,188	-
Income taxes payable	86,253	86,253	-
	¥ 3,927,402	¥3,926,892	¥ (510)

Short-term bank loans	$ 7,974	$ 7,974	-
Trade notes and accounts payable	23,170	23,170	-
Long-term debt including current portion	4,964	4,958	$ (6)
Other accounts payable	4,733	4,733	-
Income taxes payable	917	917	-
	$ 41,758	$ 41,752	$ (6)

Cash and Cash Equivalents, Time Deposits, and Trade Notes and Accounts Receivables

The carrying values of these financial instruments approximate fair value because of their short maturities.

Investment Securities

The fair values of investment securities are measured at the quoted market price of the stock exchange for the equity instruments.

Trade Notes and Accounts Payables, Short-term Borrowings, Other Accounts Payable, and Income Taxes Payable

The carrying values of these financial instruments approximate fair value because of their short maturities.

Long-term Debt Including Current Portion

The fair values of long-term debt are determined by discounting the cash flows related to the debt at the Group’s assumed corporate borrowing rate.

(b) Financial instruments whose fair value cannot be reliably determined

	Thousands of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Investments in equity instruments that do not have a quoted market price in an active market	¥53,275	¥ 54,248	$ 566
Investments in nonconsolidated subsidiaries	¥61,477	¥ 62,219	$ 654

(5) Maturity analysis for financial assets and securities with contractual maturities

Please see Note 6 for annual maturities of long-term debt.

13. COMPREHENSIVE INCOME

The components of other comprehensive income for the years ended March 31, 2013 and 2012, were as follows:

	Millions of Yen		Thousands of U.S. Dollars
	2013	2012	2013
Net unrealized gain on available-for-sale securities:			
Gains arising during the year	¥ 36,625	¥ 3,407	$ 389
Reclassification adjustments to profit or loss	(27,774)	-	(295)
Amount before income tax effect	8,851	3,407	94
Income tax effect	(3,080)	1,871	(33)
Total	¥ 5,771	¥ 5,278	$ 61
Foreign currency translation adjustments:			
Adjustments arising during the year	¥ (14,550)	¥ (1,992)	$ (155)
Reclassification adjustments to profit or loss	16,137	50,832	172
Amount before income tax effect	1,587	48,840	17
Income tax effect		(22,437)	-
Total	¥ 1,587	¥ 26,403	$ 17
Total other comprehensive income	¥ 7,358	¥ 31,681	$ 78

14. NET INCOME PER SHARE

Basic net income per share ("EPS") for the years ended March 31, 2013 and 2012, is calculated as follows:

	Thousands of Yen	Thousands of Shares	Yen	U.S. Dollars
	Net income	Weighted-average shares	EPS	
For the year ended March 31, 2013				
Basic EPS				
Net income available to common shareholders	¥292,890	6,251	¥ 46.9	$ 0.5
For the year ended March 31, 2012				
Basic EPS				
Net income available to common shareholders	¥132,927	6,390	¥ 20.8	

15. SUBSEQUENT EVENTS

The following appropriation of retained earnings at March 31, 2013, was approved at the Company's shareholders' meeting held on June 20, 2013:

Appropriation of retained earnings

	Thousands of Yen	Thousands of U.S. Dollars
Year-end cash dividends, ¥15 ($0.16) per share	¥ 89,462	$ 951

16. SEGMENT INFORMATION

Under ASBJ Statement No. 17 "Accounting Standard for Segment Information Disclosures" and ASBJ Guidance No. 20 "Guidance on Accounting Standard for Segment Information Disclosures," an entity is required to report financial and descriptive information about its reportable segments.
Reportable segments are operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity about which separate financial information is available and such information is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Generally, segment information is required to be reported on the same basis as is used internally for evaluating operating segment performance and deciding how to allocate resources to operating segments.

(1) Description of Reportable Segments

The Group's reportable segments are those for which separate financial information is available and regular evaluation by the Company's management is being performed in order to decide how resources are allocated among the Group. Therefore, the Group's reportable segments consist of three segments: Transport Equipment, Sign and Display, and Industrial Equipment. Transport Equipment segment manufactures and sells system equipments for buses and trains and lighting equipments for vehicles. Sign and Display segment manufactures and sells neon transformers, lighting effect units for outside display, cold cathode lumps, and power supply units for LED. Industrial Equipment segment consists of manufacturing and selling terminal readers, power backup units, and rechargers for battery-driven forklift and board implementation.

(2) Methods of Measurement for the Amounts of Sales, Profit (Loss), Assets, and Other Items for Each Reportable Segment

The accounting policies of each reportable segment are consistent with those disclosed in Note 2, "Summary of Significant Accounting Policies."

(3) Information about Sales, Profit (Loss), Assets and Other Items is as follows.

LECIP INC.

CODE OF ETHICS

LECIP Inc. is committed to maintaining the highest standards of ethical conduct and integrity in all areas of our activities. The Company's policy is to conduct its business affairs honestly and in an ethical manner. This Code of Ethics provides a general statement of the expectations of LECIP Inc. regarding the ethical standards that each director, officer and employee should adhere to while acting on behalf of the Company. It does not cover every issue that may arise, but it sets out basic principles to guide all employees, officers and directors of the Company. This Code of Ethics applies to all directors, officers, full and part time employees, and contract workers. Conduct in violation of this policy is unacceptable in the workplace and in any work-related setting outside the workplace.

HONEST AND ETHICAL CONDUCT

All directors, officers and employees of LECIP Inc. are required to perform their duties in an honest and ethical manner.

COMPLIANCE WITH LAWS

You must comply with all federal, state and local laws and governmental regulations applicable to your activities on behalf of LECIP Inc. If a law conflicts with this Code or another Company policy, you must comply with the law; however, if a local custom or policy conflicts with this Code, you must comply with the Code. If you have any questions about the applicability of any law or regulation to your activities, or the legality of your or your colleagues' conduct, you should consult your supervisor or the General Counsel.

CONFLICTS OF INTEREST

In general, it is not the intent of LECIP Inc. to restrict the right of employees to manage their own private affairs. However, an employee assumes certain obligations involving

loyalty and trust when employed by LECIP Inc. These obligations may easily be compromised when a conflict of interest exists. All directors, officers and employees of LECIP Inc. are required to handle all actual or apparent conflicts of interest in an ethical manner.

In general, a conflict of interest exists when an employee's private interests interfere or conflict in any way with the legitimate business interests of LECIP Inc. Examples of actual or potential conflicts of interest include situations where you or a member of your family:

- receive improper personal benefits (including benefits from a customer, supplier or competitor) as a result of your position with LECIP Inc;
- use LECIP Inc. property for your personal benefit;

- have a financial interest in a customer, supplier or competitor that is significant enough to cause divided loyalty with the Company, or the appearance of such divided loyalty;
- acquire an interest in property (including intellectual property) in which you have reason to know LECIP Inc. has, or might have, an interest; or
- make gifts or payments, or provide special favors, to customers or suppliers with a value significant enough to cause them to take an action beneficial to the Company that they would not otherwise have taken.

It is almost always a conflict of interest for a LECIP Inc. employee to work simultaneously for a competitor, customer or supplier. You are not allowed to work for a competitor as a director or consultant. The best policy is to avoid any direct or indirect business connection with our customers, suppliers or competitors, except on the Company's behalf. In addition, employees, officers and directors are prohibited from taking for themselves personally any opportunities that are discovered through the use of corporate property, information or position, except with the consent of the Board of Directors.

Many situations where there is some doubt as to whether a conflict of interest exists can be resolved with proper advice. Conflicts of interest are not always clear-cut. If you are in doubt about any situation and the potential for a conflict of interest, you should discuss the matter with your supervisor.

DISCLOSURE

It is of paramount importance to LECIP Inc. that all disclosure in reports and other documents filed by LECIP Inc. with the Securities and Exchange Commission or in other public communications by LECIP Inc. is full, fair, accurate, timely and understandable. All officers, directors, employees and contract workers must take all steps necessary to assist LECIP Inc. in fulfilling these responsibilities, consistent with each person's role in the Company. You should give prompt, accurate answers to all inquiries in connection with LECIP Inc's preparation of public reports and disclosures.

LECIP Inc's Chief Executive Officer, Chief Financial Officer and Controller (our "Senior Financial Officers") each bear a special responsibility with respect to our public disclosure and communications. Each of our Senior Financial Officers is required to:

- take all necessary steps to ensure full, fair, accurate, timely and understandable disclosure in reports that the Company files with, or submits to, governmental agencies and in other public communications; and
- foster a culture throughout LECIP Inc. that ensures the fair and timely reporting of the Company's results of operations and financial condition and other financial information.

COMPLIANCE

LECIP Inc. is committed to the prompt and consistent enforcement of this Code of Conduct. The Company will ensure that employees, officers and directors may access this Code of Ethics on the Company's website. In addition, each current employee will be provided with a copy of the Code. New employees will receive a copy of the Code as part of their Employee Manual or new hire information. From time to time, the Company will sponsor employee training programs in which the Code and other Company policies and procedures will be discussed.

When an alleged violation of the Code of Ethics is reported, the Company shall take prompt and appropriate action in accordance with the law and regulations and otherwise consistent with good business practice.

Any violation of applicable law or any deviation from the standards embodied in this Code of Ethics will subject you to disciplinary action, up to and including termination of employment. In addition to imposing discipline upon employees involved in non- compliant conduct, the Company also will impose discipline, as appropriate, upon an employee's supervisor, if any, who directs or approves such employees' improper actions, or is aware of those actions but does not act appropriately to correct them, and upon other individuals who fail to report known non-compliant conduct. In addition to imposing its own discipline, the Company will bring any violations of law to the attention of appropriate law enforcement personnel.

Any waiver of a violation of this Code of Ethics by an executive officer or director of LECIP Inc. must be approved by the Company's Board of Directors, and any such waiver and the reasons for such waiver must be promptly disclosed to the public.

The MBTA specification currently requires that the primary suppliers of subsystems delineated in Tab 1.1 to have the following information included in a Bidder's Proposal. We request that you provide this information to us so that it can be incorporated into our submittal. As noted in our cover letter, we are requesting clarification from MBTA regarding the need for this material. We will advise you of their response, but we must currently proceed as if it will be required. We request your return of this information by January 31, 2014.

1. Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.

2. Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.

3. Provide the names, title and telephone numbers of all officers.

4. Has the business or an owner or shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.

5. Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances. Please indicate whether it resulted in a termination for cause.

6. Have any of the business owners, shareholders, or officers every been convicted of felony violations of Federal, state or local laws? If yes, please describe the circumstances.

7. Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.

8. Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.

9. Provide the name, address, contact person and telephone of three business credit references, including but not limited to your primary banking institution.

10. Has the business or any of the business's owners or shareholders ever filed for bankruptcy or invoked insolvency proceedings under state law?

11. Provide the last three (3) years of audited financial statements, or reasonable equivalent of the Offeror. If the Offeror is a joint venture or other combination of business entities, provide the last three (3) years audited financial statements for each entity.

12. Provide the business's current code of business ethics or equivalent.

13. Provide the responses to Questions Nos. 1 through 12 for all proposed suppliers of major subsystems identified in response to Tab I.1 – Technical Approach.

William Francis Galvin
Secretary of the
Commonwealth

Date: February 27, 2014

To Whom It May Concern :

I hereby certify that according to the records of this office,

MITSUBISHI ELECTRIC POWER PRODUCTS, INC.

a corporation organized under the laws of

DELAWARE

on **November 20, 1985** was qualified to do business in this Commonwealth on

February 03, 2014 under the provisions of the General Laws, and I further certify that said

corporation is still qualified to do business in this Commonwealth.

I also certify that said corporation is not delinquent in the filing of any annual reports required to

date.

In testimony of which,
I have hereunto affixed the
Great Seal of the Commonwealth
on the date first above written.

William Francis Galvin

Secretary of the Commonwealth

RE: RFP NO. CAP 27-10 New Orange & Red Line Vehicles

Dear Ms. Zhang Wenting,

We are writing this letter to supplement or clarify our answers to the following two questions in Section B, Part B – Qualifications and Certifications of the RFP:

6. Have any of the business owners, shareholders, or officers ever been convicted of felony violations of Federal, state or local law? If so, please describe the circumstances.

7. Are there any pending recent law suits against the business or any of its owners or shareholders? If so, please describe the circumstances.

Our answer to Question 6 is "NO." This is based on our understanding of the words "business owners" or "shareholders" to mean our parent corporation. For your information, Mitsubishi Electric Power Products, Inc. ("MEPPI") is owned 100% by Mitsubishi Electric US Holdings, Inc. ("MEUH"). MEUH is in turn owned 100% by Mitsubishi Electric Corporation of Tokyo, Japan ("MELCO"). For purposes of Question 6, we answered with reference to MEUH, our owner, not MELCO. In the interests of full disclosure, the answer would be "YES" if we were answering Question 6 with reference to MELCO. On November 6, 2013 MELCO entered into a plea agreement whereby it pled guilty to one count of violating US antitrust laws. This plea agreement arose out of the US Department of Justice's investigation of the automotive components industry.

Our answer to Question 7 is "YES." A number of civil actions have been filed in connection with the DOJ's investigation of the automotive components industry. MEUH is a defendant in the following actions in the US District Court for the Eastern District of Michigan:

- **Martens Cars of Washington, et al. v. Denso Electric Manufacturing Co., Ltd.,** et al., including Mitsubishi Electric US Holdings, Inc. [Civil Case 1314202]
- **Ifeoma Adams et al. v. Diamond Electric Manufacturing** et al., including Mitsubishi Electric US Holdings, Inc. [1314173]
- **Jerry McDaniel et al. v. Denso Electric Manufacturing Co.,** Ltd. et al., including Mitsubishi Electric US Holdings, Inc. [Civil Case 1314660]

Should you have any questions, kindly let me know.

Very truly yours,

Timothy J. Logan
General Manager
Transportation Systems Division

Financial Highlights

Performance for the year ended March 31, 2013

I. Introduction

MEPPI is committed to the highest standards of business ethics and legal compliance. This commitment encompasses our relationships with customers, suppliers and competitors and with each other as employees at every organizational level.

It is the policy of MEPPI to require strict observance of and compliance with both the letter and spirit of all laws governing the conduct of the company's businesses. Laws affecting the conduct of MEPPI have grown in number and complexity. However, our employees are expected to have a general knowledge of the laws and regulations that apply to their work. This policy also imposes on MEPPI employees a higher standard of ethical conduct than mere compliance with the law. In all of their dealings with others, MEPPI employees are required to exercise the highest degree of honesty and integrity.

This commitment and the responsibilities it entails are summarized in this policy. This policy is not intended to address every legal compliance or ethical situation which may confront employees. Employees are asked to read MEPPI's Employee Handbook and related policies for further details and information and to discuss any concerns they may have with their supervisor, Human Resources, any member of the company's Legal Compliance Committee or the MEUS Legal Department.

Compliance with this policy and the company's legal compliance program is mandatory, including adherence to all records hold notices (see Records Retention section), participation in scheduled legal training and providing required acknowledgements. MEPPI requires employees to acknowledge annually that they have received and reviewed this policy and that they understand and agree to abide by all aspects of the policy and the company's legal compliance program.

Employees are encouraged to share these values with third parties with whom the company does business.

II. Our Mission

As part of the Mitsubishi Electric global family of companies, we are committed to advancing society through the supply of equipment and services that enable North America's electric, water, transportation, and communications infrastructures to grow and to operate safely, reliably, and economically.

III. Our Vision

We are committed---

- To be the supplier that provides our customers the best total value in the changing 21st Century business environment
- To be a good employer and corporate citizen of the communities in which we reside and work
- To be a profitable and growing part of Mitsubishi Electric's global business

IV. Our values

All of MEPPI's policies, including this Code of Ethics, stem from our core values. As our values bind us together as an organization, it is our intention to have our decisions and actions demonstrate these values.

- **Quality.** We are committed to quality. We will not be satisfied with past successes, but will use them to build for the future. We will deliver excellence, continuously improve and respond to change.

- **Customers.** We are committed to customer satisfaction. We believe in putting the customer's needs first by promoting a customer-centered culture that emphasizes outstanding service and commitment.

- **Integrity.** We recognize that integrity is fundamental to our success. By acting with integrity in all that we do, we strive to be personally accountable for high standards of behavior in all aspects of our work.

- **MEPPI people**. We value MEPPI people. We believe that our employees are the source from which our ideas, actions and performance flow. The full potential of our people is best realized in a diverse environment that breeds respect, equality, fairness, self-fulfillment, teamwork and dedication to excellence.

- **Community**. We are committed to being socially responsible corporate citizens. We encourage our employees to contribute their time and talent to worthwhile civic and charitable projects and organizations.

No one, regardless of level or position, is ever authorized to commit or to ask an employee or contractor to commit an illegal act or to violate this policy. Employees may not engage in conduct or activities that may raise questions as to MEPPI' or any employee's honesty, integrity or impartiality or which could otherwise embarrass or damage the company's reputation.

SECTION B
PART B TECHNICAL PROPOSAL AND STATEMENTS AND CERTIFICATIONS REGARDING ELIGIBILITY

CERTIFICATION REGARDING DEBARMENT, SUSPENSION AND OTHER RESPONSIBILITY MATTERS FOR LOWER TIER PARTICIPANT

The Lower Tier Participant certifies by submission of this proposal, that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal, State or local department or agency.

When the Lower Tier Participant is unable to certify to any of the statements in this certification, such Participant shall attach an explanation to this proposal.

THE LOWER TIER PARTICIPANT CERTIFIES OR AFFIRMS THE TRUTHFULNESS AND ACCURACY OF THE CONTENTS OF THE STATEMENTS SUBMITTED ON OR WITH THIS CERTIFICATION.

Code of Ethics: RL Controls, LLC (RLC) is a small growing business. We require all our employees to follow these guidelines.

Ethics Mission Statement: To treat all with respect, honesty and integrity. This includes, company resources and property, customers and customer properties and other employees at RLC.

External to RLC

1. Interacting with a customer should be a positive experience; an RLC employee needs to be courteous and helpful at all times. They are to communicate their needs at all times.
    a. The customer is our livelihood and every employee is expected to have the utmost respect and meet the needs of the customer.
    b. You are there to support the needs of the customer and there is always a solution. Ask if you need immediate help, it is always available to you. "Treat the customer, as you would expect to be treated."
    c. Answer all emails in a timely manner; provide relevant information or response with your full contact information. If need be, add the cc of a person that is being brought in to help in response, it's about the needs of a customer and acknowledge why they are now included.
    d. All documentation is the property of RLC and cannot be disseminated or reused outside of RLC without written permission. We maintain privacy agreements with customers. An employee may not be aware, or need to be, as not all information is disclosed as a matter of company policy and is decided on a case-by-case basis by management.
2. Managers and employees are to seek guidance when uncertain as to the best practice to provide a response to a customer that could impact the project/work performance or the reputation of the company.
    a. There is always a positive response, even when it's not immediate, don't feel pressured.
    b. Provide timely communication in writing, don't always assume the conversation will be remembered, and is not considered the final decision in most cases, "do not assume." When resources of the company are required, the need is to be submitted in writing for approval.

Internal to RLC

3. Employees are to interact with their manager(s) or with mangers permission if they are not clear as to what is required of them or if they need information relative to their employment at RLC.
    a. RLC is a small growing company and values the controlled input of their employees.
4. Internet usage has become a valuable tool and provides great benefit to all. It is expected that employees will use the Internet appropriately when on company time and equipment.
5. Treating each other with respect, honesty and integrity.
    a. Respect and provide personal space when needed and articulate the need to communicate when it impacts the work environment.
    b. Cooperation is expected from employees on knowing the value of good working relationships with each other, our customers and the benefits of having camaraderie with respect for a healthy working environment.

Each employee has an obligation to adhere to the standards and report to the management if the expectations can't or are not being met. They are required to sign, and a copy is maintained within their history folder.

SECTION B
PART B TECHNICAL PROPOSAL AND STATEMENTS AND CERTIFICATIONS REGARDING ELIGIBILITY

QUALIFICATIONS AND CERTIFICATIONS

NOTE: The Authority reserves the right to audit compliance with respect with each of required statements and certifications in the forms submitted by Offerors, including but not limited to the Domestic U.S. Content Certification, Domestic U.S. Content Worksheet, and Final Assembly of Production (Non-Pilot) Vehicles in Massachusetts.

Questions Concerning Eligibility

Provide short answers (and attach relevant documents) to the following questions and requests:

1. Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.

   A:N/A

2. Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.

   A: SAFT is a publicly held corporation.

3. Provide the names, title and telephone numbers of all officers.

   A: See attachment 1

4. Has the business or an owner of shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.

   A: N/A

5. Has the business owners, shareholders, or officers ever been in default of any obligations under a contract with MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances. Please indicate whether it resulted in a termination for cause.

   A: N/A

6. Have any of the business owners, shareholders, or officers ever been convicted of felony violations of Federal, state of local laws? If yes, Please describe the circumstances.

   A: N/A

7. Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.

   A: N/A

8. Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.

   A: N/A

9. Provide the name, address, contact person and telephone of three business credit references, including but not limited to your primary banking institution.

   A. N/A

10. Has the business or any of the business's owners of shareholders ever filed for bankruptcy or invoked insolvency proceedings under state law?

    A: N/A

11. Provide the last three (3) years of audited financial statements, or reasonable equivalent of the Offeror. If the Offeror is a joint venture or other combination of business entities, probed the last three (3) years audited financial statements for each entity.

    A: See attachment 2

12. Provide the business's the current code of business ethics or equivalent.

    A:See attachment 3

Elizabeth Ledger	22 April 2005	7 May 2013	6 May 2015	Director of Communications.

PRESS RELEASE

Annual sales growth of 7.5%
at constant perimeter and exchange rates.
Net income up 5.2% to €36.5 million.

Paris, 18 February, 2014 – Saft, leader in the design and manufacture of advanced technology batteries for industry, announces its fourth quarter and annual sales along with its earnings for the period ending 31 December 2013.

2013 Key figures

- Full year sales of €624.2 million, an increase of 4.4% on a reported basis. At constant perimeter and exchange rates, growth in 2013 was 7.5%.
- 2013 EBITDA amounted to €92.5 million, down 9.8% compared to 2012.
- Net income of €36.5 million, up 5.2% compared to 2012.
- Earnings per share of €1.44 compared with €1.38 as reported in 2012.
- An ordinary dividend of €0.78 per share will be proposed at the Annual General Meeting, an increase of 4.0%.

2014 Outlook

- 2014 sales to be in the range of €660-700m.
- EBITDA to be in the range of €102-108m.

John Searle, Chairman of the Management Board, commented:

"The company had very strong sales growth during H2 and overall I am very satisfied with the Group's sales performance in 2013 despite the slow start to the year. Many of our business gained market share notably in the telecom and transportation markets. This growth was seen in our Industrial Battery Group division whilst Specialty Battery Group division was faced with weak defence markets and challenges in the US civil electronics market. Nevertheless aside from the defence market the Specialty Battery Group division business made steadily sales progress through the year.

The profitability of Saft recovered strongly in H2 on the back of growing volumes in Industrial Batteries which sharply reduced losses in our new Li-ion factories, in line with our break even objective for 2014.

For this year, I see continued strong sales growth leading to improved profitability. Industrial Batteries will continue to be the main growth driver but I expect the Specialty Battery division to return to growth on the back of steadily improving sales in the civil electronics and space markets. In addition, the defence market should start to stabilise during the year. Saft is faced with favourable comparables in H1 and a more challenging H2.

I am confident the company is well positioned to succeed in 2014 and beyond."

Full year consolidated results

(in € million)	Restated			Reported		
	2013	**2012(1)**	**YoY Growth(1)**	**2013**	**2012(2)**	**YoY Growth(1)**

(1) Excluding non-recurring sales to Johnson Controls Inc. of €5.2 million.

(2) 2012 financial statements have been restated to apply revised IAS 19 standard on pensions. Financial impacts of the retrospective application of that standard from 1st January 2013 are described in note 2.1 to the consolidated financial statements.

Numbers and variations are at actual exchange rates, except for the change in revenue which is measured at constant exchange rates.

The average exchange rate in 2013 was €1 to US$1.33 (compared with €1 to US$1.28 in 2012).

2013 consolidated financial statements approved by the Saft Groupe SA Management Board have been reviewed by the Supervisory Board on 14 February 2014. These consolidated financial statements have been certified by the Group's auditors on 17 February 2014.

Full year results by product line

	Year ended December 31, 2013				Year ended December 31, 2012		
	Sales (€m)	Variations (%)	EBITDA (€m)	EBITDA margin (%)	Sales[1] as restated (€m)	EBITDA[1] as restated (€m)	EBITDA margin (%)
IBG	367.9	19.2 %	38.8	10.5%	315.3	33.7	10.7%
SBG	256.3	(5.8)%	59.1	23.1%	277.5	70.4	25.4%
Other[2]	-	-	(5.4)	n.a.	-	(1.8)	n.a.
Total	**624.2**	**7.5%**	**92.5**	**14.8%**	**592.8**	**102.3**	**17.3%**

(1) *Sales for 2012 financial period exclude €5.2m of non-recurring sales to Johnson Controls Inc. Consequently, EBITDA has been adjusted by €(0.2)m. 2012 EBITDA has also been restated to apply revised IAS 19 standard on pensions. Financial impacts of the retrospective application of that standard from 1st January 2013 are described in note 2.1 to the consolidated financial statements.*

(2) *The "Other" cost centre includes the cost of corporate support services, i.e. primarily IT, research, corporate management, finance and administration.*

All data contained in the table above are expressed at current exchange rates, except for changes in sales that are expressed at constant exchange rates.

The average exchange rate in 2013 was €1 to US$1.33 (compared with €1 to US$1.28 in 2012).

Fourth quarter sales

In the fourth quarter of 2013, sales amounted to €186.1 million, up 12.3% at constant perimeter and exchange rates. On a reported basis, the increase in sales was 9.5% compared to the fourth quarter of 2012.

	Q4 2013	Q4 2012[1]	Variations in%	
			At actual exchange rates	At constant exchange rates
IBG	117.4	93.9	25.0%	28.1%
SBG	68.7	76.1	(9.7)%	(7.3)%
Total	**186.1**	**170.0**	**9.5%**	**12.3%**

(1) Excluding non-recurring sales to Johnson Controls Inc. of €1.4m.

Sales numbers are at actual exchange rates.
The average exchange rate in Q4 2013 was €1 to US$1.36 (compared with €1 to US$1.30 in Q4 2012).

Industrial Battery Group (IBG)

For the full year, sales of Industrial Battery Group grew by 19.2% at constant rates to €367.9m, with a sharp acceleration in the second half, up 31.3% at constant rates (with a 28.1% growth in Q4).

The stationary back-up power business grew by 20.6%. The telecom business generated the growth due to strong demand from the US and a key project in India for Li-ion batteries. Thus in Q4, the stationary back-up power sales grew by 17.3% thanks to high demand for both nickel and Li-ion batteries.

The industrial standby power activity grew in line with the market, but the emerging energy storage business was slightly lower than 2012. In Q4, the industrial standby power business had sales lower than prior year due mainly to challenging comparables. The lack of contracts from prior quarters resulted also in reduced sales in the energy storage market with utilities for the quarter, but some important contracts worth more than €10.0m have been signed during the period, providing backlog for 2014.

The transportation market had full year sales growth of 10.7%, with strong growth of both aviation and rail batteries. The performance in the rail was strong throughout the year whilst the aviation activities had good growth during H2 due to strong demand from aviation OEMs and the US military. In Q4, the transportation activity recorded very strong growth of 36.3% helped by the timing of the delivery of rail contracts, notably in North America and Asia.

Finally sales of electrodes totalled €9.9m in 2013, principally to Arts Energy.

For the full year, the EBITDA of the Division increased by 15.1% to €38.8m with a stronger performance in H2. A combination of high demand for nickel batteries and for Li-ion batteries improved the profitability in most factories, particularly in the Jacksonville and Nersac factories where losses reduced sharply as a result of improved overhead recovery.

Specialty Battery Group (SBG)

For the full year, sales of Specialty Battery Group were €256.3m, which represented a reduction of 5.8% compared with 2012. However, the decline has slowed in the second half of the year, with a H2 down 2.4% at constant exchange rates (7.3% decreases in the fourth quarter).

Despite a very weak start to the year, the civil electronics activity finally achieved a small growth of 0.3% during the year. The overall performance was impacted by a poor performance in the US with reduced volumes from a small number of key clients. Elsewhere, the business performed well and had growth beyond historical levels. During Q4, sales of batteries to the civil electronics market grew by 1.9%, due to on-going strong growth in China and an expanded client base in Europe.

The space and defence activity had sale 14.3% below 2012. This reduction was due to lower demand for radio batteries and torpedo batteries from a number of historical clients, whilst new projects for Li-ion batteries continued to grow. The space market was weak in H1, and despite a strong H2, the overall sales were slightly below 2012. During Q4, space and defence market sales were 17.9% below prior year. This activity suffered from very unfavourable comparables as during Q4 2012 some major defence contracts were delivered. The space business in contrast had a strong quarter.

For the full year, the EBITDA of the division was €59,1m, a reduction 16.1% from 2012, due largely to the reduced sales but also due to an expected reduction in margin after an exceptional level of profitability in 2012. The divisional profitability was also impacted by unfavourable exchange rates, especially during H2.

Other highlights of 2013 financial results

After factoring in the cost of support activities and increased depreciation and amortization of €5.3m to €38.0m, Group operating profit amounted to €61.1m in 2013, showing a decrease of 11.8% compared to 2012.

The net financial expense in FY 2013 was €10.5m, a decrease of €2.1m on 2012. This reduction in net finance costs resulted from a decrease of net interest costs of €1.2m, and a reduction of €1.2m of foreign exchange losses of €1.2m.

Net profit from continuing operations was €41.7m in 2013, stable as compared with a 2012 net profit of €42.0m. This result includes Saft's share in increased net profit of the ASB joint-venture at €1.5m.

Net loss from discontinued operations for 2013 was €(5.2)m from the sale of the Small Nickel Battery activity.

Finally, the Group's net profit for FY 2013 totalled €36.5m, compared with a net profit of €34.7m in 2012, with an increase of 5.2%.

Stable cash generation from activities at €54.2m and a slight increase in investments at €56.9m, Saft ended 2013 with a strong cash position of €101.4m, leaving the Group with full flexibility for the future. The Group's net debt at 31 December 2013 stood at €111.6m compared with €103.0m at the end of 2012.

This strong balance sheet enables Saft to propose an ordinary dividend of €0.78 per share, an increase of 4.0% YoY.

About Saft

Saft (Euronext: Saft) is a world leading designer and manufacturer of advanced technology batteries for industry. The Group is the world's leading manufacturer of nickel batteries and primary lithium batteries for the industrial infrastructure and processes, transportation, civil and military electronics' markets. Saft is the world leader in space and defence batteries with its Li-ion technologies which are also deployed in the energy storage, transportation and telecommunication network markets. More than 3,800 employees in 18 countries, 14 manufacturing sites and an extensive sales network all contribute to accelerating the Group's growth for the future.

Saft Code of Ethics

Introduction

Our Group benefits from a rich mix of cultures, making it essential that all our employees, regardless of the entity they belong to, the function they carry out or the country they work in share a common definition of Saft's vision, ambition and values. It is also essential that we share the same code of conduct, individually and collectively.

A shared identity, ambition and vision reinforces the image that we give of ourselves, ensures the Group's cohesion and contributes to the confidence of our customers, our partners and suppliers, our shareholders, the public and all the other stakeholders who are involved in our activities and development.

I want to stress the importance of knowing and respecting our Code of Ethics. Our development must be guided by our core ethics. Our Code of Ethics ensures the proper conduct of our daily activities. Each Saft employee whatever his or her position in the Group, must be familiar with and scrupulously apply these principles.

I have created an ethics committee which will meet on a regular basis to ensure that our code is continually adapted to our evolving business environment.

I consider it of the utmost importance that each of you has easy and direct access to these fundamental rules. They will also be available to all on our internet and Intrasaft sites.

I count on you all to respect these rules.

John Searle
Chairman and CEO

January 2010

1. Working with our customers

1.1 - The way we work with our customers

The success of our customers is a key to Saft's success. Customers look to us for performance innovation, reliability but also integrity. The standards of behaviour required in our client relationships are designed to ensure that we consistently deliver those values and avoid mistakes that will harm our reputation.

1.2 - Quality

We strive to help our customers gain competitive advantage by adding value through the performance and quality of our technologies.

1.3 - Honesty

Trust is built through transparency and honesty. To be successful on a sustainable basis, we have to build each customer's trust through the integrity of our words and actions. We don't promise what we can't deliver and strive to ensure that customers, shareholders and colleagues trust us to keep our word.

1.4 - Fair competition

We believe in a competitive, free enterprise system because it guarantees that our hard work and innovation will be rewarded.

This system, as the basis of a free market economy, is protected and promoted by competition law. Consequently, our actions must always comply with all applicable antitrust and other laws regulating competition. While these laws vary from country to country, Saft’s minimum standard can be defined as follows:

We compete openly and independently in every market. We do not make any agreements – formal or otherwise – with competitors to fix or set prices or allocate products, markets, territories or customers.

We do not obtain or share with competitor's current or future information about price, profit margins or costs, bids, market share, distribution practices, terms of sales, specific customers or vendors.

We do not agree with or require a customer to resell our products at certain prices.

We do not act in a manner that unfairly favours or benefits one customer over another competing customer.

Be mindful of the antitrust risks presented by trade and professional association meetings. As a Saft employee you are required to:

Attend only meetings of legitimate trade and professional associations held for proper business, scientific, or professional purposes.

Discuss any questionable agenda items with your manager before you attend the meeting.

Leave the meeting and promptly advise your manager, if you observe any activity at an association meeting that appears to be illegal or suspicious.

1.5 - Improper payments

Saft's reputation must not be put at risk by the offer of improper payments. In dealing with public official, political parties or their officials or any private sector worker, Saft employees must never offer, promise or give any undue pecuniary or other advantage, whether directly or through intermediaries, to obtain or retain business or any improper advantage in the conduct of business.

1.6 - Gifts and favours

Accepting gifts and entertainment from business partners or offering such favours undermines our credibility. It makes us vulnerable to accusations that business decisions are influenced by factors others than merit.

Employees must therefore not offer, make, seek or accept gifts, payment, entertainment or services to actual or potential business partners which might reasonably be believed to influence business transactions, which are not within the bounds of customary business hospitality or which are prohibited by law.

2. Protecting Saft interests

2.1 - Use of the company's assets

Saft strives to give employees the tools they need – equipment and information – to be effective. Saft's physical assets, intellectual property rights and information must be handled with care to avoid loss, theft or damage. Information assets include organization charts, technologies and processes, manufacturing methods, as well as marketing, advertising, and business development studies and plans. These are considered to be Saft proprietary information and they belong to the Group. They must not be disclosed either during employment or after leaving the Group. The Company will defend its assets by all necessary legal means.

Company assets are intended to be used for business purposes. Limited personal use is only permissible if it is not in conflict with the interests of Saft, this Ethics policy or Saft's rules and policies.

2.2 - Use of information systems

Saft's information systems are there to help us work efficiently and professionally. Generally, such facilities should be used for business purposes, in a manner that does not violate the rights or interests of the Saft Group, and in line with rules issued by the Saft Group.

Remember that any communication via e-mail could be regarded as a statement of Saft. Therefore, employees must be careful not to release information that is commercially sensitive or contentious or may have undesired contractual or other legal implications for Saft.

All laws governing copyright, defamation, discrimination and other forms of written communication also apply to online and e-mail communication. Unauthorized or unlicensed software must not be placed onto Saft's IS facilities.

Saft's information systems facilities must not be used to attack the integrity of our or a third party's networks or data. This includes originating or forwarding chain letters or unsolicited commercial e-mail (spam).

Information produced and stored on Saft's information systems facilities is regarded as Saft's property and Saft reserves the right to access all such information except where limited by law or agreement. Employees are responsible for keeping their electronic files and archives in an orderly manner.

2.3 - Confidential information

Information is an asset. We share some of it in press releases, product information, the annual report and other public documents. Any other information that comes to employees in connection with their work, whatever the source must be kept confidential to prevent others copying our work or poaching customers. It may also include information that suppliers, customers, or partners may have entrusted to Saft.

Mark information appropriately, keep it secure and limit access to those who need to know in order to do their jobs. Avoid discussing information in areas where you may be overheard, such as airports, public transport, restaurants and bars, elevators, restrooms, and cafeterias.

Information is so valuable that it may be appropriate to ask any outside party given access to confidential information to sign a confidentiality agreement approved by the Legal department.

2.4 - The intellectual property rights of others

Saft protects its own secrets and respects the intellectual property rights of others. Employees must not obtain confidential information of other parties by improper means or disclose it without authorization.

2.5 - Conflicts of interest

Conflicts of interest can arise where personal interests or family and other allegiances are at odds with the interests of the company. In general, we should avoid situations in which personal interests, outside activities, financial interests, or relationships conflict or appear to conflict with the interests of Saft and not allow business dealings on behalf of the company to be influenced by personal considerations or relationships.

The most frequent conflicts of interest arise where an employee is in a position to award business contracts, hire staff, has access to information that may be of interest to the financial markets or is offered employment by a competitor.

Employees who think they may be in a “conflict” must inform their line manager, local ethics officer or human resources manager so that the company can determine whether a conflict exists. They will be advised of the proper actions to take, in line with rules issued by the Saft Group.

2.6 - Privileged information and insider trading

Inside information is information not readily available to the public that an investor would consider important in deciding whether to buy or sell a company’s shares. It can be information affecting shares of Saft or of another company.

Because inside information may have considerable value to investors, it is governed by legislation designed to preserve public confidence in and the integrity of the securities markets in many countries.

Saft has strict routines and guidelines for the dissemination of such information, which includes financial data and plans for the future of the business and changes to key personnel. The laws and agreements with the stock exchange prohibit anyone with inside knowledge from trading the securities or disclosing the information. If employees are unsure whether they have “inside” information, they should contact their supervisor or the legal department to discuss the situation.

Trading securities such as shares or bonds while in the possession of insider information is both unethical and illegal, and will be dealt with decisively. It is not permitted to share inside information with Saft employees unless they need to know and are aware of their obligations in handling the information. It is against the law to share information with others, including a co-worker, family member, friend or former colleague, who might make an investment decision based on inside information.

Saft informs all insiders in writing of their responsibilities and keeps up to date insider lists as required by the French stock market authority.

Communication with investors and the financial media is the exclusive responsibility of the financial and communication departments.

2.7 - Anti-money laundering rules

Saft's commitment to fairness, honesty and openness extends to complying fully with all money-laundering laws throughout the world. Money laundering generally occurs when funds from illegitimate sources are brought into legitimate financial channels to hide them or make them appear legitimate.

Employees must protect the integrity and reputation of Saft by helping to detect possible money laundering activities. They should watch for and report warning signs to their manager, which may include customers who are reluctant to provide complete information or wish to make payments in cash.

2.8 - We keep accurate and complete financial records

Investors, creditors and others have a legitimate interest in Saft's accounts. The integrity of the accounts depends on the accuracy, completeness and timeliness of the entries. All Saft's business transactions must therefore be fully and fairly recorded in accordance with Saft's accounting principles and other appropriate requirements. Improper or fraudulent documentation or reporting is illegal.

3. Choosing and working with business partners

We choose our business partners with care.

3.1 - Relationships with suppliers

Saft expects fair competition in its markets and applies the same standard in dealing with suppliers. If you select and/or deal with suppliers, you should not show any favour or preference to any person or business based on anything other than the best interests of Saft. You must not let your business dealings on behalf of the company be influenced by personal or family interests.

Similarly, all purchases of goods and services for Saft must be made in accordance with company policies.
Please also refer to the specific supplier-relations document available from the purchasing director.

3.2 - Agents, consultants

Commissions or fees paid to agents and consultants must be reasonable in relation to the services provided. Employees must not agree or pay commissions or fees that could be considered to be improper payments.

Agreements with consultants, brokers, sponsors, agents or other intermediaries shall not be used to channel payments to any person or persons, including public officials or customer employees.

4. Respect for regulations

Upholding Saft’s reputation for integrity requires absolute compliance with the law for Saft and all employees. Employees are expected to be familiar with the law as it applies to their job and management is expected to provide necessary instruction and advice.

Saft expects employees to comply with all laws designed to protect health, safety and the environment, to obtain all required permits and to operate facilities in strict accordance with the relevant laws.

Due to the nature of Saft’s business we observe the highest possible level of protection of our employees’ health and safety and of our environment. A specific environment policy is available on www.saftbatteries.com

5. Working with public bodies

Saft interacts with different groups of stakeholders including customers, suppliers, shareholders, the media, non-governmental organizations and government officials. The interaction of employees with governments around the world is of particular importance.

5.1 - We cooperate fully with officials

Saft does business in many countries and values good relations with governments. National and local governments around the world have specific and varied procurement laws to protect the public interest. They generally prohibit offering benefits to individual officials, often include limitations on hiring current or recently retired officials and forbid any conduct that may be viewed as improperly influencing objective decision-making.

Saft employees must be truthful and accurate in interactions with government officials and observe the highest ethical standards when conducting business with government representatives.

In dealing with a government, employees are responsible for knowing and complying with applicable laws and regulations, and must not contact government officials on behalf of the company unless it is their job to do so.

5.2 - Contributions to public affairs

Employees are free to contribute (without company reimbursement) to a political candidate or party using their own personal time, money or other resources.

Saft funds, property or services must not be used to support any candidate for political office, political party, official or committee anywhere in the world.

6. Respecting and protecting our employees

The people who work for at Saft come from many different countries, backgrounds and cultures. We can only appreciate the contribution of each individual if we observe normal standards of courtesy and respect when interacting with one another. Saft will also be judged by outsiders according to the way they are treated in their business dealings with the company. Clear and regular communications, diversity, equality of opportunity and upholding health and safety are essential to fostering a work environment in which everyone will feel welcome and comfortable.

6.1 - Regular and open communication

Regular communication between managers and their teams is a key to business success. This communication, which usually takes the form of meetings and briefings, should cover business strategy, long-term objectives and short-term priorities. Communication between employees and their superior should include making clear how employees are contributing to Saft's business goals.

Employees have a right to receive their superior's assessment of their performance, which is expected to ascertain progress and, where appropriate, to include proposed plans for further development.

6.2 - Mutual respect and privacy

The privacy of personal information – whether from employees, customers, contractors or vendors – is to be respected at all times. Employees must collect, use, store, handle, and disclose individual personal information in accordance with Saft's privacy policies and applicable laws.

All e-mail and Internet communications made through Saft facilities are treated as Saft business information and so may be accessed, retrieved, monitored and disclosed by Saft for legitimate business purposes, in accordance with relevant laws.

6.3 - Equal opportunities

The dedication and professionalism of our employees is essential in order to achieve our objectives. Dozens of different businesses in countries around the world have come together over the years under the Saft umbrella and Saft's culture welcomes them all, regardless of gender, nationality, age, physical ability, or sexual orientation, or any other aspect of diversity. Employees must conduct their business activities with co-workers, customers, stakeholders and business partners with respect for all people without regard to differences or similarities.

Saft recruits and promotes people based on an objective evaluation of the necessary qualifications and qualities for the work to be performed. Employees should not engage in or support discrimination in hiring, compensation, access to training, promotion, termination or retirement based on gender, age, ethnic and national origin, caste, religion, disability, sexual orientation, union membership or political affiliation.

6.4 - Protection against harassment

Harassment - be it face-to-face, written, electronic or verbal – will not be tolerated at Saft and will be dealt with according to the rules in each country we operate in.

6.5 - Access to information

The Group undertakes to protect the personal information gathered in connection with the employment. Access to such information is disclosed only with prior consent of the employee except the data necessary to meet legal requirements in each country in which Saft operates.

The personnel charged with keeping such records shall guarantee that the information is not unlawfully disclosed.

6.6 - Sustainable development

Every Saft employee contributes to achieving the company's sustainability goals by supporting economic progress, environmental stewardship and social development. One aspect involves taking appropriate initiatives that improve the quality of life in the communities and countries where Saft operates.

Sustainability means that Saft treats all stakeholders in a socially responsible manner. Employees can contribute by promoting open dialogue with stakeholders on Saft's economic, social and environmental contributions and performance, subject to confidentiality rules.

6.7 - We support environmental responsibility

Due to the nature of our business, all Saft employees have the responsibility to comply with the letter and the spirit of environmental laws and regulations and respect the environment, wherever they work.

6.8 - Health and safety

It is our duty to our colleagues, their families and their communities to safeguard the health and safety of every employee at work. Saft's stringent health and safety policies and reporting requirements are in place to protect the lives and good health of employees.

Saft's ground rules for employees are: work safely and protect yourself, your co-workers, the community and the environment. The policies, procedures and programs apply worldwide to promote safe and healthy working conditions, protect the environment, and support the Group's commitment to compliance with applicable laws and regulations.

You should know and comply with the law and related company policies if you have responsibilities in areas that are subject to safety and/or environmental regulations.

The Group naturally respects all the provisions of the United Nations Declaration of Human Rights.

The MBTA specification currently requires that the primary suppliers of subsystems delineated in Tab 1.1 to have the following information included in a Bidder's Proposal. We request that you provide this information to us so that it can be incorporated into our submittal. As noted in our cover letter, we are requesting clarification from MBTA regarding the need for this material. We will advise you of their response, but we must currently proceed as if it will be required. We request your return of this information by January 31, 2014.

1. attach relevant certificate of good standing from the secretary of state of the commonwealth of massachusetts.

   Answer: No

2. Provide the name and telephone numbers of the all business owners, shareholders if not a publicly held corporation, and /or members if a limited liability company.

   Answer:

   Company Name: Simutech International Co., LTD

   Owners: Wang Wen Guang

   Telephone Numbers: 0086-010-81788332-8003

3. Provide the name , title and telephone number of all officers.

   Answer:

   Name: Wang Wen Guang

   Title: President

   Telephone Numbers: 0086-010-81788332-8003

   Name: Cui Peng

   Title: Vice president

   Telephone Numbers: 0086-010-81788332-8005

   Name: Zhu Yi

   Title: Vice president

   Telephone Numbers: 0086-010-81788332-8018

4. Has the business or an owner or shareholder of the business ever had a prior contractual reationship with the MBTA? If yes, please describe relationship.

Answer: No

5. 5. Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA. any other Massachusetts atate agency or any federal agency? if yes, please describe the circumstances. please indicate whether it resulted in a termination for cause.

   Answer: No

6. have any of the business owners,shareholders, or officers every been convicted of felony violations of federal , state or local laws? if yes, please describe the circumstances.

   Answer: No

7. Are there any pending recent law suits against the business or any of its owners or share holders? if yes, please describe the circumstances.

   Answer: No

8. Provide the name, address , account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.

   Answer:

   Insuranceagent Name: Ping An insurance company of China, Ltd.

   Address: Guangdong Province Shenzhen Fukuda District Fuhua road Galaxy Development Centre

   account number:

   contact person: Li zheng

   telephone number: 0086-18901231006

9. Provide the name, address , contact preson and telephone of three business credit references, including but not limited to your primary banking insitution.

   Answer:

   Company Name: Beijing Bank

   Contract Person: Meng Yun Yun

   Telephone: 0086-13121683869

10. Has the business or any of the business's owners or shareholders ever filed for bankruptcy or invoked insolvency proceedings under state law?

    Answer: No.

11. Provide the last three years of audited financial statements, or resonable equivalent of the offeror. If the offeror is a joint venture or other combination of business entities, provide the last three years audited financial statements of each entity.

    Answer: Please check attach file.

12. Provide the business's current code of business ethices or equivalent.

    Answer:

    N/A

13. Provide the responses to questions Nos. 1 trough 12 for all proposed suppliers of major subsystems identified inresponse to TabI.1 Technical approach.

SECTION B

PART B TECHNICAL PROPOSAL AND
STATEMENTS AND CERTIFICATIONS REGARDING ELIGIBILITY

QUALIFICATIONS AND CERTIFICATIONS

NOTE: The Authority reserves the right to audit compliance with respect to each of the required statements and certifications in the forms submitted by Offerors, including but not limited to the Domestic U.S. Content Certification, Domestic U.S. Content Worksheet, and Final Assembly of Production (Non-Pilot) Vehicles in Massachusetts.

Questions Concerning Eligibility

Provide short answers (and attach relevant documents) to the following questions and requests:

1. **Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.**

   N/A Manufacturing is based out of the State of New York

2. **Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.**

   ROBERT GAGNE 1-888-248-0666

3. **Provide the names, title and telephone numbers of all officers.**

ROBERT GAGNE	PRESIDENT	1-888-248-0666
JOANNA GAGNE	VICE-PRESIDENT, ADMINISTRATION	1-888-248-0666

4. **Has the business or an owner or shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.**

   NONE

5. **Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances. Please indicate whether it resulted in a termination for cause.**

   NONE

6. **Have any of the business owners, shareholders, or officers ever been convicted of felony violations of Federal, state or local laws? If yes, please describe the circumstances.**

   NONE

7. **Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.**

    NONE

8. **Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.**

    MOORE MCLEAN INSURANCE GROUP
    25 Watline Avenue, Suite 301 Mississauga, Ontario L4Z 2Z1
    Cheryl Brookham 1-888 404 0000
    All requests are to be made to TDG who will have Insurance Agent send responses directly to MBTA

9. **Provide the name, address, contact person and telephone of three business credit references, including but not limited to your primary banking institution.**

    Available upon request.

10. **Has the business or any of the business's owners or shareholders ever filed for bankruptcy or invoked insolvency proceedings under state law?**

    NO

11. **Provide the last three (3) years of audited financial statements, or reasonable equivalent of the Offeror. If the Offeror is a joint venture or other combination of business entities, provide the last three (3) years audited financial statements for each entity.**

    See Attachment "TDG FYE EXTRACT 2012.pf"

12. **Provide the business's current code of business ethics or equivalent.**

    See Attachment "TGG CODE OF ETHICS"

CUSTOMER CREDO

November 10, 1989

The customer need is our sole reason for existing, as an economic unit. We will use every resource that is at our disposal to aid the customer in solving his problems. We will develop solutions that are to the customers benefit. We acknowledge that our customer is committed to the problems of passenger transportation and we will do our best to assist in this solution.

We will design and manufacture products that are of quality and appropriate to the customer needs. We will meet with the customer on a regular basis to better grasp and evaluate the current concerns. If for any reason, we are unable to solve the existing issue, we will inform the customer immediately, so that they can take alternative steps.

We will become totally involved with the customer's priorities and planning, in order that we may be able to continue in making suggestions for improving his operations.

We are committed to help solve the problem of traffic congestion in our cities as well has finding ways to reduce the cost of consumer transportation. And since this is also the aim of our customers we intend on giving them our full support.

we will always treat our customer with dignity and respect. At no time will we try to deceive them at their expense and our profit. Even though problems and mis-understandings can arise, we will mutually strive to find a solution.

As a good corporate citizen we will sell product in order to yield a good and fair profit. This will ensure harmony within the corporation, security and self worth for our employees, and a good rate of return for our shareholders. These values will justify our existence.

WE BELIEVE THAT OUR CUSTOMER IS IMPORTANT.

The MBTA specification currently requires that the primary suppliers of subsystems delineated in Tab 1.1 to have the following information included in a Bidder's Proposal. We request that you provide this information to us so that it can be incorporated into our submittal. As noted in our cover letter, we are requesting clarification from MBTA regarding the need for this material. We will advise you of their response, but we must currently proceed as if it will be required. We request your return of this information by January 31, 2014.

1. Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.
   Not applicable.

2. Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.
   Share Holder: Toyo Denki Seizo K.K.
   Tel: +81-3-5202-8131

3. Provide the name, title and telephone numbers of all officers.
   - Officer 1: **Shinya Koizumi**
     Title: President
     Tel: 724-774-1760
   - Officer 2: **Ichiro Sueoka**
     Title: Vice President
     Tel: 724-709-4764

4. Has the business or an owner or shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.
   No.

5. Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances, please indicate whether it resulted in a termination for cause.
   No.

6. Have any of the business owners, shareholders, or officers ever been convicted of felony violations of Federal, state or local laws? If yes, please describe the circumstances.
   No.

7. Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.
   No.

8. Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents

NAME	**ADDRESS**	**CONTACT NAME**	**TELEPHONE NO.**	**INSURANCE COMPANY**	**INSURANCE TYPE**	**POLICY NO.**

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and
Stockholder of Toyo Denki USA, Inc.

We have audited the accompanying balance sheet of Toyo Denki USA, Inc. (a Delaware corporation) as of December 31, 2010, and the related statements of operations and retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Toyo Denki USA, Inc. as of December 31, 2010, and the results of its operations and its cash flows for the year then, in conformity with accounting principles generally accepted in the United States of America.

Toyo Denki USA, Inc.
Notes to Financial Statements
For the Year Ended December 31, 2010

Note 1 - Significant Accounting Policies

Nature of Business

Toyo Denki USA, Inc. (the "Company"), supplies electrical propulsion systems to rail car manufacturers in the transit industry. The Company is 100% owned by Toyo Denki Seizo K.K., a Japanese Company, which was founded in 1918 and supplies a complete line of transit products to Japanese and international markets. The Company completed its first order in the American market, supplying propulsion systems to Kinkisharyo International L.L.C. for its Dallas Area Rapid Transit (DART) 20 Light Rail Vehicle (LRV) contract. The Company now executes its second order to supply an additional 48 propulsion systems to Kinkisharyo for use on Super Light Rail Vehicles (SLRVs), also for DART. And the Company completed its third order to supply an additional propulsion system for testing onboard one of DART's existing LRVs, which determined that DART's fleet can be "upgraded" with the Company's equipment. In addition, the Company has received an order from Mitsubishi Electric & Electronics USA, Inc. to supply equipment for use onboard "M8" rail vehicles that will operate on the New York City transit system.

Revenue and Cost Recognition

The Company recognizes revenues from fixed-price and modified fixed-price long-term contracts on the percentage-of-completion method, measured by the percentage of cost incurred to date to estimated total cost for each contract. Management considers total cost to be the best available measure of progress on long-term contracts. For short-term contracts, the Company recognizes revenues using the sales method.

Contract costs include all direct material and labor costs and those indirect costs related to contract performance, such as indirect labor, supplies and tools. Selling, general and administrative costs are charged to expense as incurred. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined. Changes in job performance, job conditions, and estimated profitability may result in revisions to costs and income, which are recognized in the period in which the revisions are determined. Changes in estimated job profitability resulting from job performance, job conditions, contract penalty provisions, claims, change orders and settlements are accounted for as changes in estimates in the current period.

The asset, "Costs and estimated earnings in excess of billings on uncompleted contracts," represents revenues recognized in excess of amounts billed. The liability, "Billings in excess of costs and estimated earnings on uncompleted contracts," represents billings in excess of revenues recognized.

Income Taxes

Deferred income taxes are reported using the liability method. Deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the changes between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance, when in the opinion of management it is more likely than not that some portion or all of the deferred tax assets will not be realized. This is the case as of December 31, 2010. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Note 1 - Significant Accounting Policies (continued)

Accounts Receivable

Accounts receivable are reported net of an allowance for doubtful accounts. The allowance is based on management's estimate of the amount of receivables that will actually be collected. As of December 31, 2010, management believes no allowance for doubtful accounts is necessary.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. The cost of additions and improvements is charged to the property accounts, while maintenance and repairs are charged against earnings, or to appropriate jobs, when incurred.

Depreciation

Depreciation is computed using the straight-line method based on the estimated useful lives of the individual assets, which range from five to seven years. Depreciation expense was $1,300 for the year ended December 31, 2010.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Foreign Currency

The Company's functional currency is the United States dollar. The Company transacts business in foreign currencies. At the date a foreign currency transaction is recognized, each asset, liability, revenue, expense, gain, or loss arising from the transaction is measured and recorded in United States dollars using the exchange rate in effect at that time. At each balance sheet date, balances that will be settled in foreign currencies are adjusted to reflect the current exchange rate. Any gain or loss resulting from changes in foreign currency exchange rates is included in net income in the period in which the exchange rate changes.

Consideration of Subsequent Events

The Company has evaluated subsequent events through February 14, 2011, the date on which the financial statements were available to be issued.

Cash and Cash Equivalents

The Company considers securities with maturities of three months or less, when purchased, to be cash equivalents.

Note 2 – Concentration of Risk

The Company maintains cash balances at two financial institutions. At December 31, 2010, the Company's cash balance exceeded the $250,000 limit insured by the Federal Deposit Insurance Corporation (FDIC) by $1,995,513.

Note 3 – Advances to Subcontractors

Typically, the Company purchases parts and provides them to Subcontractors for incorporation into subassemblies which are completed and returned to the Company. In addition, the company makes progress payments to subcontractors and suppliers during the course of their performance of work under the contract. At December 31, 2010, however, there were no advances to subcontractors.

Note 4 – Contract Receivables

Contract receivables consist of the following at December 31, 2010:

Billed:	
Contracts in progress	$ 501,709
Unbilled retainage	1,710,452
	$ 2,212,161

Note 5 – Uncompleted Contracts

Costs and billings on the uncompleted 48 SLRV contract and Upgrade contract are summarized as follows at December 31, 2010:

Costs incurred on uncompleted contracts	$18,423,104
Estimated earnings	2,477,253
	$20,900,357
Less: billings on uncompleted contracts	$21,355,400
	($ 455,043)

Presented in the accompanying balance sheet as:

Costs and estimated earnings in excess of billings on uncompleted contracts	$ 201,335
Billings in excess of costs and estimated earnings on uncompleted contracts	($ 656,378)
	($ 455,043)

Note 6– Leases

The Company is leasing office/factory space under a lease which expires on July 31, 2012, and requires monthly payments of $8,485. Also, the Company is leasing an apartment under a lease which expires January 31, 2012, and requires monthly payments of $785 through January, 2011 and then $805 through January, 2012. The Company also rents furniture for the office and apartment under a month-to-month lease at a monthly cost of $601.

Note 6– Leases (continued)

Total rent charged to expense under these leases for the Year ending December 31, 2010 amounted to $119,693 including $1,237 for additional common area maintenance.

Future minimum non-cancelable payments under the leases are as follows:

Year ending December 31,	Amount
2011	$ 111,460
2012	60,200
Total	$ 171,660

Note 7 – Major Customer

The Company's contract revenue is concentrated in a large contract from the customer in the Dallas area. The Company had contract revenue from this customer of $8,400,113 for the year ended December 31, 2010. The Company was owed $497,350 from this customer as of December 31, 2010.

Note 8 – Backlog

The Company's backlog of revenue it expects to realize from work to be performed on uncompleted contracts in progress at December 31, 2010 amounted to $732,284.

Note 9 – Retirement Plan

The Company maintains a retirement plan covering all employees. Employees are able to contribute up to $16,500 or 100% of their compensation, whichever is less. In addition, the Company will make a matching contribution equal to 100% up to the first 3% of compensation that the employee defers. Total Company contributions for the year ended December 31, 2010 were $8,699.

Note10 – Income Taxes

At December 31, 2010, provision for income taxes consists of:

	December 31, 2010
Current:	
Federal	$ -
State	-
	-
Deferred:	
Federal	$ 160,000
State	45,000
	$ 205,000

Note 10 – Income Taxes (continued)

The effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are presented below:

	December 31, 2010
Deferred tax assets	$ 600,896
Deferred tax liabilities	(896)
Deferred tax asset valuation allowance	(600,000)
	$ -

Deferred taxes relate primarily to unused net operating losses, depreciation and amortization. At December 31, 2010, the Company has federal and state operating loss carry forwards of approximately $1,300,000 expiring in various years through 2028.

Note 11 – Related Party Transactions

During the year ended December 31, 2010, the Company's 100% owner, Toyo Denki Seizo, K.K. paid the Company $1,580 for miscellaneous parts and $2,375 for support service. At December 31, 2010, the Company owed Toyo Denki Seizo, K.K. $2,000,835 for parts sold to the Company for use in its Kinkisharyo project.

Note 12 – Stockholder's Equity

The Company issued 1,000 shares of $0.01 par value, common stock to its sole stockholder Toyo Denki Seizo, K.K., for a total consideration of $2,500,000. The amount received in excess of the par value, $2,499,990, was recorded as additional paid-in capital. During 2006, Toyo Denki Seizo, K.K. contributed $1,000,000 as additional paid-in capital to be used in operations.

The Company's Board of Directors approved a corporate readjustment of the Company's accounts in the form of a quasi-reorganization, which was effected May 27, 2008. The accumulated deficit, most of which was a result of the Company's start-up and performance of its initial project in the USA, was reduced by $1,585,720 with a corresponding $1,585,720 reduction of additional paid-in capital. The reduction in accumulated deficit is expected to improve the flexibility of the Company's future management strategy.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and
Stockholder of Toyo Denki USA, Inc.

We have audited the accompanying balance sheet of Toyo Denki USA, Inc. (a Delaware corporation) as of December 31, 2011, and the related statements of operations and accumulated deficit, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Toyo Denki USA, Inc. as of December 31, 2011, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Toyo Denki USA, Inc.
Notes to Financial Statements
For the Year Ended December 31, 2011

Note 1 - Significant Accounting Policies

Nature of Business

Toyo Denki USA, Inc. (the "Company"), supplies electrical propulsion systems to rail car manufacturers in the transit industry. The Company is 100% owned by Toyo Denki Seizo K.K., a Japanese Company, which was founded in 1918 and supplies a complete line of transit products to Japanese and international markets. The Company completed its first order in the American market, supplying propulsion systems to Kinkisharyo International L.L.C. for its Dallas Area Rapid Transit (DART) 20 Light Rail Vehicle (LRV) contract. The Company's second order to supply an additional 48 propulsion systems to Kinkisharyo for use on DART Super Light Rail Vehicles (SLRVs) is complete and under warranty. The Company completed its third order to supply an additional propulsion system for testing onboard one of DART's existing LRVs, which determined that DART's fleet can be "upgraded" with the Company's equipment. In addition, the Company now performs an order for Mitsubishi Electric & Electronics USA, Inc. to supply equipment for use onboard "M8" rail vehicles that will operate on the New York City transit system.

Revenue and Cost Recognition

Contracts to perform equipment assembly are recognized on an accrual basis upon shipment of the related equipment.

The Company recognizes revenues from fixed-price and modified fixed-price long-term contracts on the percentage-of-completion method, measured by the percentage of cost incurred to date to estimated total cost for each contract. Management considers total cost to be the best available measure of progress on long-term contracts. For short-term contracts and assembly-type contracts, the Company recognizes revenues and costs using the sales method.

Contract costs include all direct material and labor costs and those indirect costs related to contract performance, such as indirect labor, supplies and tools. Selling, general and administrative costs are charged to expense as incurred. Provisions for estimated losses on uncompleted long-term contracts are made in the period in which such losses are determined. Changes in job performance, job conditions, and estimated profitability may result in revisions to costs and income, which are recognized in the period in which the revisions are determined. Changes in estimated job profitability resulting from job performance, job conditions, contract penalty provisions, claims, change orders and settlements are accounted for as changes in estimates in the current period. At December 31, 2011, the Company has estimated that it will lose an additional $725,000 on its contract to perform contract assembly and therefore has accrued this amount as a loss.

Income Taxes

Deferred income taxes are reported using the liability method. Deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the changes between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance, when in the opinion of management it is more likely than not that some portion or all of the deferred tax assets will not be realized. This is the case as of December 31, 2011. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Note 1 - Significant Accounting Policies (continued)

The Company files income tax returns in the U.S. federal jurisdiction and various state jurisdictions. The Company is no longer subject to U.S. federal, state, and local income tax examination for years before 2008.

Accounts Receivable

Accounts receivable are reported net of an allowance for doubtful accounts. The allowance is based on management's estimate of the amount of receivables that will actually be collected. As of December 31, 2011, management believes no allowance for doubtful accounts is necessary.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. The cost of additions and improvements is charged to the property accounts, while maintenance and repairs are charged against earnings, or to appropriate jobs, when incurred.

Depreciation

Depreciation is computed using the straight-line method based on the estimated useful lives of the individual assets, which range from five to seven years. Depreciation expense was $2,558 for the year Ended December 31, 2011.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Foreign Currency

The Company's functional currency is the United States dollar. The Company transacts business in foreign currencies. At the date a foreign currency transaction is recognized, each asset, liability, revenue, expense, gain, or loss arising from the transaction is measured and recorded in United States dollars using the exchange rate in effect at that time. At each balance sheet date, balances that will be settled in foreign currencies are adjusted to reflect the current exchange rate. Any gain or loss resulting from changes in foreign currency exchange rates is included in net income in the period in which the exchange rate changes.

Consideration of Subsequent Events

The Company has evaluated subsequent events through March 20, 2012, the date on which the financial statements were available to be issued.

Inventory

Inventory, which consists of raw materials, is valued at the lower of cost or market, adjusted for handling costs, with costs determined on the first-in, first-out basis.

Note 1 - Significant Accounting Policies (continued)

Cash and Cash Equivalents

The Company considers securities with maturities of three months or less, when purchased, to be cash equivalents.

Note 2 – Concentration of Risk

The Company maintains cash balances at two financial institutions. One of their accounts is held at a U.S. bank which has unlimited insurance from the Federal Deposit Insurance Corporation (FDIC) through December 31, 2012. Their other account is held at a foreign bank that is not insured. At December 31, 2011, the Company's cash balance held with this bank was $622,356.

Note 3 – Advances to Subcontractors

Typically, the Company purchases parts and provides them to Subcontractors for incorporation into subassemblies which are completed and returned to the Company. In addition, the company makes progress payments to subcontractors and suppliers during the course of their performance of work under the contract. At December 31, 2011, the balance of advances to subcontractors amounted to $500.

Note 4 - Inventories

Inventories consist of the following:

Raw materials	$202,320
Finished goods	-
Total inventories	$202,320

Note 5 – Contract Receivables

Contract receivables consist of the following at December 31, 2011:

Contract receivables	$ 6,756
Retention	1,005,912
	$1,012,668

Note 6 – Major Customer

The Company's contract revenue is concentrated in a large contract from a customer in the Dallas area. The Company had contract revenue from this customer of $683,196 for the year ended December 31, 2011. The retention amount of $1,005,912 included in contract receivables is due from this customer.

Toyo Denki USA, Inc.
Notes to Financial Statements
For the Year Ended December 31, 2011

Note 7– Leases

The Company extended its office/factory space lease to expire July 31, 2017. Monthly payments of $8,485 are required through July, 2012. Beginning in August, 2012 monthly payments increase to $8,942, in August, 2013 increase to $9,580 and remain at that level until the end of the lease. At the end of November, 2011, the Company terminated its apartment lease which would have expired January 31, 2012, and required monthly payments of $805. The Company leases an office printer at a monthly cost of $140 expiring on January 26, 2016.

Total rent charged to expense under these leases for the year ending December 31, 2011 amounted to $118,887 including $2,389 for additional common area maintenance.

Future minimum non-cancelable payments under the leases are as follows:

Year ending December 31,	Amount
2012	$ 105,785
2013	112,174
2014	116,640
2015	116,640
2016	115,100
2017	67,060
Total	$ 633,399

Note 8 – Income Taxes

At December 31, 2011, provision for income taxes consists of:

	December 31, 2011
Current:	
Federal	$ -
State	-
	-
Deferred:	
Federal	$ -
State	-
	-

The effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are presented below:

	December 31, 2011
Deferred tax assets	$ 1,180,000
Deferred tax liabilities	-
Deferred tax asset valuation allowance	(1,180,000)
	$ -

Note 8 – Income Taxes (continued)

The current year change in the tax asset valuation allowance is $580,000. Deferred taxes relate primarily to unused net operating losses, depreciation and amortization. At December 31, 2011, the Company has federal and state operating loss carry forwards of approximately $1,900,000 expiring in various years through 2031.

Note 9 – Retirement Plan

The Company maintains a retirement plan covering all employees. Employees are able to contribute up to $16,500 or 100% of their compensation, whichever is less. In addition, the Company will make a matching contribution equal to 100% up to the first 3% of compensation that the employee defers. Total Company contributions for the year ended December 31, 2011 were $5,643.

Note 10 – Related Party Transactions

During the year Ended December 31, 2011, the Company's 100% owner, Toyo Denki Seizo, K.K. paid the Company $1,000 for support service and $6,645 for miscellaneous parts. At December 31, 2011, the Company owed Toyo Denki Seizo, K.K. $1,022,173 of which $1,017,671 is for parts sold to the Company for use in its Kinkisharyo project and the balance of $4,502 is for miscellaneous parts sold directly to DART.

Note 11 – Stockholder's Equity

The Company issued 1,000 shares of $0.01 par value, common stock to its sole stockholder Toyo Denki Seizo, K.K., for a total consideration of $2,500,000. The amount received in excess of the par value, $2,499,990, was recorded as additional paid-in capital. During 2006, Toyo Denki Seizo, K.K. contributed $1,000,000 as additional paid-in capital to be used in operations.

The Company's Board of Directors approved a corporate readjustment of the Company's accounts in the form of a quasi-reorganization, which was effected May 27, 2008. The accumulated deficit, most of which was a result of the Company's start-up and performance of its initial project in the USA, was reduced by $1,585,720 with a corresponding $1,585,720 reduction of additional paid-in capital. The reduction in accumulated deficit is expected to improve the flexibility of the Company's future management strategy.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and
Stockholder of Toyo Denki USA, Inc.

We have audited the accompanying financial statements of Toyo Denki USA, Inc. (a Delaware corporation), which comprise the balance sheet as of December 31, 2012, and the related statements of operations and accumulated deficit, and cash flows for the year then ended and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purposes of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall financial statement presentation.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Toyo Denki USA, Inc. as of December 31, 2012, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Toyo Denki USA, Inc.
Notes to Financial Statements
For the Year Ended December 31, 2012

Note 1 - Significant Accounting Policies

Nature of Business

Toyo Denki USA, Inc. (the "Company"), supplies electrical propulsion systems to rail car manufacturers in the transit industry. The Company is 100% owned by Toyo Denki Seizo K.K., a Japanese Company, which was founded in 1918 and supplies a complete line of transit products to Japanese and international markets. The Company completed its first order in the American market, supplying propulsion systems to Kinkisharyo International L.L.C. for its Dallas Area Rapid Transit (DART) 20 Light Rail Vehicle (LRV) contract. The Company's second order to supply an additional 48 propulsion systems to Kinkisharyo for use on DART Super Light Rail Vehicles (SLRVs) is complete and under warranty. The Company completed its third order to supply an additional propulsion system for testing onboard one of DART's existing LRVs, which determined that DART's fleet can be "upgraded" with the Company's equipment. In addition, the Company now performs an order for Mitsubishi Electric & Electronics USA, Inc. to supply equipment for use onboard "M8" rail vehicles that will operate on the New York City transit system.

Revenue and Cost Recognition

The Company recognizes revenues from fixed-price and modified fixed-price long-term contracts on the percentage-of-completion method, measured by the percentage of cost incurred to date to estimated total cost for each contract. Management considers total cost to be the best available measure of progress on long-term contracts. On October 12, 2012, the Company entered into a contract with Kinkisharyo International L.L.C. for its Los Angeles County Metropolitan Transit Authority (LACMTA) 78 Light Rail Vehicles (LRV) contract. The contract value is $32,308,664 and is expected to be completed by August 1, 2015. The company is to supply 78 propulsion systems and control auxiliary electrical equipment, spare parts, engineering, training and manuals. For short-term contracts and assembly-type contracts, the Company recognizes revenues and costs using the sales method, at the time the product ships and risk of loss transfers to the customer.

Contract costs include all direct material and labor costs and those indirect costs related to contract performance, such as indirect labor, supplies and tools. Selling, general and administrative costs are charged to expense as incurred. Provisions for estimated losses on uncompleted long-term contracts are made in the period in which such losses are determined. Changes in job performance, job conditions, and estimated profitability may result in revisions to costs and income, which are recognized in the period in which the revisions are determined. Changes in estimated job profitability resulting from job performance, job conditions, contract penalty provisions, claims, change orders and settlements are accounted for as changes in estimates in the current period.

The asset, "Costs and estimated earnings in excess of billings on uncompleted contracts," represents revenues recognized in excess of amounts billed. The liability, "Billings in excess of costs and estimated earnings on uncompleted contracts," represents billings in excess of revenues recognized.

Income Taxes

Deferred income taxes are reported using the liability method. Deferred tax assets are recognized for deductible temporary differences and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the changes between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance, when in the opinion of management it is more likely than not that some portion or all of the deferred tax assets will not be realized. This is the case as of December 31, 2012. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Toyo Denki USA, Inc.
Notes to Financial Statements
For the Year Ended December 31, 2012

Note 1 - Significant Accounting Policies (continued)

Uncertain Tax Positions

The Company has adopted FASB ASC 740-10-25, Accounting for Uncertainty in Income Taxes. The Company will record a liability for uncertain tax positions when it is more likely than not that a tax position would not be sustained if examined by the taxing authority. The Company continually evaluates expiring statutes of limitations, audits, proposed settlements, changes in tax law and new authoritative rulings.

The Company's evaluation on December 31, 2012 revealed no uncertain tax positions that would have a material impact on the financial statements. The 2008 through 2011 tax years remain subject to examination by the IRS and state authorities.

Accounts Receivable

Accounts receivable are reported net of an allowance for doubtful accounts. The allowance is based on management's estimate of the amount of receivables that will actually be collected. As of December 31, 2012, management believes no allowance for doubtful accounts is necessary.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. The cost of additions and improvements is charged to the property accounts, while maintenance and repairs are charged against earnings, or to appropriate jobs, when incurred.

Depreciation

Depreciation is computed using the straight-line method based on the estimated useful lives of the individual assets, which range from three to five years. Depreciation expense for the year ended December 31, 2012 was $6, 814 and is included as a component of cost of goods sold and general and administrative expenses on the statement of operations and accumulated deficit.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Foreign Currency

The Company's functional currency is the United States dollar. The Company transacts business in foreign currencies. At the date a foreign currency transaction is recognized, each asset, liability, revenue, expense, gain, or loss arising from the transaction is measured and recorded in United States dollars using the exchange rate in effect at that time. At each balance sheet date, balances that will be settled in foreign currencies are adjusted to reflect the current exchange rate. Any gain or loss resulting from changes in foreign currency exchange rates is included in net income in the period in which the exchange rate changes.

Note 1 - Significant Accounting Policies (continued)

Inventory

Inventory is valued at the lower of cost or market, adjusted for handling costs, with costs determined on the first-in, first-out basis. Work in process and finished goods are valued using the "absorption" cost method, a method that includes direct labor, manufacturing overhead, and other production costs.

Cash and Cash Equivalents

The Company considers securities with maturities of three months or less, when purchased, to be cash equivalents.

Consideration of Subsequent Events

The Company has evaluated subsequent events through March 26, 2013, the date on which the financial statements were available to be issued.

Note 2 – Concentration of Risk

The Company maintains cash balances at two financial institutions. One of their accounts is held at a U.S. bank which is insured up to a $250,000 limit through the Federal Deposit Insurance Corporation (FDIC). At December 31, 2012, the Company's cash balance with this bank exceeded the FDIC limit by $233,196. Their other account is held at a foreign bank that is not insured. At December 31, 2012, the Company's cash balance with this bank was $441,506.

Note 3 - Inventories

Inventories consist of the following at December 31, 2012:

Raw materials	$ 488,690
Work in process	158,571
Total inventories	$ 647,261

Note 4 – Uncompleted Contracts

Costs and billings on uncompleted contracts are summarized as follows at December 31, 2012:

Costs incurred on uncompleted contracts at year end	$ 54,008
Estimated earnings	917
	54,925
Less: billings on uncompleted contracts	-
	$ 54,925

Note 4 – Uncompleted Contracts (continued)

Presented in the accompanying balance sheet as:

Costs and estimated earnings in excess of billings on uncompleted contracts	$ 54,925
Billings in excess of costs and estimated earnings on uncompleted contracts	-
	$ 54,925

Note 5 – Accounts Receivable

Accounts receivables consist of the following at December 31, 2012:

Accounts receivables	$ 340,765
Retention	1,005,912
	$ 1,346,677

Note 6 – Major Customer

During 2012, the Company had revenue from 1 customer of $349,406, of this amount $270,963 remains in accounts receivable at December 31, 2012. Additionally, at December 31, 2012, the Company has a retention receivable in the amount of $1,005,912 due from a different customer, which relates to a contract completed during 2011. This retention is expected to be collected in 2013.

Note 7– Leases

The Company extended its office/factory space lease through July 31, 2017. Monthly payments of $8,485 were required through July 2012. Beginning in August 2012 monthly payments increased to $8,942, and in August 2013 will increase to $9,580 and remain at that level until the end of the lease. The Company also leases an office printer at a monthly cost of $140 through January 26, 2016.

Total rent expense under these leases for the year ended December 31, 2012 amounted to $104,563, and is included as a component of cost of goods sold and general and administrative expenses on the statement of operations and accumulated deficit.

Future minimum non-cancelable payments under the leases are as follows:

Year ending December 31,	Amount
2013	$ 112,174
2014	116,640
2015	116,640
2016	115,100
2017	67,060
Total	$ 527,614

Toyo Denki USA, Inc.
Notes to Financial Statements
For the Year Ended December 31, 2012

Note 8 – Income Taxes

Provision for income taxes consists of at December 31, 2012:

Current:	
Federal	$ -
State	-
	-
Deferred:	
Federal	$ -
State	-
	-

The effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are presented below:

Deferred tax assets	$ 1,460,000
Deferred tax liabilities	-
Deferred tax asset valuation allowance	(1,460,000)
	$ -

The current year change in the tax asset valuation is $280,000. Deferred taxes relate primarily to unused net operating losses, depreciation and amortization. At December 31, 2012, the Company has federal and state operating loss carry forwards of approximately $2,800,000 expiring in various years through 2032.

Note 9 - Backlog

The Company's backlog of revenue they expect to realize from work to be performed on uncompleted contracts in progress at December 31, 2012 amounted to $32,253,739.

Note 10 – Retirement Plan

The Company maintains a retirement plan covering all employees. Employees are able to contribute up to $17,000 or 100% of their compensation, whichever is less. In addition, the Company will make a matching contribution equal to 100% up to the first 3% of compensation that the employee defers. Total Company contributions for the year ended December 31, 2012 were $10,816.

Note 11 – Related Party Transactions

During the year ended December 31, 2012, the Company's 100% owner, Toyo Denki Seizo, K.K. paid the Company $14,215 for miscellaneous parts. For the year ended December 31, 2012, the Company paid $1,094,829 and owed Toyo Denki Seizo, K.K. $11,510 for parts sold to the Company for use in its Kinkisharyo project.

Note 12 – Stockholder's Equity

The Company issued 1,000 shares of $0.01 par value, common stock to its sole stockholder Toyo Denki Seizo, K.K., for a total consideration of $2,500,000. The amount received in excess of the par value, $2,499,990, was recorded as additional paid-in capital. During 2006, Toyo Denki Seizo, K.K. contributed $1,000,000 as additional paid-in capital to be used in operations. During 2012, Toyo Denki Seizo, K.K. contributed $2,000,000 as additional paid-in capital to be used in operations.

The Company's Board of Directors approved a corporate readjustment of the Company's accounts in the form of a quasi-reorganization, which was effective May 27, 2008. The accumulated deficit, most of which was a result of the Company's start-up and performance of its initial project in the USA, was reduced by $1,585,720 with a corresponding $1,585,720 reduction of additional paid-in capital. The reduction in accumulated deficit is expected to improve the flexibility of the Company's future management strategy.

March 26, 2013

To the Board of Directors
Toyo Denki USA, Inc.

We have audited the financial statements of Toyo Denki USA, Inc. for the year ended December 31, 2012, and have issued our report thereon dated March 26, 2013. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated March 8, 2012. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by Toyo Denki USA, Inc. are described in Note 1 to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during 2012. We noted no transactions entered into by the Company during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the financial statements were:

> Management's estimate of the costs to complete on uncompleted contracts is based on management's evaluation of the progress of uncompleted contracts and the remaining work left to be done. We evaluated the key factors and assumptions used to develop the estimated costs to complete in determining that it is reasonable in relation to the financial statements taken as a whole.
>
> Management's estimate of the accrued loss on the Mitsubishi M8 project is based on management's assessment of the costs remaining on the project, including the amount of overhead to be absorbed by the project. We evaluated the key factors and assumptions used to develop the accrued loss on this project to determine that it was reasonable in relation to the financial statements taken as a whole.

Management's estimate of the deferred tax assets. The deferred tax assets are recorded based on the differences between the book and tax basis in assets and liabilities. At the end of the year, management determined that there was a need to reserve a valuation allowance against the entire deferred tax asset due to uncertainty of the ability to use the assets to offset future taxable income.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. A schedule of adjusting entries is attached to this letter.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated March 26, 2013.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the Company's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the Company's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

We also issued a letter dated March 26, 2013, relating to internal control matters.

This information is intended solely for the use of Board of Directors and management of Toyo Denki USA, Inc. and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Goff Backa Alfera & Company, LLC

To the Board of Directors
and Management

In planning and performing our audit of the financial statements of Toyo Denki USA, Inc. as of and for the year ended December 31, 2012, in accordance with auditing standards generally accepted in the United States of America, we considered Toyo Denki USA, Inc.'s internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency or combination of deficiencies in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and therefore there can be no assurance that all such deficiencies have been identified. We did not identify any deficiencies in internal control that we consider to be material weaknesses, however, as discussed below, we identified a certain matter that relates to internal control that was considered to be of a lesser magnitude.

Inventory, and overheads

The Company prepares an allocation where they capitalize overhead costs into their inventory accounts. When the goods that are manufactured are shipped the company removes a portion of the overheads related to these manufactured goods and charges them to cost of goods sold. Subsequent to year-end based on our recommendation the company reviewed the balance of these allocated costs that remained in the inventory accounts and prepared a journal entry to reduce the balance included in inventory and record a corresponding increase in the cost of goods sold. The entry prepared by the company resulted in a net change in the inventory and cost of goods sold accounts by approximately $115,000.

Review of accrued loss on contracts

During 2011 the Company recorded an accrued loss on the M8 project. Quarterly throughout 2012 and at year-end the Company performed an analysis on this project to estimate the remaining loss under the contract. When the year-end analysis was performed by the Company management was using 2012

historical data to forecast the 2013 results, and they neglected to reduce the accrued loss by the portion of the contract that had been shipped prior to year-end. When the Company updated their estimate of the accrued loss using 2013 expected results, and took into account the costs of the goods that had been shipped they reduced the remaining liability by approximately $250,000.

Deferred Income Taxes

The Company has requested Goff Backa Alfera & Company (GBAC) to assist in its calculation of the current and deferred tax provision in accordance with FASB Accounting Standards Codification, 740, *Income Taxes* and to assist in the preparation of the required disclosures. The Program Manager was designated by the Company as the individual to oversee, understand, and take responsibility for the preparation of the calculation, related adjusting journal entries, and corresponding disclosures. The preparation of these calculations did not result in any journal entries. The deferred tax assets are completely offset by a valuation allowance. Because GBAC was an integral part in assisting the Company with the accounting and disclosure requirements of the standards we felt it was necessary to communicate this to management.

Year-end cutoff

A journal entry had to be prepared to correct a sales transaction for $18,700 that occurred during 2013. This entry was entered into the accounting software with an incorrect date in 2012 and as a result the revenue was recorded in the incorrect period. Additionally, there was a check written during 2012 for $14,250 to a supplier but this check was not mailed as of the date of our onsite fieldwork. Because this check had not been mailed prior to year-end it should not have been recorded as a 2012 transaction. The Company should review all transactions near year end to determine that they are recorded within the correct accounting period.

This communication is intended solely for the information and use of management, Board of Directors, and others within the organization, and is not intended to be and should not be used by anyone other than these specified parties.

WABTEC CODE OF BUSINESS CONDUCT and ETHICS

Westinghouse Air Brake Technologies Corporation ("Wabtec" or "Company") was originally formed as Westinghouse Air Brake in 1869 by George Westinghouse and over the years has grown through mergers and acquisitions to become an international corporation with operations, customers, and suppliers around the world. As a global provider of value-added, technology-based products and services for the rail industry we are proud of our commitment to ethical, respectful and lawful business and working relationships. To ensure we maintain the highest level of ethical and legal standards management has established this Code of Business Conduct and Ethics and other specific Company policies and internal controls to provide you with guidance regarding your job responsibilities. As an integral member of Wabtec, everyone is expected to observe the highest standards of professionalism and to adhere to Company policies / procedures, internal controls and applicable laws at all times.

APPLICABILITY

This Code of Business Conduct and Ethics Policy ("Policy") applies to all Wabtec directors, officers and employees, including individuals employed at domestic and foreign subsidiaries and joint ventures controlled by the Company; and where necessary and appropriate, to any outside party who acts on behalf of the Company.

As part of a global company, you must comply with all laws, regulations and Company policies that govern your work. Laws and regulations may differ, depending on the country or state in which Wabtec operates. Because Wabtec is a company based in the United States, some United States laws apply to subsidiaries and joint ventures located in foreign jurisdictions. However, Company policies and the standards of professionalism and ethics apply to everyone. No excuse or pressure justifies breaking the law or these standards. Do not use a consultant, representative or contractor to break the law or circumvent Company policies. In some countries, certain conduct is banned, but the ban is currently not enforced. This does not excuse any illegal or unethical action.

Wabtec has specific policies and procedures on a broad range of business issues, and, while this Policy may provide summary guidance for particular subjects, this does not alleviate your responsibility to review and adhere to other specific policies. This Policy is designed to assist you with making the best ethical decision regarding possible "gray areas" that may not be expressly addressed by a particular policy or procedure. This Policy is also designed to answer questions that you may have regarding interactions with each other, our customers, our suppliers and our communities. Abiding by this Policy and other Wabtec policies and avoiding even the appearance of impropriety is essential to Wabtec's mission of maintaining the highest standards of business ethics.

ETHICS COMPLIANCE OFFICER

The Company has appointed **Scott E. Wahlstrom** as the **Ethics Compliance Officer** to administer this Policy. The Company has developed a comprehensive program for implementing this Policy through appropriate guidance, training, certifications, oversight monitoring and investigations. The Ethics Compliance Officer is responsible for: (1) giving advice on the interpretation and application of this Policy; (2) supporting training and education; (3) monitoring compliance with the Policy; (4) responding to inquiries and investigating reported concerns; and (5) providing periodic reporting to the Company's Board of Directors.

Contact Information for the Ethics Compliance Officer
Scott E. Wahlstrom
(412) 825-1418 or swahlstrom@wabtec.com
Also see below the "Reporting of a Violation of this Policy or a Violation of any Law, Rule or Regulation" section of this Policy for procedures to immediately report a concern to Wabtec's Hotline

CONFLICTS OF INTEREST

A conflict of interest exists when your personal interests or activities, or those of a family member, influence or interfere with the obligation to perform your job in the best interest of Wabtec. If you or someone closely associated with you may gain personally from Wabtec activity, then you should consider whether there is a conflict. Therefore you should avoid situations that might interfere, or appear to interfere, with your obligations to Wabtec. It is impractical to describe all of these situations in which conflicts may arise, but examples include: business or investment interests, outside employment or gifts from customers, suppliers or vendors. It is your responsibility to promptly disclose any situation that may be, or even appear to be, a conflict of interest.

CORPORATE OPPORTUNITIES

You are prohibited from taking personal advantage of opportunities that arise from the use of corporate property, information or position or from using any of these for personal gain. You have a duty to advance the legitimate business interests of Wabtec whenever possible.

FINANCIAL INTEREST AND OUTSIDE ACTIVITIES

You may invest in publicly traded securities of firms with which Wabtec conducts business, so long as you have no material inside information and the investment is not large enough to affect any business activities or raise an appearance of impropriety. You or your family may not have a financial interest in a non-publicly traded corporation, partnership, or other firm with which Wabtec conducts or is likely to conduct business unless you have obtained the written approval of the Ethics Compliance Officer. Depending on the specific circumstances, it may be appropriate for you to sell or otherwise give up your interest. If you are unsure about the situation, contact the Ethics Compliance Officer.

You are prohibited from competing with Wabtec and may accept remuneration from others only if they are not an actual or potential competitor of Wabtec, do not have an actual or significant business relationship with Wabtec, and if your activities do not interfere with or adversely influence your performance at Wabtec. Similarly, you must end your activities if and when, in the future, these activities constitute competition to Wabtec or become related to the operations of Wabtec. Further, outside activities may not be conducted from Wabtec facilities or involve the use of Wabtec time, equipment, supplies or other resources.

INSIDER TRADING

Both ethical standards and United States securities law and laws of several countries prohibit you from using material, non-public information when trading or recommending the trading of securities of Wabtec or its customers, suppliers or other corporations with which Wabtec has contractual relationships or may be negotiating transactions. Such material insider information includes any knowledge you may have about dividend changes, earnings estimates, significant changes in operations, upcoming mergers or acquisitions, major litigation, new discoveries, products, and services, and any other information which could influence a person to sell, buy or otherwise trade in a company's securities. If you have material insider information, you must not buy, sell, or recommend a transaction involving a company's securities until after the company has made the information public. Violating this law can lead to significant civil and criminal penalties in the United States and elsewhere, where similar laws have been adopted.

DIVERSITY AND EQUAL OPPORTUNITY

Wabtec's future depends on its ability to attract and retain the best people at all levels of the Company. To do so, Wabtec must establish and foster an environment that embraces individual differences and encourages everyone to attain their full potential. Wabtec policies and practices strive to assure equal employment and advancement opportunities for all qualified people. Wabtec will maintain appropriate standards of conduct in the workplace and will always be sensitive to the concerns of everyone associated with the Company. Harassment for any reason is inconsistent with Wabtec's Code of Business Conduct and Ethics and will not be tolerated.

CORPORATE PROPERTY AND ASSETS

Wabtec is committed to protect its assets, including its intellectual property, resources, confidential information and good name. All Wabtec assets should be used for legitimate business purposes only. Theft, carelessness, unauthorized disclosure and misuses all have a direct impact of Wabtec's effectiveness and profitability and will not be tolerated.

CONFIDENTIAL INFORMATION / ELECTRONIC INFORMATION

You may have access to information that is confidential or proprietary to Wabtec, including intellectual property, trade secrets, customer lists, pricing, financial information, strategic plans and product development. Confidential information should only be disclosed internally and on a "need to know" basis. You should not use confidential information for your own benefit or for the benefit of others, either during or after your employment. Outside Wabtec, you may reveal confidential information and other intellectual property only for valid, approved business purposes, or when required to do so by law, subpoena, or other legal or administrative process that compels disclosure. Even then you may only do so with proper legal protection to maintain the confidentiality and protection of the information. In these cases, you must obtain prior written approval of Wabtec's Legal Department.

In addition, it is important for you to prevent misuse, disclosure, or destruction (other than in accordance with the appropriate record retention policy) of the information entrusted to you by the Company or its customers, or for which you are otherwise responsible. This information may be in printed, electronic or other format. In handling the Company's information or information owned by a third party and/or licensed by the Company, you should comply with copyright laws, computer software licensing agreements and relevant Company policy. Wabtec's Legal Department and Corporate Information Technology Department can provide advice and assistance in protecting this information in accordance with our policies and procedures.

RELATIONSHIPS WITH SUPPLIERS AND VENDORS

You have an affirmative duty to conduct business fairly and lawfully within Wabtec and with our suppliers and vendors. You are required to give all suppliers and vendors fair and uniform consideration by making decisions based on objective criteria, such as competitive pricing, delivery, quality, reliability and service.

You may not accept gifts, loans, or any other favors from anyone who is, or wishes to conduct business with Wabtec. The only exceptions are inexpensive gifts having a nominal value of about $100 USD (see below in the Gifts and Hospitality Section). You may accept occasional business meals and entertainment, provided they are not lavish, excessive, or of a nature which might create the appearance of impropriety or influence the business decision of the recipient.

If you wish to conduct business on behalf of Wabtec with an immediate family member, another relative or with a business where you or a relative is an officer, director, or principal, you must first disclose the relationship and obtain prior written approval of the Ethics Compliance Officer.

ANTITRUST / COMPETITION LAWS

Wabtec is committed to fair and open competition in the markets it serves around the world and competes independently in the marketplace in compliance with the laws of the United States and other countries. You cannot engage in any understandings or agreements with competitors to restrain trade and must avoid the appearance of such conduct. Examples of antitrust violations are: (1) price fixing; (2) bid rigging; (3) collusion to allocate markets, customers or production; and (4) group boycotts. You must be particularly aware of these prohibitions and should exercise due care in situations where competitors may be present to avoid violating these laws.

SANCTIONS AND TRADE EMBARGOES

The United States government uses economic sanctions and trade embargoes to further foreign policy and national security objectives. You must abide by all sanctions and embargoes that may be in effect. Also, you cannot comply with a boycott imposed by a foreign country against a country friendly to the United States. Consult Wabtec's Legal Department if you have a question as to whether a particular transaction is subject to a sanction or embargo or if you are asked to comply with a foreign boycott.

IMPROPER PAYMENTS

You may not offer or accept anything of value to improperly influence any person in a business relationship with Wabtec. Such improper payments include, but are not limited to, bribes, kickbacks, or loans to or from any person with whom you conduct business on behalf of Wabtec. Likewise, neither you nor any immediate family member should offer, or accept cash, gifts, or favors from vendors, lessors, customers or competitors.

This prohibition on improper payments extends to government officials, commercial entities and, as such, it generally is expressly prohibited to give or offer to give, either directly or through an agent or intermediary, anything of value in order to obtain, retain, or maintain business. For further clarification on this prohibition the Company has enacted the Anti-Bribery / Anti-Corruption Policy.

GIFTS AND HOSPITALITY

This Policy allows for the provision of business-related meals and events, ordinary business courtesies, and nominal gifts when generally considered to be accepted industry practice. However, any gift or hospitality must: (1) be modest in value (with consideration of the nature, country, location of the gift and/or where it is given or received, and typically should not exceed $100 USD in value); (2) never be in cash or similar form; (3) be in good taste and appropriate for the occasion; (4) be promotional in nature and imprinted with a company logo (if applicable); (5) be given or accepted in good faith without improperly influencing (or appearing to influence) or rewarding the recipient; and (6) be allowable under local law.

There are additional rules pertaining to the giving/receiving of a gift or the offering/accepting of hospitality which are further explained in the Anti-Bribery / Anti-Corruption Policy.

POLITICAL AND CHARITABLE CONTRIBUTIONS

Wabtec supports your rights to participate in the political process. However, such activities must be carried out on your own time and at your own expense. The laws of the United States and other jurisdictions prohibit or restrict the ability of Wabtec to provide corporate funds in support of political campaigns. Therefore, corporate funds are not to be utilized to support political campaigns.

Likewise, Wabtec supports everyone's desire to contribute to charitable organizations utilizing their own time and resources. Wabtec resources may be contributed to a particular charitable organization with the prior written authorization of the Ethics Compliance Officer for any contribution exceeding $2000 USD. Charitable contributions of less than $2000 USD may be authorized at the local business unit level in conformance with Wabtec's Delegation of Authority.

There are additional rules pertaining to contributions to charitable organizations when government officials or commercial entities may be involved. These rules are further explained in the Anti-Bribery / Anti-Corruption Policy.

BOOKS AND RECORDS / INTERNAL CONTROLS / RECORD-KEEPING

All Wabtec books, records, accounts and financial statements must be maintained in reasonable detail to clearly and accurately represent the facts of the underlying matter in all material respects. Transactions must be recorded accurately and fairly to reflect the activities of Wabtec and comply with Wabtec's internal control procedures and applicable legal and accounting standards. Specifically, Wabtec records must properly account for all assets and liabilities, properly document all business expenditures including travel, and accurately reflect the business of Wabtec. You must not prepare, accept, approve or transmit records that intentionally or otherwise falsify or misrepresent the true nature of the transactions.

Wabtec has established accounting and other internal control standards and procedures to ensure that all Wabtec assets are protected and properly used and that financial records are accurate and reliable. Everyone shares the responsibility for maintaining and complying with required internal controls and ensuring that Wabtec assets are not misused.

Wabtec's record-retention policies are established in compliance with United States regulations and laws. Where local requirements and laws differ from those of the United States, records must be retained for the longer of Company policy or local requirements.

PROCEDURES FOR THE RECEIPT, RETENTION AND TREATMENT OF COMPLAINTS

The Audit Committee of Wabtec has established procedures for the receipt, retention and treatment of complaints received regarding improprieties relating to accounting, internal accounting controls or auditing matters and confidential, anonymous submission of complaints by employees of concerns regarding questionable accounting or auditing matters. Complaints regarding such matters should be sent to the **Ethics Compliance Officer** or by contacting Wabtec's **Ethics and Compliance Hotline** as described more fully below in the section entitled **"Reporting of a Violation of This Policy or a Violation of Any Law, Rule or Regulation".**

RESPONSIBILITIES

In addition to complying with this Policy, you should also familiarize yourself with Wabtec's Policy/Procedure Manual and report any suspected policy violations. There will be no retaliation for good-faith reports of suspected Policy violations and all reports will be addressed as confidentially as possible.

While this Policy applies to everyone, managerial and supervisory employees have a special duty to lead by example, to ensure that those whom they supervise are complying with the Policy and to respond promptly, appropriately and effectively to all alleged violations of the Policy.

CONSEQUENCES OF POLICY VIOLATIONS

Violations of this Policy, unethical conduct and illegal acts are all forbidden and may result in discipline, including termination of employment, or criminal and/or civil prosecution.

REPORTING OF A VIOLATION OF THIS POLICY OR A VIOLATION OF ANY LAW, RULE OR REGULATION
The Company has appointed the **Ethics Compliance Officer** to ensure compliance and investigate suspected Policy violations. Everyone is encouraged to raise questions or report any suspected violations without fear of retaliatory action. Each question or suspected violation will be treated with confidentiality and the highest degree of respect, and the individual may remain anonymous if they desire. If you have questions regarding this Policy or appropriate action in a particular circumstance, immediately contact the **Ethics Compliance Officer, Scott E. Wahlstrom at (412) 825-1418 or swahlstrom@wabtec.com** .

If you do not feel comfortable contacting management directly you may also raise concerns or report suspected Policy violations by contacting Wabtec's confidential **Ethics and Compliance Hotline** utilizing one of the following options:

- **Toll-Free Hotline (U.S. /Canada – English Speaking):** **877-860-1054**
- **Toll-Free Hotline (U.S. /Canada – Non English Speaking):** **888-273-6085**
- **Toll-Free Hotline (Outside the U.S. and Canada):** **See Attachment "A"**
- **Secure web reporting at:** **www.tnwinc.com/wabtec**
- **E-mail at:** **reportline@tnwinc.com**
- **Fax at:** **770-409-5008**
- **Postal Service:** **The Network**
  Attn: Wabtec
  333 Research Court
  Norcross, GA 30092

(Note: Wabtec's Hotline services are operated by an independent company called The Network. The Network offers multi-lingual services which are available 24 hours a day, 7 days a week).

All concerns will be relayed to Wabtec Corporation for review. Upon receiving a report of a concern or suspected Policy violation, the Ethics Compliance Officer will immediately document and investigate that report. If a violation is detected, the Company will take prompt measures to mitigate the violation, including disciplinary action as defined herein.

Remember:
When in doubt, ask before acting.

APPENDIX: A

Outside the U.S. and Canada Hotline Phone Numbers

Dialing Information and Instructions:

- Availability of calling options varies by country due to local restrictions. This may require using a different access code or type of phone. If phone service is not available then please contract Wabtec utilizing one of the other available reporting options.
- In countries where the Type of International Service is AT&T Direct, first dial the local Access Code then wait for a tone then dial the Toll-Free Number.

Country	Type of International Service	Access Code (For AT&T Direct Only)	Toll-Free Number

QUALIFICATIONS AND CERTIFICATIONS

IMPORTANT:

To be answered by Suppliers providing the following systems only:

¤ Propulsion,
¤ Trucks and Major Truck Components,
¤ Auxiliary Power,
¤ Low Voltage DC Power,
¤ HVAC,
¤ Carbody,
¤ Couplers / Draft Gear,
¤ Wheel Sets,
¤ Air Brake Equipment and Controls,
¤ Cab Signal Equipment,
¤ Door Systems,
¤ Seats,
¤ Vehicle Monitoring System,
¤ Network Equipment and Integrator,
¤ Communications Equipment including LED and LCD Signage,
¤ Lighting

Thank you

Supplier Name:	Wabtec Passenger Transit
Supplier Representative:	Cornelius R. Stevenson
System:	Air Brakes System and Controls, Couplers and Draft Bar, Third Rail Current Collector
Date:	1-10-2014

SECTION B
PART B TECHNICAL PROPOSAL AND STATEMENTS AND CERTIFICATIONS REGARDING ELIGIBILITY

QUALIFICATIONS AND CERTIFICATIONS

NOTE: The Authority reserves the right to audit compliance with respect to each of the required statements and certifications in the forms submitted by Offerors, including but not limited to the Domestic U.S. Content Certification, Domestic U.S. Content Worksheet, and Final Assembly of Production (Non-Pilot) Vehicles in Massachusetts.

Questions Concerning Eligibility

Provide short answers (and attach relevant documents) to the following questions and requests:

1. Attach relevant Certificate of Good Standing from the Secretary of State of the Commonwealth of Massachusetts.

   In the event Westinghouse Air Brake Technologies Corporation ("Wabtec") is awarded a Contract as a result of this proposal, Wabtec will immediately register to do business in Massachusetts as a foreign corporation

2. Provide the names and telephone numbers of all business owners, shareholders if not a publicly held corporation, and/or members if a limited liability company.

   Publicly Traded, WAB NYSE

3. Provide the names, title and telephone numbers of all officers.

   Please see Attached Appendix II

4. Has the business or an owner or shareholder of the business ever had a prior contractual relationship with the MBTA? If yes, please describe relationship.

   MotivePower Division of Wabtec- Wabtec Pasenger Transit sister division

5. Has the business or an owner or shareholder of the business ever been in default of any obligations under a contract with the MBTA, any other Massachusetts state agency or any federal agency? If yes, please describe the circumstances. Please indicate whether it resulted in a termination for cause.

   No

6. Have any of the business owners, shareholders, or officers every been convicted of felony violations of Federal, state or local laws? If yes, please describe the circumstances.

   No

7. Are there any pending recent law suits against the business or any of its owners or shareholders? If yes, please describe the circumstances.

   No

8. Provide the name, address, account number, contact person and telephone number of the insurance agent responsible for procuring insurance required by the Solicitation Documents.

   Please see Westinghouse Air Brake Technologies filings with the SEC for all corporate related information including legal and Financial

9. Provide the name, address, contact person and telephone of three business credit references, including but not limited to your primary banking institution.

   Please see Attached Appendix III

10. Has the business or any of the business's owners or shareholders ever filed for bankruptcy or invoked insolvency proceedings under state law?

    No

11. Provide the last three (3) years of audited financial statements, or reasonable equivalent of the Offeror. If the Offeror is a joint venture or other combination of business entities, provide the last three (3) years audited financial statements for each entity.

Please see Westinghouse Air Brake Technologies filings with the SEC for all Financial information

12. Provide the business's current code of business ethics or equivalent.

Please see Attached Appendix I

WABTEC CODE OF BUSINESS CONDUCT and ETHICS

Westinghouse Air Brake Technologies Corporation ("Wabtec" or "Company") was originally formed as Westinghouse Air Brake in 1869 by George Westinghouse and over the years has grown through mergers and acquisitions to become an international corporation with operations, customers, and suppliers around the world. As a global provider of value-added, technology-based products and services for the rail industry we are proud of our commitment to ethical, respectful and lawful business and working relationships. To ensure we maintain the highest level of ethical and legal standards management has established this Code of Business Conduct and Ethics and other specific Company policies and internal controls to provide you with guidance regarding your job responsibilities. As an integral member of Wabtec, everyone is expected to observe the highest standards of professionalism and to adhere to Company policies / procedures, internal controls and applicable laws at all times.

APPLICABILITY

This Code of Business Conduct and Ethics Policy ("Policy") applies to all Wabtec directors, officers and employees, including individuals employed at domestic and foreign subsidiaries and joint ventures controlled by the Company; and where necessary and appropriate, to any outside party who acts on behalf of the Company.

As part of a global company, you must comply with all laws, regulations and Company policies that govern your work. Laws and regulations may differ, depending on the country or state in which Wabtec operates. Because Wabtec is a company based in the United States, some United States laws apply to subsidiaries and joint ventures located in foreign jurisdictions. However, Company policies and the standards of professionalism and ethics apply to everyone. No excuse or pressure justifies breaking the law or these standards. Do not use a consultant, representative or contractor to break the law or circumvent Company policies. In some countries, certain conduct is banned, but the ban is currently not enforced. This does not excuse any illegal or unethical action.

Wabtec has specific policies and procedures on a broad range of business issues, and, while this Policy may provide summary guidance for particular subjects, this does not alleviate your responsibility to review and adhere to other specific policies. This Policy is designed to assist you with making the best ethical decision regarding possible "gray areas" that may not be expressly addressed by a particular policy or procedure. This Policy is also designed to answer questions that you may have regarding interactions with each other, our customers, our suppliers and our communities. Abiding by this Policy and other Wabtec policies and avoiding even the appearance of impropriety is essential to Wabtec's mission of maintaining the highest standards of business ethics.

ETHICS COMPLIANCE OFFICER

The Company has appointed **Scott E. Wahlstrom** as the **Ethics Compliance Officer** to administer this Policy. The Company has developed a comprehensive program for implementing this Policy through appropriate guidance, training, certifications, oversight monitoring and investigations. The Ethics Compliance Officer is responsible for: (1) giving advice on the interpretation and application of this Policy; (2) supporting training and education; (3) monitoring compliance with the Policy; (4) responding to inquiries and investigating reported concerns; and (5) providing periodic reporting to the Company's Board of Directors.

Contact Information for the Ethics Compliance Officer
Scott E. Wahlstrom
(412) 825-1418 or swahlstrom@wabtec.com
Also see below the "Reporting of a Violation of this Policy or a Violation of any Law, Rule or Regulation" section of this Policy for procedures to immediately report a concern to Wabtec's Hotline

CONFLICTS OF INTEREST

A conflict of interest exists when your personal interests or activities, or those of a family member, influence or interfere with the obligation to perform your job in the best interest of Wabtec. If you or someone closely associated with you may gain personally from Wabtec activity, then you should consider whether there is a conflict. Therefore you should avoid situations that might interfere, or appear to interfere, with your obligations to Wabtec. It is impractical to describe all of these situations in which conflicts may arise, but examples include: business or investment interests, outside employment or gifts from customers, suppliers or vendors. It is your responsibility to promptly disclose any situation that may be, or even appear to be, a conflict of interest.

CORPORATE OPPORTUNITIES

You are prohibited from taking personal advantage of opportunities that arise from the use of corporate property, information or position or from using any of these for personal gain. You have a duty to advance the legitimate business interests of Wabtec whenever possible.

FINANCIAL INTEREST AND OUTSIDE ACTIVITIES

You may invest in publicly traded securities of firms with which Wabtec conducts business, so long as you have no material inside information and the investment is not large enough to affect any business activities or raise an appearance of impropriety. You or your family may not have a financial interest in a non-publicly traded corporation, partnership, or other firm with which Wabtec conducts or is likely to conduct business unless you have obtained the written approval of the Ethics Compliance Officer. Depending on the specific circumstances, it may be appropriate for you to sell or otherwise give up your interest. If you are unsure about the situation, contact the Ethics Compliance Officer.

You are prohibited from competing with Wabtec and may accept remuneration from others only if they are not an actual or potential competitor of Wabtec, do not have an actual or significant business relationship with Wabtec, and if your activities do not interfere with or adversely influence your performance at Wabtec. Similarly, you must end your activities if and when, in the future, these activities constitute competition to Wabtec or become related to the operations of Wabtec. Further, outside activities may not be conducted from Wabtec facilities or involve the use of Wabtec time, equipment, supplies or other resources.

INSIDER TRADING

Both ethical standards and United States securities law and laws of several countries prohibit you from using material, non-public information when trading or recommending the trading of securities of Wabtec or its customers, suppliers or other corporations with which Wabtec has contractual relationships or may be negotiating transactions. Such material insider information includes any knowledge you may have about dividend changes, earnings estimates, significant changes in operations, upcoming mergers or acquisitions, major litigation, new discoveries, products, and services, and any other information which could influence a person to sell, buy or otherwise trade in a company's securities. If you have material insider information, you must not buy, sell, or recommend a transaction involving a company's securities until after the company has made the information public. Violating this law can lead to significant civil and criminal penalties in the United States and elsewhere, where similar laws have been adopted.

DIVERSITY AND EQUAL OPPORTUNITY

Wabtec's future depends on its ability to attract and retain the best people at all levels of the Company. To do so, Wabtec must establish and foster an environment that embraces individual differences and encourages everyone to attain their full potential. Wabtec policies and practices strive to assure equal employment and advancement opportunities for all qualified people. Wabtec will maintain appropriate standards of conduct in the workplace and will always be sensitive to the concerns of everyone associated with the Company. Harassment for any reason is inconsistent with Wabtec's Code of Business Conduct and Ethics and will not be tolerated.

CORPORATE PROPERTY AND ASSETS

Wabtec is committed to protect its assets, including its intellectual property, resources, confidential information and good name. All Wabtec assets should be used for legitimate business purposes only. Theft, carelessness, unauthorized disclosure and misuses all have a direct impact of Wabtec's effectiveness and profitability and will not be tolerated.

CONFIDENTIAL INFORMATION / ELECTRONIC INFORMATION

You may have access to information that is confidential or proprietary to Wabtec, including intellectual property, trade secrets, customer lists, pricing, financial information, strategic plans and product development. Confidential information should only be disclosed internally and on a "need to know" basis. You should not use confidential information for your own benefit or for the benefit of others, either during or after your employment. Outside Wabtec, you may reveal confidential information and other intellectual property only for valid, approved business purposes, or when required to do so by law, subpoena, or other legal or administrative process that compels disclosure. Even then you may only do so with proper legal protection to maintain the confidentiality and protection of the information. In these cases, you must obtain prior written approval of Wabtec's Legal Department.

In addition, it is important for you to prevent misuse, disclosure, or destruction (other than in accordance with the appropriate record retention policy) of the information entrusted to you by the Company or its customers, or for which you are otherwise responsible. This information may be in printed, electronic or other format. In handling the Company's information or information owned by a third party and/or licensed by the Company, you should comply with copyright laws, computer software licensing agreements and relevant Company policy. Wabtec's Legal Department and Corporate Information Technology Department can provide advice and assistance in protecting this information in accordance with our policies and procedures.

RELATIONSHIPS WITH SUPPLIERS AND VENDORS

You have an affirmative duty to conduct business fairly and lawfully within Wabtec and with our suppliers and vendors. You are required to give all suppliers and vendors fair and uniform consideration by making decisions based on objective criteria, such as competitive pricing, delivery, quality, reliability and service.

You may not accept gifts, loans, or any other favors from anyone who is, or wishes to conduct business with Wabtec. The only exceptions are inexpensive gifts having a nominal value of about $100 USD (see below in the Gifts and Hospitality Section). You may accept occasional business meals and entertainment, provided they are not lavish, excessive, or of a nature which might create the appearance of impropriety or influence the business decision of the recipient.

If you wish to conduct business on behalf of Wabtec with an immediate family member, another relative or with a business where you or a relative is an officer, director, or principal, you must first disclose the relationship and obtain prior written approval of the Ethics Compliance Officer.

ANTITRUST / COMPETITION LAWS

Wabtec is committed to fair and open competition in the markets it serves around the world and competes independently in the marketplace in compliance with the laws of the United States and other countries. You cannot engage in any understandings or agreements with competitors to restrain trade and must avoid the appearance of such conduct. Examples of antitrust violations are: (1) price fixing; (2) bid rigging; (3) collusion to allocate markets, customers or production; and (4) group boycotts. You must be particularly aware of these prohibitions and should exercise due care in situations where competitors may be present to avoid violating these laws.

SANCTIONS AND TRADE EMBARGOES

The United States government uses economic sanctions and trade embargoes to further foreign policy and national security objectives. You must abide by all sanctions and embargoes that may be in effect. Also, you cannot comply with a boycott imposed by a foreign country against a country friendly to the United States. Consult Wabtec's Legal Department if you have a question as to whether a particular transaction is subject to a sanction or embargo or if you are asked to comply with a foreign boycott.

IMPROPER PAYMENTS

You may not offer or accept anything of value to improperly influence any person in a business relationship with Wabtec. Such improper payments include, but are not limited to, bribes, kickbacks, or loans to or from any person with whom you conduct business on behalf of Wabtec. Likewise, neither you nor any immediate family member should offer, or accept cash, gifts, or favors from vendors, lessors, customers or competitors.

This prohibition on improper payments extends to government officials, commercial entities and, as such, it generally is expressly prohibited to give or offer to give, either directly or through an agent or intermediary, anything of value in order to obtain, retain, or maintain business. For further clarification on this prohibition the Company has enacted the Anti-Bribery / Anti-Corruption Policy.

GIFTS AND HOSPITALITY

This Policy allows for the provision of business-related meals and events, ordinary business courtesies, and nominal gifts when generally considered to be accepted industry practice. However, any gift or hospitality must: (1) be modest in value (with consideration of the nature, country, location of the gift and/or where it is given or received, and typically should not exceed $100 USD in value); (2) never be in cash or similar form; (3) be in good taste and appropriate for the occasion; (4) be promotional in nature and imprinted with a company logo (if applicable); (5) be given or accepted in good faith without improperly influencing (or appearing to influence) or rewarding the recipient; and (6) be allowable under local law.

There are additional rules pertaining to the giving/receiving of a gift or the offering/accepting of hospitality which are further explained in the Anti-Bribery / Anti-Corruption Policy.

POLITICAL AND CHARITABLE CONTRIBUTIONS

Wabtec supports your rights to participate in the political process. However, such activities must be carried out on your own time and at your own expense. The laws of the United States and other jurisdictions prohibit or restrict the ability of Wabtec to provide corporate funds in support of political campaigns. Therefore, corporate funds are not to be utilized to support political campaigns.

Likewise, Wabtec supports everyone's desire to contribute to charitable organizations utilizing their own time and resources. Wabtec resources may be contributed to a particular charitable organization with the prior written authorization of the Ethics Compliance Officer for any contribution exceeding $2000 USD. Charitable contributions of less than $2000 USD may be authorized at the local business unit level in conformance with Wabtec's Delegation of Authority.

There are additional rules pertaining to contributions to charitable organizations when government officials or commercial entities may be involved. These rules are further explained in the Anti-Bribery / Anti-Corruption Policy.

BOOKS AND RECORDS / INTERNAL CONTROLS / RECORD-KEEPING

All Wabtec books, records, accounts and financial statements must be maintained in reasonable detail to clearly and accurately represent the facts of the underlying matter in all material respects. Transactions must be recorded accurately and fairly to reflect the activities of Wabtec and comply with Wabtec's internal control procedures and applicable legal and accounting standards. Specifically, Wabtec records must properly account for all assets and liabilities, properly document all business expenditures including travel, and accurately reflect the business of Wabtec. You must not prepare, accept, approve or transmit records that intentionally or otherwise falsify or misrepresent the true nature of the transactions.

Wabtec has established accounting and other internal control standards and procedures to ensure that all Wabtec assets are protected and properly used and that financial records are accurate and reliable. Everyone shares the responsibility for maintaining and complying with required internal controls and ensuring that Wabtec assets are not misused.

Wabtec's record-retention policies are established in compliance with United States regulations and laws. Where local requirements and laws differ from those of the United States, records must be retained for the longer of Company policy or local requirements.

PROCEDURES FOR THE RECEIPT, RETENTION AND TREATMENT OF COMPLAINTS

The Audit Committee of Wabtec has established procedures for the receipt, retention and treatment of complaints received regarding improprieties relating to accounting, internal accounting controls or auditing matters and confidential, anonymous submission of complaints by employees of concerns regarding questionable accounting or auditing matters. Complaints regarding such matters should be sent to the **Ethics Compliance Officer** or by contacting Wabtec's **Ethics and Compliance Hotline** as described more fully below in the section entitled **"Reporting of a Violation of This Policy or a Violation of Any Law, Rule or Regulation".**

RESPONSIBILITIES

In addition to complying with this Policy, you should also familiarize yourself with Wabtec's Policy/Procedure Manual and report any suspected policy violations. There will be no retaliation for good-faith reports of suspected Policy violations and all reports will be addressed as confidentially as possible.

While this Policy applies to everyone, managerial and supervisory employees have a special duty to lead by example, to ensure that those whom they supervise are complying with the Policy and to respond promptly, appropriately and effectively to all alleged violations of the Policy.

WABTEC CODE OF BUSINESS CONDUCT and ETHICS

Westinghouse Air Brake Technologies Corporation ("Wabtec" or "Company") was originally formed as Westinghouse Air Brake in 1869 by George Westinghouse and over the years has grown through mergers and acquisitions to become an international corporation with operations, customers, and suppliers around the world. As a global provider of value-added, technology-based products and services for the rail industry we are proud of our commitment to ethical, respectful and lawful business and working relationships. To ensure we maintain the highest level of ethical and legal standards management has established this Code of Business Conduct and Ethics and other specific Company policies and internal controls to provide you with guidance regarding your job responsibilities. As an integral member of Wabtec, everyone is expected to observe the highest standards of professionalism and to adhere to Company policies / procedures, internal controls and applicable laws at all times.

APPLICABILITY

This Code of Business Conduct and Ethics Policy ("Policy") applies to all Wabtec directors, officers and employees, including individuals employed at domestic and foreign subsidiaries and joint ventures controlled by the Company; and where necessary and appropriate, to any outside party who acts on behalf of the Company.

As part of a global company, you must comply with all laws, regulations and Company policies that govern your work. Laws and regulations may differ, depending on the country or state in which Wabtec operates. Because Wabtec is a company based in the United States, some United States laws apply to subsidiaries and joint ventures located in foreign jurisdictions. However, Company policies and the standards of professionalism and ethics apply to everyone. No excuse or pressure justifies breaking the law or these standards. Do not use a consultant, representative or contractor to break the law or circumvent Company policies. In some countries, certain conduct is banned, but the ban is currently not enforced. This does not excuse any illegal or unethical action.

Wabtec has specific policies and procedures on a broad range of business issues, and, while this Policy may provide summary guidance for particular subjects, this does not alleviate your responsibility to review and adhere to other specific policies. This Policy is designed to assist you with making the best ethical decision regarding possible "gray areas" that may not be expressly addressed by a particular policy or procedure. This Policy is also designed to answer questions that you may have regarding interactions with each other, our customers, our suppliers and our communities. Abiding by this Policy and other Wabtec policies and avoiding even the appearance of impropriety is essential to Wabtec's mission of maintaining the highest standards of business ethics.

ETHICS COMPLIANCE OFFICER

The Company has appointed **Scott E. Wahlstrom** as the **Ethics Compliance Officer** to administer this Policy. The Company has developed a comprehensive program for implementing this Policy through appropriate guidance, training, certifications, oversight monitoring and investigations. The Ethics Compliance Officer is responsible for: (1) giving advice on the interpretation and application of this Policy; (2) supporting training and education; (3) monitoring compliance with the Policy; (4) responding to inquiries and investigating reported concerns; and (5) providing periodic reporting to the Company's Board of Directors.

Contact Information for the Ethics Compliance Officer
Scott E. Wahlstrom
(412) 825-1418 or swahlstrom@wabtec.com
Also see below the "Reporting of a Violation of this Policy or a Violation of any Law, Rule or Regulation" section of this Policy for procedures to immediately report a concern to Wabtec's Hotline

CONFLICTS OF INTEREST

A conflict of interest exists when your personal interests or activities, or those of a family member, influence or interfere with the obligation to perform your job in the best interest of Wabtec. If you or someone closely associated with you may gain personally from Wabtec activity, then you should consider whether there is a conflict. Therefore you should avoid situations that might interfere, or appear to interfere, with your obligations to Wabtec. It is impractical to describe all of these situations in which conflicts may arise, but examples include: business or investment interests, outside employment or gifts from customers, suppliers or vendors. It is your responsibility to promptly disclose any situation that may be, or even appear to be, a conflict of interest.

CORPORATE OPPORTUNITIES

You are prohibited from taking personal advantage of opportunities that arise from the use of corporate property, information or position or from using any of these for personal gain. You have a duty to advance the legitimate business interests of Wabtec whenever possible.

FINANCIAL INTEREST AND OUTSIDE ACTIVITIES

You may invest in publicly traded securities of firms with which Wabtec conducts business, so long as you have no material inside information and the investment is not large enough to affect any business activities or raise an appearance of impropriety. You or your family may not have a financial interest in a non-publicly traded corporation, partnership, or other firm with which Wabtec conducts or is likely to conduct business unless you have obtained the written approval of the Ethics Compliance Officer. Depending on the specific circumstances, it may be appropriate for you to sell or otherwise give up your interest. If you are unsure about the situation, contact the Ethics Compliance Officer.

You are prohibited from competing with Wabtec and may accept remuneration from others only if they are not an actual or potential competitor of Wabtec, do not have an actual or significant business relationship with Wabtec, and if your activities do not interfere with or adversely influence your performance at Wabtec. Similarly, you must end your activities if and when, in the future, these activities constitute competition to Wabtec or become related to the operations of Wabtec. Further, outside activities may not be conducted from Wabtec facilities or involve the use of Wabtec time, equipment, supplies or other resources.

There are additional rules pertaining to the giving/receiving of a gift or the offering/accepting of hospitality which are further explained in the Anti-Bribery / Anti-Corruption Policy.

POLITICAL AND CHARITABLE CONTRIBUTIONS

Wabtec supports your rights to participate in the political process. However, such activities must be carried out on your own time and at your own expense. The laws of the United States and other jurisdictions prohibit or restrict the ability of Wabtec to provide corporate funds in support of political campaigns. Therefore, corporate funds are not to be utilized to support political campaigns.

Likewise, Wabtec supports everyone's desire to contribute to charitable organizations utilizing their own time and resources. Wabtec resources may be contributed to a particular charitable organization with the prior written authorization of the Ethics Compliance Officer for any contribution exceeding $2000 USD. Charitable contributions of less than $2000 USD may be authorized at the local business unit level in conformance with Wabtec's Delegation of Authority.

There are additional rules pertaining to contributions to charitable organizations when government officials or commercial entities may be involved. These rules are further explained in the Anti-Bribery / Anti-Corruption Policy.

BOOKS AND RECORDS / INTERNAL CONTROLS / RECORD-KEEPING

All Wabtec books, records, accounts and financial statements must be maintained in reasonable detail to clearly and accurately represent the facts of the underlying matter in all material respects. Transactions must be recorded accurately and fairly to reflect the activities of Wabtec and comply with Wabtec's internal control procedures and applicable legal and accounting standards. Specifically, Wabtec records must properly account for all assets and liabilities, properly document all business expenditures including travel, and accurately reflect the business of Wabtec. You must not prepare, accept, approve or transmit records that intentionally or otherwise falsify or misrepresent the true nature of the transactions.

Wabtec has established accounting and other internal control standards and procedures to ensure that all Wabtec assets are protected and properly used and that financial records are accurate and reliable. Everyone shares the responsibility for maintaining and complying with required internal controls and ensuring that Wabtec assets are not misused.

Wabtec's record-retention policies are established in compliance with United States regulations and laws. Where local requirements and laws differ from those of the United States, records must be retained for the longer of Company policy or local requirements.

PROCEDURES FOR THE RECEIPT, RETENTION AND TREATMENT OF COMPLAINTS

The Audit Committee of Wabtec has established procedures for the receipt, retention and treatment of complaints received regarding improprieties relating to accounting, internal accounting controls or auditing matters and confidential, anonymous submission of complaints by employees of concerns regarding questionable accounting or auditing matters. Complaints regarding such matters should be sent to the **Ethics Compliance Officer** or by contacting Wabtec's **Ethics and Compliance Hotline** as described more fully below in the section entitled **"Reporting of a Violation of This Policy or a Violation of Any Law, Rule or Regulation".**

RESPONSIBILITIES

In addition to complying with this Policy, you should also familiarize yourself with Wabtec's Policy/Procedure Manual and report any suspected policy violations. There will be no retaliation for good-faith reports of suspected Policy violations and all reports will be addressed as confidentially as possible.

While this Policy applies to everyone, managerial and supervisory employees have a special duty to lead by example, to ensure that those whom they supervise are complying with the Policy and to respond promptly, appropriately and effectively to all alleged violations of the Policy.

CONSEQUENCES OF POLICY VIOLATIONS

Violations of this Policy, unethical conduct and illegal acts are all forbidden and may result in discipline, including termination of employment, or criminal and/or civil prosecution.

REPORTING OF A VIOLATION OF THIS POLICY OR A VIOLATION OF ANY LAW, RULE OR REGULATION
The Company has appointed the **Ethics Compliance Officer** to ensure compliance and investigate suspected Policy violations. Everyone is encouraged to raise questions or report any suspected violations without fear of retaliatory action. Each question or suspected violation will be treated with confidentiality and the highest degree of respect, and the individual may remain anonymous if they desire. If you have questions regarding this Policy or appropriate action in a particular circumstance, immediately contact the **Ethics Compliance Officer, Scott E. Wahlstrom at (412) 825-1418 or swahlstrom@wabtec.com** .

If you do not feel comfortable contacting management directly you may also raise concerns or report suspected Policy violations by contacting Wabtec's confidential **Ethics and Compliance Hotline** utilizing one of the following options:

- **Toll-Free Hotline (U.S. /Canada – English Speaking):** **877-860-1054**
- **Toll-Free Hotline (U.S. /Canada – Non English Speaking):** **888-273-6085**
- **Toll-Free Hotline (Outside the U.S. and Canada):** **See Attachment "A"**
- **Secure web reporting at:** **www.tnwinc.com/wabtec**
- **E-mail at:** **reportline@tnwinc.com**
- **Fax at:** **770-409-5008**
- **Postal Service:** **The Network**
  Attn: Wabtec
  333 Research Court
  Norcross, GA 30092

(Note: Wabtec's Hotline services are operated by an independent company called The Network. The Network offers multi-lingual services which are available 24 hours a day, 7 days a week).

All concerns will be relayed to Wabtec Corporation for review. Upon receiving a report of a concern or suspected Policy violation, the Ethics Compliance Officer will immediately document and investigate that report. If a violation is detected, the Company will take prompt measures to mitigate the violation, including disciplinary action as defined herein.

Remember:
When in doubt, ask before acting.

APPENDIX: A

Outside the U.S. and Canada Hotline Phone Numbers

Dialing Information and Instructions:

- Availability of calling options varies by country due to local restrictions. This may require using a different access code or type of phone. If phone service is not available then please contract Wabtec utilizing one of the other available reporting options.
- In countries where the Type of International Service is AT&T Direct, first dial the local Access Code then wait for a tone then dial the Toll-Free Number.

Country	Type of International Service	Access Code (For AT&T Direct Only)	Toll-Free Number
Brazil	AT&T Direct	**0-800-890-0288**	877-860-1054
Brazil	AT&T Direct	**0-800-888-8288**	877-860-1054
